Improving Health through Dairy Foods

- New Technologies
- New Research
- New Directions

April 10-13, 2005 Stone Mountain Inn
Stone Mountain, Georgia
Sponsored by American Dairy Science Association

Improving Health through Dairy Foods: New Technologies, New Research, New Directions will present the latest research on the healthy properties of milk and dairy products. Milk has long been praised as the perfect food for newborns and young mammals, and current knowledge indicates milk should be consumed daily well into later years. The vision for this DISCOVER Conference will be to educate targeted audiences to clinically proven benefits derived from dairy foods. Forefront researchers will present the latest findings on the dynamic role of dairy products in contemporary nutritional issues such as obesity, lactose intolerance, Vitamin D deficiency, and osteoporosis.

Program Committee
Bill Aimutis, Chair, Cargill, Inc.
Kirby Hayes, Purdue University
Lori Hoolihan, Dairy Council of California
Jill Nicholls, National Dairy Council

Email: adsa@assocq.org

Who Should Attend?
Members of the research community, human nutritionists, health care professionals, food scientists and formulators; and governmental and regulatory agencies should be a part of this interactive program. Additionally, consultants, advisors and others with the interest and foresight to promote healthy human nutrition should register.

All registrants are encouraged to participate in the discussion of the key topics and to share some of their contemporary findings that are relevant to those topics. Participants are invited to offer observations during the General Discussion Periods.

Conference Format
The American Dairy Science Association launched the ADSA DISCOVER Conference Series in June 1997. Designed to provide a format and venue that encourages in-depth discussion of cutting-edge science, these conferences do not publish proceedings, nor do they allow citations from the conference.

Programs focus on topics of importance to the science of food animal agriculture and are held in a relaxed, informal setting. Sessions for this conference will be primarily in the mornings and evenings, with afternoons free for recreation and further discussion.

Registration Fee
Registration postmarked by March 10, 2005 is $395.00, which includes sessions and most meals. After March 10, the registration fee will be $495.00 and will be accepted on an availability basis. To optimize interaction among participants, registration will be limited to the first 120 applications received.

Accommodations
The conference will be held at Stone Mountain Inn in Stone Mountain, Georgia. All participants are responsible for making their own lodging reservations. You will receive a housing form with your conference registration confirmation, by request, or by visiting the DISCOVER Conferences Web site.

Travel
Stone Mountain is 30 minutes northeast of Atlanta airport; the Stone Mountain Inn is located in the Stone Mountain Memorial Park. Rental cars are available at the Atlanta airport. Advance reservations are necessary for shuttle service. See the web site for the latest travel information.
