The Penn State Dairy Science Club has been an integral part of the education of thousands of Penn State students interested in the dairy industry. Since 1984, the Club has placed first twelve times, second nine times, and third once in the ADSA-SAD Outstanding Chapter competition.

This poster highlights several aspects of the Club's history. The top and bottom borders illustrate the evolution of the *Dairyman* yearbook through each decade. The left side outlines the Club's achievements in the ADSA-SAD. The map on the right side indicates the 38 states and three countries visited since 1979 (the first year of spring break trips).
