

AMERICAN DAIRY SCIENCE ASSOCIATION
JOURNAL OF DAIRY SCIENCE
SPECIAL CENTENNIAL ISSUE
APRIL 2006

The April issue of the *Journal of Dairy Science* is a very special issue. Created in celebration of the 100th birthday of the American Dairy Science Association, the April JDS is an historical summary of ADSA history which focuses on the past 25 years of scientific advances within the dairy industry. This issue is unique not only as a reference document, but as a keepsake. This special issue would be useful to students as a survey of the subjects, and to persons with dairy foods or dairy production interests who want to review progress of the industry. Articles focus on dairy foods, nutrition, physiology, and genetics advances since 1981.

The Centennial issue is \$30. If you wish to order a paper copy of the Centennial issue of the *Journal of Dairy Science*, please complete this form and return it to ADSA by mail or fax.

Thank you for being part of the membership, and the future,
of the American Dairy Science Association.
