Stephen LeBlanc Receives Zoetis Physiology Award

Champaign, IL—The American Dairy Science Association® (ADSA®) is pleased to announce Stephen LeBlanc as the 2019 recipient of the Zoetis Physiology Award. The award will be presented on Monday, June 24, 2019, during the awards ceremony at the ADSA Annual Meeting in Cincinnati, Ohio.

The Zoetis Physiology Award was created to recognize outstanding research in dairy cattle physiology. The winner must have research work in any area of animal physiology relating to the dairy animal published in refereed journals in the five years immediately preceding the year of recognition and have been a member of ADSA for at least the last five successive years.

Stephen LeBlanc is a professor in population medicine at the Ontario Veterinary College and research program director–animal production systems at the University of Guelph. He is past president of the Dairy Cattle Reproduction Council and serves as a section editor for the Journal of Dairy Science®. His research focuses on transition dairy cow metabolic and reproductive health and management, spanning large-scale field trials to more intensive experiments. With graduate students and collaborators, this work has resulted in more than 140 peer-reviewed papers. He has given invited talks in 20 countries.

It is with great pleasure that ADSA and Zoetis present Stephen LeBlanc with the 2019 Zoetis Physiology Award.
