Welcome to the 2016 Joint Annual Meeting!

The American Society of Animal Science is excited to be meeting jointly with the American Dairy Science Association, the Canadian Society of Animal Science and the Western Section of the American Society of Animal Science.

Around 2,000 abstracts were submitted, and approximately 1,800 will be presented. Prior to the start of the JAM, the 5th Grazing Livestock Nutrition Conference will take place at the Canyons Resort in Park City with a scientific program containing over 40 abstract presentations. At the conclusion of JAM, the 35th International Society for Animal Genetics Conference will commence at the Hilton Salt Lake City Center. Around 400 abstracts were submitted to this meeting and over 360 abstracts will be presented.

JAM, combined with these two conferences, will create the most comprehensive two weeks in animal science meeting history.

Graduate student oral and poster competitions, as well as Student Affiliate Division competitions and activities are featured throughout the program. These activities provide an excellent way for students to highlight their scientific achievements and to network with other students and professionals. I encourage you to sit in on these competitions. You will be impressed by the quality of papers and the information presented by our students.

It has been an honor to serve as the JAM Program Chair for 2016; however, our program committees do the real work of organizing the meeting. These committees develop the ideas for the symposia, review the abstracts, and construct the oral and poster sessions.

The ASAS and ADSA staff do a fantastic job with the logistics of the meeting and making everything run smoothly. If it was not for their hard work and dedication, none of this meeting would be possible. Please spare a moment to let the staff know what you think of the meeting.

JAM 2016 promises to be a meeting with a great scientific program and plenty of time for networking.

I look forward to seeing you in Salt Lake City!

Dr. Shawn Archibeque, JAM Program Chair
On behalf of the American Society of Animal Science and the American Dairy Science Association, we welcome you to Salt Lake City and JAM 2016.

This year’s meeting begins on Tuesday, July 19, and runs through Saturday, July 23. Many opportunities exist for interacting among society members, starting with the Opening Session on Tuesday, July 19, when five member nominated speakers will share their stories and passion for animal science in a new series called AnimalX. Stylized after the well-known Ted-Talks, each AnimalX presentation offers a unique perspective on animal agriculture. AnimalX spotlights can be found scattered throughout the program.

The Opening Session will be followed by a BBQ (page 10) for all attendees. Other special pre-meeting events include the ASN-ASAS Preconference: Gut Microbiota, Diet and Health and the ASN Poster Competition.

Over 50 symposia are scheduled that cross many species, disciplines and societal topics of importance to food and companion animal production.

Attendees are encouraged to take full advantage of this great opportunity to share ideas across species and societies, visit with each other in person, and make new acquaintances.

We are grateful to the many people involved in making this meeting a success, starting with our sponsors. Their support is essential to the quality program that makes JAM unlike any other meeting. A list of sponsors of this year’s meeting is available in this program book. Please take time to thank them during the meeting. The program committee has worked long and hard to organize an excellent program. Our thanks to the Overall Program Committee of Shawn Archibeque (chair), Barry Bradford, Connie Larson, Ignacio Ipharraguerre, Cathleen Williams, Filippo Miglior, Jack Whittier and Clare Gill for their efforts in bringing forth this outstanding scientific program. We also thank the many others who contributed to this huge undertaking, including the staffs of ASAS and ADSA.

Finally, thank you, the attendees, for participating in JAM 2016 and making it a grand success!

Dr. Michael Looper, ASAS President

Dr. Susan Duncan, ADSA President
Dear CSAS Members and Participants,

The Canadian Society of Animal Science is excited to be meeting jointly with the American Society of Animal Science, the American Dairy Science Association, and the Western Section of the American Society of Animal Science.

It gives me great pleasure to welcome you to the Joint Annual Meeting in Salt Lake City. With over 3,250 participants from over 35 countries, this truly embodies an unparalleled global event of the brightest minds in animal science and agriculture.

This meeting provides an unequalled opportunity to see old friends, meet new ones, learn about CSAS's recent activities and advances in the animal science industry, and participate in discussions with experts from around the globe about some of the most important issues related to animal science. We are honoured to count you among the conference participants.

Another year has passed by with lightning speed; however, I invite all CSAS members to our 2016 Annual General Meeting and Lunch, July 21 from 12:30-14:00 at the Salt Palace Convention Center in Salt Lake City. During our AGM, I will present to you the most recent updates related to the work of your executive team, inform you of a number of achievements, as well as host a discussion on challenges confronting our society.

I look forward to joining you in attending many exciting presentations including the student competitions, scientific discussions, CSAS symposium, and our CSAS awards night where we recognize and celebrate outstanding members of our society.

Please enjoy the conference and take advantage of the many opportunities to learn, share, and network in Salt Lake City.

Respectfully yours,

Dr. Tim Reuter
CSAS President
The Western Section of the American Society of Animal Science (WSASAS) is excited to be part of JAM, and meeting jointly with the American Society of Animal Science (ASAS), American Society of Dairy Science (ADSA) and the Canadian Society of Animal Science (CSAS). We would like to welcome everyone to Salt Lake City, UT and hope that you enjoy the joint programming this year.

It is always exciting to join our programming with the national programming; thus, I would encourage everyone to take full advantage of the WSASAS activities. However, there will be some programs that are exclusive to WSASAS. One of the strengths of WSASAS is our student members and they will be highlighted in three events. First, 19 graduate students will compete in our graduate student paper competition representing nine different institutions on Wednesday. Second, make plans to attend the undergraduate poster competition on Thursday morning. Third, the Young Scholar Recognition program will highlight the accomplishments of two M.S. and two Ph.D. students.

Although the WSASAS sponsored ruminant nutrition symposium will be a part of the Grazing Livestock Nutrition Conference that will precede JAM, there are other symposia to participate in covering broad areas by species, discipline and societies. We encourage everyone to take advantage of this opportunity to learn about cutting edge research, emerging technologies, and hot topics in animal science.

We are grateful to all those involved in organizing this tremendous event and making JAM the outstanding conference it has grown to be. We encourage everyone to look at the list of sponsors in the program and thank them when you see representative(s) throughout the meeting.

The WSASAS would like to encourage everyone to make the most of this opportunity to network, make new friends, and visit with old friends. Events, such as this, are what allow us to learn from each other and find solutions to help solve those issues facing animal agriculture. Welcome to Salt Lake City and enjoy the conference.

Dr. Micheal Salisbury
WSASAS President

**Important Message**

In the event that protestors interrupt the meeting, please ignore them. Their goal is to attract attention, any attention you give them will only help their cause. Convention staff have a plan to handle these situations, and they depend on attendee cooperation. If members of the media approach you for an interview, please politely decline and direct them to the convention’s media room, where spokespersons will be available.

Thank you for your cooperation.
Visit the newly renovated
ASAS Animal Science Image Gallery
animalimagegallery.org

This site is designed to provide images, animations, and short video for classroom and outreach learning. To supplement the visual information, each file has a description and metadata including the origins and ownership for the image. Downloading any image within the gallery is free for ASAS members and only $5 per image for non-members.

Each file in the Gallery has had at least two peer reviews to optimize the image and its metadata, and to ensure that the information is sufficient and accurate.

Submitting an image to the gallery is easy. There is no submission fee for ASAS members and only a $25 fee (per image) for non-members.
Schedule of Events
The 2016 ASAS-ADSA-CSAS-WSASAS JAM will be held July 19 – 24 (Tuesday through Sunday). The Opening Session will be Tuesday evening, July 19; scientific sessions will begin Wednesday morning, July 20, and run through noon on Saturday, July 23.

Location
The meeting will be held at the Salt Palace Convention Center and area hotels. The convention center is ideally located within walking distance of hotels, shopping and dining.

Opening Night Activities
We will kick everything off with a “Meet and Greet” at 4:30 pm in the South Foyer of the convention center. Join us for drinks (cash bar) and light snacks. The “Meet and Greet” will be followed by the Opening Session (5:30 pm in Grand Ballroom E-J). The 2016 opening session will feature a series of TED-Style Talks. Immediately following the Opening Session, we invite everyone to join us at This is the Place Heritage Park for the JAM Opening BBQ. We will have games for the kids, great food, as well as the Big Scoop and the Battle of the Brats competitions.

Program Format for 2016
Poster sessions (Wednesday – Friday) ...............7:15 am – 8:15 am, 8:15 am – 9:15 am, 1:00 pm – 2:00 pm, 5:00 pm – 6:00 pm
Scientific sessions .............................................. 9:30 am – 12:30 pm
Lunch breaks ......................................................12:30 pm – 2:00 pm
Scientific sessions .............................................. 2:00 pm – 5:00 pm
Poster sessions (Saturday) ......7:15 am – 8:15 am, 8:15 am – 9:15 am

Registration Hours
Registration is located in the Exhibit Hall A/B area on Level 2 in the lower level of Salt Palace Convention Center. Registration hours for the 2016 JAM, including special symposia and other events, are as follows:
Monday, July 18 ........... (pre-registered only), 1:00 pm – 5:00 pm
Tuesday, July 19................................. 7:00 am – 6:00 pm
Wednesday, July 20.......................... 6:30 am – 5:15 pm
Thursday, July 21............................. 6:30 am – 5:15 pm
Friday, July 22................................. 6:30 am – 5:15 pm
Saturday, July 23............................. 7:15 am – 12:00 pm

Media Check-In & Media Room
A media room will be available in room 150 D of the convention center throughout the meeting to provide a space for media representatives to work. Meeting press releases will be available there. Complimentary registration is available for members of the media. For more information, please contact: asas@asas.org.

Speaker Ready Room
The Speaker Ready Room is located in 250 D of the convention center. This room will be available for speakers from 7:00 am to 5:00 pm on each day of the meeting.

Hospitality Lounge
A hospitality lounge will be located in the Exhibit Hall. This lounge will offer attendees an area to relax and network. It also serves as a great meeting location when departing the convention center as a group.

Business Center
The Business Center is your office away from the office! They are an on-site, full service print, copy and shipping center located inside the convention center on the north end of the upper concourse. For more information, contact the Business Center at (385) 468-2228 or businesscenter@saltpalace.com.

Presentation Information
Oral and Invited Speakers
Oral sessions will begin at 9:30 am on Wednesday and Thursday, 10:30 am on Friday, and 8:30 am on Saturday. Meeting rooms will be equipped for electronic presentations and pre-loaded sessions.

Onsite Upload Information
Onsite presentation upload will be available. Files can be delivered to the Pre-Load Room (251A) at the convention center. Presentations must be uploaded by 5:00 pm on the day before your scheduled presentation. Files will not be accepted via e-mail. No presentations will be loaded while the session is in progress or between presentations.
Poster Presentations
We have dedicated 4, one-hour blocks each day on Wednesday – Friday and 2 one-hour blocks on Saturday for poster presentations. The "open poster" sessions will be from 7:15 to 8:15 am Wednesday, Thursday, and Friday. Each poster presentation will be available for public viewing for the entire day, with the presenting authors present during the open posters time (7:15 – 8:15 am). The poster presentations space will be located in the Exhibit Hall. We are bringing ePosters to JAM in 2016. All posters will be presented as ePosters. This new format offers some new and exciting options for poster presenters and attendees. Most notably, all posters will be on display for the duration of the meeting and available to all attendees to view at their leisure. This new technology is less expensive for presenters than printed posters and is easily transportable.

Some features of the ePosters include:
• ePosters offer the option to have multiple pages per poster.
• Videos, animations, graphs and images can be embedded into the poster.
• Graphs and images can be expanded to full screen view with a single click.

The Exhibit Hall will open at 6:30 am, Wednesday through Friday.

Locating the Correct Poster Board
Find the posters you want to view in the back of the program and identify the screen number (second number to the left of the abstract title). Then locate the corresponding screen in the back of the Exhibit Hall. During Poster Sessions only the poster scheduled for presentation will be available for viewing. At all other times, all posters presented throughout the week will be available for viewing on their assigned screens. E-poster technicians are available on-site if you need help finding a poster.

ARPAS Continuing Education Units
The 2016 Joint Annual Meeting has been approved for up to 21 continuing education units (CEU) for the American Registry of Professional Animal Scientists (ARPAS) certification requirements. Check the schedule of events for times and location of the ARPAS exams.

Job Resource Center
The ASAS-ADSA-CSAS-WSASAS Job Resource Center is located in the exhibit hall. Job announcements and CVs will be organized into the following categories for posting: Animal Behavior and Well-Being; Animal Health; Animal Breeding; Companion Animals; Extension; Food Safety; Food Science; Forages and Pastures; Genetics; Growth and Development; International Animal Agriculture; Lactation; Meat Science and Muscle Biology; Nonruminant Nutrition; Pharmacology and Toxicology; Physiology and Endocrinology; Production and Management; Ruminant Nutrition; and Teaching.

Cyber Café
Keep in touch with work, family and friends at the cyber café. Located in the Exhibit Hall, the cyber café is available to all meeting attendees. The cyber café will also have a computer with a printer for limited printing during the meeting.

JAM 2016 App and Personal Scheduler
There are two ways to keep informed and organized at JAM 2016. First, if you have not already downloaded the JAM App, please look for signage at the meeting to show you how to download. If allowed, the App will push all scheduling updates directly to your mobile devices. In addition to the JAM 2016 App is the Personal Scheduler. Find the Personal Scheduler at https://event.crowdcompass.com/2016jam.

Notice to Attendees
Use of cameras, video cameras, and cell phones (for calls or as cameras) is prohibited during oral and poster presentations to minimize disruption and unauthorized dissemination of data. Anyone found in violation of this policy will be asked to leave the session.

Transportation in Salt Lake City
Public transportation to and from the Salt Lake City International Airport is provided by the Utah Transit Authority (UTA). The TRAX/light rail Green Line leaves the airport every 15 minutes on weekdays and every 20 minutes on weekends. The TRAX stop is located at the south end of Terminal One. To locate the TRAX stop, visit our Airport Terminal Map. One-way fare for the bus and train is $2.50.

Salt Lake City Sightseeing Options
From the Salt Lake City Convention and Visitors Bureau:
It is not just hotels that are within easy distance of the convention center. The downtown convention district abounds with restaurants, nightlife, and shopping. The convention center is next door to the City Creek Center, Salt Lake's newest shopping destination, and a short walk from the Gateway. If you prefer not to walk, six Trax stops (all within the “free fare zone”) provide quick transportation to destinations within the downtown area, or as far away as the University of Utah, South Valley, West Valley, or the Airport.

How much have you learned in your undergraduate program?

How does your knowledge compare to other students at your school?

How does it compare with students regionally?

How does it compare nationally?

Participate in the Animal Science Academic Quadrathlon and find out!!
**NEW IN 2016**

**New**
- ePosterboards for all Poster Presentations
- TED-Style Talks during the Opening Session

**Returning**
- A meeting theme: “Animals and Science: Big Solutions for Grand Challenges”
- Enhanced industry involvement in sessions
- Reception before the Opening Session
- Panel discussions during lunch
- Opening BBQ
- Family Fun Day

**Returning to our Roots:**
We are excited to change the format of our opening night. Following a reception and a brief opening session, we will bus participants to an off-site BBQ. Years ago, the BBQ was a standing event at ASAS meetings and was met with unmitigated success and record attendance in 2014. Therefore, we are excited to bring the BBQ back again in 2016. The BBQ will also include our other popular events, the Big Scoop and Battle of the Brats Competitions. Additionally, we are adding back snacks throughout the day.

---

**JAM EVENTS**

**Opening Night Activities**
Tuesday, July 19 • 4:30 – 9:30 pm

**Meet & Greet**
4:30 – 5:30 pm
Salt Palace Convention Center, South Foyer
Before the opening session, come catch up with old friends and make new ones! Light snacks and a cash bar will be available. Pre-registered attendees may pick up their packets outside of the ballroom during this time.

**Opening Session**
5:30 – 6:15 pm
Salt Palace Convention Center, Grand Ballroom E-J
Join us as we kick off the 2016 JAM at the opening session with a series of TED-Style Talks about animal science and animal agriculture.

**Opening BBQ, Big Scoop Competition, and Battle of the Brats**
6:45 – 9:30 pm
This is the Place Heritage Park
Returning this year, we will have a BBQ! After the opening session, head over to the This is the Place historic village. This is the Place Heritage Park is the place for summer fun! And you don't have to like history to love the Park! There is something for every age to do. Step back in time and see the West as it was in the early settlement of Utah. Take a train tour of the village. “Set sail” on the Ship Brooklyn, a one-sixth replica of the original that tells the story of the expedition of pioneers who sailed from New York Harbor over 24,000 miles in search of a new home in the West.

In addition to the great food and fun for all ages, join us for the Big Scoop and Battle of the Brats Competitions! Buses from the Convention Center to the BBQ will be available from 6:30 to 6:45 pm. Buses will stage at 6:15 pm at the South Plaza Shuttle Entrance Bus Loading Area on 200 South Street, for departure 6:30 to 6:45 pm.

**Spouse Event 1: Olympic Park tour and afternoon exploring downtown Park City**
Wednesday, July 20 • 9:30 am – 4:00 pm
We will start the morning off with a guided bus tour of the Olympic Park followed by exploring, shopping and museum visits in historic downtown Park City.

**Family Fun Day: Hogle Zoo**
Thursday, July 21 • 9:30 am – 4:00 pm
We will depart by bus for the zoo. The Hogle Zoo has something for everyone! With hundreds of animals from hundreds of species to visit, the splendor of the animal kingdom is yours to behold.

**JAM Ice Cream Social and Celebration of Dairy Award Winners, sponsored by Utah State University and Dairy Science Departments.**
Thursday, July 21 • 8:15 – 9:30 pm
Salt Palace Convention Center, North Foyer
All meeting participants, families, friends, and award donors are invited to join us for the always-popular ice cream social. For the first time this year, the Ice Cream Social is being held specifically to recognize all of the dairy science award winners. Please join our award winners to celebrate!
DR. SHAWN ARCHIBEQUE
Animal Science Comes From Many Roots—We Must Care for All of Them

Many individuals involved in agriculture do not fit the historical demographic of animal sciences. Dr. Archibeque will discuss his own family’s connection to agriculture, and how, within a span of three generations, a family of Latino field workers went from only finishing the second grade to discussing the need to embrace diversity and inclusion in the animal sciences.

Dr. Archibeque is Associate Professor of Animal Sciences at Colorado State University.

**ASAS EVENTS**

**ASAS Undergraduate AQ**
*Monday, July 18 • All Day*
*Tuesday, July 19 • All Day*
*Utah State University, Logan, Utah*

ASAS is excited to offer our four regional championship team undergraduates the chance to compete for the National Academic Quadrathlon (AQ) title. The AQ has been an integral part of ASAS history, and we are excited to use it as a platform to integrate more undergraduate involvement at our meetings. The lab practicum, written exam, quiz bowl and oral presentations will be held early in the week. A special presentation will take place immediately before the ASAS awards on Wednesday night. Please come out and support our undergraduates.

**ASAS Undergraduate Lunch and Learn**
*Wednesday, July 20 • 12:30 – 2:00 pm*
*Hilton Salt Lake City Center, Alpine Ballroom*

The ASAS Undergraduate Student Lunch and Learn is an annual event for all undergraduate attendees. The Lunch and Learn is following a common theme for not only JAM but also all student educational events from the meeting this past year, “Branding Yourself.” The lunch and learn will consist of a presentation from Dr. Todd Armstrong. The overarching topic for the lunch and learn will be on “elevator speeches” and on how to separate yourself from the group all while enjoying a great lunch and meeting fellow students from all over the country and the world.

**ASAS President’s Picks Posters**
*Salt Palace Convention Center, Exhibit Hall*

New to JAM 2016: ASAS President’s Picks Posters will be available for viewing all week. Any ePoster Dr. Looper thinks is new and exciting will have a little blue ribbon icon next to its title on the ePoster monitor home screens.

**ASAS Awards Ceremony**
*Wednesday, July 20 • 7:15 – 8:45 pm*
*Hilton Salt Lake City Center, Grand Ballroom*

All meeting participants, families and friends are welcome to attend the ASAS Awards Ceremony. Please join us at this special event to recognize and congratulate the 2016 ASAS award winners. The 2016 Awards Celebration follows immediately after the awards ceremony.

**ASAS Awards Celebration**
*Wednesday, July 20 • 8:45 pm – 12:00 am*
*Hilton Salt Lake City Center, Grand Ballroom Foyer*

Come and join ASAS after our awards ceremony to celebrate and congratulate all of the 2016 ASAS award winners. ASAS and sponsors welcome you to this exciting reception. We will have food and a cash bar while you interact with award winners and colleagues.

**ASAS/WSASAS Graduate Student Mixer**
*Wednesday, July 20 • 9:00 pm*
*The Twist*

The ASAS graduate student mixer will be held at the Twist located just 4 blocks from the convention center. One unique feature to this year’s mixer is that the Western Section mixer will be held at the same location as the National mixer. Western Section Graduates will meet at 8:00 pm for WSASAS Social Hour. The combined mixer starts at 9:00 pm. This location will be a lot of fun with good food and drink and a great place to catch up with old friends and make new ones.

**Spouse Event 2: Thanksgiving Point Gardens**
*Friday, July 22 • 9:30 am – 4:30 pm*

We will start the day departing for the gardens by bus. The gardens are an oasis in the desert, featuring 55-acres of stately gardens, grand lawns, as well as the largest manmade waterfall in the Western Hemisphere.

**ASAS EVENTS**

**ASAS Undergraduate AQ**
*Monday, July 18 • All Day*
*Tuesday, July 19 • All Day*
*Utah State University, Logan, Utah*

ASAS is excited to offer our four regional championship team undergraduates the chance to compete for the National Academic Quadrathlon (AQ) title. The AQ has been an integral part of ASAS history, and we are excited to use it as a platform to integrate more undergraduate involvement at our meetings. The lab practicum, written exam, quiz bowl and oral presentations will be held early in the week. A special presentation will take place immediately before the ASAS awards on Wednesday night. Western Section Graduates will meet at 8:00 pm for WSASAS Social Hour. The combined mixer starts at 9:00 pm. This location will be a lot of fun with good food and drink and a great place to catch up with old friends and make new ones.
**OneHealth: The Need for Alternatives to Protect the Health of Animals, and Ultimately People, Has Never Been Greater**

Today, approximately 20 percent of livestock around the world are lost to disease, a significant source of food and resource waste. We must approach this challenge using science-based actions, decisions, practices and technologies to continue gains in efficiency and productivity, cut food loss and waste, and minimize environmental and resource impacts.

Dr. Armstrong is Senior Director, Global Market Access for Elanco Animal Health.
Animal Science Image Gallery Launch Party
Thursday, July 21 • 5:15 – 6:15 pm
Salt Palace Convention Center 251 D
Come join ASAS for the launch of the new and vastly improved Animal Science Image Gallery! This new site is designed to provide images and video for classroom and outreach learning while offering a friendly browsing experience utilizing the latest web design trends. The Polaroid gallery is a fun and creative way to show images. Images can be viewed full-size with a click. To supplement the visual information, each file has a description and metadata including the origins and ownership for the image. The site is searchable via keywords, or you may browse by subject. Come see how you can submit your images for publication in the Gallery!

ADSA EVENTS

ADSA Student Educational Tour
Monday, July 18 • 11:45 am – 6:00 pm
Salt Lake Plaza Hotel Lobby
Departing from the lobby of the student hotel, the Salt Lake Plaza, we will travel via motor coach to Bateman’s Mosida Farms in Elberta. Owned and operated by the Bateman family, it is one of Utah’s largest farms and has been touted as a model of efficiency, animal care and high quality milk. Next, we will depart for Utah Olympic Park, one of the venues for the 2002 XIX Olympic Winter Games. Today it is an active Olympic training site, home to six Nordic Ski Jumps, 1,335-meter sliding track with five start areas, freestyle aerals winter training and competition hill, a 750,000-gallon training pool, and a Winter Sports Center with a Ski Museum and 2002 Olympic Winter Games Museum. Ticket price includes transportation and refreshments.

ADSA Graduate Student Division Workshop: Applying for Jobs
Tuesday, July 19 • 1:00 – 3:00 pm
Salt Palace Convention Center, 151 B/C
Join other dairy science graduate students as Dr. Leon Spicer and Dr. Al Kertz provide practical insight on separating yourself from the rest when it comes time to apply for jobs. Drs. Spicer and Kertz will cover topics from interview do’s and don’ts to the differences between CV and resume writing and much more. There will also be ample time for professional and social networking throughout the workshop. A $5 registration is required.

ADSA Graduate Student Division Business Meeting and Open Forum
Tuesday, July 19 • 3:15 – 4:00 pm
Salt Palace Convention Center, 151 B/C
In addition to greeting the incoming GSD officer team, attend this meeting to voice your ideas and opinions about ADSA graduate student activities. Learn about our upcoming events and enjoy conversations with your fellow dairy science graduate students.

ADSA Undergraduate Student Midday Mixer
Tuesday, July 19 • 11:00 am – 12:00 pm
Salt Palace Convention Center, 254 B
Join your fellow dairy clubs and get to know your 2016-2017 Student Affiliate Division (SAD) Officer candidates. Ticket price includes lunch. Note: Registration is limited to ADSA undergraduate student members and advisors.

MS. MELISSA BREWER
Communicating Science in a Sound Bite Society
In her communications role with the Certified Angus Beef® brand, Melissa brings the science of animal agriculture to consumers, transforming science facts into messages that resonate with consumers. Melissa will equip you with strategies for sharing challenging concepts in consumer-friendly sound bites, posts and Tweets.

Ms. Brewer is Director of Communications for the Certified Angus Beef® brand.
Large Dairy Herd Management (LDHM) e-Book and Conference Update
Tuesday, July 19 • 4:00 – 5:00 pm
Salt Palace Convention Center, 150 B/C
The ADSA® Foundation is in the midst of developing and publishing the Third Edition of Large Dairy Herd Management as an e-Book. The new comprehensive international reference is targeted for practicing dairy management professionals, progressive farmers, and upper division university students studying dairy science and management. It is written in a practical application style, yet reflects the scientific rigor of the Journal of Dairy Science. The LDHM Conference was held last May.

This session is follow-up to that conference to provide an update about the e-Book content and progress towards publication. The completely new content, designed to allow for convenient updating, will be sold at ADSA member, non-member, and student rates. Release is anticipated in Spring 2017.

You can partner with the ADSA Foundation. Nonprofit organizations, companies, and individuals are invited to join as co-sponsors of the e-Book at any time. For information about sponsorship and the long-lasting worldwide recognition, please contact the ADSA Foundation at LargeDairyHerdManagement@adsa.org.

Dairy Quiz Bowl Final Round
Tuesday, July 19 • 4:30 – 5:00 pm
Salt Palace Convention Center, 251 D
University teams from across North America will compete in the ADSA-SAD Dairy Quiz Bowl. The event gives schools an opportunity to demonstrate their knowledge about dairy production, processing, and ADSA history. The Student Affiliate Division (SAD) invites you to join them for the excitement of the final round of competition as the top two schools go head to head for the title of 2016 Dairy Quiz Bowl Champion.

ADSA Undergraduate Student Poster and Paper Competitions
Wednesday, July 20 • 3:15 – 4:00 pm
Salt Palace Convention Center, Exhibit Hall
Support the future of ADSA - plan time in your schedule to visit the undergraduate posters on Wednesday morning or the oral presentations on Wednesday afternoon. See the Scientific Program for complete details.

ADSA Graduate Student Division Career Insights Luncheon
Wednesday, July 20 • 12:30 – 2:00 pm
Salt Palace Convention Center, Grand Ballroom E
This roundtable career development event will provide dairy science graduate students the opportunity to interact with career professionals from industry, academia, and government agencies. This event is intended to give attendees an informal environment in which to inquire about each professional’s personal journey and the challenges they encountered along the way. This is also an excellent context network with likeminded professionals and graduate students. A $10 registration fee is required and a boxed lunch will be provided.

ADSA Undergraduate Student Mixer
Wednesday, July 20 • 6:00 pm
Salt Lake Plaza Hotel Poolside
With the hard work behind you, tonight is the night for fun. Celebrate the week with your fellow undergraduates. Ticket price includes pizza and sodas.

DR. LARRY REYNOLDS
Importance of Animals in Agricultural Sustainability and Food Security
Dr. Reynolds is passionate about sharing the role of food-producing animals in food security and the scientific, socioeconomic, and health implications for humans. He is deeply involved in national and international efforts to highlight the importance of funding for livestock research and its critical role in food security and agricultural sustainability.

Dr. Reynolds is University Distinguished Professor of Animal Sciences and Director of the Center for Nutrition and Pregnancy at North Dakota State University.
**ADSA Undergraduate Student Symposium - Telling Our Dairy Story**  
**Thursday, July 21 • 9:30 – 11:00 am**  
Salt Palace Convention Center, Grand Ballroom E  
Presented by Dairy Management, Inc., this session will look at how social media can be used to help tell dairy’s story to the public. What is being done now? What tools and tips might they use? How can the students contribute and use their knowledge and experience to communicate through social media? Students will be involved and challenged.

**ADSA Undergraduate Student Awards Luncheon**  
**Thursday, July 21 • 11:45 am – 2:00 pm**  
Salt Palace Convention Center, Grand Ballroom G  
Plan to attend this year’s Student Affiliate Division (SAD) Awards Luncheon. The afternoon will be capped with the presentation of student awards and announcement of new SAD officers. Both students and professionals are encouraged to attend. This is a wonderful chance to get to know the next generation of the dairy industry.

**ADSA Student Three-Minute Thesis Challenge**  
**Thursday, July 21 • 3:00 – 4:30 pm**  
Salt Palace Convention Center, 250 F  
ADSA Graduate Student and Student Affiliate Division members are encouraged to take part in the return of the Three-Minute Thesis Challenge. This event will test the competitor’s ability to quickly and concisely convey their research in a way that is understandable to all. Competition will be limited to five graduate and five undergraduate students selected by a panel of judges based upon strength of CV and a 100 word abstract describing the presentation. Everyone is invited to attend the Challenge to watch these students compete for cash prizes and present their research in a fun and exciting way!

**DR. GARTH SASSER**

**From Molecule to Meadow**  
Dr. Sasser’s extensive research in the field of bovine reproductive physiology led to the discovery of pregnancy specific protein B’s, which are aspartic acid proteases, and the development of the BioPRYN cattle pregnancy tests sold globally. He will share the story of the quest to better understand the physiological signals of the pregnant cow and the milestones that led to the development and worldwide use of assays for pregnancy-specific proteins in cattle, sheep, goats, and wildlife.

Dr. Sasser is Professor Emeritus at the University of Idaho and Founder of BioTracking Inc.
**CSAS EVENTS**

**CSAS Executive Committee Meeting**  
Tuesday, July 19 • 8:00 am - 12:00 pm  
Salt Palace Convention Center, 151 D

**CSAS Annual General Meeting and Lunch**  
Thursday, July 21 • 12:30 – 2:00 pm  
Salt Palace Convention Center, 251 E/F  
Discussions will include the most recent updates related to the work of your executive team, achievements of the year, and challenges confronting our society. All CSAS members are invited to attend and share their views.

**CSAS Awards Banquet**  
Friday, July 22 • 6:00 – 10:00 pm  
Hotel Monaco, Paris Ballroom  
During the banquet we will recognize and celebrate outstanding professional and student members of our society. You are all invited to join in the celebration of great achievements. Come and cheer your colleagues on! Student dinners at this event are partly sponsored by the Canadian Science Publishers.

**CSAS Graduate Student Poster Competition**  
The CSAS Graduate Student Poster Competition will take place in the Exhibit Hall on Wednesday, July 20 from 7:15 am to 8:15 am. These posters will be available for viewing the remainder of the week.

**CSAS Graduate Student Oral Competition**  
In addition to the poster competition, CSAS Graduate students will also participate in an oral competition in Room 251 B on Wednesday, July 20 starting at 9:30 am.

**CSAS Symposium**  
All meeting participants are invited to attend a special CSAS sponsored symposium on reducing the use of antibiotics in livestock production. This symposium starts at 2:00 pm on Friday, July 22 in room 155 A.

**CSAS Member Mixer**  
Friday, July 22 • 10:00 pm – 12:00 am  
Hotel Monaco, Paris Ballroom  
The CSAS Members Mixer event is a great opportunity to chat, exchange with colleagues and students and forge future partnerships. Meet and share with us! All CSAS members are encouraged to attend. This event is sponsored by your society and the Canadian Science Publishers!

**WSASAS EVENTS**

**WSASAS Graduate Competition Papers**  
Wednesday, July 20 • All Day  
Salt Palace Convention Center, 258/259  
Come watch as WSASAS Graduate Students compete. See the Scientific Program for the detailed schedule.

**ASAS/WSASAS Graduate Student Lunch and Learn**  
Thursday, July 21 • 12:00 – 2:00 pm  
Hilton Salt Lake City Center, Alpine Ballroom East  
The ASAS Graduate Student Lunch and Learn is being co-hosted this year by the ASAS National Graduate Directors and the WSASAS Graduate Directors. The Lunch and Learn is following a common theme for not only JAM but also all graduate educational event from ASAS section meetings this past year, “Branding Yourself.” Mark Branine, Mike Day, and Kristen Hales will be available to provide advice and answer any questions about pursuing their specific careers paths. This will be a great opportunity for students to explore employment opportunities within Animal Science and listen to advice from successful professionals in a variety of areas.

**ASAS/WSASAS Graduate Student Mixer**  
Wednesday, July 20 • 8:00 pm  
The Twist  
The ASAS graduate student mixer will be held at The Twist located just 4 blocks from the convention center. One unique feature to this year’s mixer is that the Western Section mixer will be held at the same location as the National mixer. Western Section Graduates will meet at 8:00 pm for WSASAS Social Hour. The combined mixer starts at 9:00 pm. This location will be a lot of fun with good food and drink and a great place to catch up with old friends and make new ones.

**WSASAS Undergraduate Poster Competition**  
The WSASAS Undergraduate Poster Competition will take place in the Exhibit Hall on Wednesday from 7:15 am to 8:15 am. These posters will be available for viewing the remainder of the week.

**WSASAS Business Meeting**  
Friday, July 22 • 7:45 – 9:15 am  
Salt Palace Convention Center, 155A
**Grazing Livestock Nutrition Conference (GLNC)**
The theme of the 5th GLNC is “Enhancing Management, Production, and Sustainability of Grazing Ruminants in Extensive Landscapes.” The goal of GLNC is to create a platform for information exchange regarding grazing livestock nutrition and enhancing livestock production within sustainable grazing.

GLNC will take place in beautiful Park City, located just 30 minutes outside Salt Lake City.

**ASAS-ASN Preconference**

**Salt Lake Convention Center, Grand Ballroom B/D**
The ASAS-ASN Joint Preconference Symposium begins at 8:15 on Tuesday morning and will focus on gut microbiota, diet and health. Invited talks include:

- Modulation of the gut microbiota – An ecological perspective. Jens Walter, University of Alberta, Edmonton, AB, Canada
- Effects of early antibiotic exposure on host metabolism. Laura M Cox, Harvard Medical School and Brigham and Women’s Hospital, Boston, MA; New York University Langone Medical Center, New York, NY

**International Society for Animal Genetics (ISAG)**

ISAG is devoted to the study of the immunogenetics, molecular genetics and functional genomics of economically important and domesticated animal species. There is an outstanding scientific program planned that will blend plenary sessions, posters, and workshops of interest to animal geneticists from around the world.

The conference will follow the 2016 ASAS-ADSA-CSAS-WSASAS Joint Annual meeting (July 19-23, 2016) at the Hilton Salt Lake City Center on July 23 through July 27, 2016.

**Functional Annotation of Animal Genomes (FAANG)**

ASAS-ISAG Joint Symposium begins at 8:30 on Saturday morning. During lunch ePosters from ISAG and the genetics sessions at JAM will be available for viewing. Invited talks include:

- Causal inference of molecular networks integrating multi-omics data. F. Peñagaricano, University of Florida, Gainesville

**Postconference Events**

- Impact of gut microbiota on brain and behavior. John F. Cryan, University College Cork, Cork, Ireland
- The human milk microbiome and oligosaccharides - What’s normal and so what? Michelle K McGuire, Washington State University, Pullman, WA
- Dietary fiber and starch, digestive physiology, and metabolic health. Ruurd T. Zijlstra, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada
- Methane matters: From blue tinged moos, to boozy roos, and for the health of humans too. Mark Morrison, University of Queensland Diamantina Institute, Brisbane, Australia
- Sub-acute ruminal acidosis (SARA): A tale of two microbiomes. Robert J Wallace, Rowett Institute of Nutrition and Health, Aberdeen, United Kingdom
- Dietary manipulation of canine and feline gut microbiome. Kelly S Swanson, Department of Animal Sciences, University of Illinois at Urbana-Champaign

- Genotypes to phenotypes: Lessons from functional variation in the human genome and transcriptome. B. E. Stranger, Section of Genetic Medicine, Department of Medicine, Institute of Genomics and Systems Biology, Center for Data Intensive Sciences, University of Chicago, Chicago, IL
- Recurrent chimeric transcripts in human and mouse. S. Djebali, GenPHYSE, INRA, Castanet-Tolosan, France, Universitat Pompeu Fabra (UPF), Barcelona, Spain, Bioinformatics and Genomics Programme, Centre for Genomic Regulation (CRG), Barcelona, Spain
- Improving genomic selection across breeds and across generations with functional annotation. B. Hayes, Department of Economic Development, Melbourne, Australia
- Integrating dynamic omics responses for universal personalized medicine. G. I. Mias, Michigan State University, East Lansing
- A review of sequencing and assembly methods that enhance computational use. W. C. Warren, McDonnell Genome Institute, Washington University School of Medicine, St Louis, MO

Booth: 716
Beijing KeepYoung Technology Co., Ltd., which founded in 2001, is the first national high-tech enterprise that specializes in applied research, production and sales of plant extract in animal feed and cultivation by using the theory of traditional Chinese medicine and modern biopharmaceutical engineering technology in combination with the development process of animal nutrition and scientific cultivation. At present, nearly half of the top 20 feed companies in China are strengthening the partnership with us to get rid of the antibiotics that prevent disease and promote growth used in feed for pig, broiler chicken, duck, cow, fish and shrimp, etc., since our products are equal or superior to antibiotics in terms of survival rate of animal and productivity. The company is located in the production base in Miyun District of Beijing, which integrates R&D, production, test and office. Its laboratory covers over 2,000 square meters, while the workshop covers over 8,000 square meters. It also has a production line that yields 10,000 tons of plant extracts every year.

BIOMIN America
1842 Lockhill-Selma Rd., Ste 102
San Antonio, TX 78213
www.biomin.net
Booth: 505
We care for healthy animal nutrition. We at BIOMIN are dedicated to developing innovative and sustainable solutions that ensure our customers’ success through healthy and safe animal nutrition. The application of science and expertise is based on first understanding and appreciating our customer’s needs and concerns. This principle enables us to deliver solutions that support animal health, optimize performance and production efficiency.

Save costs and improve quality by upgrading to the next generation of NIR analyzers. From control of feed ingredients to precise testing of proximates, these analyzers have also been used to monitor blending processes and optimize mill operation. They feature the lowest cost of ownership with a 10 year warranty on the permanently aligned Rock Solid TM Interferometer, eliminating time-consuming "instrument standardization" protocols. Samples can be measured in seconds without sample preparation.

Booth: 315
iCEV strives to meet the demand of collegiate instructors by providing a modern educational platform filled with streaming video and expert insight across numerous industries in Agriculture. The unrivaled visual exposure will enhance student learning and equip students with an extensive knowledge foundation to achieve ultimate success.
**Chr. Hansen, Inc.**

9015 W Maple St  
Milwaukee, WI 53214  
www.chr-hansen.com/animal-health  
Booth: 615

Chr. Hansen is committed to natural products and sustainable practices. Our products improve feed conversion ratios and feed utilization in production animals while increasing milk output per cow in dairy operations - all this without detrimental effect on the environment or on long-term product quality and consumer safety. We are actively exploring and participating in the quest to identify solutions that help farmers optimize output per land acre and minimize environmental bi-products.

**C-Lock Inc.**

2025 Samco Rd  
Rapid City, SD 57702  
www.c-lockinc.com  
Booth: 221

We manufacture precision equipment for measuring and monitoring of animal health and performance.

**Cumberland Valley Analytical Services**

14515 Industry Dr  
Hagerstown, MD 21742-2410  
www.foragelab.com  
Booth: 621

Cumberland Valley Analytical Services is a forage and feed testing laboratory providing services for the agriculture industry worldwide. CVAS is focused on traditional and innovative chemistry analysis of feed materials providing one of the broadest panels of services to the industry. We support not only the nutritional services industry, but the feed ingredient, agronomy and research communities as well.

**Dairy One**

730 Warren Rd  
Ithaca, NY 14850  
www.dairyone.com  
Booth: 801

The Dairy One Forage Lab excels in providing you with high quality analyses and customer service. As an international leader, our goal is to provide you with analytical services designed to meet the expanding demands of modern agriculture. New technology and traditional methods are combined to deliver fast, accurate results.

**Dairy Records Management Systems**

NCSU, 313 Chapanoke Rd Ste 100  
Raleigh, NC 27603  
www.drms.org  
Booth: 617

DRMS is improving the dairy industry with precise information, leading-edge products and superior service. While serving herds from Maine to California through 20 DHIAs, DRMS delivers strong value to every herd: small or large, Jerseys or Holsteins, technology-driven or traditional. Product offerings including PCDART, PocketDairy and a vast array of DHI reports, empower producers to use both their DHI and everyday data to make the most informed, cost-effective decisions possible.

**DASCOR, Inc.**

PO Box 5036  
Oceanside, CA 92052-5036  
www.dascor.com  
Booth: 518

A world leader, DASCOR provides data loggers for ruminal research with over 500 units already in the field, which measure temperature, ORP/REDOX, pH, and battery voltage. Support software allows calibration and set-up for tests, and downloads the data into an Excel compatible file. DASCOR has improved the performance and long term reliability of both the loggers and sensors. pH sensors now have significantly extended life and reliability, repeatability demonstrated over multiple field trials.

**Diamond V**

2525 60th Ave SW  
Cedar Rapids, IA 52404  
www.diamondv.com  
Booth: 700

Diamond V is a global nutritional health company conducting research in dairy and beef cattle, swine, poultry, and other species. Our natural, fermentation-based products support animal health, animal performance, and food safety worldwide. Our Embria Health Sciences subsidiary manufactures EpiCor® for research-proven immune support in humans. More than 70 years of science, innovation, technology, and quality have earned Diamond V the reputation of The Trusted Experts in Nutrition and Health®.

www.innovad-global.be
Booth: 820

INNOVAD is a group and a brand that combines people's long time experiences in the field of animal feed additives with an innovative approach and dedication to animal well-being and a healthy environment whilst securing the producer's cost effectiveness. With its corporate headquarters and licensed state of the art production facilities close to the port of Antwerp in Belgium, INNOVAD is in a position to serve the global feed and animal industry. Fine products are produced with strict adherence to EU directives and regulations, and GMP certified.

Intermountain Farmers Association
1147 W 2100 S
Salt Lake City, UT 84130
www.intermountainfarmers.com
Booth: 215

Intermountain Farmers Association (IFA) was organized as a farmer's co-op in 1923 as Utah Poultry Exchange by men with hard-working values and a vision for the future. Today, we proudly manufacture and provide superior feed products and nutritional services to the agricultural community and to those choosing a country living lifestyle. We are a major supporter of 4-H, FFA, and our own Young Producer Program. IFA operates 4 feed mills and 3 commodity operations in Utah as well as 24 IFA Country Stores and 7 Agronomy Centers in the Intermountain West.

IQ Technologies, Inc.
3524 Bear Hollow Way
Lehi, UT 84043
www.iqmassager.com/aboutmassagers
Booth: 318

IQ TECHNOLOGIES INC. is the premier leading worldwide distributor of TENS STIMULATORS with over 10 years experience! Our FDA class II cleared medical devices use electrical pulses for the stimulation of muscles. These portable and compact electrical TENS STIMULATORS are a breakthrough in the compact medical device industry. Our devices include an array of massage modes ranging from 6, 8, and 12. Each mode specifically designed to deal with all types of muscle aches and stress. SELLING WORLDWIDE! European CE Certificate approved, Canadian Health department approved and cleared by the FDA as a class II medical device.

We exhibited in the past in horses event and agriculture expo. In general, TENS/EMS is used on people but we find out that the device can be used and beneficial on animals.
**Kemin Industries**
600 E Court Avenue Ste A
Des Moines, IA 50310
www.kemin.com
Booth: 201
Kemin offers a range of nutritional solutions for raising healthy animals. We understand your need to raise healthy livestock that gives consumers the nutritional and health benefits they are looking for, while also returning a profit. Our products and services help you with nutrition, feed quality, gut health and risk management.

**King Techina**
PO Box 131455
Ann Arbor, MI 48105
www.kingtechina.com
Booth: 601
King Techina is specialized in developing and manufacturing microcapsulated feed additives. Through our ground breaking patented Intelligent Microcapsule (IM) technology, feed additives and medicines can be coated according to animal digestion system for higher feed efficiency, better animal health and growth performance.

**Laboratoires Phodé**
Z. I Albipole
Terssac 81150, France
www.phode.fr
Booth: 420
Laboratoires Phodé is a french original and innovative company designing unique sensory and functional ingredients for the feed market. Phodé research center is dedicated to better understanding the effects of olfactory molecules and vegetable extracts on emotions, behavior, better being and ultimately health of living beings. This expertise allows Phodé to create unique solutions targeting livestock performances with new cerebral approach.

**Micronutrients**
1550 Research Way
Indianapolis, IN 46231
www.micro.net
Booth: 101
IntelliBond trace minerals, manufactured by Micronutrients, represent a completely new category of trace mineral nutrition that can reduce trace mineral supplement costs while optimizing cattle health and productivity. Multiple research studies by well-known universities confirm the ability of IntelliBond trace minerals to significantly increase trace mineral absorption and utilization by your herd.

**National Animal Nutrition Program**
609 W.P. Garrigus Bldg
Lexington, KY 40546-0215
www.nanp.nrsp-9.org
Booth: 316
The National Animal Nutrition Program (NANP) serves as a forum to identify high-priority animal nutrition issues and provide an integrated and systemic approach to sharing, collecting, assembling, synthesizing, and disseminating science-based information, educational tools, and enabling technologies on animal nutrition that facilitate high-priority research among agricultural species, with emphasis on beef, dairy, swine, poultry, horses, small ruminants, and fish. The NANP is a research-support activity funded as a National Research Support Project (NRP-9) with Hatch funds appropriated by the USDA National Institute of Food and Agriculture, and administered by the Experiment Station Committee on Organization and Policy and the State Agricultural Experiment Stations.

**Neogen Corporation**
4131 N 48th St
Lincoln, NE 68504
www.neogen.com/en/
Booth: 609
GeneSeek provides comprehensive research, product development and delivery solutions for the Life Science, Agribusiness, Pharmaceutical and Biotechnology industries. GeneSeek is the largest global provider of DNA testing for the agricultural biotechnology industry, providing critical genomic-based information to those focused on increasing agricultural outputs, and capabilities in place to provide ultra high-throughput solutions at low cost.

**Novus International**
20 Research Park Dr
St. Charles, MO 63304
Booth: 302
Novus is a leading developer of animal health and nutrition products for all species with worldwide headquarters in St. Charles, Missouri. Offering products based in science such as ALIMET® and MHA® methionine supplements, SANTOQUIN® and AGRADO® Plus antioxidants, MINTREX® and MAAC® chelated trace minerals, and CIBENZA® enzymes. Other notable Novus product lines include ZORIEN® SeY, SOLIS® and SPORULIN®. Novus works to improve animal performance, health and well-being globally.
Since it was established in 1947, Pancosma has been creating, developing, manufacturing and distributing a wide range of solutions for the feed industry worldwide. Founded in the Swiss city of Geneva, we are a provider of essential feed additive solutions, based on a unique approach based on three core values: commitment to cutting-edge scientific research, driving forward innovation and dedication to serving customers. Pancosma is present in 75 countries around the world.

Penton Agriculture - Livestock Group
255 38th Ave #P
St. Charles, IL 60174
www.penton.com
Booth: 503
Feedstuffs provides news and insight for the feed, grain and animal production industries. Its properties include a monthly magazine, guidebooks and priority reports, website, newsletters, technical references and the information resource that provides consumer and industry education information.

Poultry Protein & Fat Council
1530 Coolidge Rd
Tucker, GA 30084
www.uspoultry.org/ppfc_index.cfm
Booth: 301
The leading technical resource and advocate for the poultry rendering industry, serving its members through research, education and promotional services.

Sable Systems International
3840 N Commerce St
N Las Vegas, NV 89032
www.sablesys.com
Booth: 311
Sable Systems is the world’s most trusted provider of tools and expertise for research in animal metabolism and behavioral sciences. Whether your focus is on livestock nutrition and diet or methane and CO₂ emission studies, Sable’s precise, reliable, high-resolution systems measure MR, RQ, temperature, and water vapor. Our systems are designed to reduce external disturbance for your animal and to maximize your ease of setup and operation in the lab or a field environment.

Silostop
401 N Michigan Ave Ste 120
Chicago, IL 60611
silostop.com
Booth: 721
Silostop Ultimate Oxygen Barrier Film is recognized worldwide as the leading oxygen barrier film. Silostop specializes in silage protection systems. We help farmers and producers around the world to make the best possible silage, as well as reduce labour and recycling costs. Silostop has offices in the UK and the US, an international technical team of renowned silage experts and a global network of carefully selected distributors.

SoyBest
PO Box 157
West Point, NE 68788
www.soybest.com
Booth: 701
Soy Best High Bypass Soybean Meal with Gums is bypass protein for dairy cows. Manufactured by the mechanical process, it contains no chemical solvents and is all-natural. Soy Best includes fresh soy-gums with lecithin and phosphatidyl-choline. Now nutritionists and dairy producers can choose between Soy Best formulations: Original Soy Best with fresh soy gums and now Soy Best “L” - the only high-bypass soybean meal available with rumen-protected lysine fortification.

SoyPlus/SoyChlor
PO Box 68
Ralston, IA 51459
www.dairynutritionplus.com
Booth: 710
Dairy Nutrition Plus™, a family of quality products by Landus Cooperative®, brings together the company’s dairy nutrition offerings under a parent brand while re-energizing its well-known products, SoyPlus and SoyChlor. Landus Cooperative demonstrates a long-standing commitment to providing quality and consistency. The Dairy Nutrition Plus family of quality products showcases the ways in which Landus Cooperative offers more to feed mills, nutritionists and dairy producers.

Stuhr Enterprises, LLC
505 W Main St
Marshall, MN 56258
www.stuherenterprises.com
Booth: 709
Stuhr Enterprises, LLC is a global company based in Marshall, MN with manufacturing plants in IA and MO. The company is research and technology based with innovative manufacturing process applications.
The National Academies Press
500 5th Street NW
Washington, DC 20001
www.nap.edu
Booth: 319

The National Academies Press (NAP) is the publisher of reports from the National Academies of Sciences, Engineering, and Medicine. The NAP publishes more than 200 books a year on a wide range of topics in science, engineering, and medicine, including the Nutrient Requirements of Animals series.

Udder Health Systems, Inc.
4455 S Meridian Rd
Meridian, ID 83642
www.udderhealth.com
Booth: 705

Udder Health Systems provides animal health, milk quality and food safety testing and consulting for dairy farms, processors, and dairy manufacturers. UHS makes a proprietary line of mastitis diagnostic products for veterinary diagnostic laboratories. Our professional staff of veterinary, microbiology and milk quality technical consultants regularly assist herd managers to protect their operations from expensive mastitis or milk quality threats with bacterial testing in milk, water and bedding.

Unity Scientific
117 Old State Rd
Brookfield, CT 06804
www.aphis.usda.gov/nahms
Booth: 400

Unity Scientific, formed by the merger of Westco Scientific Inc. and Unity Scientific, is a leading global provider of near infrared analysis instrumentation, automated wet chemistry analyzers and sample preparation apparatus all designed to make our customers’ analysis needs easier and more efficient. Unity Scientific offers the Forage Analyzer and Feed Analyzer, complete with ready to go calibrations for today’s livestock and dairy farms and suppliers.

USDA-APHIS-VS, National Animal Health Monitoring System
2150 Centre Avenue, Bldg B-2E7
Fort Collins, CO 80526
Booth: 711

National studies conducted by the National Animal Health Monitoring System (NAHMS) provide essential information on livestock and poultry health and management in the United States. Production types are studied at regular intervals, providing up-to-date information needed to monitor US animal health, support trade decisions, inform the public, and set policy.

Vetagro, Inc.
230 S Clark St #320
Chicago, IL 60604
www.vetagro.com/eng/
Booth: 416

Vetagro is a research-driven company specialized in microencapsulation of feed additive and nutrients for ruminants, swine and poultry since 1982. We are committed to innovation, quality, work safety and environmental care. Vetagro team invites you to visit Vetagro booth #416 to speak with our technical team to find out more about our microencapsulation technology and products.

Veterinary Simulator Industries Ltd.
1155 40 Ave NE
Calgary, AB T2E 6M9, Canada
www.vetsimulators.net
Booth: 414

Making the Best Simulators in the World! Veterinary Simulator Industries Ltd. creates animal simulators that allow veterinary students to become proficient in their diagnostic and practical skills without the need to endanger or cause unnecessary discomfort to live animals.

Locating the Correct Poster Board
Find the posters you want to view in the back of the program and identify the screen number (second number to the left of the abstract title). Then locate the corresponding screen in the back of the Exhibit Hall. During Poster Sessions only the poster scheduled for presentation will be available for viewing. At all other times, all posters presented throughout the week will be available for viewing on their assigned screens. E-poster technicians are available on-site if you need help finding a poster.

Locating an abstract:
In the back of the program, abstract presentations are listed first by day, then by presentation style (oral vs. poster) and finally by presentation order. Presentations with corresponding abstracts have an abstract number listed to the left of each abstract title. For poster presentations, this is the first number on the left. Use the abstract number to look up abstracts in the abstract book published online: www.asas.org/JAM2016/abstract_book.

New to JAM!
AnimalX
A series of short, TED-style talks about animal science.

Featuring in Speaking Order

Dr. Shawn Archibeque, Colorado State University
Animal Science Comes from Many Roots – We Must Care for All of them

Melissa Brewer, Certified Angus Beef
Communicating Science in a Sound Bite Society

Dr. Todd Armstrong, Elanco Animal Health
OneHealth: The Need for Alternatives to Protect the Health of Animals, and Ultimately People, Has Never Been Greater

Dr. Larry Reynolds, North Dakota State University
Importance of Animals in Agricultural Sustainability and Food Security

Dr. Garth Sasser, University of Idaho; BioTracking Inc.
From Molecule to Meadow

AnimalX takes place during the Opening Session on Tuesday, July 19. These 3-5 minute presentations replace a keynote speaker.
Emerging Innovations in Animal Health: Strategies for a Healthier & More Sustainable Animal

September 14–16
Madden’s on Gull Lake • Brainerd, MN

108th ANNUAL MEETING
AMERICAN SOCIETY OF
ANIMAL SCIENCE
AWARDS PROGRAM

JULY 20, 2016 • 7:15 P.M.
SALT PALACE CONVENTION CENTER
SALT LAKE CITY, UTAH

Tuesday, July 19, 2016
Accelerating agrigenomic breakthroughs
A history of progress. A future of promise.

Learn more about Illumina solutions for agriculture at www.Illumina.com/agrigenomics
ASAS/ASN Joint Symposium: Gut Microbiota, Diet and Health

Chairs: Gretchen M. Hill, Michigan State University;
Teresa A. Davis, USDA-ARS Children’s Nutrition Research Center, Baylor College of Medicine

Sponsor: BIOMIN
8:15 AM - 4:30 PM
Grand Ballroom B/D

8:15 AM  Welcoming Remarks
8:20 AM 219 Modulation of the gut microbiota – An ecological perspective.
J. Walter*, University of Alberta, Edmonton, AB, Canada
9:05 AM 220 Effects of early antibiotic exposure on host metabolism.
L. M. Cox*, Harvard Medical School and Brigham and Women’s Hospital, Boston, MA; New York University Langone Medical Center, NY
9:50 AM Break
10:05 AM 221 ASAS-EAAP Speaker: Impact of gut microbiota on brain and behavior.
J. F. Cryan*, University College Cork, Ireland
10:50 AM 222 The human milk microbiome and oligosaccharides - What’s normal and so what?
M. K. McGuire*1 and M. A. McGuire2, 1Washington State University, Pullman 2University of Idaho, Moscow
11:35 AM Lunch and Poster Competition: Sponsored by Lallemand
1:05 PM 223 Dietary fiber and starch, digestive physiology, and metabolic health.
R. T. Zijlstra*, J. M. Fouhse, T. Vasanthan, and M. G. Gänzle, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada
1:50 PM 224 ASAS-AAPA Speaker: Methane matters: From blue tinged moos, to boozy roos, and for the health of humans too.
E. C. Hoedt1,2, P. OCuiv2, and M. Morrison*3, 1University of Queensland, School of Chemistry and Molecular Biosciences, St Lucia, Australia, 2University of Queensland Diamantina Institute, Woolloongabba, Australia, 3University of Queensland Diamantina Institute, Brisbane, Australia
2:35 PM 225 ASAS-EAAP Speaker: Sub-acute ruminal acidosis (SARA): A tale of two microbiomes.
C. A. McCartney1, R. C. Cernat2, H. H. C. Koh-Tan3, H. J. Ferguson4, E. M. Strachan5, W. Thomson5, T. J. Snelling5, C. M. Harvey5, I. Andonovic6, C. Michie5, N. N. Jonsson5, G. W. Horgan5, and R. J. Wallace*6, 1University of Aberdeen, United Kingdom, 2Chr. Hansen A/S, Hoersholm, Denmark, 3University of Glasgow, United Kingdom, 4Harbro Ltd, Turriff, United Kingdom, 5Strathclyde University, Glasgow, United Kingdom, 6BIOSS, Aberdeen, United Kingdom
3:20 PM 226 Dietary manipulation of canine and feline gut microbiome.
K. S. Swanson*, University of Illinois at Urbana-Champaign
4:05 PM Concluding Remarks
GLUCOSE PRECURSOR FOR TRANSITION COWS

NEW RESEARCH:
U. of CA Davis School of Veterinary Medicine and Research Center,
Tulare, California

UC DAVIS VETERINARY MEDICINE

- Reduces Ketosis
- Reduces BHBA
- Increases Glucose
- Significant Increase in Milk
- Decreased Health Parameters
- Minimize Drenching

COME TO
BOOTH 709
AND DISCUSS WITH RESEARCHERS
Kelly Mitchell and Dr. Heidi Rossow

View Research Poster
FRIDAY, JULY 22 – 8:15 A.M. - 9:15 A.M.
Latest Research from Diamond V

**Dairy Calves**

**July 21 | 7:15 a.m. | Exhibit Hall A/B | Abstract 18142**

*Effects of Saccharomyces cerevisiae fermentation products on intestinal villi integrity in neonatal calves naturally infected with Cryptosporidium spp.*

S. Vázquez Flores, et al.

**Beef Cattle**

**July 22 | 8:15 a.m. | Exhibit Hall A/B | Abstract 18113**

*Effects of feeding NaturSafe™ on performance, carcass characteristics, and liver abscesses in finishing beef heifers at a commercial feedlot*

M.F. Scott, et al.

**July 22 | 5:00 p.m. | Exhibit Hall A/B | Abstract 18057**

*Effects of feeding NaturSafe™ on foodborne pathogens in finishing beef heifers*

K.M. Feye, et al.

**July 22 | 7:15 a.m. | Exhibit Hall A/B | Abstract 17663**

*Dose response effect of a Saccharomyces cerevisiae fermentation product prototype on leukocyte functionality and ex vivo cytokine production during a dexamethasone challenge in Holstein steer calves*

K.P. Sharon, et al.

**July 22 | 7:15 a.m. | Exhibit Hall A/B | Abstract 17636**

*Influence of dietary supplementation with a Saccharomyces cerevisiae fermentation product prototype on the pathophysiological response to a combined intranasal bovine herpesvirus-1 and intratracheal Mannheimia haemolytica challenge in Holstein steers*

K.P. Sharon, et al.

**Nursery Pigs**

**July 23 | 8:15 a.m. | Exhibit Hall A/B | Abstract 15066**

*Supplementation with Lactobacillus acidophilus fermentation product alters the metabolic response following a lipopolysaccharide challenge in weaned pigs.*

N. Burdick Sanchez, et al.
# SYMPOSIA AND ORAL SESSIONS

## Pancosma Symposium

### Non-Nutrition: The Future of Nutrition?

**Chair:** Emma Wall, Pancosma; 
Michael Steele, University of Alberta

**Sponsor:** Pancosma

9:00 AM - 5:30 PM  
Grand Ballroom A

<table>
<thead>
<tr>

<tbody>
<tr>
<td>9:00 AM</td>
<td><strong>Introductory Remarks</strong></td>
</tr>
</tbody>
</table>
| 9:15 AM | 1029 **Why the intersection of microbiology and neurobiology matters to animal health: Microbial endocrinology as a means to examine the host-microbiota interface.**  
M. Lyte*, Iowa State University, Ames |
| 9:45 AM | 1030 **The gut microbiome as a virtual endocrine organ: Implications for host physiology and behaviour.**  
G. Clarke*, University College Cork, Ireland |
| 10:15 AM | 1031 **Threats to gut health in production animals.**  
J. Furness**, D. M. Bravo**, and J. J. Cottrell**, 1University of Melbourne, Parkville, Australia, 2Pancosma, Geneva, Switzerland, 3Facuity of Veterinary and Agricultural Sciences, The University of Melbourne, Parkville, Australia |
| 10:45 AM | 1032 **ASAS-EAAP Speaker: The gut microbiome and its role in the development and function of newborn calf gastrointestinal tract.**  
N. Malmuthuge1, G. Liang1, P. J. Griebel2, and L. L. Guan*, 1University of Alberta, Edmonton, AB, Canada, 2Vaccine and Infectious Disease Organization, University of Saskatchewan, Saskatoon, SK, Canada |
| 11:15 AM | 1033 **From pre- to post-weaning: The adaptations of the gastrointestinal tract of the young calf.**  
M. Steele*, S. J. Meale*, K. Wood, and G. B. Penner*, 1Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2INRA, Unité Mixte de Recherches sur les Herbivores, St Genés Champanelle, France, 3Department of Animal Biosciences, University of Guelph, ON, Canada, 4Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada |
| 11:45 AM | **Break**                                                                                                        |
| 1:45 PM | 1034 **Metabolic effects of dietary pungent spices on the gut in animal models.**  
K. Srinivasan*, Department of Biochemistry and Nutrition, CSIR - Central Food Technological Research Institute, Mysore, India |
| 2:15 PM | 1035 **Phytonutrients as non-nutritive feed additives to enhance growth and host immunity in broiler chickens.**  
H. Lillehoj*, and S. Oh*, 1USDA-ARS, Beltsville, MD, 2USDA, Beltsville, MD |
| 2:45 PM | 1036 **Phytonutrients as additives in ruminants: The unexpected target organ.**  
| 3:15 PM | 1037 **Non-nutrients in swine health and production.**  
Y. Liu*, University of California-Davis |
| 3:45 PM | 1038 **ASAS-EAAP Speaker: Manipulation of gut morphology and gut immunity in swine using novel, naturally sustainable bioactives.**  
T. Sweeney* and J. O’Doherty*, 1School of Veterinary Medicine, University College Dublin, Ireland, 2School of Agriculture and Food Science, University College Dublin, Ireland |
| 4:15 PM | **Concluding Remarks**                                                                                           |
| 4:30 PM | **Discussion**                                                                                                   |

</table>
10:00 AM 697  Effects of poor maternal nutrition during gestation on offspring prenatal muscle growth.  

10:15 AM 698  Effects of citral and linalool on blood neutrophil toxicity and oxidative response in dairy cows.  
C. M. Scholte*, Y. Qu, M. Garcia, T. H. Elsasser, D. Biswas, and K. M. Moyes, Department of Animal and Avian Sciences, University of Maryland, College Park, USDA-ARS, Beltsville, MD

10:30 AM 699  In vivo screening of the anthelmintic efficacy of birdsfoot trefoil commercial varieties and cultivars against ovine Haemonchus contortus.  
C. Barone*, S. Ferguson, A. Zajac, R. Brown, J. Reed, C. Krueger, and K. Petersson, University of Rhode Island, Kingston, Virginia Polytechnic Institute and State University, Blacksburg, University of Wisconsin-Madison

ADSA-Southern Section Graduate Student Oral Competition

Chair: Peter D. Krawczel, University of Tennessee  
9:30 AM - 10:30 PM  
251 D

9:30 AM 760  The nutritional quality of winter crops for silage in monoculture or with legumes.  
A. N. Brown*, G. Ferreira, C. L. Teets, W. E. Thomason, and C. D. Teutsch, Department of Dairy Science, Virginia Polytechnic Institute and State University, Blacksburg, Department of Crop and Soil Environmental Sciences, Virginia Polytechnic Institute and State University, Blacksburg

9:45 AM 761  Housing and demographic effects on somatic cell score in southeast United States dairies.  
A. Stone*, C. Blakely, K. Bochantin, P. D. Krawczel, M. Myers, D. T. Nolan, C. S. Petersson-Wolf, G. M. Pighetti, S. Ward, and J. M. Bewley, University of Kentucky, Lexington, University of Tennessee, Knoxville, Virginia Polytechnic Institute and State University, Blacksburg, Mississippi State University, Mississippi State

10:00 AM 762  Feeding low crude protein diets in lactating dairy cows during summer months: Improvements in milk production and nitrogen utilization.  
J. Kaufman*, K. Kassube, and A. G. Rius, The University of Tennessee, Knoxville

10:15 AM 763  Influence of a BRDC vaccine with a MLV or KV IBR component on estrous cycle parameters and anti-müllerian hormone concentration in nulliparous heifers.  
C. L. Widener*, D. J. Hurley, W. M. Graves, A. H. Nelson, D. A. L. Lourenco, and J. F. Bohlen, University of Georgia, Athens

ASAS Western Section Graduate Student Paper Competition

Chair: Shanna L. Ivey, New Mexico State University  
Sponsor: ASAS Western Section  
9:30 AM - 3:30 PM  
258/259

9:30 AM 1  Effects of maternal nutritional status on nutrient transporter expression in bovine utero-placental tissue on days 16 to 50 of gestation.  

9:45 AM 2  Effects of dried distillers grains and lasalocid on feedlot lamb growth, carcass traits, nutrient digestibility, ruminal fluid volatile fatty acid concentrations, and ruminal hydrogen sulfide concentration.  

10:00 AM 3  Impacts of stocking density on growth and puberty attainment of replacement beef heifers.  
10:15 AM 4 Physiologic, health and production responses of dairy cows supplemented with an immunomodulatory feed ingredient during the transition period.
A. P. Brandao\textsuperscript{1,2}, R. F. Cooke\textsuperscript{1}, F. N. Correa\textsuperscript{1}, M. B. Piccolo\textsuperscript{1}, R. Gennari\textsuperscript{1}, T. Leiva\textsuperscript{1}, and J. L. M. Vasconcelos\textsuperscript{1}, \textsuperscript{1}Oregon State University-EOARC Burns, \textsuperscript{2}UNESP - FMVZ, Botucatu, Brazil, \textsuperscript{3}Department of Animal Sciences, University of Florida, Gainesville, \textsuperscript{4}UNESP - FMVZ, Botucatu, FL, \textsuperscript{5}Sao Paulo State University, Botucatu, Brazil

10:30 AM 5 Bioavailability of supplemental ruminally-protected leucine in sheep.
J. G. Castro\textsuperscript{*}, J. B. Alford, K. E. Quinn, F. A. Lopez, S. L. Pillmore, E. J. Scholljegerdes, and C. A. Loest, New Mexico State University, Las Cruces

10:45 AM 6 Key metabolic pathways associated with differences in weight maintenance and gain in mature cow skeletal and adipose tissue.
H. C. Cunningham\textsuperscript{1}, K. J. Austin\textsuperscript{1}, K. M. Cammack\textsuperscript{1}, H. C. Freely\textsuperscript{2}, and A. K. Lindholm-Perry\textsuperscript{3}, \textsuperscript{1}Department of Animal Science, University of Wyoming, Laramie, \textsuperscript{2}USDA-ARS, US Meat Animal Research Center, Clay Center, NE

11:00 AM 7 Effects of grazing intensity and advancing season on chemical composition and \textit{in vitro} organic matter disappearance in steers grazing mixed-grass prairie.
K. E. Chilcoat\textsuperscript{*}, Animal Sciences Department, North Dakota State University, Fargo

11:15 AM 8 Altering the time of vaccination against respiratory pathogens to enhance vaccine efficacy, health, and performance of feedlot cattle.
K. Lippolis\textsuperscript{1,2}, R. F. Cooke\textsuperscript{1}, K. M. Schubach\textsuperscript{1}, A. P. Brandao\textsuperscript{1,2}, R. Marques\textsuperscript{1}, M. T. Hinchliff\textsuperscript{1}, and D. W. Bohnert\textsuperscript{1}, \textsuperscript{1}Oregon State University-EOARC Burns, \textsuperscript{2}UNESP - FMVZ, Botucatu, Brazil

11:30 AM 9 Evaluation of genetic structure across five US climate zones using prominent AI sires of two British Bos taurus breeds.
B. C. Krehbiel\textsuperscript{1,2}, M. G. Thomas\textsuperscript{1}, H. D. Blackburn\textsuperscript{1}, S. E. Speidel\textsuperscript{1}, R. M. Enns\textsuperscript{1}, and L. Keenan\textsuperscript{3}, \textsuperscript{1}Department of Animal Sciences, Colorado State University, Fort Collins, \textsuperscript{2}National Animal Germplasm Program USDA-ARS, Fort Collins, CO, \textsuperscript{3}Red Angus Association of America, Denton, TX

11:45 AM 10 Effect of processing of supplemental corn on metabolizable protein of beef cows grazing winter wheat pasture.
C. S. Hebbert\textsuperscript{*}, M. A. Lopez-Baca\textsuperscript{2}, L. Avendaño-Reyes\textsuperscript{2}, U. Macias-Cruz\textsuperscript{2}, and S. A. Soto-Navarro\textsuperscript{1}, \textsuperscript{1}New Mexico State University, Las Cruces, \textsuperscript{2}Instituto de Ciencias Agricolas, Universidad Autonoma de Baja California, Ejido Nuevo Leon, Baja California, Mexico

12:00 PM 11 Does adaptive grazing management influence dietary quality of yearlings during the grazing season on western Great Plains rangelands?
T. R. Plechaty\textsuperscript{1}, J. D. Scasta\textsuperscript{1}, and J. D. Derner\textsuperscript{2}, \textsuperscript{1}University of Wyoming, Laramie, \textsuperscript{2}USDA-ARS, Cheyenne, WY

12:15 PM 12 Long-term progesterone influence on feed efficiency, body composition, non-esterified fatty acids and metabolic hormones in mature Rambouillet ewes.
M. R. Herrygers\textsuperscript{*}, J. M. Thomson, K. A. Perz, P. J. Merta, M. Knerr, K. Metcalf, K. B. Herrygers, and J. G. Berardinelli, Montana State University, Bozeman

12:30 PM Break

2:00 PM 13 Health evaluation of immune-stimulated and hay-supplemented feedlot receiving calves as assessed by blood gas analysis.
E. R. Oosthuysen\textsuperscript{1}, M. Hubbert\textsuperscript{1}, K. L. Samuelson\textsuperscript{1}, E. J. Scholljegerdes\textsuperscript{1}, G. C. Duff\textsuperscript{1}, and C. A. Loest\textsuperscript{1}, New Mexico State University, Las Cruces, Clayton Livestock Research Center, New Mexico State University, Clayton

2:15 PM 14 Effect of post-weaning heifer development system on average daily gain, pregnancy rates, and subsequent feed efficiency as a pregnant heifer.
S. A. Springman\textsuperscript{*}, H. R. Nielson, T. L. Meyer, and R. N. Funston, University of Nebraska, West Central Research and Extension Center, North Platte

2:30 PM 15 Comparison of timed insemination vs. modified estrus detection protocol in beef heifers.
B. T. Tibbitts\textsuperscript{*}, T. L. Meyer\textsuperscript{2}, D. J. Kelly\textsuperscript{3}, and R. N. Funston\textsuperscript{1}, University of Nebraska-Lincoln, \textsuperscript{2}University of Nebraska, West Central Research and Extension Center, North Platte, \textsuperscript{3}Kelly Ranches, Sutherland, NE

2:45 PM 16 Performance and net energy in high and low RFI beef cattle.
K. C. Dykier\textsuperscript{*} and R. D. Sainz, University of California-Davis

3:00 PM 18 Impact of maternal protein restriction in first-calf heifers during mid- to late- gestation on gene expression, feedlot performance, and carcass characteristics of progeny.
J. J. Kincheloe\textsuperscript{1}, M. J. Webb\textsuperscript{2}, R. N. Funston\textsuperscript{1}, K. R. Underwood\textsuperscript{3}, M. G. Gonda\textsuperscript{2}, A. D. Blair\textsuperscript{1}, and K. C. Olson\textsuperscript{1}, \textsuperscript{1}South Dakota State University, Rapid City, \textsuperscript{2}South Dakota State University, Brookings, \textsuperscript{3}University of Nebraska, West Central Research and Extension Center, North Platte
Big Data in Animal Science: Uses for Models, Statistics and Meta-Approaches  
Chair: Robin R. White, Virginia Polytechnic Institute and State University  
Sponsor: CDGKV  
9:30 AM - 2:00 PM  
155 C

9:30 AM  
Welcoming Remarks

9:40 AM 1293  
ASAS-EAAP Speaker: Modeling in animal science: An introduction to quantitative understanding and prediction.  
J. Dijkstra*, Animal Nutrition Group, Wageningen University, Netherlands

10:35 AM 1294  
Traditional versus structure-based model development strategies.  
L. O. Tedeschi1, R. R. White2, C. F. Nicholson1, B. L. Turner2, M. A. Fonseca1, and M. D. Hanigan2, 1Texas A&M University, College Station, 2Virginia Polytechnic Institute and State University, Blacksburg, The Pennsylvania State University, University Park, 2Texas A&M University-Kingsville

11:25 AM  
Break

11:45 AM 1295  
Big data analysis techniques.  
N. St-Pierre*, The Ohio State University, Columbus

12:35 PM  
Break

1:15 PM 1296  
Evaluation of multilevel mixed effect models.  
E. Kebreab*, University of California-Davis

Breeding and Genetics: Genomic Evaluation I - Methods  
Chair: James E. Koltes, University of Arkansas  
9:30 AM - 12:30 PM  
Grand Ballroom I

9:30 AM 291  
APY inverse of genomic relationship matrix – Theory, analyses and questions.  
I. Misztal*, I. Pocrnic, D. Lourenco, and Y. Masuda, University of Georgia, Athens

9:45 AM 292  
Dimensionality of genomic information and APY inverse of genomic relationship matrix.  
I. Pocrnic*, D. A. L. Lourenco1, Y. Masuda1, A. Legarra2, and I. Misztal1, 1University of Georgia, Athens, 2INRA, UMR 1388 GenPhySE, Castanet-Tolosan, France

10:00 AM 293  
Accounting for discovery bias in genomic prediction.  
R. M. Thallman*, J. T. Parham1, L. A. Kuhn1, and J. P. Cassady2, 1USDA-ARS, US Meat Animal Research Center, Clay Center, NE, 2South Dakota State University, Brookings

10:15 AM 294  
Assessing genomic prediction accuracy for Holstein sires using bootstrap aggregation sampling and leave-one-out cross validation.  
A. Mikshowsky1, K. A. Weigel2, and D. Gianola1, 1University of Wisconsin-Madison, 2Department of Dairy Science University of Wisconsin-Madison

10:30 AM 295  
The impact of call rate on genotype accuracy.  
D. C. Purfield1, M. C. McClure2, and D. P. Berry1, 1Animal & Grassland Research and Innovation Centre, Teagasc, Moorepark, Fermoy, Co. Cork, Ireland, 2Irish Cattle Breeding Federation, Bandon, Ireland, 3Teagasc, Moorepark, Fermoy, Co. Cork, Ireland

10:45 AM 296  
Strategy for incorporating newly discovered causative genetic variants into genomic evaluations.  
G. R. Wiggins1, P. M. VanRaden, D. M. Bickhart, and M. E. Tooker, Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD

11:00 AM  
Break

11:15 AM 297  
High density marker panels, SNPs prioritizing and accuracy of genomic selection.  
L. Y. Chang1, S. Toghiani1, S. E. Aggrey2, and R. Rekaya1, 1Department of Animal and Dairy Science, University of Georgia, Athens, 1NutriGenomics Laboratory, Department of Poultry Science, University of Georgia, Athens, 1Institute of Bioinformatics, University of Georgia, Athens
11:30 AM 298  Selection of sequence variants to improve dairy cattle genomic predictions.
M. E. Tooker1, P. M. VanRaden1, D. M. Bickhart1, and J. O’Connell2, 1Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD, 2University of Maryland School of Medicine, Baltimore

11:45 AM 299  Genomic prediction of crossbred performance.
B. Harlizius1, M. S. Lopes1, J. Vandenplas2, C. A. Sevillano2, and J. W. M. Bastiaansen1, 1Topigs Norsvin Research Center, Beuningen, Netherlands, 2Wageningen University, Netherlands, 3Animal Breeding and Genomics Centre, Wageningen University, Netherlands

12:00 PM 300  SNP filtering using FST and implications for Genome wide association and phenotype prediction.
S. Toghiani1, L. Y. Chang1, S. E. Aggrey2,3, and R. Rekaya1,3, 1Department of Animal and Dairy Science, University of Georgia, Athens, 2NutriGenomics Laboratory, Department of Poultry Science, University of Georgia, Athens, 3Institute of Bioinformatics, University of Georgia, Athens

12:15 PM 301  A combined coalescence forward in time simulator software for pedigreed populations undergoing selection for complex traits.
J. T. Howard1, F. Tiezzi1, J. E. Pryce2, and C. Maltecca1, 1North Carolina State University, Raleigh, 2Department of Economic Development, Jobs, Transport and Resources, Bundoora, Australia

CSAS Graduate Student Oral Competition I

Chairs: Evaline Ibeagha-Awemu, Agriculture and Agri-Food Canada;
Kees Plaizer, University of Manitoba

9:30 AM - 12:30 PM

251 B

9:30 AM 456  Ensiling barley varieties selected for varied levels of in vitro NDF degradability.
N. G. Preston1,2, J. Nair1, P. Yu1, D. A. Christensen1, J. J. McKinnon1, and T. A. McAllister2, 1University of Saskatchewan, Saskatoon, SK, Canada, 2Lethbridge Research and Development Centre, Agriculture and Agri-food Canada, Lethbridge, AB, Canada, 3Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada

9:45 AM 457  Characterization of the variation in the daily excretion of faecal constituents and digestibility predictions in beef cattle fed feedlot diets using near infrared spectroscopy.
L. J. Janewicz1,2, G. B. Penner1, M. L. Swift1, J. J. McKinnon1, C. L. Waldner1, and T. A. McAllister1, 1Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada, 2Lethbridge Research and Development Centre, Agriculture and Agri-food Canada, Lethbridge, AB, Canada, 3Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada

10:00 AM 458  Effect of energy substrate and days on feed on plasma insulin response in finishing beef heifers.
F. Joy1, K. M. Wood, and G. B. Penner, Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada

10:15 AM 459  Effect of digestible fiber content of barley silage on lactation performance and chewing activity of lactating dairy cows in comparison with corn silage.
B. Refat1,2, D. A. Christensen1, J. J. McKinnon1, J. Nair1, A. D. Beattie1, T. A. McAllister1, W. Yang2, and P. Yu1, 1Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, 2Animal Production Department, Faculty of Agriculture, Zagazig University, Zagazig, Egypt, 3University of Saskatchewan, Saskatoon, SK, Canada, 4Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, 5Department of Plant Sciences, College of Agriculture and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, 6Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 7Department of Large Animal Clinical Sciences, Western College of Veterinary Medicine, University of Saskatchewan, Saskatoon, SK, Canada

10:30 AM 460  Daytime pasture vs. free-stall barn access: What do dairy cows with year-long outdoor experience prefer?
E. R. Shepley1, E. Vasseur2, and R. Bergeron1, 1McGill University, Sainte-Anne-de-Bellevue, QC, Canada, 2University of Guelph, ON, Canada

10:45 AM 461  Can regular exercise and more comfortable stalls improve cleanliness and lameness in tie-stall dairy cows?
S. Palacio1, S. Adam2, R. Bergeron1, D. Pellerin1, A. M. de Passille6, J. Rushen1, D. B. Haley1, T. J. DeVries1, and E. Vasseur1, 1McGill University, Sainte-Anne-de-Bellevue, QC, Canada, 2Valacta, Sainte-Anne-de-Bellevue, QC, Canada, 3Faculty of Land and Food Systems - University of British Columbia, Vancouver, BC, Canada, 4Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada, 5Department of Animal Biosciences, University of Guelph, ON, Canada
11:00 AM 462  Saccharomyces cerevisiae boulardii improves acute phase response and phagocytosis during weaning in dairy calves. B. Fomenky¹,², J. Chiquette¹, P. Y. Chouinard², and E. M. Ibeagha-Awemu¹, ¹Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada, ²Département des sciences animales, Université Laval, Québec, QC, Canada

11:15 AM 463  Effect of lipid supplementation and type of lipid on fatty acid composition of the ruminal epithelium and short-chain fatty acid transport. A. C. Verdugo¹ and G. B. Penner, Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada

11:30 AM 464  Degradation kinetics and bypassed nutrients of value added pellet products based on combination of new co-products from bio-fuel/bio-oil processing, low grade of peas and lignosulfonate chemical compound at different levels for ruminants. V. Guevara¹, D. A. Christensen, J. J. McKinnon, and P. Yu, Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada

11:45 AM 465  The different effects of ferrous glycine chelate and ferrous sulfate to intestinal porcine epithelial cells. Z. Zhuo¹, College of Animal Science, Zhejiang University, Hangzhou, China

12:00 PM 466  The effect of SNPs in the promoter on expression of CYP2E1 gene and boar taint. H. E. Archer¹, University of Guelph, ON, Canada

---

### Dairy Foods Division Symposium: Increasing Utilization of Dairy Co-Products

Chair: Rohit Kapoor, National Dairy Council

9:30 AM - 12:30 PM

151 B/C

9:30 AM 573  Welcoming Remarks

9:35 AM 574  Consumer demand, innovation and opportunity for co-products. B. Graves¹ and R. Kapoor, Dairy Management Inc., Rosemont, IL

9:50 AM 575  International market opportunities and regulatory hurdles. USDEC.

10:15 AM 576  Permeate - use as a sodium replacer / flavor implications. M. Drake¹, Southeast Dairy Foods Research Center, North Carolina State University, Raleigh

10:40 AM 577  Fractionating acid whey into value-added ingredients. K. E. Smith¹, University of Wisconsin-Madison

11:05 AM 578  Break

11:10 AM 579  Demineralization of delactose permeate and acid whey. J. K. Amamcharla¹, Food Science Institute, Animal Sciences and Industry, Kansas State University, Manhattan

11:35 AM 579  Advancements in drying lactose and acid whey. J. G. Ronckers¹, Relco, Willmar, MN

12:00 PM 580  Lactose derivatives and GOS as prebiotic fibers. T. C. Schoenfuss¹, University of Minnesota, Department of Food Science and Nutrition, St. Paul

12:25 PM 580  Concluding Remarks
Forages and Pastures I

Chair: Ken P. Coffey, University of Arkansas

9:30 AM - 12:30 PM

Grand Ballroom H

9:30 AM 627
A Bayesian approach to unmix diet composition.
N. Vargas Jurado1, K. M. Eskridge, and R. M. Lewis, University of Nebraska-Lincoln

9:45 AM 628
Dry matter yields and nutritional composition of corn and sorghum for silage in Florida.
G. Ferreira1, C. R. Staples2, and J. D. Wadini1,1Virginia Polytechnic Institute and State University, Blacksburg,
2University of Florida, Gainesville

10:00 AM 629
Influence of plant population, maturity and ensiling time on fermentation profile, nitrogen fractions and starch digestibility in earlage.
L. F. Ferrarett1, R. D. Shaver2, J. G. Lauer2, L. Brown1, R. Lutz1, J. Kennicker1, R. Schmidt1, and D. M. Taysom1,
1University of Florida, Gainesville, 2University of Wisconsin-Madison, 3Monsanto, St Louis, MO, 4Lallemand Animal Nutrition, Milwaukee, WI, 5Dairyland Laboratories Inc, Arcadia, WI

10:15 AM 630
Replacing alfalfa silage with birdsfoot trefoil silage varying in tannin content in lactating cow diets.
U. C. Hymes Fecht*, USDA-ARS Dairy Forage Research Center, Madison, WI

10:30 AM 631
Bacterial and fungal community structure of conventional and brown midrib corn hybrids ensiled with or without a combo inoculant at high dry matter concentrations.
J. J. Romero12, Y. H. Joo1, Y. Zhao2, J. Park3, M. A. Balseca-Paredes4, E. Gutierrez-Rodriguez5, and M. S. Castillo6,
1Department of Crop Science, North Carolina State University, Raleigh, 2Animal and Veterinary Sciences, University of Maine, Orono, 3Division of Applied Life Science (BK21Plus, Insti. of Agri. & Life Sci.), Gyeongsang National University, Jinju, The Republic of Korea, 4Department of Animal Nutrition and Feed Science, China Agricultural University, Beijing, China, 5Department of Food, Bioprocessing, and Nutrition Sciences, North Carolina State University, Raleigh

10:45 AM 632
Bacterial and fungal community structure of oats ensiled with or without a combo inoculant.
J. J. Romero12, Y. Zhao1, M. A. Balseca-Paredes1, Y. H. Joo1, J. Park4, E. Gutierrez-Rodriguez5, and M. S. Castillo6,
1Department of Crop Science, North Carolina State University, Raleigh, 2Animal and Veterinary Sciences, University of Maine, Orono, 3Department of Animal Nutrition and Feed Science, China Agricultural University, Beijing, China, 4Division of Applied Life Science (BK21Plus, Insti. of Agri. & Life Sci.), Gyeongsang National University, Jinju, The Republic of Korea, 5Department of Food, Bioprocessing, and Nutrition Sciences, North Carolina State University, Raleigh

11:00 AM
Break

11:15 AM 633
Microbial count, fermentation, and aerobic stability of regular and brown midrib corn hybrids ensiled with or without a combo inoculant at high moisture concentrations.
J. J. Romero12, J. Park3, M. A. Balseca-Paredes1, Y. Zhao2, Y. H. Joo1, A. Heitman1, E. Gutierrez-Rodriguez5, and M. S. Castillo6,
1Department of Crop Science, North Carolina State University, Raleigh, 2Animal and Veterinary Sciences, University of Maine, Orono, 3Division of Applied Life Science (BK21Plus, Insti. of Agri. & Life Sci.), Gyeongsang National University, Jinju, The Republic of Korea, 4Department of Animal Nutrition and Feed Science, China Agricultural University, Beijing, China, 5Department of Food, Bioprocessing, and Nutrition Sciences, North Carolina State University, Raleigh

11:30 AM 634
Forage quality of two different pasture systems incorporating warm and cool season forages for grazing organic dairy cattle.
K. E. Ruh12, B. J. Heins3, and J. Paulson1,1University of Minnesota, Saint Paul, 2University of Minnesota West Central Research and Outreach Center, Morris, 3University of Minnesota Extension, Rochester

11:45 AM 635
Meta-analysis of the effect of homolactic and facultative heterolactic bacteria inoculation on silage quality: Aerobic stability and yeast, mold and clostridia counts.
A. S. Oliveira1, Z. G. Weinberg2, A. A. P. Cervantes3, K. G. Arriola1, I. M. Ogunade1, Y. Jiang1, D. Kim3, M. C. M. Gonçalves5, D. Vyas3, and A. T. Adesogan1, 1Universidade Federal de Mato Grosso - Sinop, Sinop, Brazil, 2Department of Food Quality and Safety, Agricultural Research Organization, The Volcani Center, Rishon Le Zion, Israel, 3UF/IFAS, Gainesville, FL, 4Instituto Federal Goiano, Rio Verde, Brazil

12:00 PM 636
Meta-analysis of the effect silage inoculation with homolactic or facultative heterolactic bacteria on the performance of dairy cows.
A. S. Oliveira1, Z. G. Weinberg2, A. A. P. Cervantes3, K. G. Arriola1, I. M. Ogunade1, Y. Jiang1, D. Kim3, M. C. M. Gonçalves5, D. Vyas3, and A. T. Adesogan1, 1Universidade Federal de Mato Grosso - Sinop, Sinop, Brazil, 2Department of Food Quality and Safety, Agricultural Research Organization, The Volcani Center, Rishon Le Zion, Israel, 3UF/IFAS, Gainesville, FL, 4Instituto Federal Goiano, Rio Verde, Brazil
**International Animal Agriculture Symposium:**  
*The Future of Pastoral Production Systems*

**Chair:** Filippo Miglior, Centre for Genetic Improvement of Livestock, University of Guelph  
**Sponsor:** EAAP  
**9:30 AM - 12:00 PM**  
**150 B/C**

**Wednesday, July 20, 2016**

### International Animal Agriculture Symposium: The Future of Pastoral Production Systems

Chair: Filippo Miglior, Centre for Genetic Improvement of Livestock, University of Guelph

Sponsor: EAAP

9:30 AM - 12:00 PM

150 B/C

**9:30 AM**  
**835**  
**ASAS-EAAP Speaker:** Contribution of pastoral systems to global food security and potential for sustainable intensification.  
A. M. Motter1, F. Teillard, G. Cinardi, and G. Velasco Gil, Food and Agriculture Organization of the United Nations, Rome, Italy

**10:00 AM**  
**836**  
**Opportunities for international research and development through the Feed the Future Innovation Lab for Livestock Systems.**  
A. T. Adesogan1, UF/IFAS, Gainesville, FL

**10:30 AM**  
**837**  
**Community-based breeding programs: A sustainable solution for livestock keepers?**  
M. Wurzinger1, A. Haile2, B. Rischkowsky3, C. P. VanTassell4, T. S. Sonstegard5, O. Mwai6, and J. Stölker7, 1BOKU-University of Natural Resources and Life Sciences, Vienna, Austria, 2International Centre for Agricultural Research in the Dry Areas, Addis Ababa, Ethiopia, 3International Center for Agricultural Research in the Dry Areas, Addis Ababa, Ethiopia, 4Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD, 5USDA-ARS, BFGL, Beltsville, MD, 6International Livestock Research Institute, Nairobi, Kenya, 7University of Natural Resources and Life Sciences, Vienna, Austria

**11:00 AM**  
**838**  
**Innovative dissemination of small ruminant genetic improvement by a non-government institute in India.**  
C. Nimbkar1 and P. Ghalsasi, Nimbkar Agricultural Research Institute, Phaltan, Dist. Satara, Maharashtra, India

**11:30 AM**  
**839**  
**Pastoral systems in the developing world: Trends, needs, and future scenarios.**  
D. L. Coppock1, M. Fernandez-Gimenez2, P. Hiernaux3, E. Huber-Sannwald4, C. Schloeder5, C. Valdivia6, J. T. Arredondo7, M. Jacobs8, C. Turner8, and M. Turner8, 1Utah State University, Logan, 2Colorado State University, Fort Collins, 3Centre National de la Recherche Scientifique, Geosciences Environment Toulouse, Toulouse, France, 4Instituto Potosino de Investigacion Cientifica y Tecnologica, San Luis Potosi, Mexico, 5Oikos Services LLC, Fortine, MT, 6University of Missouri, Columbia, 7International Potato Center, Lima, Peru, 8University of Wisconsin-Madison

### Nonruminant Nutrition: Enzymes

Chair: K. M. Ajuwon, Purdue University  
Sponsor: JBS United, Dupont  
**9:30 AM - 12:30 PM**  
**Grand Ballroom F**

**9:30 AM**  
**927**  
**Effect of timing of post-weaning supplementation of xylanase on growth performance, nutrient digestibility and fecal microbial composition in weanling pigs.**  
H. Lu1, H. Yan1, H. Masey O’Neill2, C. L. Bradley2, M. Bedford2, P. Wilcock2, C. Nakatsu1, O. Adeola1, and K. M. Ajuwon1, 1Purdue University, West Lafayette, IN, 2AB Vista Feed Ingredients, Marlborough, United Kingdom

**9:45 AM**  
**928**  
**Effect of xylanase and live yeast supplementation on growth performance and gut microflora diversity of growing pigs.**  
H. Lu1, H. Yan1, H. Masey O’Neill2, C. L. Bradley2, M. Bedford2, P. Wilcock2, C. Nakatsu1, O. Adeola1, and K. M. Ajuwon1, 1Purdue University, West Lafayette, IN, 2AB Vista Feed Ingredients, Marlborough, United Kingdom

**10:00 AM**  
**929**  
**Effects of dietary supplementation of β-mannanase on digesta viscosity and intestinal health of nursery pigs.**  
I. Park1, Y. J. Kim, and S. W. Kim, North Carolina State University, Raleigh

**10:15 AM**  
**930**  
**Effects of dietary supplementation with xylanase on growth performance, ileal digesta viscosity, apparent ileal digestibility and excreta noxious gas emission of broilers fed wheat-based diets.**  
W. C. Liu1, J. H. Park, S. I. Lee, S. D. Upadhyaya, and I. H. Kim, Department of Animal Resource & Science, Dankook University, Cheonan, The Republic of South Korea

**10:30 AM**  
**931**  
**Effects of corn-expressed phytase on growth performance and gut health of nursery pigs.**  
J. K. Lee1, H. Chen, I. Park, and S. W. Kim, North Carolina State University, Raleigh

**10:45 AM**  
**932**  
**Effects of xylanase and protease on gut health and growth performance of newly hatched broiler chickens.**  
M. P. Herchler1, L. Zheng, and S. W. Kim, North Carolina State University, Raleigh

**11:00 AM**  
Break
Effect of supplemental enzyme on growth performance, digesta viscosity, apparent total tract digestibility of nutrients in nursery pigs.
U. P. Tiwari*1, H. Chen2, S. W. Kim2, and R. Jha1, 1University of Hawaii at Manoa, Honolulu, 2North Carolina State University, Raleigh

Effects of full fat or defatted rice bran and microbial xylanase on growth performance of weanling pigs.
G. A. Casas* and H. H. Stein, University of Illinois at Urbana-Champaign

Addition of optimal non-starch polysaccharides enzymes using in vitro method to a corn-soybean meal diet and a corn-miscellaneous meal diet for growing pigs.
L. Gao, L. Chen, R. Zhong, L. Zhang, and H. Zhang*, Institute of Animal Sciences, Chinese Academy of Agricultural Sciences, Beijing, China

Growth performance, bone measurements, and P digestibility in nursery pigs fed diets supplemented with increasing levels of a new bacterial 6-phytase expressed in Pseudomonas fluorescens.

Nutritive value of cold-pressed soybean cake with or without extrusion or supplementation of multi-carbohydrase for pigs.
T. A. Woyengo*, R. Patterson2, and C. L. Levesque1, 1South Dakota State University, Brookings, 2Canadian Biosystems, Calgary, AB, Canada

**Physiology and Endocrinology:**
**Reproductive Technologies and Fertility**

Chair: Jeffrey S. Stevenson, Kansas State University

9:30 AM - 11:30 PM

9:30 AM 1127
Effects of OmniGen-AF on superovulation response and embryo quality in donor beef cows.
A. P. Snider*1,2, M. R. Gellings1, S. A. Armstrong1, D. J. McLean*, and A. R. Menino1, 1Department of Animal and Rangeland Sciences, Oregon State University, Corvallis, 2Phibro Animal Health Corporation, Quincy, IL

9:45 AM 1128
OmniGen-AF reduces basal plasma cortisol as well as cortisol release to adrenocorticotropic hormone or corticotrophin releasing hormone and vasopressin in lactating dairy cows under thermoneutral or acute heat stress conditions.
M. L. McBride1, N. C. Burdick Sanchez2, J. A. Carroll2, P. R. Broadway3, X. O. Ortiz4, J. L. Collier*, D. McLean*, J. D. Chapman1, H. G. Kattesh5, and R. J. Collier1, 1University of Arizona, Tucson, 2USDA-ARS, Livestock Issues Research Unit, Lubbock, TX, 3Texas Tech University, Wolfforth, 4Phibro Animal Health Corporation, Quincy, IL, 5Department of Animal Science, University of Tennessee, Knoxville

10:00 AM 1129
Reproductive performance with automated activity monitoring or a timed insemination program for first insemination in dairy cows.
J. Denis-Robichaud*, R. L. A. Cerri2, A. Jones-Bitton1, and S. J. LeBlanc1, 1Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada, 2Applied Animal Biology, Faculty of Land and Food Systems, University of British Columbia, Vancouver, BC, Canada

10:15 AM 1130
Establishing fertility benchmarks for in-line automated milk progesterone monitoring in postpartum dairy cows.
L. M. Mayo* and M. C. Lucy, University of Missouri, Columbia,

10:30 AM 1131
The effects of aspirin on pregnancy rates and pregnancy specific protein B in lactating dairy cows during the summer.
J. A. Spencer*1, K. G. Carnahan1, B. Shaﬁ1, J. Dalton2, and A. Ahmadzadeh1, 1University of Idaho, Moscow; 2University of Idaho, Caldwell

10:45 AM 1132
Temporarily decreasing progesterone after timed artificial insemination decreased expression of ISG15 in blood leukocytes, serum PSPB concentrations, and embryo size in lactating Holstein cows.
P. D. Carvalho, C. E. Consentini, S. R. Weaver, R. V. Barletta, L. L. Hernandez, and P. M. Fricke*, Department of Dairy Science, University of Wisconsin-Madison

11:00 AM 1133
Effects for fertility of processing steps of a new technology platform for producing sexed sperm.
M. A. Faust*, J. Bethhauser, A. Storch, and S. Crego, ABS Global, Inc., De Forest, WI

11:15 AM 1134
Fertility and sex of calf results from a new commercial scale technology platform for producing sexed sperm.
M. A. Faust*, J. Bethhauser, S. Crego, and A. Storch, ABS Global, Inc., De Forest, WI
Production, Management and the Environment:
Environment
Chair: Vinicius R. Moreira, Louisiana State University
9:30 AM - 12:30 PM
151 E/F

9:30 AM 1196  Use of a novel continuous culture fermentor system for in vitro determination of enteric methane output from ruminants.
A. I. Roca-Fernandez*, S. L. Dillard, M. D. Rubano, R. J. Tillmann, and K. J. Soder, USDA-ARS, University Park, PA

9:45 AM 1197  Effect of introducing legumes containing condensed tannins in an orchardgrass diet on forage nutritive value and enteric methane output in continuous culture.
A. I. Roca-Fernandez*, S. L. Dillard, M. D. Rubano, C. J. Dell, and K. J. Soder, USDA-ARS, University Park, PA

10:00 AM 1198  Effect of summer annuals on ruminal fermentation and methane output in continuous culture.

10:15 AM 1199  Analysis and review of publicly available GreenFeed results.
S. Zimmerman* and P. R. Zimmerman, C-lock, Inc., Rapid City, SD

10:30 AM 1200  Evaluation of an enteric methane emissions measurement system for cattle.
E. M. Andreini*, M. S. Calvo-Lorenzo, C. J. Richards, J. E. White, and S. E. Place, Oklahoma State University, Stillwater, University of California-Davis, Elanco Animal Health, Fayetteville, AR

10:45 AM 1201  Impact of corn or soybean in crops and lactating cow diets on estimated greenhouse gas emission from Wisconsin certified organic dairy farms.
D. Liang*, F. Sun, M. A. Wattiaux, V. Cabrera, and E. M. Silva, University of Wisconsin-Madison

11:00 AM 1202  Winter feeding systems and farm greenhouse gas emissions.
A. W. Alemu*, R. R. Doce, A. C. Dick, J. Basarab, R. Kröbel, K. Haugen-Kozyra, and V. Baron, Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, Lacombe Research and Development Centre, Agriculture and Agri-Food Canada, Lacombe, AB, Canada, Lacombe Research Centre, Alberta Agriculture and Forestry, Lacombe, AB, Canada, Viresco Solutions, Calgary, AB, Canada

11:15 AM 1203  Grazing management and farm greenhouse gas emission intensity of beef production systems.
A. W. Alemu*, H. Janzen, S. Little, X. Hao, D. Thompson, V. Baron, A. D. Iwaasa, K. A. Beauchemin, and R. Kröbel, Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, Lacombe Research and Development Centre, Agriculture and Agri-Food Canada, Lacombe, AB, Canada, Agriculture and Agri-Food Canada, Swift Current, SK, Canada

11:30 AM 1204  A life cycle assessment of a beef feedlot finishing ration supply chain in California.
S. J. Werth*, J. W. Oltjen, E. Kebreab, and F. M. Miltoehner, University of California-Davis

11:45 AM 1205  Estimating farm-gate ammonia emissions from Canadian beef production in 1981 as compared with 2011.
G. Legesse*, R. Kroebel, A. Alemu, K. H. Ominski, E. J. McGough, K. A. Beauchemin, and T. A. McAllister, Department of Animal Science, University of Manitoba, Winnipeg, MB, Canada, Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada

12:00 PM 1206  The effect of reduced crude protein, synthetic amino acid supplemented diets on nutrient excretion in wean to finish swine.
C. E. Vonderohe*, K. M. Mills, M. D. Asmus, E. R. Otto-Tice, J. Ni, C. V. Maxwell, B. T. Richert, and J. S. Radcliffe, Purdue University, West Lafayette, IN, Department of Animal Science, Division of Agriculture, University of Arkansas, Fayetteville

12:15 PM 1207  Oxalic acid production by Aspergillus niger when using whey permeate lactose as a carbon source.
**Ruminant Nutrition: Feed Additives I**

Chair: Agustin G. Rius, The University of Tennessee

Sponsor: Ajinomoto

9:30 AM - 12:30 PM

155 E

9:30 AM 1361  
Effect of rumen-protected *Capsicum oleoresin* on productivity and responses to a glucose tolerance test in lactating dairy cows.

J. Oh1, M. Harper1, F. Giallongo2, E. H. Wall2, D. M. Bravo2, and A. N. Hristov1, 1The Pennsylvania State University, University Park, 2Panconsa, Geneva, Switzerland

9:45 AM 1362  
Supplementation of β-mannanase (CTCZYME) to lactating dairy cattle diets improves feed conversion efficiency and somatic cell count.

E. Kebreab1*, T. Tewoldebrhan1, R. Appuhamy1, M. Niu1, S. Seo2, S. Jeong2, and J. J. Lee3, 1University of California-Davis, 2Chungnam National University, Daejeon, The Republic of Korea, 3CTC Bio Inc, Seoul, The Republic of Korea

10:00 AM 1363  
Effects of essential oils and exogenous enzyme in feedlot finishing cattle diets high in flint corn ground at different particle sizes.

M. A. P. Meschiatti1, J. M. M. D. Moraes1, T. S. Acedo2, T. S. Acedo2, L. F. M. Tamassia1, C. S. Cortinhas1, V. N. D. Gouvea2, J. R. Dórea1, and F. A. P. Santos3, 1USP, Sao Paulo, Brazil, 2DSM Nutritional Products SA, Sao Paulo, Brazil, 3University of Wisconsin-Madison, 4University of São Paulo, Piracicaba, Brazil

10:15 AM 1364  
The potential of a buffer (calcified marine algae) or plant extract (*Capsicum*) in combination with or to replace an ionophore (monensin) in lamb feedlot diets.

R. F. Gouws1*, F. M. Hagg2, L. J. Erasmus3, R. H. van der Veen4, and D. E. Holm5, 1Department of Animal and Wildlife Science, University of Pretoria, Pretoria, South Africa, 2Allied Nutrition, Pretoria, South Africa, 3Department of Production Animal Studies, Faculty of Veterinary Science, University of Pretoria, Pretoria, South Africa

10:30 AM 1365  
Health, milk yield and milk quality records evaluated in 787 dairy herds before and during OmniGen-AF supplementation to dry and lactating cows.

J. D. Chapman1, S. S. Bascom1, L. O. Elzy1, G. A. Holub1, J. P. Jarrett1*, J. S. Lanier1, D. Kirk1, D. E. Nuzback1, A. D. Rowson1, and T. J. Wistuba1, 1Phibro Animal Health Corporation, Quincy, IL, 2University of Georgia, Athens

10:45 AM 1366  
Comparison of the effects of laidedmocyn propionate plus chlortetracycline vs. monensin plus tylosin and multiple beta-agonist feeding strategies on feedlot performance and carcass characteristics.

A. J. Thompson1*, Z. K. F. Smith1, M. Corbin1, L. B. Harper2, and B. J. Johnson3, 1Texas Tech University, Lubbock, 2Zoetis, Florham Park, NJ

11:00 AM 1367  
Effect of different inclusion rates of Fermenten on performance, carcass characteristics, and total tract digestibility of growing Angus crossbred steers.

M. E. Garcia-Ascolani1*, T. M. Schulmeister1, M. Ruiz-Moreno1, D. D. Henry1, F. M. Ciriaco1, G. M. Silva1, P. L. P. Fontes1, G. C. Lamb1, and N. DiLorenzo1, 1University of Florida, North Florida Research and Education Center, Marianna, 2UF/IFAS, Range Cattle Research and Education Center, Ona, FL

11:15 AM 1368  
A meta-analysis of lasalocid effects on rumen measures, beef and dairy performance, and carcass traits in cattle.

H. M. Golder1*, T. Cowper2, and I. J. Lean1, 1Scibus, Camden, Australia, 2Zoetsis Australia, Sydney, Australia

11:30 AM 1369  
Close-up diet DCAD, urine pH, and total plasma calcium at calving on a commercial Jersey herd.

A. Valdecabres1, D. Rolle1, V. J. Ramirez1, S. Rodriguez1, and N. Silva-del-Rio, Veterinary Medicine Teaching and Research Center, University of California-Davis, Tulare

11:45 AM 1370  
Effects of bismuth subsalicylate and calcium-ammonium nitrate on in vitro fermentation of bahiagrass hay with supplemental molasses.

D. D. Henry1*, F. M. Ciriaco1, R. C. Araujo1, M. E. Garcia-Ascolani1, P. L. P. Fontes1, N. Oosthuizen1, C. D. Sanford1, T. M. Schulmeister1, M. Ruiz-Moreno1, G. C. Lamb1, and N. DiLorenzo1, 1University of Florida, North Florida Research and Education Center, Marianna, 2GRASP Ind. & Com. LTDA, Curitiba, Brazil

12:00 PM 1371  
The effect of a monensin controlled release capsule at prepartum on betahydroxy butyrate, milk yield, fat, protein, postpartum diseases, rectal temperature, and body condition in Holstein cows.

P. Melendez1, A. Arevalo2, P. J. Pinedo3, and M. Duchens2, 1University of Missouri, Columbia, 2University of Chile, Santiago, 3Colorado State University, Fort Collins

12:15 PM 1372  
Effects of essential oils and exogenous enzyme in low starch diets for finishing feedlot cattle.

T. S. Acedo1, L. F. M. Tamassia1, C. S. Cortinhas1, V. N. D. Gouvea1, V. R. M. Couto1, and J. J. D. R. Fernandes1, 1DSM Nutritional Products SA, Sao Paulo, Brazil, 2Universidade Federal de Goiás, Goiânia, Brazil, 3UFG, Goiania, Brazil
Ruminant Nutrition: Metabolism
Chair: Jan C. Plaizier, University of Manitoba
9:30 AM - 12:30 PM
155 F

9:30 AM 1507
The effects of heat stress on protein metabolism in lactating Holstein cows.
S. Gao1, J. Guo1, S. Quan1, X. Nan1, L. H. Baumgard1, and D. Bu1,2,3, 1State Key Laboratory of Animal Nutrition, Institute of Animal Sciences, Chinese Academy of Agricultural Sciences, Beijing, China, 2The Animal Physiology and Biochemistry Laboratory of the Ministry of Agriculture in Nanjing Agriculture University, Nanjing, China, 3Iowa State University, Ames, 4Hunan Co-Innovation Center of Animal Production Safety, CICAPS, Changsha, China, 5CAAS-ICRAF Joint Laboratory of Agroforestry and Sustainable Animal Husbandry, World Agroforestry Centre, East and Central Asia, Beijing, China

9:45 AM 1508
The effect of fructose infusion on dry matter intake in dairy cattle.
R. Yair* and M. S. Allen, Michigan State University, East Lansing

10:00 AM 1509
Effects of maternal nutrient restriction and melatonin supplementation on vascularity in ovine maternal and fetal jejenum.
G. Jia*, North Dakota State University, Fargo

10:15 AM 1510
Production level of dairy cows affects the extent of diet-induced milk fat depression.
Y. Sun*, M. S. Allen, and A. L. Lock, Michigan State University, East Lansing

10:30 AM 1511
Effect of production level and parity on responses of milk fat to supplementation with 2-hydroxy-4-(methylthio)butanoate (HMTBa).
M. Baldin1, H. A. Tucker2, and K. J. Harvatine1, 1The Pennsylvania State University, University Park, 2Novus International Inc., St. Charles, MO

10:45 AM 1512
The timing of feed availability entrains the circadian rhythm of milk synthesis in dairy cattle.
I. J. Salfer*, J. Y. Ying, and K. J. Harvatine, The Pennsylvania State University, State College

11:00 AM 1513
Characterization of peripartum liver and skeletal muscle ceramide concentrations in lean and overweight Holstein dairy cows.
S. Saed Samii*, J. E. Rico, and J. W. McFadden, West Virginia University, Morgantown

11:15 AM 1514
Variation in rumen epithelial fatty acid metabolism and cholesterol homeostasis contributes to different responses to the high grain diet adaptation in beef cattle.
K. Zhao1,2, Y. Chen1, G. B. Penner2, M. Oba1, and L. L. Guan1, 1Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2College of Medicine, Xi’an Jiaotong University, Xi’an, China, 3Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada

11:30 AM 1515
Dose response effect of acetate on milk fat synthesis in lactating dairy cows.
N. L. Urrutia1, M. Baldin1, J. Y. Ying2, Y. Fan1,3, K. J. Harvatine1, and J. Carvalho1, 1The Pennsylvania State University, University Park, 2The Pennsylvania State University, State College, 3China Agricultural University, Beijing, China

11:45 AM 1516
Lipogenic gene network expression in mammary tissue in response to abomasal infusion of casein, glucose and acetate into feed-restricted lactating cows.
M. A. C. Danes1,2, F. Batistel3, G. A. Broderick4, M. A. Wattiaux1, and J. J. Loor1, 1Federal University of Lavras, Brazil, 2University of Wisconsin-Madison, 3University of Illinois at Urbana-Champaign, 4Broderick Nutrition & Research, LLC, Madison, WI

12:00 PM 1517
The effects of feeding increasing concentrations of corn oil on energy metabolism and nutrient balance in finishing beef steers.

12:15 PM 1518
Isolation and comparison of expression of novel glucose transporters, GLUT3 and GLUT14, in bovine uteroplacental tissues from days 16 to 50 of gestation.
Small Ruminant I
Chair: Travis R. Whitney, Texas A&M AgriLife Research
9:30 AM - 12:30 PM
150 E/F

9:30 AM
Introduction Remarks

9:35 AM 1672
Protein supplementation and herbage allowance for pregnant ewes grazing low-quality pasture.
C. H. E. C. Poli1,2, B. M. Paulino1, A. B. Moraes1, Z. M. S. Castilhos2, F. C. A. Silva1, N. M. Fajardo3, C. M. Pimentel4, D. B. David5, E. B. Azevedo6, and J. J. Villalba1, 1Universidade Federal do Rio Grande do Sul, Porto Alegre, Brazil, 2Utah State University, Logan, 3FUNDAÇÃO ESTADUAL DE PESQUISA AGROPECUARIA, Porto Alegre, Brazil, 4Universidade de Brasília, Brasília, Brazil, 5FUNDAÇÃO ESTADUAL DE PESQUISA AGROPECUARIA, São Gabriel, Brazil, 6Universidade Federal do Pampa, Itaqui, Brazil

9:50 AM 1673
Food restriction in ewes during different pregnancy periods affects milk production and lamb growth.
C. H. E. C. Poli1,2, L. A. Sphor2, A. L. G. Monteiro3, J. F. Tontini2, C. Bremm4, P. C. F. Carvalho5, and J. J. Villalba1, 1Utah State University, Logan, 2Universidade Federal do Rio Grande do Sul, Porto Alegre, Brazil, 3Universidade Federal do Paraná, Curitiba, Brazil, 4FUNDAÇÃO ESTADUAL DE PESQUISA AGROPECUARIA, Porto Alegre, Brazil

10:05 AM 1674
Relationship between infrared thermography measures and feed efficiency in New Zealand sheep.
S. P. Miller1, S. Dowling2, J. C. Munro3, Y. R. Montanholi3, J. R. Webster2, and P. L. Johnson1, 1AgResearch, Mosgiel, New Zealand, 2AgResearch, Hamilton, New Zealand, 3Department of Plant and Animal Sciences, Faculty of Agriculture, Dalhousie University, Truro, NS, Canada

10:20 AM 1675
Ground redberry juniper and urea in supplements fed to Rambouillet ewe lambs on growth, blood serum, and fecal N.
T. R. Whitney1 and J. P. Muir2, 1Texas A&M AgriLife Research, San Angelo, 2Texas A&M AgriLife Research, Stephenville

10:35 AM 1676
The relationship between body condition score and body weight, body linear measurements and real-time ultrasound body composition measurements in Alpine does prior to breeding and kidding.
F. R. B. Ribeiro1, B. Barcelos2, L. C. Nuti1, W. B. Foxworth1, S. K. Lewis1, Y. Jung1, S. Horner1, B. L. Jackson1, and G. R. Newton1, 1Prairie View A&M University, TX, 2School of Animal Science and Food Engineering, University of Sao Paulo, Pirassununga, Brazil

10:50 AM
Break

11:05 AM 1677
Effects of selection for high and low juniper-consuming goats on rumen fermentation characteristics.
W. C. Stewart1, T. R. Whitney2, E. J. Scolljegerdes1, D. F. Waldron1, J. W. Walker4, and J. M. B. Musser4, 1Montana State University, Bozeman, 2Texas A&M AgriLife Research, San Angelo, 3Texas A&M, San Angelo, 4Texas A&M AgriLife Research, San Angelo, 5Texas A&M, College Station

11:20 AM 1678
Ground redberry juniper and urea in DDGS-based supplements do not adversely affect ewe lamb rumen microbial communities.
S. L. Ishaq1, C. J. Yeoman1, and T. R. Whitney2, 1Montana State University, Bozeman, 2Texas A&M AgriLife Research, San Angelo

11:35 AM 1679
Fatty acid profile, sensory traits, and aromatic compounds of chops from lambs fed ground woody plants as roughage in feedlot finishing diets.
K. R. Wall1, C. R. Kerth1, T. R. Whitney2, S. B. Smith1, J. L. Glasscock1, and J. T. Sawyer4, 1Texas A&M University, College Station, 2Texas A&M AgriLife Research, San Angelo, 3Texas A&M AgriLife, San Angelo, 4Tarleton State University, Department of Animal Science and Veterinary Technology, Stephenville, TX

11:50 AM 1680
Feeding behavior of grazing lambs in a silvopastoral system.
F. de Oliveira Scarpino van Cleepl, L. A. Sphor1, G. C. Nascimento1, 1Universidade Federal do Rio Grande do Sul, Porto Alegre, Brazil, 2CNPq, Brasília, Brazil

12:05 PM 1681
Intake, digestibility and performance of hair sheep lambs fed with ammoniated cotton gin trash treated with exogenous fibrolytic enzymes.
D. G. Quadros1, Bahia State University, Barreiras, Brazil
### Teaching Undergraduate and Graduate Education Symposium: Animal Science Education in the Current Environment

**Chair:** Antonio Faciola, University of Nevada  
**Sponsor:** Elanco Animal Health  
**Time:** 9:30 AM - 12:30 PM  
**Location:** 155 B

A2 Milk marketing and human health.
J. Nystrom* and D. R. Winston, Virginia Polytechnic Institute and State University, Blacksburg

Ultrasonic separation of milk to select for fat globule size distribution.
S. P. Ile* and D. R. Olver, The Pennsylvania State University, University Park

**ADSA Dairy Foods Graduate Student Oral Competition**

**Chair:** Randy Brandsma, Schreiber Foods

**2:00 PM - 4:30 PM**

**2:00 PM** 700 Anti-obesity and anti-diabetic properties of lactoferrin are independent of calorie intake.
R. C. Zapata*, A. Pezeshki*, A. Singh*, and P. K. Chelikani†, 1University of Calgary, AB, Canada, 2Oklahoma State University, Stillwater

**2:15 PM** 701 Effect of milk protein intake and casein:whey ratio in breakfast meals on postprandial glucose, satiety ratings and subsequent meal intake.
B. Kung*, S. Paré, A. J. Tucker*, G. H. Anderson*, A. J. Wright†, and H. D. Geoff†, 1University of Guelph, ON, Canada, 2University of Toronto, ON, Canada

**2:30 PM** 702 Evaluation of modified stainless steel surfaces targeted to reduce biofilm formation by common dairy related sporeformers.
S. Jindal*, S. Anand†, J. K. Amamcharla*, and L. Metzger†, 1South Dakota State University, Brookings, 2Food Science Institute, Animal Sciences and Industry, Kansas State University, Manhattan

**2:45 PM** 703 Gelation properties of micellar casein concentrate when recombined with cream.
Y. Lu†, D. J. McMahon, and A. H. Vollmer, Western Dairy Center, Utah State University, Logan

**3:00 PM**

Break

**3:15 PM** 704 Thermal stability of microfiltered and ultrafiltered retentates.
I. R. T. Renhe* and M. Corredig†, 1University of Guelph, ON, Canada, 2Gay Lea Foods, Guelph, ON, Canada

**3:30 PM** 705 Effect of milk protein composition on in vivo gastric digestion of a model infant formula.
N. Rafiee Tari*, M. Z. Fan, and M. Corredig, University of Guelph, ON, Canada

**3:45 PM** 707 Efficient removal of spores from skim milk using microfiltration: Spore size and surface property considerations.
E. R. Griep*, Y. Cheng, and C. I. Moraru, Cornell University, Ithaca, NY

**ADSA Production Division Graduate Student Oral Competition: Ph.D.**

**Chair:** Gerd Bobe, Oregon State University

**2:00 PM - 5:15 PM**

**2:00 PM** 728 Effects of supplementing rumen-protected methionine on lactational performance of Holstein dairy cows during early and mid-lactation.
M. A. Fagundes†, S. A. Blaser*, S. Y. Yang†, J. S. Eun†, and J. O. Moon*, 1School of Veterinary Medicine, Utah State University, Logan, 2Department of Animal, Dairy, and Veterinary Sciences, Utah State University, Logan, 3CJ CheilJedang Research Institute of Biotechnology, Sowon, The Republic of Korea

**2:15 PM** 729 Effect of dextrose and purified starch at two levels of rumen degradable protein on lactation performance and enteric methane emission in dairy cows.
F. Sun*, M. J. Aguerre, and M. A. Wattiaux, University of Wisconsin-Madison

**2:30 PM** 730 Influence of mixed cropping of corn and soybean with different seeding rates on forage yield, quality and nutrient yield grown under organic condition.
I. P. Acharya*, X. Gu*, and D. P. Casper†, 1Dairy Science Department, South Dakota State University, Brookings, 2Department of Plant Science, South Dakota State University, Brookings
**Association between circulating progesterone during the luteal phase and estrous activity detected by automated activity monitoring in dairy cattle.**  
J. Denis-Robichaud¹, S. J. LeBlanc¹, A. Jones-Bitton¹, and R. L. A. Cerri², ¹Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada, ²Applied Animal Biology, Faculty of Land and Food Systems, University of British Columbia, Vancouver, BC, Canada

**Effect of prepartum physical activity on behavior and immune competence of dairy cows.**  
R. A. Black¹, G. M. Pighetti, and P. D. Krawczel, University of Tennessee, Knoxville

**Associations between preventive hoof trimming, activity and resting behaviors.**  
G. Stoddard¹ and G. Cramer¹, ¹University of Minnesota Twin-Cities, Saint Paul, ²Department of Veterinary Population Medicine, College of Veterinary Medicine, University of Minnesota, St. Paul

**Enhanced pre-weaning nutrition increases mammary gland development without negatively affecting tissue composition in Holstein heifer calves.**  
A. J. Getiger*, R. M. Akers, and C. L. M. Parsons, Virginia Polytechnic Institute and State University, Blacksburg

**Effects of fuels derived from starch digestion on feeding behavior of cows in the postpartum period.**  
L. B. Gualdron-Duarte* and M. S. Allen, Michigan State University, East Lansing

**Fetuin-A: A novel biomarker for lipolysis-induced metabolic stress in transition dairy cows.**  
C. Strieder-Barboza¹, W. Raphael², S. E. Schmidt³, A. L. Lock³, L. M. Sordillo³, and G. A. Contreras³, ¹Department of Large Animal Clinical Sciences, Michigan State University, East Lansing, ²Michigan State University, East Lansing

**The effect of trace mineral source and fiber source on total-tract nutrient digestion.**  
M. J. Faulkner⁴, K. R. Perryman⁵, and W. P. Weiss⁵, ¹Department of Animal Sciences, OARDC, The Ohio State University, Wooster, ²Miconutrients Inc., Indianapolis, IN

**Economic value of cooling dry cows across the United States.**  
F. C. Ferreira¹,², A. De Vries³, G. E. Dahl³, and R. Gennari³, ¹Embrapa Gado de Leite, Juiz de Fora, Brazil, ²Department of Animal Sciences, University of Florida, Gainesville

**Palmitic acid feeding increases hepatic ceramide accumulation and modulates expression of genes responsible for ceramide synthesis in mid-lactation dairy cows.**  
J. E. Rico*, A. T. Mathews, and J. W. McFadden, West Virginia University, Morgantown

**Assessment of performance, oxidative stress status, and plasma AA profiles in peripartal dairy cows supplemented with rumen-protected methionine or choline and with different liver functionality indices.**  
Z. Zhou¹, M. Vailati Riboni¹, E. Trevisi², D. N. Luchini³, and J. J. Loor⁴, ¹University of Illinois at Urbana-Champaign, ²University Cattolica del Sacro Cuore, Piacenza, Italy, ³Adisseo S.A.S., Alpharetta, GA, ⁴University of Georgia, Athens

---

**ADSA-SAD (Student Affiliate Division)**  
**Undergraduate Student Oral Competition: Dairy Production**

**Chair:** Cathleen C. Williams, Louisiana State University  
**2:00 PM - 3:30 PM**  
251 D

**2:00 PM 41**  
Gene therapy and the prevention of mastitis in dairy cattle.  
K. Boudreaux⁴, Louisiana State University, Baton Rouge

**2:15 PM 42**  
The importance of mastitis management practices in maintaining milk quality in the United States.  
K. Bochantin* and J. M. Bewley, University of Kentucky, Lexington

**2:30 PM 43**  
The impact of amount and quality of colostrum and subsequent transition milk on calf health and growth.  
J. Hardy*, K. M. Daniels, and D. R. Winston, Virginia Polytechnic Institute and State University, Blacksburg

**2:45 PM 44**  
A future for genomics in animal health through the Bovine Respiratory Disease Complex: Coordinated Agricultural Project.  
S. J. Thomsen* and J. F. Bohlen, University of Georgia, Athens

**3:00 PM 45**  
Breeding for strength may create frail cows.  
A. N. Gabel* and C. D. Dechow, The Pennsylvania State University, University Park

**3:15 PM 46**  
The links between uterine infection and infertility.  
N. Walker*, University of Florida, Gainesville
**ADSA-SAD (Student Affiliate Division)**  
**Undergraduate Student Oral Competition: Original Research**  
Chair: Jeffrey M. Bewley, University of Kentucky  
2:00 PM - 3:30 PM  
251 E

2:00 PM  47  
**Comparison of calving data among Jersey, Jersey x Holstein crosses, and Norwegian Red x Holstein x Jersey crosses.**  
*S. M. Royal*, K. A. E. Mullen, and S. P. Washburn, North Carolina State University, Raleigh

2:15 PM  48  
**Effects of a low moisture block supplement on cow distribution and time budget.**  
*A. J. DiGennaro*, A. R. Lee, B. A. Wadsworth, J. D. Clark, and J. M. Bewley, University of Kentucky, Lexington

2:30 PM  49  
**The influence of age and weaning on the structure of the gastrointestinal epithelium in Holstein bull calves.**  
*S. I. Pletts*, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada

2:45 PM  50  
**Effects of supplementing a commercial blend of anaerobic probiotic bacteria, MBiotix Calif, on the growth and health of pre-weaned and immediately post-weaned Holstein calves.**  
*R. E. Hudson*, Y. Liang, T. L. Harris, K. P. Sharon, and M. A. Ballou, Texas Tech University, Lubbock

3:00 PM  51  
**Assessing the correlation between teat end scores and presence of mastitis in lactating Holstein cows.**  

3:15 PM  52  
**Evaluating the effects of heat stress on rumen pH and temperature.**  
*L. Beckett*, R. R. White, and M. D. Hanigan, Virginia Polytechnic Institute and State University, Blacksburg

**Advances in Bovine Respiratory Disease**  
Chair: H. L. Neibergs, Washington State University  
Sponsor: USDA-NIFA  
2:00 PM - 5:00 PM  
Grand Ballroom C

2:00 PM  283  
**Genetic approaches to selection for resistance to bovine respiratory disease.**  
*J. E. Womack*, Texas A&M University, College Station

2:20 PM  284  
**Differential gene expression in cattle challenged with single pathogens of the bovine respiratory disease complex.**  
*L. J. Gershwin*1, A. Vaneenennaam1, J. F. Taylor2, J. Kim3, R. L. Toaff-Rosenstein1, H. L. Neibergs4, and J. E. Womack5,  
1University of California-Davis, 2University of Missouri, Columbia, 3Department of Animal Sciences, Washington State University, Pullman

2:40 PM  285  
**Genome-wide association study of bovine respiratory disease complex in US feedlot cattle.**  
*C. M. Seabury*1, H. L. Neibergs2, J. F. Taylor3, J. E. Womack4, and T. Bovine Respiratory Disease Complex, 1College of Veterinary Medicine, Texas A&M University, College Station, 2Department of Animal Sciences, Washington State University, Pullman  
*3Texas A&M University, College Station

3:00 PM  286  
**Identification of causal variants underlying pathogen susceptibility and translation to genetic improvement.**  
*J. F. Taylor*1, H. L. Neibergs2, C. M. Seabury3, A. Vaneenennaam4, J. E. Decker4, J. L. Hoff5, P. C. Tzioto6, T. Bovine Respiratory Disease Complex, 1College of Veterinary Medicine, Texas A&M University, College Station, 2Department of Animal Sciences, Washington State University, Pullman  
3Texas A&M University, College Station, 4University of California-Davis, 5Division of Animal Sciences, University of Missouri, Columbia, 6Embrapa Southeast Livestock, SÃ£o Carlos, Brazil

3:20 PM  Break

3:35 PM  287  
**Gene set enrichment analysis of bovine respiratory disease complex SNP data in feedlot cattle.**  
*M. Neupane*1, J. F. Taylor2, C. M. Seabury3, J. E. Womack4, T. Bovine Respiratory Disease Complex, and H. L. Neibergs5, 1Department of Animal Sciences, Washington State University, Pullman, 2University of Missouri, Columbia, 3Texas A&M University, College Station
Calculation of genomic predicted transmitting abilities for bovine respiratory disease complex in Holsteins.
C. P. VanTassell1, G. Spangler2, D. M. Bickhart3, G. R. Wiggans4, J. B. Cole5, J. F. Taylor6, H. L. Neibergs7, C. M. Seabury3, A. L. Van Eenennaam8, J. E. Womack9, and T. Bovine Respiratory Disease Complex, 1Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD, 2USDA-ARS, Beltsville, MD, 3University of Missouri, Columbia, 4Department of Animal Sciences, Washington State University, Pullman 5College of Veterinary Medicine, Texas A&M University, College Station, 6University of California-Davis 7Texas A&M University, College Station

The value of genetic selection in reducing economic losses from bovine respiratory disease complex in beef cattle feedlots.
J. S. Neibergs* and H. L. Neibergs, Washington State University, Pullman

How might genomic information get translated into industry outcomes?
A. L. Van Eenennaam*, University of California-Davis

**Beef Species I**

Chair: David L. Fernandez, University of Arkansas - Pine Bluff
2:00 PM - 5:00 PM
150 B/C

Effects of rumen-protected PUFA supplementation to late-gestation beef cows on performance and physiological responses of the offspring.
R. Marques1, R. F. Cooke1, K. M. Shubach1, A. P. Brandaoo2, M. C. Rodrigues2, K. Lippolis1, P. Morieli, and D. W. Bohnert4, 1Oregon State University-EOARC Burns, 2UNESP - FMVZ, Botucatu, Brazil, 3UF/IFAS, Range Cattle Research and Education Center, Ona, FL

Effects of injectable trace mineral supplementation on yearling bull growth, carcass characteristics, testicular development and semen quality attributes.
C. P. Blank1, P. J. Gunn, D. Schrunk, S. Ensley, D. Madson, and S. L. Hansen, Iowa State University, Ames

Effect of alpha tocopherol acetate and ascorbic acid on performance, carcass traits, and incidence and severity of liver abscesses in finishing cattle.
H. C. Muller*, C. L. Van Bibber-Krueger, and J. S. Drouillard, Kansas State University, Manhattan

Feed intake and production efficiency of beef cows.

Effects of concurrent selection for residual feed intake and average daily gain on fertility and longevity in black Angus beef females.
P. J. Gunnt and G. R. Dahlke, Iowa State University, Ames

Efficacy of a novel intranasal Zn solution on health and growth performance of high risk, newly received stocker cattle.
M. M. Foster1, E. B. Kegley, J. G. Powell, J. L. Reynolds, J. A. Hornsby, D. L. Galloway, J. J. Ball, and J. Zhao, Department of Animal Science, Division of Agriculture, University of Arkansas, Fayetteville

Performance and net energy in High and Low RFI beef cattle on restricted intake.
K. C. Dykier and R. D. Sainz2, University of California-Davis

Effects of the EPNIX beef program on feedlot performance in diets containing no Monensin or Tylosin.
V. B. Holder1, J. S. Jennings2, and R. S. Swingle1, 1Alltech Inc, Nicholasville, KY, 2Texas A&M AgriLife Research and Extension Center, Amarillo, 3Cactus Feeders, Amarillo, TX

Natural dry matter intake fluctuation impacts performance, feeding behavior and rumin morphometrics of feedlot cattle: 10 years of data assessment.
G. D. Cruz1, I. C. Pereira2, D. D. Millen3, M. D. Arrigoni2, C. L. Martins2, and C. F. Costa2, 1Cargill Animal Nutrition, Elk River, MN, 2São Paulo State University (UNESP), Botucatu campus, Botucatu, Brazil, 3 São Paulo State University (UNESP), Dracena campus, Dracena, Brazil
Breeding and Genetics: Selection for Improved Efficiency

Chair: Filippo Miglior, Centre for Genetic Improvement of Livestock, University of Guelph

2:00 PM - 5:00 PM
Grand Ballroom I

2:00 PM 390
Economic selection index coefficients for terminal traits in Beefmaster cattle.
K. P. Ochsner1, M. R. Lewis1, M. D. MacNeil1, and M. L. Spangler1, 1University of Nebraska-Lincoln, 2Delta G, Miles City, MT

2:15 PM 391
Genomic regions associated with residual feed intake of divergently selected lines of Yorkshire pigs when fed a low energy, high fiber diet.
E. D. Mauch1, V. N. Serão2, J. M. Young1, J. F. Patience1, N. K. Gabler1, and J. C. M. Dekkers1, 1Department of Animal Science, Iowa State University, Ames, 2North Carolina State University, Raleigh, 3North Dakota State University, Fargo

2:30 PM 392
Genetic architecture of feed efficiency in mid-lactation Holstein dairy cows.
L. C. Hardie1, M. J. Vandehaar2, R. J. Tempelman3, K. A. Weigel1, L. E. Armentano1, G. R. Wiggans1, R. F. Veerkamp1, Y. de Haas5, M. P. Coffey6, E. E. Connor1, M. D. Hanigan5, Z. Wang5, and D. M. Sparlock1, 1Iowa State University, Ames, 2Michigan State University, East Lansing, 3University of Wisconsin-Madison, 4Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD, 5Animal Breeding and Genomics Centre, Wageningen University, Netherlands, 6SRUC, Edinburgh, United Kingdom, 7Virginia Polytechnic Institute and State University, Blacksburg, 8Department of Animal Sciences, University of Florida, Gainesville, 9University of Alberta, Edmonton, AB, Canada

2:45 PM 393
Analysis of genetic residual feed intake in Danish Holstein cows by covariance functions using random regression models.
C. Pfeiffer1, B. Li, P. Lovendahl, and J. Lassen, Department of Molecular Biology and Genetics AU Foulum/ Aarhus University, Tjele, Denmark

3:00 PM 394
Greenhouse gas emission related traits differ in RFI divergent lactating dairy cows.
D. Hullemambert1, G. Manafiazar1, J. Basarab1,2, F. Miglior3,4, G. Plastow1, and Z. Wang1, 1Livestock Gentec, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Lacombe Research Centre, Alberta Agriculture and Forestry, Lacombe, AB, Canada, 3Canadian Dairy Network, Guelph, ON, Canada, 4Centre for Genetic Improvement of Livestock, University of Guelph, ON, Canada

3:15 PM 395
Genetic relationship between methane emissions and conformation traits in Danish Holstein cattle.
L. Zetouni1, M. Kargo1,2, and J. Lassen1, 1Aarhus University, Tjele, Denmark, 2SEGES, Aarhus N, Denmark

3:30 PM
Break

3:45 PM 396
Genetic variation of predicted milk fatty acids groups in Canadian Holsteins.
S. G. Narayana1, F. S. Schenkel1, A. Fleming1, A. Koeck1, F. Malchiodi1, J. Jamrozik1,2, M. Sargolzaei1,4, M. Corredig4, B. Mallard1,6, A. Ali1, and F. Miglior1, 1Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada, 2Canadian Dairy Network, Guelph, ON, Canada, 3Semex Alliance, Guelph, ON, Canada, 4University of Guelph, ON, Canada, 5Gay Lea Foods, Guelph, ON, Canada, 6Dept of Pathobiology, OVC, University of Guelph, ON, Canada, 7Dept of Mathematics and Statistics, University of Guelph, ON, Canada

4:00 PM 397
Genetic correlations between predicted milk fatty acids and milk production traits in Canadian Holsteins.
A. Fleming1, F. S. Schenkel1, A. Koeck1, F. Malchiodi1, A. Ali2, B. Mallard4, M. Corredig4, and F. Miglior1, 1Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada, 2Dept of Mathematics and Statistics, University of Guelph, ON, Canada, 3Canadian Dairy Network, Guelph, ON, Canada, 4University of Guelph, ON, Canada

4:15 PM 398
Genetic associations between milk β-hydroxybutyrate and fatty acids in early first lactation of Canadian Holsteins.
A. Koeck4, J. Jamrozik4, A. Fleming1, F. S. Schenkel1, R. K. Moore4, D. M. Lefebvre4, D. F. Kelton4, and F. Miglior1, 1Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada, 2Center for Genetic Improvement of Livestock, University of Guelph, ON, Canada, 3Canadian Dairy Network, Guelph, ON, Canada, 4Valacta, Sainte-Anne-de-Bellevue, QC, Canada, 5Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada
4:30 PM 399  Relevance of mid-infrared spectroscopy predictions of milk fine composition and technological properties for selective breeding.
V. Bonfatti\textsuperscript{1}, D. Vicario\textsuperscript{2}, L. Degano\textsuperscript{2}, and P. Carneri\textsuperscript{1}, \textsuperscript{1}Department Comparative Biomedicine and Food Science, University of Padova, Legnaro, Italy; \textsuperscript{2}National Simmental Cattle Breeders Association, ANAPRI, Udine, Italy

4:45 PM 400  Markers associated with metabolome, and microbiome measures in a grain and sugar challenge in dairy heifers.
H. M. Golder\textsuperscript{1}, J. Thomson\textsuperscript{2}, S. Denman\textsuperscript{3}, C. McSweeney\textsuperscript{3}, and I. J. Lean\textsuperscript{1}, \textsuperscript{1}Scibus, Camden, Australia; \textsuperscript{2}Montana State University, Bozeman; \textsuperscript{3}CSIRO Animal, Food and Health Services, Queensland Bioscience Precinct, St. Lucia, Australia

**Cell Biology Symposium:**

**Membrane Trafficking and Signal Transduction**

Chair: James L. Klotz, USDA-ARS, Forage - Animal Production Research Unit

Sponsors: ASAS and Pancosma

2:00 PM - 5:00 PM

2:00 PM 189  Introduction - What is the relevance of this topic?
J. L. Klotz\textsuperscript{*}, USDA-ARS, Forage-Animal Production Research Unit, Lexington, KY

2:15 PM 190  SNAREs in exocytosis and membrane trafficking.
S. W. Whiteheart\textsuperscript{*}, University of Kentucky, Lexington

3:00 PM 191  Signaling endosomes and epithelial morphogenesis.
C. D’Souza-Schorey\textsuperscript{*}, University of Notre Dame, Notre Dame, IN

3:45 PM 192  Structural and signaling functions of sphingomyelinases during inflammation.
M. N. Nikolova-Karakashian\textsuperscript{*}, University of Kentucky, Lexington

4:30 PM 193  Practical application of the basic aspects of membrane trafficking and receptor-mediated signaling on issues related to animal agriculture.
S. B. Smith\textsuperscript{*}, Texas A&M University, College Station

**Contemporary and Emerging Issues Symposium:**

**Communicating Animal Sciences Effectively**

Chairs: Deb Hamernik, University of Nebraska-Lincoln; Kristen Johnson, Washington State University

Sponsor: Elanco Animal Health

2:00 PM - 5:15 PM

2:00 PM 452  Public perceptions of animal-sourced genetically modified food products.
W. K. Hallman\textsuperscript{*}, C. L. Cuite, and X. K. Morin, Rutgers University, New Brunswick, NJ

2:30 PM 453  What is the science of science communication for, and why should animal scientists care?
D. Kahan\textsuperscript{*}, Yale Law College, New Haven, CT

3:00 PM 454  Panel Discussion

3:30 PM 454  Cracking the code: Making complex information understandable.
A. Perry\textsuperscript{*}, The Center for Food Integrity, Gladstone, MO

4:00 PM 455  Communicating animal science effectively.
D. R. Williams\textsuperscript{*}, National Cattlemen's Beef Association, Centennial, CO

4:30 PM 455  Panel Discussion
CSAS Graduate Student Oral Competition II

Chairs: Eveline Ibeagha-Awemu, Agriculture and Agri-Food Canada; Kees Plaizer, University of Manitoba

2:00 PM - 5:00 PM

251 B

2:00 PM 467 Nutritional evaluation of barley varieties grown for silage.
J. Nair¹, D. A. Christensen², P. Yu¹, A. D. Beattie¹, T. A. McAllister³, D. Damiran¹, N. Preston⁴, L. Fuhr², and J. J. McKinnon¹, ¹Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, ²University of Saskatchewan, Saskatoon, SK, Canada, ³Department of Plant Sciences, College of Agriculture and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, ⁴Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada.

2:15 PM 468 The repeatability of gonadotropin releasing hormone-induced release of luteinizing hormone and its association with fertility in dairy cattle.
M. Gobikrushanth¹, P. A. Dutra¹, C. A. Felton², T. C. Bruinjé¹, M. G. Colazo², S. Butler¹, and D. J. Ambrose¹,², ¹Department of Agricultural Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, ²Livestock Research Branch, Alberta Agriculture and Forestry, Edmonton, AB, Canada.

2:30 PM 469 Use of low-cost, non-nutritive adsorbents as intestinal binding agents to sequester the boar taint compound androstenedione.
P. Park¹, J. B. Mandell, C. F. M. de Lange, and J. Squires, Department of Animal Biosciences, University of Guelph, ON, Canada.

2:45 PM 470 The effect of sorting wheat or barley, based on the predicted CP of individual seeds, on physical characteristics and in vitro dry matter digestibility.
K. Sahtout¹, D. Beaulieu¹, G. B. Penner², and T. A. McAllister³, ¹Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada, ²University of Saskatchewan, Saskatoon, SK, Canada, ³Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada.

3:00 PM 471 The effect of binding feed enzymes to spores of bacillus Subtlis and bacillus Coagulans on in Vitro NDF digestibility in ruminal batch cultures.
C. L. Rosser¹,², L. Jin¹, K. A. Beauchemin¹, M. Oba², S. M. Cutting³, and T. W. Alexander¹, ¹Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, ²Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, ³School of Biological Sciences, Royal Holloway University of London, Egham, United Kingdom.

3:15 PM 472 Characterization of bovine nasopharyngeal lactic acid bacteria and their in vitro antimicrobial activities against the respiratory pathogen Mannheimia haemolytica.
S. Amat¹,², E. Timsit¹, D. B. Holman², and T. W. Alexander², ¹Department of Production Animal Health, Faculty of Veterinary Medicine, University of Calgary, Calgary, AB, Canada, ²Lethbridge Research and Development Centre, Agriculture Agri-Food Canada, Lethbridge, AB, Canada.

3:30 PM 473 Severity and prevalence of ruminal acidosis during the diet transition for commercial feedlot cattle.
B. I. Wiese¹, S. Hendrick², J. J. McKinnon¹, J. Campbell¹, and G. B. Penner¹, ¹Department of Large Animal Clinical Sciences, University of Saskatchewan, Saskatoon, SK, Canada, ²Coaldale Veterinary Clinic, Coaldale, AB, Canada.

3:45 PM 474 Comparison of digestion and particle-associated bacteria after in situ incubation of different barley varieties in the rumen of cattle.
H. E. Yang¹,², C. A. Zotti², J. J. McKinnon¹, and T. A. McAllister³, ¹Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, ²Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada.

4:00 PM 475 Carbohydrate spectroscopic features of bio-oil co-products in relation to rumen degradation kinetics in ruminants.
X. Li¹,², W. Xu¹, J. Yang¹, Y. Zhang¹, and P. Yu², ¹College of Animal Science and Technology, Northeast Agricultural University, Harbin, China, ²Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada.

4:15 PM 476 Low protein diets produce divergent effects on energy balance.
R. C. Zapata¹, A. Pezeshki², A. Singh¹, N. J. Yee¹, and P. K. Chelikani¹, ¹University of Calgary, AB, Canada, ²Oklahoma State University, Stillwater.
Dairy Foods Division: Innovations in Dairy Chemistry
Chair: Annie Bienvenue, US Dairy Export Council
2:00 PM - 5:00 PM
151 B/C

2:00 PM 558 Composition and antioxidant activity of full-fat cheese fortified with (+)-catechin, and recovery of (+)-catechin after simulated in vitro digestion.
A. Rashidinejad¹, J. Birch², and D. W. Everett³⁴, ¹Riddet Institute, Palmerston North, New Zealand, ²University of Otago, Dunedin, New Zealand, ³California Polytechnic State University, San Luis Obispo

2:15 PM 559 Prediction of fat globule particle size in homogenized milk using mid-FTIR.
D. M. Barbano¹, L. di Marzo², and P. Cree³, ¹Cornell University, Department of Food Science, Northeast Dairy Foods Research Center, Ithaca, NY, ²Delta Instruments, Drachten, Netherlands

2:30 PM 560 Impact of mid-FTIR homogenizer performance on repeatability and predicted values for major milk components.
D. M. Barbano and L. di Marzo³, Cornell University, Department of Food Science, Northeast Dairy Foods Research Center, Ithaca, NY

2:45 PM 561 Lipolysis effect on milk fat and protein analysis by infrared spectroscopy using filter and Fourier Transform Infrared (FTIR) methods.
R. M. Longo¹, L. F. Ferreira¹, F. D. A. C. Feijo¹, R. S. Conrado¹, M. E. R. Costa¹, M. M. O. P. Cerqueira¹², M. O. Leite¹², and L. M. Fonseca¹²³, ¹Universidade Federal de Minas Gerais (School of Veterinary Medicine), Belo Horizonte, Brazil, ²Laboratory of Milk Quality/UFMG/FUNDEP, Belo Horizonte, Brazil, ³CNPq-Produtividade em Pesquisa, Brasilia, Brazil

3:00 PM 562 Complimentary calcium fractionation techniques to increase coproduct solids value and utilization.
R. Singh¹, M. Molitor², and J. A. Lucey¹², ¹University of Wisconsin-Madison, ²Wisconsin Center for Dairy Research, Madison, WI

3:15 PM 563 Impact of controlling the lactose to casein ratio of concentrated milks on the properties of cheddar cheese.
R. A. Ibáñez¹*, S. Govindasamy Lucey², J. J. Jaeggi², M. E. Johnson², and J. A. Lucey², ¹University of Wisconsin-Madison, ²Wisconsin Center for Dairy Research, Madison, WI

3:30 PM Break

3:45 PM 564 Enhanced dairy membrane operations through control of deposit formation on membrane surfaces.
U. Kulozik*, Technical University of Munich, Freising-Weihenstephan, Germany

4:00 PM 565 Constant permeate flux microfiltration of liquid whey protein concentrate for the separation of whey proteins from fat.
S. L. Beckman¹ and L. Metzger², ¹Midwest Dairy Foods Research Center, South Dakota State University, Brookings, ²South Dakota State University, Brookings

4:15 PM 566 Critical factors for evaluation of cheese yield performance and fat loss in large cheese factories.
D. M. Barbano and B. Margolies*, Cornell University, Department of Food Science, Northeast Dairy Foods Research Center, Ithaca, NY

4:30 PM 567 Kinetics studies of chemical reactions in conjugated linoleic acid (CLA) enriched milk treated with high-pressure sterilization.
S. I. Martinez-Monteagudo*, South Dakota State University, Brookings

4:45 PM 568 Impact of shear, heat and pH on the conformation, digestibility and antigenicity of lactoglobulin.
M. T. Rahaman, L. Ramchandran, and T. Vasiljevic*, Victoria University, Melbourne, Australia
**Forages and Pastures Symposium:**
**Greenhouse Gas Emissions in Pasture-Based Dairy and Beef Cattle Systems**

Chair: Kathy J. Soder, USDA-ARS

2:00 PM - 5:00 PM
Grand Ballroom H

2:00 PM
Welcoming Remarks

2:05 PM 686
**Comprehensive national assessment on the sustainability of beef production.**
C. A. Rotz*1 and K. R. Stackhouse2, 1USDA-ARS Pasture Systems and Watershed Management Research Unit, University Park, PA, 2National Cattlemen’s Beef Association, Centennial, CO

2:40 PM 688
**Screening for forages and foraging managements that reduce N excretion and CH₄ emissions while maintaining or increasing animal production.**
P. Gregorini*, P. C. Beukes, and A. J. Romera, Dairy NZ Ltd., Hamilton, New Zealand

3:15 PM 689
**Outcomes and future directions from the National Livestock Methane Program in Australia.**
T. M. Davison*, Meat and Livestock Australia, Brisbane, Australia

3:50 PM 690
**Greenhouse gas emissions and mitigation in the West African sub-region: Challenges and opportunities.**
C. Antwi*, Kwame Nkrumah University of Science & Technology, Kumasi, Ghana

4:25 PM 691
**Effects of native and tame grassland species reintroduction on carbon sequestration potential on the Canadian Prairies.**
A. D. Iwaasa*, B. McConkey, and H. Wang, Agriculture and Agri-Food Canada, Swift Current, SK, Canada

**Nonruminant Nutrition Symposium: VFD**

Chair: Z. J. Rambo, Zinpro Corporation

Sponsor: Zoetis

2:00 PM - 5:00 PM
Grand Ballroom F

2:00 PM
**Microbial colonisation, metabolism and immunity in the young piglet.**
M. Bailey, University of Bristol, School of Clinical Veterinary Science, Langford House, Langford, Bristol, UK

2:45 PM
**Intraluminal targeting of intestinal interleukin-10. A new strategy for controlling helminthic and protozoan diseases.**
M. Cook, Animal Sciences Department, University of Wisconsin-Madison

3:30 PM
**Early life adversity and life time gut function.**
Yihang Li, North Carolina State University

4:15 PM
**Post-weaning feed and water deprivation has long- and short-term implications on nursery pig growth performance and gastrointestinal dynamics and influences subsequent stress response.**
N. Horn, Purdue University
Physiology and Endocrinology: Reproduction, Environment and Genetics
Chair: Clay A. Lents, USDA-ARS, US Meat Animal Research Center
2:00 PM - 4:00 PM
151 G

2:00 PM  1119  Hepatic gluconeogenic enzymes are differentially altered by methyl-donors choline and methionine in bovine primary hepatocytes.
T. L. Chandler*, S. J. Bertics¹, B. A. Barton¹, and H. M. White¹, ¹Department of Dairy Science University of Wisconsin-Madison, ²Balchem Corporation, New Hampton, NY

2:15 PM  1120  Expression of the putative gonadotropin-inhibitory hormone receptor, NPFFR1, in the anterior pituitary gland of the gilt is affected by age and sexual maturation.

2:30 PM  1121  Role of focal adhesion molecules in maternal recognition of pregnancy in the mare.
K. Klohonatz, L. Nulton, A. Hess, G. J. Bouma, and J. E. Bruemmer*, Colorado State University, Fort Collins

2:45 PM  1122  Modification of embryonic resistance to heat shock in cattle by melatonin and genetic variation in HSPAIL.
M. S. Ortega*, N. A. D. S. Rocha Frigoni², G. Z. Mingoti², Z. Roth³, and P. J. Hansen¹, ¹Department of Animal Sciences, University of Florida, Gainesville, ²University of Sao Paulo State (UNESP), Araçatuba, Brazil, ³The Hebrew University, Rehovot, Israel

3:00 PM  1123  Transgenerational paternal influence on temperament and growth performance of crossbred beef calves.
R. C. Vann*, B. P. Littlejohn¹, C. R. Long¹, T. H. Welsh, Jr¹, and R. D. Randel¹, ¹MAFES - Brown Loam Experiment Station, Mississippi State University, Raymond, ²Texas A&M AgriLife Research and Department of Animal Science, College Station, ³Texas A&M AgriLife Research, Overton

3:15 PM  1124  DNA methylation is a possible basis of phenotypic alterations observed in suckling Brahman calves.
B. P. Littlejohn¹², D. M. Price¹², D. A. Neuendorff¹, C. R. Long¹, J. A. Carroll¹, R. C. Vann¹, T. H. Welsh, Jr¹, and R. D. Randel¹, ¹Texas A&M AgriLife Research and Department of Animal Science, College Station, ²Texas A&M AgriLife Research, Texas A&M University System, Overton, ³USDA-ARS, Livestock Issues Research Unit, Lubbock, ⁴MAFES - Brown Loam Experiment Station, Mississippi State University, Raymond

3:30 PM  1125  Photoperiod manipulations during the dry period significantly impact mammary circadian clock in goats.
S. J. Mabjeesh*, A. Shamay², K. Plaut³, C. Sebastian³, and T. M. Casey³, ¹Department of Animal Sciences, The Robert H. Smith Faculty of Agriculture, Food and Environment, The Hebrew University, Rehovot, Israel, ²Institute of Animal Science, The Volcani Center, Israel, ³Department of Animal Sciences, Purdue University, West Lafayette, IN

3:45 PM  1126  Management and genetic components of fertility indicators in dairy cattle.
T. M. Goncalves¹, D. Gonzalez-Pena², H. Jeong³, P. J. Pinedo³, J. E. P. Santos⁴, G. M. Schuenemann⁵, G. J. M. Ros³, R. O. Gilber³, R. C. Bicalho³, R. Chebel³, K. N. Galvão⁶, C. M. Seabury⁶, W. W. Thatcher⁷, and S. L. Rodriguez Zas⁸, ¹University of Illinois at Urbana-Champaign, ²Zoetis, Kalamazoo, MI, ³Colorado State University, Fort Collins, ⁴University of Florida, Gainesville, ⁵Department of Veterinary Preventive Medicine, The Ohio State University, Columbus, ⁶University of Wisconsin - Madison, ⁷Cornell University College of Veterinary Medicine, Department of Clinical Sciences, Ithaca, NY, ⁸Cornell University, Ithaca, NY, ⁹Department of Large Animal Clinical Sciences; University of Florida, Gainesville, ¹⁰Texas A&M University, College Station, ¹¹Department of Animal Sciences, University of Florida, Gainesville
Production, Management and the Environment: Stress
Chair: Felipe Cardoso, University of Illinois at Urbana-Champaign
2:00 PM - 5:00 PM
151 E/F

2:00 PM 1277
Milk metabolomics of dairy goats with mammary inflammation under heat stress conditions.
S. Love¹, A. Salama¹,², N. Mehaba¹, and G. Caja¹, ¹Group of Ruminant Research, Universitat Autonoma de Barcelona, Bellaterra, Spain, ²Animal Production Research Institute, Dokki, Giza, Egypt

2:15 PM 1278
Winter climate variables and their effect on feed intake in Bos taurus bulls.
R. C. Pauling⁴, S. E. Speidel, M. G. Thomas, M. M. Culbertson, R. K. Peel, and R. M. Enns, Department of Animal Sciences, Colorado State University, Fort Collins

2:30 PM 1279
Maternal heat stress reduces body and organ growth in calves: Relationship to immune tissue development.
B. M. S. Ahmed¹, U. Younas¹, T. O. Asar¹, A. P. A. Monteiro², J. Hayen¹, S. Tao², and G. E. Dahl¹, ¹University of Florida, Gainesville, ²University of Georgia, Tifton, ³Department of Animal Sciences, University of Florida, Gainesville

2:45 PM 1280
Liver proteomic analysis of cows exposed to heat stress or cooling conditions during the dry period.
A. L. Skibiel¹, M. Zachar², Y. Levin³, B. C. do Amaral⁴, and G. E. Dahl¹, ¹Department of Animal Sciences, University of Florida, Gainesville, ²Institute of Animal Science, Volcani Center, Bet Dagan, Israel, ³The Nancy and Stephen Grand Israel National Center for Personalized Medicine, Weizmann Institute of Science, Rehovot, Israel, ⁴PMI Nutritional Additives, Shoreview, MN

3:00 PM 1281
A rumen bolus is a useful tool to monitor core body temperature in lactating dairy cows in a sub-tropical summer.
P. A. Gonzalez-Rivas¹, M. Sullivan², J. J. Cottrell¹, B. J. Leury¹, J. B. Gaughan², and F. R. Dunshea¹, ¹Faculty of Veterinary and Agricultural Sciences, The University of Melbourne, Parkville, Australia, ²The University of Queensland, Gatton, Australia

3:15 PM 1282
Activity and rumination in an organic vs. a conventional grazing herd.
G. M. Pereira¹,², B. J. Heins², and M. J. Endres¹, ¹University of Minnesota, St. Paul, ²University of Minnesota West Central Research and Outreach Center, Morris

3:30 PM 1283
Understanding behavior patterns of cattle adaptation to heat stress.
G. Nogueira¹, P. Ajmone-Marsan², M. Milanesi³, L. Zavare³, T. Sayuri Aguiar³, D. Sandre¹, M. A. Maioli⁴, G. Ferreira⁴, G. Bispo¹, S. Stabile³, S. Stabile³, R. Caputo³, C. Toyama³, J. F. Garcia³, and J. C. P. Lima³, ¹UNESP- FMVA, Aracatuba, Brazil, ²Università Cattolica del Sacro Cuore, Piacenza, Italy, ³UNESP, Jaboticabal, Brazil, ⁴UNESP, Aracatuba, Brazil, ⁵UNESP- FMVA, Aracatuba-SP, Brazil, ⁶UNESP Univ Estadual Paulista, Aracatuba, Brazil

3:45 PM 1284
Plasma insulin and glucose concentrations of feedlot cattle during summer.
A. M. Lees¹, S. T. Anderson², V. Sejian³, and J. B. Gaughan¹, ¹The University of Queensland, Gatton, Australia, ²School of Biomedical Sciences, The University of Queensland, Gatton, Australia, ³ICAR-National Institute of Animal Nutrition and Physiology, Bangalore, India

4:00 PM 1285
Impact of heat stress on immune status of sheep.

4:15 PM 1286
Stocking rates and parasite load in yearling steers grazed season long in the Northern Great Plains.
F. A. Brummer¹, G. L. Stokka², B. Patton¹, and C. Miller², ¹North Dakota State University, Central Grasslands Research Extension Center, Streeter, ²North Dakota State University, Fargo

4:30 PM 16
Growth and reproductive performance of yearling beef heifers implanted with Revalor G in the Nebraska Sandhills.
B. T. Tibbitts¹, H. R. Nielsen¹, K. C. Ramsay², and R. N. Funston¹, ¹University of Nebraska-Lincoln, ²University of Nebraska, West Central Research and Extension Center, North Platte, ³Rex Ranches, Ashby, NE
Ruminant Nutrition: Fats, Fatty Acids and Energy
Chair: Sara E. Place, Oklahoma State University
2:00 PM - 5:00 PM
155 F

2:00 PM 1306
Feeding steers extruded flaxseed and hay in a total mixed ration or sequentially can have substantial effects on beef fat polyunsaturated fatty acids and biohydrogenation intermediates.
P. Vahmani1, D. C. Rolland1, T. A. McAllister2, H. C. Block1, S. D. Proctor1, L. L. Guan1, N. Prieto1, J. L. Aalhus1, and M. E. R. Dugan1. 1Agriculture and Agri-Food Canada, Lacombe, AB, Canada, 2Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada.

2:15 PM 1307
Fatty acid composition of intramuscular lipids from Nellore and Brangus bulls fed diets supplemented with cottonseed.
S. R. Medeiros*, G. D. Feijó, M. Mele, P. E. P. Barros, C. T. Marino, F. Ciucci, M. N. Bonin, and N. V. Verbisck1. 1Embrapa Beef Cattle, Campo Grande-MS, Brazil, 2University of Pisa, Italy, 3Universidade Federal dos Vales do Jequitinhonha e Mucuri, Brazil, 4Federal University of Mato Grosso do Sul, Campo Grande-MS, Brazil

2:30 PM 1308
Effects of dietary fat on fertility of dairy cattle: A meta analysis and meta-regression.
R. M. Rodney1,2, P. Celi3, W. Scott2, I. J. Lean1,2, and K. Breinhild2. 1University of Sydney, Camden, Australia, 2Scibus, Camden, Australia, 3Faculty of Veterinary and Agricultural Sciences, the University of Melbourne, Parkville, Australia

2:45 PM 1309
Altering the ratio of palmitic, stearic and oleic acids in diets with or without whole cottonseed impacts production responses and energy partitioning of dairy cows.
J. de Souza*, C. L. Preseault, and A. L. Lock, Michigan State University, East Lansing

3:00 PM 1310
Effect of high-oleic acid whole, heated soybeans or extruded soybean meal on production performance, milk fatty acid composition, and enteric methane emission in dairy cows.

3:15 PM 1311
Biodehydrogenation kinetics of oleic, linoleic and alpha-linolenic acids in vivo.
M. Baldin*, J. G. de Souza1, N. L. Urrutia, J. Y. Ying, and K. J. Harvatine. 1The Pennsylvania State University, State College, 2Federal University of Bahia, Salvador, Brazil

3:30 PM 1312
Production response, nutrient digestibility, and energy partitioning of post-peak dairy cows when palmitic acid-enriched supplements are included in diets: A meta-analysis and meta-regression.
J. de Souza*, R. J. Tempelman, M. S. Allen, and A. L. Lock, Michigan State University, East Lansing

3:45 PM 1313
Effect of potassium carbonate and soybean oil supplementation on rumen microbial population linked to lipid metabolism.
A. R. Alfonso-Avila*, J. Chiquette, P. Y. Chouinard, E. Charbonneau, and R. Gervais. 1Département des sciences animales, Université Laval, Quebec, QC, Canada, 2Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada

4:00 PM 1314
Abomasal infusions of linoleic and linolenic acid in lactating dairy cows differentially alter the fatty acid composition of plasma lipid fractions and immune cells.
S. E. Schmidt*, V. E. Ryman, C. L. Preseault, L. M. Sordillo, and A. L. Lock, Michigan State University, East Lansing

4:15 PM 1315
Effect of increasing doses of abomasally infused linseed oil on animal performance and oxidative stability of milk in Holstein dairy cows.
D. E. Rico, R. Gervais, S. M. Peña-Cotino, C. Cohou, Y. Lebeuf, and P. Y. Chouinard. 1Département des sciences animales, Université Laval, Quebec, QC, Canada

4:30 PM 1316
Palmitic acid feeding increases ceramide availability in association with increased milk yield, NEFA availability, and adipose tissue responsiveness to a glucose challenge.
J. E. Rico, A. T. Mathews, and J. W. McFadden. 1West Virginia University, Morgantown

4:45 PM 1317
Effect of supplemental enriched palmitic acid in free fatty acid form vs calcium salts of palm fatty acids on production performance in early postpartum cows.
J. E. Nocek, C. Wan, and T. M. Londergan. 1Overture Enterprises, LLC, Auburn, NY, 2Centriq, Seattle, WA
Ruminant Nutrition:  
Feeds and Feeding  
Chair: Antonio Faciola, University of Nevada  
Sponsor: H. J. Baker  
2:00 PM - 5:00 PM  
155 E

2:00 PM 1404  
Effects of replacing soybean meal with canola meal or treated canola meal on ruminal digestion, and omasal nutrient flow in lactating dairy cows.  
E. Marostegan de Paula1, M. A Camargo Danes2, N. E Lobos3, F. L. Drago4, G. J. Zanton5, G. A. Broderick6, and A. Faciola1, 1University of Nevada, Reno, 2Federal University of Lavras, Lavras, Brazil, 3Kemin Industries, Des Moines, IA, 4University of Sao Paulo, Piracicaba, Brazil, 5USDA-ARS, US Dairy Forage Research Center, Madison, WI, 6Broderick Nutrition & Research, LLC, Madison, WI

2:15 PM 1405  
Growth performance of dairy heifers limit-fed distillers dried grains with ad libitum forage.  
A. K. Manthey1 and J. L. Anderson, Dairy Science Department, South Dakota State University, Brookings

2:30 PM 1406  
Effects of roughage inclusion and particle size on performance and rumination behavior of finishing beef steers.  
W. W. Gentry1, C. P. Weiss1, C. M. Meredith1, C. L. Brauer1, F. T. McCollum1, N. A. Cole1, and J. S. Jennings1, 1Texas A&M AgriLife Research and Extension Center, Amarillo, 1USDA-ARS Conservation and Production Research Laboratory, Bushland, TX

2:45 PM 1407  
Automation of statistical procedures to screen raw data and construct feed composition databases.  
H. Tran1,2, A. Caprez1, P. J. Kononoff1, P. S. Miller1, and W. P. Weiss1, 1University of Nebraska-Lincoln, 2National Animal Nutrition Program, University of Kentucky, Lexington, 3Department of Animal Sciences, OARDC, The Ohio State University, Wooster

3:00 PM 1408  
Effect of pelleting at different temperatures and times on nutrient supply of co-products form canola oil processing.  
X. Huang1, V. Guevara1,2, B. Refat1, and P. Yu1, 1Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada, 2Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada

3:15 PM  
Break

3:30 PM 1409  
Okara meal can completely replace soybean meal in diets of early to mid-lactation dairy cows.  
R. A. V. Santana1, A. F. Brito2, D. C. Moura1, C. P. Ghedini2, J. G. B. Galvão Jr.2, F. A. Barbosa2, A. S. Oliveira2, A. B. D. Pereira2, S. F. Reis2, J. A. Souza2, and K. A. Juntwait2, 1Instituto Federal de Educação, Ciência e Tecnologia do Norte de Minas Gerais – Campus Arinos, Arinos, Brazil, 2University of New Hampshire, Durham, 3Universidade Federal de Mato Grosso, Cuiabá, Brazil, 4Instituto Federal de Educação, Ciência e Tecnologia do Rio Grande do Norte, Ipanguaú U, Brazil, 5Universidade Federal de Minas Gerais, Belo Horizonte, Brazil, 6Instituto de Ciências Agrárias e Ambientais, Universidade Federal de Mato Grosso – Campus Sinop, Sinop, Brazil, 7Universidade Estadual do Sudoeste da Bahia, Itapetinga, Brazil

3:45 PM 1410  
Effect of flax meal supplementation on oxidative stress and metabolic status of early lactation dairy cows infused with flax oil in the abomasum.  
J. Lapointe1, C. Roy, D. Beaudry, N. Bergeron, I. Blanchet, H. Petit, and M. F. Palin, Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada

4:00 PM 1411  
The effect of by-product inclusion and concentrate feeding level on milk production and composition, pasture dry matter intake, body weight and body condition score of mid-late lactation spring calving grazing dairy cows.  
S. A. Condren1, S. J. Whelan1, T. M. Boland1, G. Rajauria1, S. Kirwan2, M. B. Lynch2, and K. M. Pierce3, 1School of Agriculture and Food Science, University College Dublin, Ireland, 2AHDB Dairy, Agriculture & Horticulture Development Board, Stoneleigh Park, Kenilworth, Warwickshire, United Kingdom

4:15 PM 1412  
Evaluating the feeding value of field peas for growing and finishing cattle.  
H. L. Greenwell1, K. H. Jenkins2, and J. C. MacDonald3, 1University of Nebraska-Lincoln, 2University of Nebraska, Scottsbluff

4:30 PM 1413  
Cotton burrs as alternative roughage to adapt beef steers to steam-flaked corn-based finisher diet.  
L. A. Ovinge1, J. O. Sarturi1, P. B. B. Campanil1, B. J. M. Lemos1, B. C. Bernhardt1, and D. Pettit1, 1Texas Tech University, Lubbock, 2Universidade Federal de Goiás, Goiânia, Brazil

4:45 PM 1414  
Temporal effects of ruminal propionate infusion on feeding behavior of Holstein cows In the postpartum period.  
G. Maldini1, M. Allen, K. Kennedy, Michigan State University, East Lansing
Small Ruminant Symposium:
Enhancing Small Ruminant Profitability
Chair: Steven P. Hart, American Institute for Goat Research, Langston University
2:00 PM - 5:00 PM
150 E/F

2:00 PM  Introductory Remarks

2:10 PM  1726  Profitability of small ruminant production systems.
G. W. Williams* and D. P. Anderson, Texas A&M University, College Station,

2:55 PM  1727  Contribution of hair sheep to small ruminant profitability.
J. Morgan*, Round Mountain Consulting Service, Fayetteville, AR

3:25 PM  1728  Contribution of newer goat breeds to small ruminant profitability.
R. Browning, Jr.*1 and M. L. Leite-Browning2, 1Tennessee State University, Nashville, 2Alabama A&M University, Huntsville

3:55 PM  1729  Contribution of forage production systems to small ruminant profitability.
R. Ehrhardt*, Michigan State University, East Lansing

Strategies for Managing Heifers in the Southeast
Chair: Mary E. Sowerby, University of Florida
2:00 PM - 5:00 PM
155 D

2:00 PM  57  Influences of feeding and housing practices on the behavior and performance of dairy calves.
E. K. Miller-Cushon*1 and T. J. DeVries2, 1Department of Animal Sciences, University of Florida, Gainesville, 2Department of Animal Biosciences, University of Guelph, ON, Canada

2:30 PM  58  Developing replacement heifers that get pregnant and maintain pregnancy.
K. G. Pohler*, M. H. Pereira, S. Reese, and J. L. M. Vasconcelos, 1The University of Tennessee, Knoxville, 2UNESP - FMVZ, Botucatu, Brazil, 3Sao Paulo State University, Botucatu, Brazil

3:00 PM  59  Benefits of fly control in dairy heifers.
S. C. Nickerson*, University of Georgia, Athens

3:30 PM  60  Economic trade-offs between replacement rates and improved genetics.
A. De Vries*, Department of Animal Sciences, University of Florida, Gainesville

4:00 PM  Panel discussion: Where should Southeastern calf/heifer nutrition research go from here?

Teaching Undergraduate and Graduate Education
Chair: Amin Ahmadzadeh, University of Idaho
2:00 PM - 5:00 PM
155 B

2:00 PM  1747  Increase in demand for hands on instruction in animal science curriculum.
R. Woiwode*, Colorado State University, Fort Collins

2:15 PM  1748  Adding a student-generated summary of main points to a lecture as a learning tool in an advanced nutrition course.
S. L. Hansen*, Iowa State University, Ames

2:30 PM  1749  Teaching animal welfare via competitive judging contests.
C. B. Shivley*, F. B. Garry, and T. Grandin, 1Colorado State University, Fort Collins, 2Colorado State University, College of Veterinary Medicine and Biomedical Sciences, Fort Collins
2:45 PM 1750 Integrated program for reducing bovine respiratory disease complex (BRDC) in cattle, coordinated agricultural project (CAP): translation of multi-omics research results into teaching programs. M. G. Thomas¹, R. M. Enns¹, R. Hagevoort², J. S. Neibergs³, A. L. Van Eenennaam⁴, H. L. Neibergs³, and J. E. Womack⁵, ¹Department of Animal Sciences, Colorado State University, Fort Collins, ²New Mexico State University, Dairy Extension, Clovis, ³Washington State University, Pullman, ⁴University of California-Davis, ⁵Texas A&M University, College Station

3:00 PM 1751 A novel approach to adviser training for relational skills. A. L. Robinson* and H. D. Tyler, Iowa State University, Ames

3:15 PM 1752 The effect of a real-world learning project on students’ knowledge retention: A comparative study. L. M. White*, New Mexico State University, Las Cruces

3:30 PM Break

3:45 PM 1753 Utilization of concept mapping as a tool to qualitatively assess knowledge of college seniors in a companion animal management course. C. L. Morris*, Iowa State University, Ames

4:00 PM 1754 Spanish for animal health and care: Towards a certificate program in field-specific Spanish. S. Zeller¹, M. Velazquez-Castillo², and I. N. Roman-Muniz³, ¹INTO Colorado State University, Colorado State University, Fort Collins, ²Department of Foreign Languages and Literatures, Colorado State University, Fort Collins, ³Department of Animal Sciences, Colorado State University, Fort Collins

4:15 PM 1755 Characterization of students’ educational background and subsequent use of relevant teaching methods enhances student engagement and success in introductory animal science course. J. Adcock¹, Q. S. Baptiste¹, and M. Knights², ¹Berea College, Berea, KY, ²West Virginia University, Morgantown

4:30 PM 1756 Impact of a global food security assignment on agricultural sciences students’ education and career interests. K. Matthews* and O. Bolden-Tiller, Tuskegee University, AL
ASAS Undergraduate Student Poster Competition

198 1 Antimicrobial activity of tropical spice extracts against *Escherichia coli* O157:H7.
E. Olasoji1*, I. M. Ogunade2, D. Kim2 and A. T. Adesogan2, 1Department of Food Science, University of Florida, Gainesville, 2Department of Animal Sciences, UF/IFAS, Gainesville, FL

199 2 Effect of low and high-fat dry distillers grains supplementation on forage intake and digestibility in beef heifers.
E. L. Stephenson1*, A. L. Jones2, J. S. Luther1 and A. E. Radunz1, 1University of Wisconsin-River Falls, 2University of Wisconsin-Madison

200 3 Nutritive and digestibility parameters of invasive grasses in Northwest Missouri.
F. C. Huneke1, M. H. Richardson, A. M. Snyder and J. D. Allen, Northwest Missouri State University, Maryville

201 4 Poor maternal nutrition during gestation alters mesenchymal stem cell (MSC) metabolism in offspring.
N. H. Sereda1*, S. M. Pillai1, M. L. Hoffman1, S. A. Zinn1, Y. K. Park1, J. Y. Lee2 and K. E. Govoni1, 1Department of Animal Science, University of Connecticut, Storrs, 2Department of Nutritional Sciences, University of Connecticut, Storrs

202 5 The abundance of myosin heavy chain IIb mRNA in porcine *Longissimus dorsi* muscle was not affected by dietary lysine level.
M. B. Lewis1*, S. F. Liao, T. Wang and J. M. Feugang, Mississippi State University, Mississippi State

203 6 Identification of loci on chromosome 3 associated with susceptibility to bovine paratuberculosis using genotypes imputed to whole genome sequence in Holstein cows.
C. F. Pierce1*, J. N. Kiser1, J. L. Hoff2, M. Neupane1, S. N. White1, J. F. Taylor2 and H. L. Neibergs1, 1Department of Animal Science, Washington State University, Pullman, 2University of Missouri, Columbia, 3USDA-ARS, Animal Disease Research Unit, Pullman, WA

204 7 Effect of the total western diet via direct or ancestral exposure on estrous cycling in third generation offspring in mice.
K. Contreras1*, J. Cuthbert1, S. Phatak1, D. Larson2 and A. Benninghoff1, 1Utah State University, Logan, 2USTAR Applied Nutrition Research, Logan, UT

205 8 Maternal over-feeding during gestation alters islet size and number in the pancreas of 135 d old fetuses.
M. C. Wynn1*, M. L. Hoffman, S. M. Pillai2, A. K. Jones2, K. K. McFadden, S. A. Reed, S. A. Zinn and K. E. Govoni2, 1Department of Animal Science, University of Connecticut, Storrs, 2Department of Animal Science, University of Connecticut, Storrs

206 9 Comparison of high definition Zenmuse X3 and X5 video cameras onboard unmanned aerial vehicles for future use in precision ranching.
C. F. Solecki1* and J. S. Church, Thompson Rivers University, Kamloops, BC, Canada

207 10 Leucine supplementation increases mouse mammary cell proliferation in vitro.
M. M. McGuckin1*, R. Manjarin and D. G. Peterson, California Polytechnic State University, San Luis Obispo

208 11 Effects of maternal nutrition during gestation on placental steroid metabolizing enzyme activity in sheep.
K. J. McCarty1*, M. P. T. Coleson1, S. M. Pillai1, M. L. Hoffman1, A. K. Jones2, K. E. Govoni2, S. A. Reed2, S. A. Zinn2 and C. O. Lemley1, 1Mississippi State University, Mississippi State, 2Department of Animal Science, University of Connecticut, Storrs

209 12 Relationship between antioxidants and residual feed intake in grazing heifers.
J. N. Kidrick1*, E. Felton, K. S. Shaffer and K. M. Barnes, West Virginia University, Morgantown

210 13 Effects of spices on in vitro enteric methane production.
S. Taylor1*, I. M. Ogunade, D. Kim, K. G. Arriola and A. T. Adesogan, Department of Animal Sciences, UF/IFAS, Gainesville, FL

211 14 An exploratory observational study to quantify ante- and post-mortem complete blood count variables in fed beef cattle.
C. L. Rogers1*, T. J. McEvers, J. T. Richeson, S. L. Roberts and T. E. Lawrence, West Texas A&M University, Canyon
Body fat distribution is a determinant of pulmonary arterial and central venous pressures in feedlot cattle.
K. M. Freeman*, A. K. Gulick, B. C. Bernhard, R. J. Rathmann, J. O. Sarturi and J. M. Neary, Texas Tech University, Lubbock

The effects of lavender oil on stalled horses subjected to a stressor.
S. R. Adkins*, A. I. Apel, K. D. Vogel and D. N. Smarsh, University of Wisconsin-River Falls

FSH dependent and IGF-1 independent phosphorylation of β-catenin is similar in bovine and human granulosa cells.
C. R. Smith*, B. H. Aloqaily, C. A. Gifford, B. I. Gomez and J. A. Hernandez Gifford, Oklahoma State University, Stillwater

Receptor (chemosensory) transporter protein-4 expression and regulation in bovine granulosa cells.
C. N. Horsley*, B. H. Aloqaily, J. A. Hernandez Gifford and C. A. Gifford, Oklahoma State University, Stillwater

Protein expression and localization of receptor (chemosensory) transporter protein 4 in the endometrium during early pregnancy in sheep and cattle.
K. S. Wilson*, J. A. Hernandez Gifford, T. L. Ot and C. A. Gifford, 1Oklahoma State University, Stillwater,
2Department of Animal Science, The Pennsylvania State University, University Park

Follcile-stimulating hormone regulation of proenkephalin in granulosa cells.
A. D. Gullic*, B. I. Gomez, B. Couger, C. A. Gifford and J. A. Hernandez Gifford, Oklahoma State University, Stillwater

Optimization of probes and PCR conditions for the correlation between 4 genes and production of high citrate in milk.
V. A. Smith*, R. Manjarin and R. Jimenez-Flores, 1California Polytechnic State University, San Luis Obispo, 2Dairy Products Technology Center, California Polytechnic State University, San Luis Obispo

---

**CSAS Graduate Student Poster Competition**

Effect of high dietary canola meal inclusion in lactating sows on nutrient digestibility and sow and piglet performance.
D. E Velayudhan and C. M. Nyachoti, University of Manitoba, Winnipeg, MB, Canada

Transcriptome analysis of the intestinal tissues of cattle suggests an association among host immune responses, lipid metabolism and the super-shedding of E. coli O157.
O. Wang*, T. A. McAllister*, G. Plastow, B. Selinger*, K. Stamford and L. L. Guan, 1University of Alberta, Edmonton, AB, Canada, 2Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 3Livestock Gentec, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 4University of Lethbridge, AB, Canada, 5Alberta Agriculture and Forestry, Lethbridge, AB, Canada, 6Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada

Determination of standardized total tract digestibility of phosphorus in flaxseed meal fed to finishing pigs without or with phytase supplementation.
J. W. Kim* and C. M. Nyachoti, University of Manitoba, Winnipeg, MB, Canada

The effects of partial replacement of barley starch with lactose on production and ruminal fermentation characteristics in dairy cows.
E. De Seram*, G. B. Penner* and T. Matsvangwa, 1Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada, 2University of Saskatchewan, Saskatoon, SK, Canada

Potential to improve fiber digestion in the rumen of cattle through inoculation with bison rumen contents.
C. Griffith*, G. O. Ribeiro Jr., V. Bremer*, M. Obia, T. A. McAllister, and K. A. Beauchemin, 1University of Alberta, Edmonton, AB, Canada, 2Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 3Elanco Animal Health, Greenfield, IN, 4Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada

CNCP5 fractions of value added pellet products based on combination of new co-products from bio-fuel/bio-oil processing, low grade of peas and lignosulfonate chemical compound at different levels for ruminants.
V. Guevara*, D. A. Christensen, J. J. McKinnon and P. Yu, Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada

Comparison of barley silage with varying digestible fibre content to corn silage on rumen fermentation characteristics and microbial protein synthesis using RUSITEC technique.
B. Refat*, D. A. Christensen, J. J. McKinnon, J. Nair, A. D. Beattie, T. A. McAllister, W. Yang and P. Yu, 1Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, 2Animal Production Department, Faculty of Agriculture, Zagazig University, Egypt, 3University of Saskatchewan, Saskatoon, SK, Canada, 4Department of Plant Sciences, College of Agriculture and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, 5Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada
Phosphorus utilization on dairy farms in Manitoba.
V. P. Senaratne*, E. J. McGeough, K. H. Ominski and J. C. Plaizier, Department of Animal Science, University of Manitoba, Winnipeg, MB, Canada

Effect of variety and level of inclusion of barley grown for silage on performance and carcass characteristics of growing and finishing beef steers.
J. Nair1, D. A. Christensen2, P. Yu3, T. A. McAllister4, D. Damiran1 and J. J. McKinnon1, 1Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, 2University of Saskatchewan, Saskatoon, SK, Canada, 4Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 3Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, Saskatoon, SK, Canada

Development of a genetic marker panel for ketosis in dairy cattle.
V. Kroezen1, F. Miglior1,2, F. S. Schenkel1 and J. Squires1, 1Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada, 2Canadian Dairy Network, Guelph, ON, Canada

Taxonomic assessment of the rumen microbiome of bulls under backgrounding and finishing diets.
E. O’Hara1,2, M. Zhou3, S. M. Waters4, M. E. Walpole1, P. Gorka1, M. Woodbury1, G. B. Penner4 and L. L. Guan1, 1Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Teagasc Grange Animal & Bioscience Department, Dunsany, Co. Meath, Ireland, 3Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada, 4University of Agriculture in Krakow, Poland

The transition cow: May the odds be ever in her favour.
Y. Schuermann1, A. St-Yves1, N. Dicks1, R. C. Bohrer1, R. Mondadori2, G. Welsford1, V. Boyer1, M. Taibi1, V. Higginson1, S. Hartley1, E. Madogwe1, V. Bordignon1, S. Patel2, R. Duggavathi1, 1McGill University, Saint-Anne De Bellevue, QC, Canada, 2Federal University of Pelotas, Capão do Leão, Brazil

Effect of dietary wheat bran inclusion on nutrient digestibility in weaned pigs.
B. Koo*, M. M. Hossain and C. M. Nyachoti, University of Manitoba, Winnipeg, MB, Canada

Effect of steam flaking and seed type on carbohydrate molecular structure features associated with nutrient availability of legume seed in ruminants.
X. Li1,2, V. Racz1, B. Laarveld1, Y. Zhang2 and P. Yu1, 1Department of Agricultural and Animal Biosciences, University of Saskatchewan, Saskatoon, SK, Canada, 2College of Animal Science and Technology, Northeast Agricultural University, Harbin, China

Dynamics of progesterone concentrations and insemination outcomes in dairy cows.
T. C. Bruinjé1, M. Gobikrushanth1, R. C. Guimarães1 and D. J. Ambrose1,2, 1Department of Agricultural and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Livestock Research Branch, Alberta Agriculture and Forestry, Edmonton, AB, Canada

ADSA Dairy Foods Graduate Student Poster Competition

Unit operations before and during spray drying influence the flavor of milk protein concentrate and whole milk powder.
C. Park* and M. Drake, Southeast Dairy Foods Research Center, North Carolina State University, Raleigh

The effect of bleaching agents on the degradation of vitamins and carotenoids in WPC80.
M. A. Stout1, C. Park1 and M. Drake2, 1North Carolina State University, Raleigh, 2Southeast Dairy Foods Research Center, North Carolina State University, Raleigh

Characterization of flavor and functional properties of liquid and dried WPC 80, WPI, MPC 85 and micellar casein concentrates.
B. Carter1, H. Patel1, D. M. Barbano2 and M. Drake1, 1North Carolina State University, Raleigh, 2Cornell University, Department of Food Science, Northeast Dairy Foods Research Center, Ithaca, NY

Effect of milk protein concentrate (MPC 80) quality on susceptibility to fouling during thermal processing.
G. Gandhi1 and J. K. Amamcharla, Food Science Institute, Animal Sciences and Industry, Kansas State University, Manhattan

Use of fluorescence-based Amaltheys analyser for studying effect of pH and heat on whey protein interactions in reconstituted milk protein concentrate.
K. Sajith Babu*, Z. Liu and J. K. Amamcharla, Food Science Institute, Animal Sciences and Industry, Kansas State University, Manhattan
98  •  JAM 2016 CONFERENCE INFORMATION AND SCIENTIFIC PROGRAM

98  •  JAM 2016 CONFERENCE INFORMATION AND SCIENTIFIC PROGRAM

714 43  Use of ozonated water in removing Bacillus cereus biofilms from the dairy membranes.
R. Henderson¹, G. Gandhi¹, N. Sevart¹, S. Gragg², R. Phebus² and J. K. Amamcharla¹, ¹Food Science Institute, Animal Sciences and Industry, Kansas State University, Manhattan, ²Food Sciences Institute, Department of Animal Sciences and Industry, Kansas State University, Olathe

715 44  Development of a benchtop method to polymerize lactose to soluble fiber.
A. F. Kuechel* and T. C. Schoenfuss, University of Minnesota, Department of Food Science and Nutrition, St. Paul

716 45  Effect of micro-encapsulated iron salts on cheddar cheese divalent cation balance and composition.
A. Arce* and Z. Ustunol, Michigan State University, East Lansing

ADSA Production Division Graduate Student Poster Competition: M.S.

741 46  Effect of intramammary infusion of chitosan hydrogels on bovine mammary gland involution after drying-off.
S. Lanctot¹, X. Zhao¹, P. Fastier¹, A. Taherian¹, B. Bisakowski² and P. Lacasse¹, ¹Department of Animal Science, McGill University, Montreal, QC, Canada, ²Food Research and Development Centre, St-Hyacinthe, QC, Canada

742 47  Mitigation of variability in feeding patterns between competitively-fed dairy cows through increased feed delivery frequency.
R. E. Crossley*, A. Harlander and T. J. DeVries, Department of Animal Biosciences, University of Guelph, ON, Canada

743 48  Infusion of a serotonin precursor pre-partum induces dynamic glucose and fat metabolism gene expression in the livers of multiparous dairy cows during peripartum.
A. P. Prichard¹, S. R. Weaver¹, E. L. Endres¹, M. S. Akins¹, R. M. Bruckmaier² and L. L. Hernandez², ¹University of Wisconsin-Madison, ²Department of Dairy Science, University of Wisconsin-Madison, ³University of Wisconsin, Platteville, ⁴Veterinary Physiology, Vetsuisse Faculty University of Bern, Bern, Switzerland

744 49  Sire performance and reproductive breeding values are associated with feed efficiency and growth in dairy heifers.
C. E. Owens*, Virginia Polytechnic Institute and State University, Blacksburg

745 50  Dry matter intake, milk yield and milk composition of dairy cows fed corn silage from corn treated with various application times of foliar fungicide.
C. Kalebich¹, M. Weatherly¹, G. M. Fellows² and P. Cardoso², ¹University of Illinois at Urbana-Champaign, ²BASF Corporation, Research Triangle Park, NC

746 51  Identification of loci associated with fertility in US Holstein heifers.
E. Keuter¹, C. M. Seabury², M. Neupane¹, J. N. Kiser¹, J. Moraes³, G. Burns³, T. E. Spencer³ and H. L. Neibergs¹, ¹Department of Animal Science, Washington State University, Pullman, ²Texas A&M University, College Station, ³Division of Animal Sciences, University of Missouri, Columbia

747 52  The effects of increased metabolizable protein and amino acid supplementation in fresh dairy cattle.
E. G. Carder*, The Ohio State University-OARDC, Wooster

748 53  Effects of supplementing lactating dairy cow ration with sodium sesquicarbonate on reticulorumen pH, rumination, and dry matter intake.
M. L. Jones¹, J. D. Clark¹, N. A. Michael¹ and J. M. Bewley¹, ¹University of Kentucky, Lexington, ²Arm & Hammer Animal Nutrition, Princeton, NJ

749 54  Feeding low crude protein diets in lactating dairy cows during summer months: Improvements in energy metabolism.
J. Kaufman*, K. Kassube, K. G. Pohler and A. G. Rius, University of Tennessee, Knoxville

ASAS Western Section Undergraduate Student Poster Competition

Sponsor: WSASAS

19 55  Development of an immunohistochemical technique to determine presence and localization of glucose transporter GLUT3 in bovine utero-placental tissues from days 16 to 50 of gestation.

20 56  Do ewes born with a male co-twin have greater longevity with lambing over time?
D. N. Grogan¹, J. A. Brown¹ and J. B. Taylor², ¹Wingate University, NC, ²USDA-ARS, Rangeland Sheep Production Efficiency Research, Dubois, ID

21 57  Effect of post-weaning brewers grain supplementation on growth and reproductive performance of angus and red angus heifers.
S. E. Butterfield*, J. M. Wisniewski, D. A. Daley, S. P. Doyle and K. L. DeAtley, California State University, Chico
Growth performance and feed efficiency of commercial and half-blood lowline-angus steers in backgrounding and finishing phases.

Utilization of wet brewers grain as a winter feed supplement for beef cows grazing native annual grasslands.
K. N. Bohn1, S. P. Doyle1, J. Davy1, D. K. Flavel11, N. Schweitzer1 and K. L. DeAtley11, 1University of California, Cooperative Extension Service, Red Bluff, 11University of California, Cooperative Extension Service, Browns Valley

Derivation of economic values for feedlot performance traits in commercial and lowline-influenced angus steers.
L. C. Huffaker*, K. L. DeAtley, J. N. Brimlow and S. P. Doyle, California State University, Chico

Nonruminant Nutrition: Enzymes

The effect of increasing Buttiauxella phytase dose on performance in piglets: Meta-analysis from 5 trial studies.
Y. Dersjant-Li, R. M. Bold and W. Li*, Danisco Animal Nutrition, DuPont Industrial Biosciences, Marlborough, United Kingdom

Effects of dietary β-mannanase supplementation with soy bean meal in the performances in weanling pigs.
B. Balasubramanian*, H. M. Yun, Y. M. Kim, J. K. Kim and I. H. Kim, Department of Animal Resource & Science, Dankook University, Cheonan, South Korea

Effect of multi-enzyme component on growth performance, nutrient digestibility, carcass quality and gas emission in broilers.
D. H. Nguyen*, H. S. Kim, S. Kathannan, S. Shanmugam and I. H. Kim, Department of Animal Resource & Science, Dankook University, Cheonan, South Korea

Efficacy of dietary supplementation of protease and xylanase in plant-based diets on growth performance and health of nursery pigs at 6 to 9 week of age.
I. Park*, H. Chen and S. W. Kim, North Carolina State University, Raleigh

Effects of microbial phytase on the apparent and standardized total tract digestibility of calcium in milk co-products fed to growing pigs.
Y. She*, D. Li2 and H. H. Stein1, 1University of Illinois at Urbana-Champaign, Urbana, 2CAU, Beijing, China

Effect of different levels of zinc and phytase on growth performance in weanling pigs.
L. Blavi*, D. Solà-Oriol, S. M. Martín-Orúe and J. F. Pérez, Animal Nutrition and Welfare Service, Department of Animal and Food Sciences, Universitat Autonoma de Barcelona, Bellaterra, Spain

New bacterial 6-phytase expressed in Pseudomonas fluorescens improved growth performance, bone parameters, and P digestibility in growing pigs.

Poster Session II
8:15 AM - 9:15 AM
Exhibit Hall A/B

ADSA Production Division Graduate Student Poster Competition: Ph.D.

Elevation of circulating serotonin pre-partum decreases BHBA concentrations and improves energy status post-partum in multiparous dairy cows.
S. R. Weaver*, A. P. Prichard*, E. L. Endres2, M. S. Akins3, R. M. Bruckmaier4 and L. L. Hernandez4, 1Department of Dairy Science, University of Wisconsin-Madison, 2University of Wisconsin-Madison 1University of Wisconsin, Platteville, 1Veterinary Physiology, Vetuisse Faculty University of Bern, Switzerland

Temporal effects of ruminal propionate infusion on feeding behavior of Holstein cows in the postpartum period.
G. Maldini12, M. S. Allen1 and K. M. Kennedy1, 1Michigan State University, East Lansing, 2CAPES Foundation, Brasilia, Brazil

Forage yield, nutrient composition and grain yield of corn and soybeans when intercropped at different seeding rates grown under organic conditions.
I. P. Acharya*, X. Gu2, S. Acharya1, P. Poudel1 and D. P. Casper1, 1Dairy Science Department, South Dakota State University, Brookings, 1Department of Plant Science, South Dakota State University, Brookings

JAM 2016 CONFERENCE INFORMATION AND SCIENTIFIC PROGRAM • 99
Refinement of the DST locus associated with bovine respiratory disease complex in Holstein calves.
Department of Animal Sciences, Washington State University, Pullman, Department of Animal Sciences, Washington State University, Pullman.

Meta-analysis of factors influencing new intramammary infection rate in natural exposure teat dip efficacy trials.
B. D. Enger*, R. R. White, S. C. Nickerson, L. K. Fox, Virginia Polytechnic Institute and State University, Blacksburg, University of Georgia, Athens, Washington State University, Pullman.

Diet starch content and fermentability affect feed intake and milk yield of cows in the postpartum period.
R. I. Albornoz and M. S. Allen, Michigan State University, East Lansing.

Meta-analysis of post-ruminal microbial nitrogen flows in dairy cattle.
Y. Roman-Garcia*, R. R. White and J. L. Firkins, Ohio State University, Columbus, Virginia Polytechnic Institute and State University, Blacksburg.

Milk yield genotype affects hepatic expression of innate immune genes when challenged with lipopolysaccharide (LPS).

Effects of feeding different forms of polyunsaturated fatty acids on performance, plasma metabolites and milk fatty acid composition of dairy cows.

Rumen-protected methyl donors during the transition period: Circulating plasma amino acids in response to supplemental rumen-protected methionine or choline.
Z. Zhou*, M. Vailati Riboni, D. N. Luchiné and J. J. Loor, University of Illinois at Urbana-Champaign, Adisseo S.A.S., Alpharetta, GA.

Teaching Undergraduate and Graduate Education I

Student perspectives on agricultural study abroad programs.
M. M. Beverly*, S. F. Kelley, P. Urso, M. J. Anderson, J. L. Leatherwood and K. J. Stutts, Sam Houston State University, Huntsville, TX.

Curriculum development for animal disaster planning.
K. Franks, S. F. Kelley and M. M. Beverly, Sam Houston State University, Huntsville, TX.

Student assessment of curriculum efficacy in a beef systems management course.

International Animal Agriculture

Carcass quality of guinea pigs: Age effects on weights, yields and linear carcass measurements.

Effect of age on the regional composition of fattening guinea pig carcasses.

Inulin and flavomycin as growth promoters in rabbit diets: Effects on animal performance, cecum's crypts depth and serum-bone macrominerals (Ca, P, Mg).
M. E. Juárez Silva, M. Cuchillo Hilario, I. Torres Acosta, E. L. Villarreal Delgado and R. M. Castillo Domínguez, National Institute of Medical Science and Nutrition Salvador Zubiran, Mexico City, Mexico.

Increased body condition during lactation increases milk production and pre-weaning growth of Bali cattle.
D. Dahlanuddin*, M. Supriyadi, T. S. Panjaitan, D. P. Poppi and S. P. Quigley, Faculty of Animal Science, University of Mataram, NTB, Indonesia, Assessment Institute for Agricultural Technology, Narmada, NTB, Indonesia, School of Agriculture and Food Sciences, The University of Queensland, Gatton, Qld, Australia.
Alpaca and lama fiber quality comparison in Ecuadorian Andes.

Fiber alpaca quality in Ecuadorian Andes.

Guinea pig carcass quality: Traditional diet vs. high quality diet.
M. C. Tenelema¹, D. Sánchez-Macias², D. D. Yumisaca-Guevara¹, R. Remache², V. Inca Guerrero², I. Barba², C. Hernández², J. Palma² and A. J. Morales-delaNuez²*, ¹Facultad de Ciencias Pecuarias, Escuela Superior Politecnica de Chimborazo, Riobamba, Ecuador, ²Agroindustrial Engineering, Universidad Nacional de Chimborazo, Riobamba, Ecuador

Do buffaloes have better milk fat profile than cows? Where does the evidence stand in 2016?
G. Bilala and M. Moaheen-ud-Din, PMAS-Arid Agriculture University, Rawalpindi, Pakistan

Forages and Pastures I

Screening of microorganism and effects of different bacterial additives on fermentation quality of rye silage harvested at dough stage.
S. S. Lee¹, Y. H. Joo¹, H. J. Lee¹, J. W. Jang⁴, O. K. Han¹, J. H. Kim¹ and S. C. Kim¹², ¹Division of Applied Life Science (BK21Plus, Institute of Agriculture & Life Science), Gyeongsang National University, Jinju, The Republic of Korea, ²Department of Animal Science, Gyeongsang National University, Jinju, The Republic of Korea, ³National Institute of Crop Science, Rural Development Administration, Suwon, The Republic of Korea

Effects of cow and bag type on the undigested neutral detergent fiber after 240 hours in situ incubation.
H. Yang¹, Y. Yan², D. J. Undersander³ and D. K. Combs⁴, ¹College of Animal Science and Technology, China Agriculture University, Beijing, China, ²College of Animal Science and Technology, Sichuan Agriculture University, Chengdu, China, ³Department of Agronomy, University of Wisconsin-Madison, ⁴Department of Dairy Science University of Wisconsin-Madison

Immunodetection of the Cry toxin in leaves of transgenic maize hybrids.
G. Balieiro Neto¹, A. W.P. Freitas¹, R. Botelho Ferraz Branco¹, K. Maria Roncato Duarte¹, F. Porto Pela¹ and M. D. Baraffi², ¹Sao Paulo State Agency Agribusiness Technology, Ribeirao Preto, Brazil, ²University of São Paulo, Ribeirao Preto, Brazil

The effect of defoliation severity during late autumn-winter on herbage production, regrowth and nitrogen uptake.
G. Cun¹, G. R. Edwards and R. H. Bryant, Lincoln University, New Zealand

Tall wheatgrass biomass yield and quality after interseeding with hairy vetch.
M. Menghini¹,², H. M. Arelovich¹,²,³, M. F. Martínez¹, R. D. Bravo¹ and M. D. Chamadoira¹, ¹Dtos. Agronomía, Universidad Nacional del Sur, Bahia Blanca, Argentina, ²CIC, Bahia Blanca, Argentina, ³CERZOS, Bahia Blanca, Argentina

Effect of canopy height on the nutritive value of elephant grass silage.
E. B. Alves, I. L. De Oliveira, J. R. Gervasio, M. S. Bastos, S. M. Da Silva, J. O. Gusmao, L. M. Lima and T. F. Bernardes*, Federal University of Lavras, Brazil

Compost inclusion level in soil on chemical composition and in vitro dry matter digestibility of native and improved cactus forage varieties.

Percentages of alfalfa and grass in fresh and ensiled binary mixtures using near infrared reflectance spectroscopy: Developing a robust calibration.
E. Karayilanlia1, J. H. Cherney2, P. Sirois3, D. Kubinec4 and D. J. R. Cherney2, 1Suleyman Demirel University, Isparta, Turkey, 2Cornell University, Ithaca, NY, 3Dairy One, Ithaca, NY, 4Dairy One Forage Laboratory, Dairy One Cooperative, Inc., Ithaca, NY

Comparison of dry matter measurements between three hand-held near infrared units with oven drying at 60 degrees Celsius for 48 hours.
D. M. Donnelly1,2, H. Yang2 and D. K. Combs1, 1Department of Dairy Science, University of Wisconsin-Madison, 2College of Animal Science and Technology, China Agriculture University, Beijing

Grazing intensities and season affect N2O emissions in a tropical pastureland.
A. S. Cardoso11, L. F. Brito1, E. R. Janusckiewicz11, E. S. Morgado2, R. P. Barbere1, J. F. W. Koscheck1, R. A. Reis1 and A. C. Ruggieri1, 1Sao Paulo State University, Jaboticabal, Brazil, 2Universidade Federal de Uberlandia, Brazil

Impact of foliar spray on yield and chemical composition of alfalfa hay.
S. Acharya1 and D. P. Casper, Dairy Science Department, South Dakota State University, Brookings

Evaluation of in vitro gas production and energy available in low lignin alfalfa varieties.
K. P. Ortega1, G. Getachew, D. H. Putnam and E. J. DePeters, University of California-Davis

ADSA-SAD (Student Affiliate Division)
Undergraduate Student Poster Competition

Validation of a commercially available beta-hydroxybutyrate meter for assessing rumen development in dairy calves.
M. A. Richard1, C. C. Williams1, R. M. Orellana1, S. J. Blair1 and A. H. Dolejsiova1, 1Louisiana State University, Baton Rouge, 2Louisiana State University, AgCenter, Baton Rouge

The effect of the liquid nitrogen level on the temperature in a semen storage tank.
A. Hale1, A. Ahmadzadeh1, B. Shafi1 and J. Dalton2, 1University of Idaho, Moscow, 2University of Idaho, Caldwell,

Evaluating the effects of a sodium hypochlorite post milking teat disinfectant on teat condition using a split udder trial.
N. Lind, University of Kentucky, Lexington

The effect of ergothioneine-containing mushroom powder (MP) on sensory acceptability and probiotic survivability in yogurt.
B. Blain, C. Boothroyd1, D. R. Roberts and E. Furumoto, The Pennsylvania State University, University Park
Ruminant Nutrition: Ruminal Fermentation I

1617 45

Effect of dietary energy source and level on rumen bacteria community in lactating dairy cows.
D. Bu1, 2, 3, S. Li4, Z. Yu5, S. Gao1, L. Ma1, X. Zhou1 and J. Wang1, 1State Key Laboratory of Animal Nutrition, Institute of Animal Sciences, Chinese Academy of Agricultural Sciences, Beijing, 2CAAS-ICRAF Joint Lab on Agroforestry and Sustainable Animal Husbandry, World Agroforestry Centre, East and Central Asia, Beijing, China, 3Hunan Co-Innovation Center of Animal Production Safety, CICAPS, Changsha, China, 4Department of Animal Science, University of Manitoba, Winnipeg, MB, Canada, 5The Ohio State University, Columbus

1618 46

Effect of different microbial inoculants on fermentation characteristics of Miscanthus silage, and their rumen fermentation and digestibility.
J. Yang1, C. Ryu1, S. J. Shin1, B. Choi1, Y. Kim1, M. Park1, J. Heo2, S. Cho1 and N. J. Choi1, 1Chonbuk National University, Jeonju-si, The Republic of Korea, 2Microbial Institute for Fermentation Industry, Sunchang-gun, The Republic of Korea, 3CALS Co., Ltd, Seongnam-si, The Republic of Korea

1619 47

The effects of varying undegraded NDF and physically effective NDF content of fresh cow rations on dry matter intake, rumination, and milk yield in multiparous Holstein cows.
S. E. Williams1, B. M. Leno, C. M. Ryan and T. R. Overton, Cornell University, Department of Animal Science, Ithaca, NY

1620 48

Bacterial diversity in the feces of lambs fed purple prairie clover (Dalea purpurea Vent.) and alfalfa (Medicago Sativa).
Q. Huang1, 2, D. Holman1, T. W. Alexander1, T. Hu2, L. Jin1, Z. Xu1, T. A. McAllister1, S. Acharya1 and Y. Wang1, 1Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 2College of Animal Science and Technology, Northwest A&F University, Yangling, China

1621 49

Comparisons of microbial populations found in the rumen and in a dual-flow continuous culture fermentation system using high-throughput 16S amplicon sequencing.
I. J. Salfer1, H. E. Larson and M. D. Stern, University of Minnesota, St. Paul

1622 50

Evaluation of in vitro and in situ starch digestibility assays.
S. E. Schuling1, D. Schimek and B. Vander Wal, Hubbard Feeds Inc., Mankato, MN

1623 51

Effect of rumen acidosis and short-term feed restriction on mRNA expression of genes relating to gut barrier function and immune response in Holstein steers.
K. M. Wood1, 2, R. L. A. Pedersolli1 and G. B. Penner1, 1University of Saskatchewan, Saskatoon, SK, Canada, 2University of Guelph, ON, Canada

1624 52

Use of fecal starch as an indicator of starch digestibility and starter intake in pre-weaned dairy calves.
T. S. Dennis1, W. He1, F. X. Suarez-Mena2, T. M. Hill1, J. D. Quigley1 and R. L. Schlotterbeck1, 1Provimi, Brookville, OH, 2Provimi North America, Brookville, OH

1625 53

Expression and purification of a novel bacterial expansin from Bacillus subtilis that synergistically degrades cellulose with fibrolytic enzymes.
A. A. P. Cervantes1, I. Muhammad2, C. F. Gonzalez2, D. Vyas1 and A. T. Adesogan1, 1Department of Animal Sciences, UF/IFAS, Gainesville, FL, 2University of Florida, Gainesville

1626 54

Annual rhythms of milk, fat, and protein production in US dairy cattle.
I. J. Salfer1, C. D. Dechow and K. J. Harvatine, The Pennsylvania State University, State College

1627 55

Molecular physiology of rumen papillae following an acidosis challenge.
C. E. Kent-Dennis1, J. A. Pasternak and G. B. Penner, University of Saskatchewan, Saskatoon, SK, Canada

1628 56

Endocannabinoid and lipid metabolism gene network expression in adipose tissue of peripartal cows with low or high body condition score at calving.
A. S. Alharthi1, Z. Zhou1, D. N. Luchini2 and J. J. Loor1, 1University of Illinois at Urbana-Champaign, 2Adisseo S.A.S., Alpharetta, GA

1629 57

Endocannabinoid network and proopiomelanocortin gene expression in peripartal bovine liver in response to rumen-protected methionine supplementation.
A. S. Alharthi1, Z. Zhou1, D. N. Luchini2 and J. J. Loor1, 1University of Illinois at Urbana-Champaign, 2Adisseo S.A.S., Alpharetta, GA

1630 58

Substrate utilization by Megagphaera elsdenii strain NCIMB 41125.
A. M. Mobiglia1, F. R. Camilo1 and J. S. Drouillard2, 1CAPES Foundation, Ministry of Education of Brazil, Brasilia, Brazil, 2Kansas State University, Manhattan

1631 59

16S rRNA bacterial sequences suggest dietary intervention can be used to change microbial community structure to reduce methane emission in Holstein dairy cattle.
W. Tom1, J. V. Judy, P. J. Kononoff and S. C. Fernando, University of Nebraska-Lincoln
Inulin as prebiotic for *Lactobacillus salivarius* and *Enterococcus faecium* with probiotic potential in ruminants. D. Hernández-Sánchez1, J. L. Gómez–Hernández2, M. M. Crosby–Galván1, A. M. Hernández-Anguiano1, J. E. Ramírez–Bribiesca2, E. Aranda–Ibañez1, S. S. Gonzalez–Muñoz1 and R. Pinto–Ruiz1, 1Colegio de Postgraduados, Montecillo Texcoco, Mexico, 2Colegio de Postgraduados, Montecillo, Mexico

Moisture content influences ensiling characteristics, *in situ* disappearance, and *in vitro* digestion characteristics of reconstituted corn grain. F. R. Camilo1, A. M. Mobiglia1, C. L. Van Bibber-Krueger2, H. C. Muller2, T. J. Ellerman2, S. Katulski2 and J. S. Drouillard2, 1CAPES Foundation, Ministry of Education of Brazil, Brasilia, 2Kansas State University, Manhattan

On the way to optimize the two stage Tilley and Terry technique for a more accurate *in vitro* assessment of rumen modifiers. A. Russouw1, E. Raffrenato1, F. Chaucheyras-Durand1 and E. Chevaux2, 1Department of Animal Sciences, Stellenbosch University, South Africa, 2Lallemand SAS, Blagnac, France

Effect of feeding different flaxseed-based products on the rumen microbial community of dairy cows evaluated by high-throughput DNA sequencing. E. Castillo-Lopez1, J. Moats1, N. D. Aluthge2, H. A. Ramirez Ramirez1, T. A. McAllister4, C. L. Anderson2, D. A. Christensen1, T. Mutsvangwa1, H. Lee-Rangel1, G. B. Penner1 and S. C. Fernando4, 1University of Saskatchewan, Saskatoon, SK, Canada, 2University of Nebraska-Lincoln, 3Iowa State University, Ames, 4Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 5Universidad Autonoma de San Luis Potosi, San Luis Potosi, Mexico

Influence of forage diversity on feeding behavior and diet digestibility in lambs. S. Lagrange1,2 and J. J. Villalba2, 1INTA EEA, Bordenave, Argentina, 2Utah State University, Logan

Nutritive quality and forage yield of three brassica varieties for use in livestock grazing systems. S. L. Dillard2, A. I. Roca-Fernandez, M. D. Rubano and K. J. Soder, 1University of Nebraska, Amos, 2Northern Great Plains Research Laboratory, University Park, PA

Effect of early intensive grazing of Kentucky bluegrass on animal performance. F. A. Brummer1, B. Patton1 and R. Limb2, 1North Dakota State University, Central Grasslands Research Extension Center, Streeter, 2North Dakota State University, Fargo

Frequency of feeding distillers dry grain with solubles as a supplement to beef cows grazing corn residue. S. M. Gross1, B. W. Neville, F. A. Brummer and M. Undi, North Dakota State University Central Grasslands Research Extension Center, Streeter

Development of an automated system for measuring supplement intake of grazing animals. R. Reuter1, S. Zimmerman2 and M. Billars2, 1Oklahoma Agricultural Experiment Station, Stillwater, 2C-lock, Inc., Rapid City, SD

Sampling corn silage in bags from the sides. P. Turiello1, M. Ruiz de Huidobro2, H. García1, L. Forcone1 and C. Celaye2, 1Facultad de Agronomía y Veterinaria, UNRC, Río Cuarto, Argentina, 2Garay SRL, Recreo, Argentina

Survey of temporal variation in pasture mineral concentrations and total dietary mineral intake in pasture-based dairy herds. F. Curran1,2, D. Wall1, P. Lonergan1 and S. Butler1, 1Animal & Grassland Research and Innovation Centre, Teagasc Moorepark, Fermoy, Co. Cork, Ireland, 2School of Agriculture and Food Science, University College Dublin, Ireland, 3Teagasc Crops, Environment and Land Use Programme, Johnstown Castle Co.Wexford, Ireland

Observations of forage yield and steer average daily gain when double cropped forage following crop harvest. K. M. Ulmer1, R. G. Bondurant1, J. L. Gramkow2, G. W. Lesoing2, M. E. Drewnoski1 and J. C. MacDonald1, 1University of Nebraska-Lincoln, 2University of Nebraska, Auburn

Banana tree (*Musa sapientum*) forage in sexed Guinea pig (*Cavia Porcellus*) fattening. A. R. Sanchez, Universidad Tecnica de Quevedo, Ecuador
Effect of frame size and season on enteric methane (CH$_4$) and carbon dioxide (CO$_2$) emissions in Angus brood cows grazing native tall-grass prairie in central Oklahoma, USA.
J. P. S. Neel*, K. E. Turner, P. H. Gowda and J. L. Steiner, USDA-ARS-PA-GRL, El Reno, OK

Grazing management: Milk production and composition of dairy cows grazing elephant grass.
C. D. A. Batalha, G. F. D. S. Congio, A. C. A. Krol, S. Crestani, M. B. Chiavegato, S. C. Da Silva and F. A. P. Santos*, University of Sao Paulo, Piracicaba, Brazil

Performance and ruminal metabolism are not changed in lactating dairy cows offered spring available annual forage crops during a short-term grazing experiment.

Performance and ruminal metabolism in lactating dairy cows offered summer available annual forage crops during a short-term grazing experiment.

Fluctuation of soil carbon dioxide emission in agrosilvopastoral system managed with sheep.
F. O. Alari1, A. C. Ruggieri*, T. Silva do Nascimento, E. B. Malheiros, P. P. Spasiani, L. F. Brito, R. A. Reis and A. S. Cardoso, Sao Paulo State University, Japicatubal, Brazil

Yield and quality evaluation of ensiled Johnsongrass as a potential forage for beef cattle.
M. L. Bass’, D. D. Harmon, J. M. Lourenço’, D. Hancock and R. L. Stewart, Jr., University of Georgia, Athens, 1Department of Crop and Soil Sciences, University of Georgia, Athens, 2Department of Animal and Dairy Science, University of Georgia, Athens

Evaluation of warm-season annual forages on forage production and stocking rate.
D. D. Harmon’, M. L. Bass’, J. M. Lourenço’, C. D. Teutsch3, J. R. Segers4, A. M. Stielzen’t, R. L. Stewart, Jr. and D. Hancock1, 1Department of Crop and Soil Sciences, University of Georgia, Athens, 2Department of Animal and Dairy Science, University of Georgia, Athens, 3Department of Crop and Soil Environmental Sciences, Virginia Polytechnic Institute and State University, Blacksburg, 4Department of Animal and Dairy Science, University of Georgia, Tifton

Microbiota attachment and structural components of Lolium perenne L. and Festuca arundinacea Schreb during in vitro fermentation.
H. A. Zavaleta-Mancera’, D. Trujillo-Gutierrez’, S. S. Gonzalez-Muñoz’, M. Cobos-Peralta’, J. E. Ramirez-Bribiesca’ and J. L. Börquez-Gastelín’, 1Colegio de Postgraduados, Montecillo Texcoco, Mexico, 2Colegio de Postgraduados, Montecillo Estado de Mexico, Mexico, 3Colegio de Postgraduados, Montecillo, Mexico, 4Universidad Autónoma del Estado de México, Toluca, Mexico

Correlation of fermentation characteristics with intake and digestibility of alfalfa silage in gestating ewes.
V. Niyigena’, K. P. Coffey’, W. K. Coblenz’, A. N. Young’, D. Phillion’, H. L. Bartimus’ and R. T. Rhein’, 1Department of Animal Science, University of Arkansas Division of Agriculture, Fayetteville, 2University of Arkansas, Division of Agriculture, Fayetteville, 3US Dairy Forage Research Center, Marshfield, WI, 4Department of Agriculture and Environmental Sciences, Lincoln University, Jefferson City, MO

Small Ruminant I

Effects of forage quality and breed on rumination time in goats.
S. N. LeShure’, T. A. Gipson, A. L. Goetsch, R. Puchala and T. Sahlu, American Institute for Goat Research, Langston University, OK

Genome-wide association analysis of residual feed intake and milk yield in dairy goats.

Effect of Narasin on nutrient intake and digestibility in wethers fed high-forage diets.

Effects of different levels of zilpaterol hydrochloride on feedlot performance and carcass characteristics of hair-breed ram lambs.
J. Cayetano de Jesus’, R. Rojo-Rubio’, H. Lee-Rangel’, L. Avendaño-Reyes’, U. Macias-Cruz’, A. Olmedo-Juarez’, J. Vazquez-Armijes’ and S. Reballar-Rebollar’, 1Universidad Autonoma de San Luis Potosi, Mexico, 2Universidad Autonoma del Estado del Mexico, Temascaltepec, Mexico, 3Universidad Autonoma de San Luis Potosi, Mexico, 4Universidad Autonoma de Baja California, Mexico, 5Centro Nacional de Investigacion Disciplinaria en Parasitologia Veterinaria, INIFAP, Cuernavaca, Mexico
Performance of lambs fed high concentrate-diets with monensin or narasin.
D. M. Poloiczik1, M. F. Westphalen2, R. G. Silva1, A. A. Miszura2, M. H. Santos2, M. V. C. Ferraz Junior2, M. V. Biehlf, A. V. Pires2 and I. Sasinf, 1FMVZ/University of Sao Paulo, Pirassununga, Brazil, 2ESALQ/ University of Sao Paulo, Piracicaba, Brazil

Effects of high concentrations of crude glycerin on blood parameters of energy metabolism in finishing lambs.
E. H. C. B. van Cleef1,2,3, M. T. C. Almeida1,2, H. L. Perez1,2, V. B. Carvalho1, J. R. Paschoaloto1, E. S. Castro Filho1 and J. M. B. Ezequiel1, 1São Paulo State University, Jaboticabal, Brazil, 2FAPESP, São Paulo, Brazil

Effect of diets rich in starch or digestible fiber on glucose metabolism of ewes and goats in mid lactation.
M. F. Lunesu1, G. C. Bomboi2, M. Decandia1, G. Molle1, G. Gaspa1, A. S. Aztori1, L. S. Knupp1 and A. Cannas1, 1Dipartimento di Agraria, University of Sassari, Italy, 2Dipartimento di Medicina Veterinaria, University of Sassari, Italy, 3Dipartimento per la Ricerca nelle Produzioni Animali, Agris Sardegna, Sassari, Italy, 4Departamento de Zootecnia, Universidade Federal de Vicosa, Brazil

Reproductive parameters of Dorper ewes in south Texas.
E. C. Taylor1, J. A. Reyes2, M. R. Garcia1 and R. Stanko2, 1Texas A&M University-Kingsville, 2Texas A&M University-Kingsville, Texas A&M AgriLife Research

Comparison of linear model and artificial neural network using antler beam diameter and beam length of whitetailed deer (Odocoileus virginianus).
S. O. Peters1, M. Sinecen2, G. R. Gallagher1, L. A. Peibworth2, J. S. Hatfield2 and K. Kzikyaka1, 1Department of Animal Science, Berry College, Mount Berry, GA, 2Adnan Menderes University, Aydin, Turkey, 3Berry College, Mount Berry, GA

Induction of sexual activity in Dorper ewes: Effect of two intramuscular doses of progesterone vs. progesterone vaginal sponges + eCG.
J. Z. Ordonez1, O. Àngel-García1, E. Carrillo1, J. Luna-Orozco1, C. A. Meza-Herrera1, R. Rodríguez1 and F. G. Véliz-Deras1, 1Universidad Autónoma Agraria Antonio Narro, Torreon, Mexico, 2Instituto Tecnológico de Torreon, Torreon, Mexico, 3Centro de Bachillerato Tecnológico Agropecuario N. 1, Torreon, Torreon, Mexico, 4Universidad Autónoma Chapingo, Unidad Regional Universitaria de Zonas Áridas, Bermejillo, Durango, Mexico

Effect of supplementation with antioxidants in goats and their newborns evaluated during the transition period.
B. Barcelos1, F. R. B. Ribeiro1, S. K. Lewis2, W. B. Foxworth3, L. C. Nati4, G. R. Newton5, V. F. P. Rispoli1, L. B. Correa4 and A. Saran Netto1, 1School of Animal Science and Food Engineering, University of Sao Paulo, Pirassununga, Brazil, 2Prairie View A&M University TX, 3School of Veterinary Medicine and Animal Science, University of Sao Paulo, Brazil

Effects of feeding varying levels of deoiled distillers dried grains with solubles on fatty acid composition of subcutaneous adipose tissue in meat goats.
K. C. Camareno1, A. T. Sukumaran1, J. Scott2, N. Gurung2, T. T. N. Dinh1 and D. D. Burnett1, 1Mississippi State University Department of Animal Science, 2Mississippi State University Department of Animal Science, Mississippi State, 3Tuskegee University, AL

Dietary effects of grass hay and alfalfa hay on the digestive microbiome of the alpaca.
C. Carroll1, K. D. Olsen2, J. M. Chaston3 and T. F. Robinson, Brigham Young University, Provo, UT

Sunflower and palm cake as supplemental fatty acid sources to feedlot lambs.
J. G. de Souza1,2, P. G. Cirqueira1, J. P. I. S. Monnerat3 and C. V. D. M. Ribeiro1, 1The Pennsylvania State University, University Park, 2Federal University of Bahia, Salvador, Brazil, 3Federal University of Pernambuco Rural, Recife, Brazil

Ground chevon as influenced by different concentrations of rosemary extracts.
M. Y. Muñoz1, J. H. Lee2, C. D. Santos1, X. Ma2, A. Discua2 and B. Kouakou2, 1Universidad Nacional de Agricultura, Catacamas, Honduras, 2Fort Valley State University, GA

Post-estrus GnRH administration does not improve fertility in Alpine goats in northern Mexico.
Z. Santos3, C. A. Meza-Herrera3, J. M. Guillon1, F. Arellano4, R. Rodriguez1 and F. G. Véliz-Deras1, 1Universidad Autónoma Agraria Antonio Narro, Torreon, Mexico, 2Universidad Autónoma Chapingo, Unidad Regional Universitaria de Zonas Áridas, Bermejillo, Durango, Mexico

Quality of chevon chops as influenced by different packaging atmospheres.
C. D. Santos1, J. H. Lee2, M. Y. Muñoz2, A. Discua2, X. Ma2, D. Kale2 and B. Kouakou2, 1Universidad Nacional de Agricultura, Catacamas, Honduras, 2Fort Valley State University, GA

Reproductive performance of anovulatory goats stimulated by bucks previously exposed to estrogenized does.
J. M. Guillon1, C. A. Meza-Herrera1, Z. Santos1 and F. G. Véliz-Deras1, 1Universidad Autónoma Agraria Antonio Narro, Torreon, Mexico, 2Universidad Autónoma Chapingo, Unidad Regional Universitaria de Zonas Áridas, Bermejillo, Durango, Mexico

Effect of dried distillers grains on diet digestibility, body weight gain and carcass composition of lambs.
J. R. Bárcena-Gama1, K. R. Carayanz-Leyva1, C. Sánchez del Real2, J. C. Escobar- España3, M. J. Rivas-Martinez4, E. A. Santillán-Gómez1 and S. S. González-Muñoz1, 1Colegio de Postgraduados, Montecillo Texcoco, Mexico, 2Universidad Autónoma Chapingo, Chapingo Texcoco, Mexico, 3Colegio de Postgraduados, Montecillo Estado de Mexico, Mexico
Physiology and Endocrinology: Reproductive Technologies, Gametes, and Embryo Development

1135 38 A meta-analysis of the impacts of maternal weight and fetal sex on uterine blood flow and maternal heart rate in beef cows from mid- to late-gestation.
A. R. Tanner*1, M. L. Bauer1, V. C. Kennedy1, B. Mordhors1, L. E. Camacho2, K. C. Swanson1 and K. A. Vonnahme1,
1North Dakota State University, Fargo, 2University of Arizona, Tucson

1136 39 Validation of a chemical pregnancy test in dairy cows that uses whole blood, shortened incubation times, and visual readout.
L. M. Mayo*1, S. G. Moore1, S. E. Poock1, W. Silvia2 and M. C. Lucy1, 1University of Missouri, Columbia, 2University of Kentucky, Lexington

1137 40 Effects of parity and mid-gestation nutrient restriction on umbilical blood flow, fetal and placental measurements, and birth weight in sheep.
M. A. Vasquez*, K. C. Swanson and K. A. Vonnahme, North Dakota State University, Fargo

1138 41 Comparing two ultrasound devices to determine antral follicle counts in dairy cows.
M. Gobikrushanth*1 and D. J. Ambrose1,2, 1Department of Agricultural Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Livestock Research Branch, Alberta Agriculture and Forestry, Edmonton, AB, Canada

1139 42 The repeatability of antral follicle count and anti-Müllerian hormone concentration at two different postpartum stages in dairy cattle.
M. Gobikrushanth1, P. A. Dutra1, C. A. Felton2, A. Ruiz-Sanchez1, T. C. Bruinjé1, M. G. Colazo2, S. Butler1 and D. J. Ambrose1,2, 1Department of Agricultural Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Livestock Research Branch, Alberta Agriculture and Forestry, Edmonton, AB, Canada, 3Animal & Grassland Research and Innovation Centre, Teagasc Moorepark, Fermoy, Co. Cork, Ireland

1140 43 Dairy cows with shorter ano-genital distance may be more fertile than those with longer ano-genital distance.
M. Gobikrushanth1, T. C. Bruinjé1, M. G. Colazo2 and D. J. Ambrose1,2, 1Department of Agricultural Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Livestock Research Branch, Alberta Agriculture and Forestry, Edmonton, AB, Canada

1141 44 Pregnancy Associated Glycoprotein (PAG) concentrations in early gestation from dairy heifers undergoing embryo transfer.
S. Reese1, M. H. Pereira1, J. L. M. Vasconcelos1 and K. G. Pohlerα1, 1University of Tennessee, Knoxville, 2UNESP - FMVZ, Botucatu, Brazil, 3University of Tennessee, Knoxville

1142 45 Protein kinase A directly phosphorylates GSK3β, and regulates beta-catenin via phosphorylation in granulosa cells.
B. H. Aloqaily*1, C. A. Gifford1, B. I. Gomez1 and J. A. Hernandez Gifford1, 1Oklahoma State University, Stillwater, 2Department of Animal Science, Oklahoma State University, Stillwater

1143 46 Plasma anti-Müllerian hormone in dairy heifers and associations with reproductive performance in two reproductive programs for first artificial insemination.
T. V. Silva1, J. E. P. Santos2 and E. S. Ribeiroα1, 1Department of Animal Sciences, University of Florida, Gainesville, 2University of Florida, Gainesville, 3Department of Animal Biosciences, University of Guelph, ON, Canada

1144 47 Wingless-type mouse mammary tumor virus integration site (WNT) regulation of ovarian theca cells of cattle.
L. J. Spicer*, Oklahoma State University, Stillwater

Ruminant Nutrition: Feed Additives I

1341 48 Application of Pediococcus pentosaceus and chitinase to high moisture alfalfa hay at baling: Effects on nutrient digestion and on growth performance of beef cattle.
L. Jin1, E. Chevaux1, T. A. McAllister1 and Y. Wang*1, 1Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 2Lallemand SAS, Blagnac, France

1342 49 The impact of Saccharomyces cerevisiae and Lactobacillus acidophilus on colon histomorphology and gene expression in rumen and ileum tissues of young dairy calves.
B. Fomenky1,2, J. Chiquette1, P. Y. Chouinard2 and É. M. Ibeagha-Awemu1, 1Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada, 2Département des Sciences Animales, Université Laval, Québec, QC, Canada

1343 50 Aflatoxin M1 levels reduction in milk after Saccharomyces cerevisiae or mannanoligosaccharides addition to aflatoxin B1 contaminated diet of dairy cows.
M. Aronovich1, C. Peral1, C. A. D. R. Rosa1, A. A. Castagna1 and E. Rodrigues1, 1Pesagro-Rio, Niteroi, Brazil, 2Castelo Branco University, Rio de Janeiro, Brazil, 3Veterinary Microbiology/UFRJ, Rio de Janeiro, Brazil
Effects of a plant extract-based feed additive on feed intake, milk production and composition, rumen fermentation, digestibility, and nitrogen utilization in lactating dairy cows.

D. M. Polizel, S. S. Marques, M. F. Westphalen, M. H. Santos, M. V. C. Ferraz Junior, M. V. Biehl, R. G. Silva, I. Monensin and A. V. Pires, IFMVZ/University of Sao Paulo, Pirassununga, Brazil, Ponta Grossa State University, Brazil, ESALQ/ University of Sao Paulo, Piracicaba, Brazil

Effect of narasin on rumen metabolism and dry matter intake in wethers fed high-forage diets.

D. M. Polizel, S. S. Marques, M. F. Westphalen, M. H. Santos, M. V. C. Ferraz Junior, M. V. Biehl, R. G. Silva, I. Monensin and A. V. Pires, IFMVZ/University of Sao Paulo, Pirassununga, Brazil, Ponta Grossa State University, Brazil, ESALQ/ University of Sao Paulo, Piracicaba, Brazil

Monensin and levels of narasin on rumen metabolism in lambs during adaptation to high-concentrate diets.

D. M. Polizel, S. S. Marques, M. F. Westphalen, M. H. Santos, M. V. C. Ferraz Junior, M. V. Biehl, R. G. Silva, I. Monensin and A. V. Pires, IFMVZ/University of Sao Paulo, Pirassununga, Brazil, Ponta Grossa State University, Brazil, ESALQ/ University of Sao Paulo, Piracicaba, Brazil

Effect of narasin on rumen metabolism and dry matter intake in wethers fed high-forage diets.

D. M. Polizel, S. S. Marques, M. F. Westphalen, M. H. Santos, M. V. C. Ferraz Junior, M. V. Biehl, R. G. Silva, I. Monensin and A. V. Pires, IFMVZ/University of Sao Paulo, Pirassununga, Brazil, Ponta Grossa State University, Brazil, ESALQ/ University of Sao Paulo, Piracicaba, Brazil

Daily supplementation with an active dry yeast improved feed efficiency in lactating dairy cows.

N. D. Walker and W. V. Straalen, AB Vista Feed Ingredients, Marlborough, United Kingdom, Schothorst, Lelystad, Netherlands

Effect of saponite (EcoMix) on toxin binding capacity, ruminal fermentation, diet digestibility and growth of steers fed high concentrate diets.

N. A. Lancaster, D. Silva Antonelo, C. R. Muegge and J. P. Schoonmaker, Purdue University, West Lafayette, IN, University of Sao Paulo, Pirassununga, Brazil

Use of aspergillus oryzae extract containing α-amylase activity in finishing diets for Nellore cattle.

C. F. Nascimento, L. L. Oliveira, W. D. C. Amancio, N. C. D. Silva, F. D. Santos, P. H. Gonçalves, G. R. Siqueira and F. D. D. Resende, UNESP - Univ Estadual Paulista, Jaboticabal, Brazil, UNIFEB, Barretos, Brazil, APTA - Agência Paulista de Tecnologia dos Agronegócios, Colina, Brazil

Inclusion of pelleted calcium hydroxide-treated corn stover in lactating Holstein cow diets: Effects on milk production and milk composition.

B. A. Casperson, A. E. Wertz-Lutz and S. S. Donkin, Purdue University, West Lafayette, IN, ADM Alliance Nutrition, Quincy, IL

Influence of adding slow release urea and zeolite in growth performance and carcass traits of feedlot lambs.

H. Dávila-Ramos, J. N. Sanchez-Perez, J. C. Robles-Estrada, F. G. Rios-Rincon, J. J. Portillo-Loera and A. Plascencia, Universidad Autonoma de Sinaloa, Culiacán, Mexico, Universidad Autonoma de Sinaloa, Sinoaloa, Mexico, Universidad Autonoma de Sinaloa, Cuilacan, Mexico, Universidad Autonoma de Sinaloa, Culiacn, Sinaloa, Mexico, Instituto de Investigaciones en Ciencias Veterinarias, Universidad Autonoma de Baja California, Mexico

Effect of different doses of a Bacillus-based probiotic on the in vitro digestibility of concentrates and forages.

C. A. Oliveira, D. O. Sousa, J. F. Fenso, P. F. Menegucci and L. F. P. Silva, University of Sao Paulo, Pirassununga, Brazil, Chr. Hansen, Valinhos, Brazil

Net choline absorption of abomasally infused choline and rumen-protected choline in the lactating dairy cow.

M. J. de Veth, V. M. Artegotita, S. R. Campagna, L. Hapierre, F. M. Harte and C. L. Girardi, BioloNarus LLC, Cary, NC, University of Tennessee, Knoxville, Agriculture & Agri-Food Canada, Sherbrooke, QC, Canada, The Pennsylvania State University, University Park

Effects of Trigestamace on performance of lactating dairy cows.

M. M. Masiero, A. L. Kenny, R. L. Barnett, R. Morrison and M. S. Kerley, University of Missouri, Columbia, R&D LifeSciences, Menomonie, WI

Effect of imprinted polymer based ergot-alkaloid adsorbent on in vitro ruminal fermentation.

M. B. Kudupoje, Alltech-University of Kentucky Nutrition Research Alliance, Lexington

Effects of ascophyllum nodosum meal and monensin on performance and iodine metabolism in lactating dairy cows.

S. F. Reis, A. F. Brito, C. P. Ghedini, D. C. Moura and A. S. Oliveira, University of New Hampshire, Durham, Universidade Federal de Mato Grosso, Cuiabá, Brazil, Instituto de Ciências Agrárias e Ambientais, Universidade Federal de Mato Grosso – Campus Sinop, Sinop, Brazil

Lactation performance and nutrient digestibility by dairy cows supplemented with calcium montmorillonite clay during an aflatoxin feeding challenge.

A. D. Thomas, C. Maki, E. M. Jimenez, S. E. Elmore, L. Kinman, A. Romoser, R. B. Harvey, T. Phillips and H. A. Ramirez Ramirez, Iowa State University, Ames, Texas A&M University, College Station, Tarleton State University, Stephenville, TX, USDA, College Station, TX
Impact of a ferulic acid esterase producing lactobacilli on nutrient digestion of barley silage.
L. Jin, Y. Wang* and T. A. McAllister, Lethbridge Reserarch and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada

Excretion of fumonisin B1 by dairy cows supplemented with calcium montmorillonite clay during a mycotoxin challenge.
E. M. Jimenez1, A. D. Thomas1, C. Maki1, S. E. Elmore2, R. B. Harvey3, T. Phillips4, L. A. Kinman4 and H. A. Ramirez Ramirez5, 1Tarleton State University, Stephenville, TX, 2Iowa State University, Ames, 3Texas A&M University, College Station, 4USDA, College Station, TX

The effect of vaginal temperature on expressed physical activity of lactating Holstein cows following induced estrus.
L. Polsky1, A. M. L. Madureira2, E. L. Drago Filho2, J. L. M. Vasconcelos2 and R. L. A. Cerri3, 1Applied Animal Biology, Faculty of Land and Food Systems, University of British Columbia, Vancouver, BC, Canada, 2Departamento de Produção Animal - FMVZ - UNESP, Botucatu, Brazil

Poster Session IV

5:00 PM - 6:00 PM
Exhibit Hall A/B

Forages and Pastures III

The physiological consequences of ingesting a toxic plant (Diplotaxis tenuifolia) and medicinal supplements influence subsequent foraging decisions by sheep.
F. H. Catanese1, J. J. Villalba2 and R. A. Distel1, 1Universidad Nacional del Sur, Bahia Blanca, Argentina, 2Utah State University, Logan

Lining bunker wall with oxygen barrier film reduces nutrient losses of corn silages.
L. M. Lima, J. P. Dos Santos, J. L. De Oliveira, J. O. Gusmao, M. S. Bastos, S. M. Da Silva, E. B. Alves, J. R. Gervasio and T. F. Bernardes, Federal University of Lavras, Brazil

Effects of method and storage time on the nutritive value of sugarcane for dairy cattle.
F. T. Fonseca1, L. M. Lima1, R. M. De Oliveira1, F. N. Domingues2 and T. F. Bernardes3, 1Federal University of Lavras, Brazil, 2Federal University of Para, Belem, Brazil

Bunk heating of rations containing corn silage with various inoculants, a stabilizer, or wet grain byproducts: A field survey.
B. Powel-Smith, L. Nuzback1, F. Owens, S. Dennis, B. Mahanna and W. Rutherford, DuPont Pioneer, Johnston, IA

The effect of *Lactobacillus brevis* and fibrolytic enzymes on fermentation of switchgrass silages.
J. Liu1, Y. Wang2, X. Wang3, Z. Cao1, S. Li2 and Z. Cai2, 1State Key Laboratory of Animal Nutrition, Beijing Engineering Technology Research Center of Raw Milk Quality and Safety Control, College of Animal Science and Technology, China Agricultural University, Beijing, China, 2Center of Biomass Engineering, College of Agriculture and Biotechnology, China Agricultural University, Beijing, China

Effects of wrapping time delays on fermentation characteristics of baled alfalfa silages.
W. K. Coblenz1, K. P. Coffey1 and E. A. Chow1, 1US Dairy Forage Research Center, Marshfield, WI, 2University of Arkansas, Division of Agriculture, Fayetteville, 3Kuraray America, Inc., Pasadena, TX

Effects of wrapping time delays on the nutritive value of baled alfalfa silages.
W. K. Coblenz1, K. P. Coffey1 and E. A. Chow1, 1US Dairy Forage Research Center, Marshfield, WI, 2University of Arkansas, Division of Agriculture, Fayetteville, 3Kuraray America, Inc., Pasadena, TX

Effects of corn planting density and maturity on yield and nutritional quality of corn silage.
G. Ferreira and C. L. Teets, Virginia Polytechnic Institute and State University, Blacksburg

Effect of homolactic bacteria inoculation and aerobic stress during ensiling on the nutritional and fiber digestibility characteristics of spring triticale.
L. C. Salórzano1, L. L. Solorzano2, A. A. Rodriguez1 and J. A. Teisberg2, 1University of Puerto Rico, Mayagüez, PR, 2Larkin, Fitchburg, WI, 3Nurealm, LLC, Hutisford, WI

Effect of homolactic bacteria inoculation and aerobic stress during ensiling on the fermentation characteristics, DM recovery and aerobic stability of spring triticale.
L. C. Salórzano1, L. L. Solorzano2, A. A. Rodriguez1 and J. A. Teisberg2, 1University of Puerto Rico, Mayagüez, PR, 2Larkin, Fitchburg, WI, 3Nurealm, LLC, Hutisford, WI

Effects of inoculant application on chemical composition, fermentation indices and microbial counts of corn silage.
Impact of temperature post-defrosting on fermentation of high-moisture corn.
L. F. Ferraretto\textsuperscript{1, 2}, E. Lynch\textsuperscript{2}, J. P. Goeser\textsuperscript{2, 3} and R. D. Shaver\textsuperscript{1}, \textsuperscript{1}University of Wisconsin-Madison, \textsuperscript{2}Rock River Laboratory, Inc, Watertown, WI

The effect of two microbial inoculants on the aerobic stability of high moisture corn.

Investigating the relationship between corn silage fiber digestibility and rainfall, growing degree days and soil type.
S. A. Flis\textsuperscript{4, 5}, T. P. Tylutki\textsuperscript{2} and P. Sirois\textsuperscript{1}, \textsuperscript{1}Dairy One, Ithaca, NY, \textsuperscript{2}AMTS LLC, Cortland, NY

Forage yield and quality of four maize cultivars sown in single and double rows.
M. A. Ramirez\textsuperscript{6}, Universidad Nacional Autonoma de Mexico, FMVZ, Mexico, City, Mexico

Evaluation of genetic diversity of \textit{Lactobacillus plantarum} isolated from alfalfa silage using the BOX-PCR.
M. C. N. Agarwala\textsuperscript{7}, O. G. Pereira\textsuperscript{5}, K. G. Ribeiro\textsuperscript{2}, E. S. Leandro\textsuperscript{2}, V. P. Silva\textsuperscript{2} and R. A. Paula\textsuperscript{1}, \textsuperscript{1}Federal University of Viçosa, Brazil, \textsuperscript{2}Universidade Federal de Viçosa, Viçosa, Minas Gerais, Brazil

Volatile organic compounds in sugarcane silage treated with chemical and microbial additives.
L. L. Cardoso\textsuperscript{8}, K. G. Ribeiro\textsuperscript{2}, O. G. Pereira\textsuperscript{1}, M. I. Marcondes\textsuperscript{9} and K. Weiss\textsuperscript{1}, \textsuperscript{1}Universidade Federal de Viçosa, Minas Gerais, Brazil, \textsuperscript{2}Departamento de Zootecnia, Universidade Federal de Viçosa, Viçosa, Brazil, \textsuperscript{3}Humboldt University of Berlin, Germany

Meta-analysis of the effect of homolactic and facultative heterolactic bacteria inoculation on silage quality: Fermentation profile.
A. S. Oliveira\textsuperscript{1}, Z. G. Weinberg\textsuperscript{2}, A. A. P. Cervantes\textsuperscript{2}, K. G. Arriola\textsuperscript{3}, I. M. Ogunade\textsuperscript{4}, Y. Jiang\textsuperscript{3}, D. Kim\textsuperscript{5} and M. C. M. Gonçalves\textsuperscript{6}, \textsuperscript{1}Universidade Federal de Mato Grosso - Sinop, Brazil, \textsuperscript{2}Department of Food Quality and Safety, Agricultural Research Organization, The Volcani Center, Rishon Le Zion, Israel, \textsuperscript{3}Department of Animal Sciences, UF/IFAS, Gainesville, FL, \textsuperscript{4}Department of Animal Sciences, University of Florida, Gainesville, \textsuperscript{5}Instituto Federal Goiano, Rio Verde, Brazil

The effects of air and heat stress on the aerobic stability of silage treated with a chemical additive.

Effects of chemical additives on fermentation characteristics of high moisture alfalfa silage.

**Small Ruminant II**

Effect of high concentrations of crude glycerin on feed intake and growth of feedlot ram lambs.
M. Almeida\textsuperscript{12}, J. M. Bertocco Ezequiel\textsuperscript{1}, J. R. Paschoaloto\textsuperscript{1}, H. L. Perez\textsuperscript{12}, V. B. Carvalho\textsuperscript{1}, E. S. Castro Filho\textsuperscript{1} and E. H. C. B. Van Cleef\textsuperscript{1}, \textsuperscript{1}Sao Paulo State University, Jaboticabal, SP, Brazil, \textsuperscript{2}Department of Animal Science, Department of Animal Science, University of Florida, Gainesville, FL, \textsuperscript{3}Department of Animal Sciences, University of Florida, Gainesville, FL

Conditions to evaluate differences among individual sheep and goats in resilience to restricted drinking water availability.
U. L. Mengistu\textsuperscript{12}, R. Puchal\textsuperscript{12}, T. Sahlu\textsuperscript{12}, T. A. Gipson\textsuperscript{1}, L. J. Dawson\textsuperscript{13} and A. L. Goetsch\textsuperscript{1}, \textsuperscript{1}American Institute for Goat Research, Langston University, OK, \textsuperscript{2}School of Animal and Range Sciences, Haramaya University, Dire Dawa, Ethiopia, \textsuperscript{3}Center of Veterinary Health Sciences, Oklahoma State University, Stillwater

High concentrations of crude glycerin change ruminal \textit{in vitro} greenhouse gas emissions in feedlot sheep.
M. Almeida\textsuperscript{12}, J. M. Bertocco Ezequiel\textsuperscript{1}, J. R. Paschoaloto\textsuperscript{1}, H. L. Perez\textsuperscript{12}, V. B. Carvalho\textsuperscript{1}, E. S. Castro Filho\textsuperscript{1} and E. H. C. B. Van Cleef\textsuperscript{1}, \textsuperscript{1}Sao Paulo State University, Jaboticabal, SP, Brazil, \textsuperscript{2}FAPESP, Sao Paulo, SP, Brazil, \textsuperscript{3}Unesp, Sao Paulo State University, Department of Animal Science, Jaboticabal, SP, Brazil

Factors influencing estimates of energy used for activity by grazing meat goats.
M. E. Brassard\textsuperscript{7}, R. Puchala\textsuperscript{7}, T. A. Gipson\textsuperscript{1}, T. Sahlu\textsuperscript{7} and A. L. Goetsch\textsuperscript{1}, \textsuperscript{1}Université Laval, Quebec City, QC, Canada, \textsuperscript{2}American Institute for Goat Research, Langston University, OK

The response to artificial infection with \textit{Haemonchus contortus} and growth performance of sheep and goat progeny of selected parents in a central performance test.

Effect of Axcelera-C on calf performance, intake, digestive development and immune function during the first 3 months of life.
M. Terré, F. Fabregas and A. Bach, 1IRTA, Caldes de Montbui, Spain, 2Department of Ruminant Production, IRTA, Caldes de Montbui, Spain, 3CREA, Barcelona, Spain

Colostrum supplement feeding with a medium quality bovine colostrum: Passive immunity transfer, health and performance of dairy calves.
M. R. De Paula, N. B. Rocha, E. Miqueo, F. L. M. Silva, T. Manzoni, S. Baldassin and C. M. M. Bitrar, University of Sao Paulo, Piracicaba, Brazil

Thermoregulation, performance and blood metabolites in calves fed different amounts of colostrum.
F. L. M. Silva, M. D. Silva, E. Miqueo, N. B. Rocha, T. Manzoni, M. G. Coelho and C. M. M. Bittar, University of Sao Paulo, Piracicaba, Brazil

The effects of supplementing a ruminally protected B-vitamin complex on pre-weaning growth and performance of Holstein heifer calves.
K. M. Wood, E. Evans, C. L. Girard, H. Leclerc, L. Doepel and G. B. Penner, 1Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada, 2Technical Advisory Services, Bowmanville, ON, Canada, 3Agriculture & Agri-Food Canada, Sherbrooke, QC, Canada, 4Jefo Nutrition, St. Hyacinthe, QC, Canada, 5University of Calgary, AB, Canada, 6University of Saskatchewan, Saskatoon, SK, Canada

RNAseq-based whole transcriptome analysis in jejunum of pre-weaned calves under different milk feeding regimens.
H. M. Hammon, D. Frieten, C. Gerber, C. Koch, G. Duse, R. Weikard and C. Kühn, 1Leibniz Institute for Farm Animal Biology (FBN), Dummerstorf, Germany, 2University of Applied Sciences, Bingen, Germany, 3Educational and Research Centre for Animal Husbandry, Hofgut Neumuehle, Muenschweiler, Germany

Comparison of two calf rearing programs on the performance and cost benefit ratio.
Ruminant Nutrition: Forages and Feeds I

1427  52 Effects of feeding steers extruded flaxseed and hay together (TMR) or sequentially (non-TMR) on animal performance and erythrocyte vaccenic, rumenic and alpha-linolenic acid content.

P. Vahmani1, D. C. Rolland1, T. A. McAllister2, H. C. Block1, S. D. Proctor1, L. L. Guan1, N. Prieto1, J. L. Aalhus1 and M. E. R. Dugan1, 1Agriculture and Agri-Food Canada, Lacombe, AB, Canada, 2Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 1University of Alberta, Edmonton, AB, Canada

1428  53 Transcriptome responses to different forage allowance in the hypothalamus of grazing beef cows.

A. I. Trujillo1, F. Peñaagaricano2, A. Casal1, J. Laporta1, P. Soca4 and M. Carriquiry1, 1Facultad de Agronomia, Universidad de la Republica, Montevideo, Uruguay, 2University of Florida, Gainesville, 3Department of Animal Sciences, University of Florida, Gainesville, 4Facultad de Agronomia, Universidad de la Republica, Paysandu, Uruguay

1429  54 Effects of feeding alfalfa stemlage or wheat straw for dietary energy dilution on growth performance and sorting behaviors of Holstein dairy heifers.

1430  55 Effect of partially replacing barley grain with liquid whey permeate in diets for finishing lambs on DMI, average daily gain, and total tract digestibility.

F. Joy* and G. B. Penner, Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada

1431  56 Evaluation of the fermentation characteristics and glucosinolate content of cold-pressed or solvent-extracted carinata meal ensiled with corn forage.

K. Rodriguez-Hernandez1,2, J. L. Anderson1, M. A. Berhow3 and A. Garcia1, 1Dairy Science Department, South Dakota State University, Brookings, 2CIRNOC-INIFAP, Matamoros, Mexico, 3USDA-ARS, NCAUR, Peoria, IL

1432  57 Magnitude of difference in chemical and nutrient profiles, ruminal degradation kinetics, and intestinal digestion of three barley silages varieties in comparison with corn silage for dairy cattle.

B. Refat1,2, W. Yang1, J. J. McKinnon1, J. Nair1, A. D. Beattie4, T. A. McAllister2, D. A. Christensen3 and P. Yu1, 1Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, 2Animal Production Department, Faculty of Agriculture, Zagazig University, Zagazig, Egypt, 3Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 4Department of Plant Sciences, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada, 5University of Saskatchewan, Saskatoon, SK, Canada

1433  58 Production of high quality and digestible forages to increase milk production and nutrient supply for lactating dairy cows.

J. P. Pretz*1, C. Ramsier2 and D. P. Casper1, 1Dairy Science Department, South Dakota State University, Brookings, 2Ag Spectrum, Inc., De Witt, IA

1434  59 Increased forage NDF digestibility (in vitro or in situ) is positively related to DMI and milk yield both across and within forage type.

D. Sousa*, M. J. VandeHaar and M. S. Allen, Michigan State University, East Lansing

1435  60 Lactation performance, in situ degradability, and rumen fermentation of Holstein cows fed BMR-6 sorghum silage versus corn silage based diets.

K. K. Gautam, S. J. Trojan, J. O. Sarturi and M. A. Ballou*, Texas Tech University, Lubbock

1436  61 Factors affecting methane production from ruminal fermentation of fiber isolated from dried distillers grains and solubles.

1437  62 Effect of native and hybrid varieties of whole-plant corn silage on digestion in diets for cattle.

L. Corona-Gochi*, Universidad Nacional Autonoma de Mexico, Mexico City, Mexico

1438  63 Evaluation of brown mid-rib sudangrass silage in the diets of lactating dairy cows.

K. F. Kalscheur* and B. Geoff, USDA-ARS, US Dairy Forage Research Center, Madison, WI

1439  64 Chemical composition and fermentation profile of corn silage ensiled for 0, 30, 90, or 150 days from corn treated with a foliar fungicide at different growing stages.

M. Weatherly*, C. Kalebich1, K. Robinson1, G. M. Fellows1 and P. C. Cardoso1, 1University of Illinois at Urbana-Champaign, 2BASF Corporation, Research Triangle Park, NC
Chemical and energy profiles of value added pellet products based on combination of new co-products from bio-fuel/bio-oil processing, low grade of peas and lignosulfonate chemical compound at different levels for ruminants.

V. Guevara*, D. A. Christensen, J. J. McKinnon and P. Yu, Department of Animal and Poultry Science, College of Agricultural and Bioresources, University of Saskatchewan, Saskatoon, SK, Canada

Use of short season hybrids may enable greater use of corn silage in Western Canadian feedlot diets without decreasing animal performance.

G. E. Chibisa*1 and K. A. Beauchemin2, 1University of Idaho, Moscow, 2Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada

In vitro starch and neutral-detergent fiber degradability of corn silage hybrids.

M. T. Harper*, G. Roth1, H. L. Wells1, C. Canale2, A. Gallo3, F. Masoero3 and A. N. Hristov4, 1The Pennsylvania State University, University Park, 2Cargill Animal Nutrition, Shippensburg, PA, 3Università Cattolica del Sacro Cuore, Piacenza, Italy
Animal Science and Technology: Ensuring Food Security

ASA-CSAS Annual Meeting & Trade Show
July 8 - 12, 2017 • Baltimore, Maryland

www.asas.org/Annual2017
We are committed to optimizing animal performance and well-being with specific natural microbial product and service solutions. Using sound science, proven results and knowledge from experience, Lallemand Animal Nutrition:

- Develops, manufactures and markets high value yeast and bacteria products including probiotics, silage inoculants and yeast derivatives.
- Offers a higher level of expertise, leadership and industry commitment with long-term and profitable solutions to move our partners forward.

Lallemand Animal Nutrition
Specific for your success
SYMPOSIA AND ORAL SESSIONS

ADSA Production Division Symposium:
Robotic Dairying: Adapting Farm and Business Management

Chair: Leo L. Timms, Iowa State University
9:30 AM - 12:30 PM
Grand Ballroom J

9:30 AM 33 Changes in dairy farm management strategies with the adoption of robotic milking.
J. Rodenburg*, DairyLogix, Woodstock, ON, Canada

10:00 AM 34 Opportunities and challenges for herd health and reproduction with robotic milking.
S. J. LeBlanc*, Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada

10:30 AM Break

10:45 AM 35 Nutritional approaches in robotic herds.
A. Bach1,2, M. Vidal1, and V. Cabrera3, 1ICREA, Barcelona, Spain, 2IRTA, Caldes de Montbui, Spain, 3University of Wisconsin-Madison

11:15 AM 36 Finances and returns for robotic dairies.
J. A. Salfer1, M. I. Endres2, W. Lazarus2, and K. Minegishi2, 1University of Minnesota, St. Cloud, 2University of Minnesota, St. Paul

11:45 AM Panel Discussion

Animal Behavior and Well-Being Symposium:
Metrics for On-Farm Animal Welfare Assessment –
Current State and Future Needs

Chair: Trevor J. DeVries, University of Guelph
Sponsor: Novus
9:30 AM - 12:30 PM
150 B/C

9:30 AM Introductory Remarks

9:40 AM 95 Poultry welfare assessments: Where do we go from here.
R. Blatchford*, University of California-Davis

10:20 AM 96 Metrics for beef cattle welfare.
D. Griffin*, Great Plains Veterinary Educational Center, Clay Center, NE

11:00 AM Break

11:10 AM 97 Optimizing outcome measures of welfare in dairy cattle assessment.
E. Vasseur*, McGill University, Sainte-Anne-de-Bellevue, QC, Canada

11:50 AM 98 The Common Swine Industry Audit: Future steps to assure positive on-farm animal welfare utilizing validated, repeatable and feasible animal-based measures.
M. Pairis-Garcia1 and C. J. Rademacher2, 1The Ohio State University, Columbus, 2Swine Medicine Education Center, Department of Vet Diagnostic & Production Animal Medicine, Ames, IA
Animal Health: Dairy Transition and Reproductive Health

Chair: Troy J. Wistuba, Phibro Animal Health Corporation
9:30 AM - 11:35 PM
155 D

9:30 AM
Introductory Remarks

9:35 AM 144
Effects of lactic acid bacteria on metritis prevalence and endometrium inflammation in dairy cows.
S. Genís1, R. L. A. Cerri2, A. Bach3,4, B. F. Silper2, J. Denis-Robichaud5, and A. Aríš1, 1Department of Ruminant Production, IRITA, Caldes de Montbui, Spain, 2Applied Animal Biology, Faculty of Land and Food Systems, University of British Columbia, Vancouver, BC, Canada, 3ICREA, Barcelona, Spain, 4IRTA, Caldes de Montbui, Spain, 5Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada

9:50 AM 145
Metritis severity score misclassification underpredicts consequence cost of disease.
M. M. McCarthy* and M. W. Overton, Elanco Animal Health, Greenfield, IN

10:05 AM 146
Subacute ruminal acidosis negatively affects conception rate in Holstein heifers.
H. Khalouei1, A. A. Alamouti2, A. Mohammadi-Sangcheshmeh2, N. Farzaneh1, J. C. Plaizier1, and E. Khafipour1, 1Department of Animal Science, University of Manitoba, Winnipeg, MB, Canada, 2Department of Animal and Poultry Sciences, Ahuraian Campus, University of Tehran, Pakdasht, Tehran, Islamic Republic of Iran

10:20 AM 147
Evaluating milk fat to protein ratio and milk fat to lactose ratio as indicators for early lactation disease.
S. Paudyal1,2, F. P. Maunsell3, C. A. Risco1, A. Donovan1, A. De Vries4, D. Manriquez1, and P. J. Pinedo1,5, 1Department of Animal Sciences, Colorado State University, Fort Collins, 2College of Veterinary Medicine, University of Florida, Gainesville, 3Department of Animal Science, Colorado State University, Fort Collins, 4Department of Animal Science, University of Florida, Gainesville, 5Texas A&M AgriLife Research, Amarillo

10:35 AM 148
Associations between multiple activity and physiological parameters around the time of disease diagnosis and calving in Holstein cows.
D. Manriquez1, F. P. Maunsell2, S. Paudyal1, A. Donovan3, A. De Vries4, and P. J. Pinedo2, 1Department of Animal Sciences, Colorado State University, Fort Collins, 2College of Veterinary Medicine, University of Florida, Gainesville, 3Department of Animal Science, University of Florida, Gainesville, 4Texas A&M AgriLife Research, Amarillo

10:50 AM 149
DI/LC-MS/MS-based metabolomics identifies early predictive serum biomarkers for ketosis in dairy cows.
B. N. Ametaj1, G. Zhang1, E. Dervishi1, S. M. Dunn1, R. Manda1, and D. S. Wishart2, 1Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2University of Alberta, Edmonton, AB, Canada

11:05 AM 150
Targeted metabolomics reveals multiple metabolite alterations in the urine of transition dairy cows preceding the incidence of lameness.
B. N. Ametaj1, G. Zhang1, E. Dervishi1, S. M. Dunn1, R. Manda1, and D. S. Wishart2, 1Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2University of Alberta, Edmonton, AB, Canada

11:20 AM 151
Elevated serum amyloid A concentrations in the first days after calving are an early disease indicator in dairy cows.
G. Bobe1 and S. Walker2, 1Department of Animal and Rangeland Sciences, Oregon State University, Corvallis, 2Oregon State University, Corvallis

ASAS Western Section Young Scholars

Chair: Michael Salisbury, Angelo State University
Sponsor: Zinpro
9:30 AM - 11:00 AM
155 C

9:30 AM 25
Effects of organic or inorganic Co, Cu, Mn, and Zn supplementation to late-gestating beef cows on productive and physiological responses of the offspring.
R. Marques1, R. F. Cooke1, M. C. Rodrigues1, B. I. Cappellozza1, R. R. Mills2, C. K. Larson1, P. Moriel1, and D. W. Bohnert1, 1Oregon State University-EOARC Burns, 2Oregon State University Extension Service, Pendleton, 1Zinpro Corporation, Eden Prairie, MN, 2UF/IFAS Range Cattle Research and Education Center, Ona, FL
10:00 AM 26  
Altered rumen microbial populations in response to high sulfate water in lambs.
A. N. Abrams1, C. J. Clarkson1, K. J. Austin1, M. Ellison1, H. C. Cunningham1, G. C. Conant2, W. R. Lamberson2, T. M. Taxis1, and K. M. Cammack1, 1Department of Animal Science, University of Wyoming, Laramie, 2University of Missouri, Columbia

10:30 AM 27  
Immunological implications of pregnancy: A focus on inflammatory cytokines.
S. Z. Prosser*, K. E. Quinn, and R. L. Ashley, New Mexico State University, Las Cruces

**Beef Cattle Nutrition Symposium: A Look at the Latest Beef Cattle NRC Recommendations**

**Chair:** Nathan M. Long, Clemson University  
**Sponsor:** NRC, ASAS & Zinpro  
9:30 AM - 12:30 PM  
Grand Ballroom B/D

9:30 AM 1021  
Overview of the process and changes in the 8th Edition of the Nutrient Requirements of Beef Cattle.  
M. L. Galyean*, Texas Tech University, Lubbock

9:45 AM 1022  
The 8th Revised Edition of the Nutrient Requirements of Beef Cattle: Maintenance and growth.  
J. S. Caton1, C. R. Krehbiel1, M. L. Galyean1, and L. O. Tedeschi1, 1Department of Animal Sciences, North Dakota State University, Fargo, 2Oklahoma State University, Stillwater, 3Texas Tech University, Lubbock, 4Texas A&M University, College Station

10:15 AM 1023  
The 8th Revised Edition of the Nutrient Requirements of Beef Cattle: Reproduction.  
R. P. Lemenager1, J. S. Caton2, M. L. Galyean3, and L. O. Tedeschi4, 1Purdue University, West Lafayette, IN, 2Department of Animal Sciences, North Dakota State University, Fargo, 3Texas Tech University, Lubbock, 4Texas A&M University, College Station

10:30 AM 1024  
The 8th Revised Edition of the Nutrient Requirements of Beef Cattle: Protein and metabolic modifiers.  
J. H. Eisemann1, M. L. Galyean1, K. A. Beauchemin1, C. R. Krehbiel1, and L. O. Tedeschi1, 1North Carolina State University, Raleigh, 2Texas Tech University, Lubbock, 3Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 4Oklahoma State University, Stillwater, 5Texas A&M University, College Station

10:50 AM 1025  
The 8th Revised Edition of the Nutrient Requirements of Beef Cattle: Minerals, vitamins, and water.  
T. E. Engle1, J. S. Caton2, M. L. Galyean3, L. O. Tedeschi4, N. A. Cole1, C. R. Krehbiel1, G. E. Erickson1, K. A. Beauchemin1, R. P. Lemenager4, and J. H. Eisemann5, 1Colorado State University, Fort Collins, 2Department of Animal Sciences, North Dakota State University, Fargo, 3Texas Tech University, Lubbock, 4Texas A&M University, College Station, 5USDA-ARS, Bushland, 6Oklahoma State University, Stillwater, 7University of Nebraska-Lincoln, 8Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 9Texas A&M University, College Station

11:10 AM 1026  
The 8th revised edition of the Nutrient Requirements of Beef Cattle: Environmental issues.  
N. A. Cole1, K. A. Beauchemin1, G. E. Erickson1, L. O. Tedeschi1, and M. L. Galyean1, 1USDA-ARS Conservation and Production Research Laboratory, Bushland, 2Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 3University of Nebraska-Lincoln, 4Texas A&M University, College Station, 5Texas Tech University, Lubbock

11:30 AM 1027  
The 8th Revised Edition of the Nutrient Requirements of Beef Cattle: Byproducts and feed composition.  
K. A. Beauchemin1, G. E. Erickson1, H. Tran1, J. S. Caton1, N. A. Cole1, J. H. Eisemann1, T. E. Engle2, M. L. Galyean3, C. R. Krehbiel1, R. P. Lemenager4, and L. O. Tedeschi5, 1Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 2University of Nebraska-Lincoln, 3National Animal Nutrition Program, University of Kentucky, Lexington, 4Department of Animal Sciences, North Dakota State University, Fargo, 5USDA-ARS Conservation and Production Research Laboratory, Bushland, TX, 6North Carolina State University, Raleigh, 7Colorado State University, Fort Collins, 8Texas Tech University, Lubbock, 9Oklahoma State University, Stillwater, 10Purdue University, West Lafayette, IN, 11Texas A&M University, College Station

11:50 AM 1028  
The 8th Revised Edition of the Nutrient Requirements of Beef Cattle: Development and evaluation of the mathematical model.  
L. O. Tedeschi1, M. L. Galyean2, K. A. Beauchemin1, J. S. Caton1, N. A. Cole1, J. H. Eisemann1, T. E. Engle2, G. E. Erickson3, C. R. Krehbiel1, and R. P. Lemenager4, 1Texas A&M University, College Station, 2Texas Tech University, Lubbock, 3Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 4Department of Animal Sciences, North Dakota State University, Fargo, 5USDA-ARS Conservation and Production Research Laboratory, Bushland, TX, 6North Carolina State University, Raleigh, 7Colorado State University, Fort Collins, 8University of Nebraska-Lincoln, 9Oklahoma State University, Stillwater, 10Purdue University, West Lafayette, IN

12:10 PM  
Panel Discussion
**Bioethics Symposium**

Chair: James W. Knight, Virginia Polytechnic Institution and State University  
Sponsor: Elanco Animal Health  
9:30 AM - 12:30 PM  
151 B/C

9:30 AM  280  
How was that chicken raised? Ethics and deliberating conscientiously about animal welfare standards.  
*R. X. Anthony*, University of Alaska Anchorage, Anchorage

10:15 AM  281  
Farm animal welfare: Three essential ingredients from an international context.  
*A. De Paula Vieira*, Positivo University, Curitiba, Brazil

11:00 AM  
Break

11:15 AM  282  
Breaking down communication barriers to connect with stakeholders.  
*R. Beck*, The Center for Food Integrity, Gladstone, MO

12:00 PM  
Panel Discussion

---

**Breeding and Genetics: Genomic Evaluation II - Applications**

Chair: Ignacy Misztal, University of Georgia  
9:30 AM - 12:30 PM  
Grand Ballroom I

9:30 AM  302  
Identifying and calling insertions, deletions, and single-base mutations efficiently from sequence data.  
P. M. VanRaden1, D. M. Bickhart4, and J. R. O’Connell2, 1Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD, 2University of Maryland School of Medicine, Baltimore

9:45 AM  303  
Issues in commercial application of single-step genomic BLUP for genetic evaluation in American Angus.  
D. A. L. Lourenco1, S. Tsuruta1, B. D. Fragomeni1, Y. Masuda1, I. Pocrnic1, I. Aguilar2, J. K. Bertrand1, D. W. Moser1, and I. Misztal1, 1University of Georgia, Athens, 2INIA, Las Brujas, Uruguay, 3Angus Genetics Inc., St. Joseph, MO

10:00 AM  304  
Single-step GBLUP using APY inverse for protein yield in US Holstein with a large number of genotyped animals.  
Y. Masuda1, I. Misztal1, and P. M. VanRaden2, 1University of Georgia, Athens, 2Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD

10:15 AM  305  
Heteroskedastic extensions for genome-wide association studies.  
Z. Ou1, R. J. Tempelman2, J. P. Steibel3, C. W. Ernst1, R. O. Bates1, C. Chen1, and N. M. Bello1, 1Department of Statistics, Kansas State University, Manhattan, 2Michigan State University, East Lansing, 3Department of Animal Science, Michigan State University, East Lansing, 4Department of Fisheries and Wildlife, Michigan State University, East Lansing

10:30 AM  306  
Exploring the feasibility of using copy number variants as genetic markers through large-scale whole genome sequencing experiments.  
D. M. Bickhart1, L. Xu3, J. L. Hutchison1, J. B. Cole1, D. J. Null1, S. G. Schroeder3, J. Song2, J. F. Garcia1, T. Sonstegard3, C. P. VanTassell1, R. D. Schnabel2, J. F. Taylor6, and G. E. Liu2, 1Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD, 2Department of Animal and Avian Sciences, University of Maryland, College Park, 3Animal Improvement Programs Laboratory, USDA-ARS, Beltsville, MD, 4UNESP Univ Estadual Paulista, Araçatuba, Brazil, 5Recombinetics, Inc., St Paul, MN

10:45 AM  307  
Use of marker × environment interaction whole genome regression model to incorporate genetic heterogeneity for residual feed intake, dry matter intake, net energy in milk, and metabolic body weight in dairy cattle.  
C. Yao1, G. de los Campos2, M. J. VandeHaar2, D. M. Spurlock3, L. E. Armentano1, M. F. Coffey1, Y. de Haas4, R. F. Veerkamp5, C. R. Staples1, E. E. Connor4, Z. Wang3, R. J. Tempelman3, and K. A. Weigel1, 1University of Wisconsin-Madison, 2Animal Breeding and Genomics Centre, Wageningen University, Netherlands, 3Department of Animal Sciences, University of Florida, Gainesville, 4USDA-ARS, Animal Genomics and Improvement Laboratory, Beltsville, MD, 5University of Alberta, Edmonton, AB, Canada

11:00 AM  
Break
11:15 AM  308  Imputation of medium density genotypes from custom low density genotype panel in sheep.
D. P. Berry\textsuperscript{2}, A. O’Brien\textsuperscript{4}, S. Randles\textsuperscript{1}, K. McDermott\textsuperscript{1}, E. Wall\textsuperscript{1}, and N. McHugh\textsuperscript{1}, \textsuperscript{1}Sheep Ireland, Bandon, \textsuperscript{2}Teagasc Moorepark, Fermoy, Ireland

11:30 AM  309  Systematic profiling of short tandem repeats in the cattle genome.
G. E. Liu\textsuperscript{1}, L. Xu\textsuperscript{1}, R. Haasl\textsuperscript{2}, J. Sun\textsuperscript{3}, Y. Zhou\textsuperscript{1}, D. M. Bickhart\textsuperscript{1}, J. Li\textsuperscript{1}, J. Song\textsuperscript{1}, T. Sonstegard\textsuperscript{4}, C. P. VanTassell\textsuperscript{1}, and H. Lewin\textsuperscript{1}, Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD, \textsuperscript{2}University of Wisconsin-Platteville, \textsuperscript{3}South China Agricultural University, Guangzhou, China, \textsuperscript{4}Institute of Animal Science of Chinese Academy of Agricultural Sciences, Beijing, China, Beijing, China, \textsuperscript{5}University of Maryland, Animal Science and Avian, College Park, \textsuperscript{6}Recombinetics, Inc., St Paul, MN, \textsuperscript{7}University of California-Davis, Department of Evolution and Ecology, David

11:45 AM  310  Assessing genetic diversity in Canadian beef cattle populations using Illumina Bovine SNP50 chip.
M. K. Abo-Ismail\textsuperscript{1,2}, E. C. Akanno\textsuperscript{1}, R. Khorshidi\textsuperscript{1}, J. Crowley\textsuperscript{1,3}, L. Chen\textsuperscript{1}, B. K. Karisa\textsuperscript{1}, X. Li\textsuperscript{1}, Z. Wang\textsuperscript{1}, J. Basarab\textsuperscript{1,5}, C. Li\textsuperscript{1,6}, P. Stothard\textsuperscript{1}, and G. Plastow\textsuperscript{1}, Livestock Gentec, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, \textsuperscript{2}Animal and Poultry Production, Damanhour University, Damanhour, Egypt, \textsuperscript{3}Canadian Beef Breeds Council, Calgary, AB, Canada, \textsuperscript{4}Alberta Livestock and Meat Agency Ltd, Edmonton, AB, Canada, \textsuperscript{5}Lacombe Research Centre, Alberta Agriculture and Forestry, Lacombe, AB, Canada, \textsuperscript{6}Lacombe Research and Development Centre, Agriculture and Agri-Food Canada, Edmonton, AB, Canada

12:00 PM  311  Joint association analysis of additive and non-additive genomic effects for growth and carcass traits of beef cattle.
E. C. Akanno\textsuperscript{1}, M. K. Abo-Ismail\textsuperscript{1,2}, L. Chen\textsuperscript{1}, C. Li\textsuperscript{1,3}, J. Basarab\textsuperscript{1,4}, and G. Plastow\textsuperscript{1}, Livestock Gentec, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, \textsuperscript{2}Animal and Poultry Production, Damanhour University, Damanhour, Egypt, \textsuperscript{3}Lacombe Research and Development Centre, Agriculture and Agri-Food Canada, Edmonton, AB, Canada, \textsuperscript{4}Lacombe Research Centre, Alberta Agriculture and Forestry, Lacombe, AB, Canada

12:15 PM  312  Investigation of genomic imprinting through allelic expression analysis of mRNA in chicken embryonic brain and liver.
Z. Zhuo\textsuperscript{1}, S. J. Lamont\textsuperscript{2}, and B. Abasht\textsuperscript{1}, \textsuperscript{1}Department of Animal and Food Sciences, University of Delaware, Newark, \textsuperscript{2}Department of Animal Science, Iowa State University, Ames

---

**Comparative Gut Physiology Symposium**

Chair: Andrew P. Foote, USDA-ARS, US Meat Animal Research Center

Sponsors: Novus, King Techina, Kemin, Pro Nutra Solutions

9:30 AM - 5:00 PM
Grand Ballroom A

9:30 AM  Introductory Remarks

9:45 AM  441  Diet, gut microbiome, brain and behavior.
J. Bienenstock\textsuperscript{1}, McMaster Brain-Body Institute, Hamilton, ON, Canada

10:30 AM  442  Butyrate increases tight junction protein expression and enhances tight junction integrity in porcine IPEC-J2 cells stimulated with LPS.
H. Yan\textsuperscript{1} and K. M. Ajuwon\textsuperscript{2}, \textsuperscript{1}Purdue University, West Lafayette, IN, \textsuperscript{2}Department of Animal Sciences, Purdue University, West Lafayette, IN

10:45 AM  443  Understanding host-microbiota interplay using nutrimetabonomics.
S. P. Claus\textsuperscript{1}, C. I. Le Roy\textsuperscript{1}, M. J. Woodward\textsuperscript{1}, and R. M. La Ragione\textsuperscript{2}, \textsuperscript{1}The University of Reading, United Kingdom, \textsuperscript{2}University of Surrey, Guildford, United Kingdom

11:30 AM  444  Effects of dietary fibers on obesity related physiological parameters in C57BL/6 mice.
C. Liu, A. K. Singh, M. Stewart, J. H. Uyehara-Lock, and R. Jha\textsuperscript{1}, University of Hawaii at Manoa, Honolulu

11:45 AM  445  The gut microbiome as a regulator of physiology, brain and behaviour: Implications for the treatment of stress-related disorders.
G. Clarke\textsuperscript{1}, T. F. O’Callaghan\textsuperscript{1}, P. Ross\textsuperscript{1}, and C. Stanton\textsuperscript{1}, \textsuperscript{1}University College Cork, Ireland, \textsuperscript{2}Teagasc Food Research Centre, Cork, Ireland

12:30 PM  Break

2:00 PM  446  The microbiota-gut-brain axis: A key regulator of neural function across the lifespan.
J. F. Cryan\textsuperscript{1}, University College Cork, Ireland
2:45 PM 447  Microbial modulation of the neonatal immune system: Lessons from infants and piglets.  
S. M. Donovan1, M. Wang1, L. A. Davidson1, J. Ivanov2, and R. S. Chapkin2, 1University of Illinois at Urbana-Champaign, 2Texas A&M University, College Station

3:15 PM 448  The growing importance of defining gut “health” in animal nutrition and health.  
P. Celi1, A. J. Cowsion1, F. Fru-Nji2, A. M. Kluenter2, and V. Verlhac1, 1Faculty of Veterinary and Agricultural Sciences, The University of Melbourne, Parkville, Australia, 2DSM Nutritional Products, Kaiseraugst, Switzerland

3:30 PM 449  The microbiome and animal health.  
G. B. Penner1, T. A. McAllister2, S. Li1, J. C. Plaizier3, E. Khafipour3, and L. L. Guan4, 1University of Saskatchewan, Saskatoon, SK, Canada, 2Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada 3Department of Animal Science, University of Manitoba, Winnipeg, MB, Canada, 4Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada

4:15 PM 450  In vitro fermentation characteristics of agricultural products and coproducts and its effect on the large intestinal microbiota of swine.  
U. P. Tiwari1, S. Mattus1, K. Neupane1, and R. Jha1, 1University of Hawaii at Manoa, Honolulu, 2University of Hawaii, Leeward Community College, Pearl City

4:30 PM 451  Analysis of the gut microbiome in beef cattle and its association with feed intake, growth, and efficiency.  
P. R. Myer1, J. E. Wells2, T. P. L. Smith2, L. A. Kuehn2, and H. C. Freely2, 1University of Tennessee Institute of Agriculture, Knoxville, 2USDA-ARS, US Meat Animal Research Center, Clay Center, NE

Forages and Pastures II
Chair: Karla H. Jenkins, University of Nebraska

9:30 AM - 12:30 PM  Grand Ballroom H

9:30 AM 656 WS  Influence of supplement type and monensin addition on utilization of low-quality, cool-season forage by beef cattle.  
D. W. Bohnert1, M. C. Rodrigues1, M. C. Vieira1, K. C. Swanson1, S. J. Falck1, and R. F. Cooke1, 1Oregon State University-EOARC Burns, 2North Dakota State University, Fargo, 3USDA-ARS; EOARC Burns, OR

9:45 AM 657 WS  Methods to increase productivity of spring calving production systems in the Nebraska Sandhills.  
D. Broadhead1, A. Stalker1, J. A. Musgrave2, and R. N. Funston2, 1University of Nebraska-Lincoln, North Platte, 2University of Nebraska-Lincoln,

10:00 AM 658 WS  Performance of stocker cattle grazing ‘Tifton 85’ bermudagrass supplemented with dried distillers grains on per animal and per area bases: A 2-year summary.  
W. B. Smith1, F. M. Rouquette1, J. L. Kerby1, L. O. Tedeschi2, J. L. Foster2, J. P. Banta1, K. C. McCuistion3, T. J. Machado4, and L. A. Redmon4, 1Texas A&M AgriLife Research, Overton, 2Texas A&M University, College Station, 3Texas A&M AgriLife Research, Beeville, 4Texas A&M University, Kingsville

10:15 AM 659 WS  Monensin effects on early weaned beef calves grazing annual ryegrass pastures.  
J. M. B. Vendramini1, P. Leite de Oliveira1, J. M. D. Sanchez1, J. Yarborough1, D. Perez1, J.Ralston1, and R. F. Cooke2, 1UF/IFAS, Range Cattle Research and Education Center, Ona, FL, 2Oregon State University-EOARC Burns

10:30 AM 660 WS  Reduced enteric methane emissions on legume vs. grass irrigated pastures.  
J. W. MacAdam1, K. A. Beauchemin1, A. I. Bolletta1, and L. R. Pitcher1, 1Department of Plants, Soils, and Climate, Utah State University, Logan, 2Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 3National Institute of Agricultural Technology, Bordenave, Argentina, 4Utah State University, Logan

10:45 AM 661 WS  Milk production, rumination and body condition score of organic dairy cattle grazing two pasture systems incorporating warm and cool season forages.  
K. E. Ruh1,2, B. J. Heins3, and J. Paulson4, 1University of Minnesota, Saint Paul, 2University of Minnesota West Central Research and Outreach Center, Morris, 3University of Minnesota Extension, Rochester

11:00 AM  Break

11:15 AM 662 WS  Evaluation of production, rumination, milk fatty acid profile, and profitability for organic dairy cattle fed sprouted barley fodder.  
B. J. Heins1, J. Paulson2, and H. Chester-Jones1, 1University of Minnesota West Central Research and Outreach Center, Morris, 2University of Minnesota Extension, Rochester, 3University of Minnesota Southern Research and Outreach Center, Waseca
11:30 AM 663  Effect of tillage and planting date of wheat pasture on forage production and calf performance.  
P. A. Beck1,2, W. Galyen2, T. Hess2, and D. S. Hubbell3,II.1 University of Arkansas SWREC, Hope, 2University of Arkansas, Fayetteville, 3University of Arkansas Livestock and Forestry Research Station, Batesville

11:45 AM 664  Impact of high-energy forages on grass-finished steer performance and carcass merit.  
R. M. Martin1,2, J. E. Rowntree1, K. A. Cassida1, and D. Carmichael2, 1Michigan State University, East Lansing, 2Michigan State University AgBio Lake City Research Center, Lake City

12:00 PM 665  Effect of stocking rate on performance, diet selection and apparent total-tract digestibility among heifers grazing cover crops.  
B. R. Brunsvig1, D. W. Brake, A. J. Smart, and E. E. Grings, South Dakota State University, Brookings

Genomics Symposium:  
Translational Genomics to Improve Fertility of Animals  
Chair: Mark A. Miranda, USDA National Institute of Food and Agriculture  
Sponsor: CDGKV Appreciation Club  
9:30 AM - 11:30 AM  
150 G

9:30 AM 691  Translational genomics for improving sow reproductive longevity.  
D. C. Ciobanu1, S. D. Kachman1, S. Olson1, M. L. Spangler1, M. D. Trenhaile2, H. Wijesena2, P. S. Miller1, J. J. Riethoven1, C. A. Lents1, J. F. Thornton3, R. Massey4, and T. J. Sufranski5, 1University of Nebraska-Lincoln, 2USDA-ARS, US Meat Animal Research Center, Clay Center, NE, 3University of Missouri, Columbia, 4GeneSeek, a Neogen Company, Lincoln, NE, 5Oklahoma State University, Stillwater, US Meat Animal Research Center, Clay Center, NE

10:00 AM 692  Detection and selection against early embryonic lethals in US beef breeds.  
J. F. Taylor1, R. D. Schnabel1, B. Simpson1, J. E. Decker1, M. Rolf2, B. P. Kinghorn4, A. Van Eenennaam1, M. D. MacNeil1, D. S. Brown1, M. F. Smith1, and D. J. Patterson1, 1University of Missouri, Columbia, 2GeneSeek, a Neogen Company, Lincoln, NE, 3Oklahoma State University, Stillwater, 4University of New England, Armidale, Australia

10:30 AM 693  Genomic selection for improved fertility of dairy cows with emphasis on cyclicity and pregnancy.  
G. J. M. Rosa1, P. J. Pinedo2, J. E. P. Santos3, R. C. Bicalho4, G. Schuenemann5, R. Chebel1, K. N. Galvão1, R. O. Gilbert1, S. L. Rodriguez-Zas6, C. M. Seabury7, J. Fetrow8, and W. W. Thatcher9, 1University of Wisconsin-Madison, 2Colorado State University, Fort Collins, 3University of Florida, Gainesville, 4University of Illinois at Urbana-Champaign, 5The Ohio State University, Columbus, 6University of Minnesota, Saint Paul, 7Cornell University College of Veterinary Medicine, Department of Clinical Sciences, Ithaca, NY, 8University of Illinois at Urbana-Champaign, 9College of Veterinary Medicine, Texas A&M University, College Station,  

11:00 AM 694  Improving fertility of dairy cattle using translational genomics.  
T. E. Spencer1, H. L. Neibergs2, J. B. Cole3, J. Dalton4, D. A. Moore5, M. Chahine6, and A. De Vries7, 1Division of Animal Sciences, University of Missouri, Columbia, 2Department of Animal Sciences, Washington State University, Pullman, 3Department of Animal Sciences, University of Florida, Gainesville, 4Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD, 5University of Idaho, Caldwell, 6Department of Veterinary Clinical Sciences, Washington State University, Pullman, 7Department of Animal and Veterinary Sciences, University of Idaho, Twin Falls

Horse Species Symposium:  
Urban Students in Animal Science and the Impact of Equine Programs  
Chair: Fernanda Camargo, University of Kentucky  
9:30 AM - 12:30 PM  
155 A

9:30 AM 822  Making animal sciences relevant to the Urban student: Connecting to the real world.  
J. J. Parrish1, University of Wisconsin-Madison

10:00 AM 823  Creating hands on learning opportunities for inexperienced equine students.  
K. L. Vernon1, Clemson University, SC

10:30 AM 824  Beyond the lecture: Engaging equine science students inside and outside the classroom  
C. J. Hammer1, Animal Sciences, North Dakota State University, Fargo
11:00 AM  824  Retaining urban students in animal science: The role of equine programs.
  J. A. Sterle* and H. D. Tyler, Iowa State University, Ames

11:15 AM  825  Prolonged head elevation causes mucosal IgA fluctuation in horses.

11:30 AM  826  Effect of a square toe or perimeter fit horseshoe on quality of movement and gait kinematics of the western pleasure horse.
  P. Q. Underwood¹, L. M. White¹, K. W. Walter¹, D. Hogue¹, and L. K. Hirtz², ¹New Mexico State University, Las Cruces, ²Truman State University, Kirksville, MO

Meeting Today’s Animal Care Standards: Are You Ready?
  Chair: Gretchen M. Hill, Michigan State University
  Sponsor: AAALAC
  9:30 AM - 12:30 PM
  Grand Ballroom C

9:30 AM  28  New Ag Guide—What should we expect?.
  A. B. Webster*, Department of Poultry Science, University of Georgia, Athens

10:05 AM  29  How ag research and teaching differs from “rodent” studies in AAALAC international accreditation.
  J. J. McGlone*, Texas Tech University, Lubbock

10:40 AM  30  Getting along with your IACUC and helping them understand agricultural species research.
  J. Salak-Johnson¹, University of Illinois at Urbana-Champaign

11:15 AM  31  Applying AAALAC international’s peer review program to support agricultural research programs.
  J. Bradfield*, AAALAC International, Frederick, MD

11:50 AM  32  AAALAC international agricultural animal research program accreditation at Purdue University: “The good, the bad, and the ugly”.
  J. S. Radcliffe*, Purdue University, West Lafayette, IN

Nonruminant Nutrition: Feed Additives
  Chair: Josh Jendza, BASF Corporation
  9:30 AM - 12:30 PM
  Grand Ballroom F

9:30 AM  938  Influence of Acacia tortilis leaf meal-based diets on growth performance of pigs.
  M. Khanyile, S. P. Ndou, and M. Chimonyo*, University of KwaZulu-Natal, Pietermaritzburg, South Africa

9:45 AM  939  Different responses of Ross 308 and 708 broiler strains in growth performance and related properties to diet treatment with or without tributyrate glycerides.
  A. Bedford¹, H. Yu¹, M. Hernandez¹, J. Squires², S. Leeson², Y. Ho², and J. Gong³, ¹Agriculture and Agri-Food Canada, Guelph, ON, Canada, ²Department of Animal Biosciences, University of Guelph, ON, Canada, ³Department of Animal and Poultry Science, University of Guelph, ON, Canada, ³Wuhan Polytechnic University, Wuhan, China

10:00 AM  940  Immunomodulatory effects of whole yeast cells and capsicum in weanling pigs challenged with pathogenic Escherichia coli.
  S. Wojnicki¹, V. G. Perez¹, and R. N. Dilger¹, ¹University of Illinois at Urbana-Champaign, ²ADM Animal Nutrition, Decatur, IL

10:15 AM  941  Comparing the effects of zinc oxide, milk hydrolysate, yeast β glucan and combination of milk hydrolysate / yeast β glucan on growth, gut microbiota and cytokine gene expression in weaning piglets.
  A. Mukhopadhyay¹, J. V. O’Doherty², N. Noronha², M. T. Ryan², and T. Sweeney³, ¹School of Veterinary Medicine, University College Dublin, Ireland, ²School of Agriculture and Food Science, University College Dublin, Ireland, ³Food for Health Ireland, University College Dublin, Ireland

10:30 AM  942  Effects of a standardized blend of carvacrol, cinnamaldehyde and capsicum oleoresin on performance of growing finishing pigs using multiple trial analysis methodology.
  C. Oguey*, Pancosma, Geneva, Switzerland
Extracts of laminarin improve growth rate and small intestinal morphology in new born chicks, but does not influence Campylobacter colonisation.
A. Mukhopadhyya1, S. Vigors2, J. V. O’Doherty2, H. Meridith3, K. Thornton1, and T. Sweeney1, 1School of Veterinary Medicine, University College Dublin, Ireland, 2School of Agriculture and Food Science, University College Dublin, Ireland

Effects of defatted microalgae on nutrient digestibility and retention in broiler chicks.
T. Sun*, A. D. Magnuson, L. Tao, M. Burke, M. Barcus, and X. G. Lei, Cornell University, Ithaca, NY

Defatted microalgae-mediated enrichment of N-3 polyunsaturated fatty acids in muscle of broiler chicks was not affected by supranutrition of vitamin E and(or) Se.
L. Tao, T. Sun, A. D. Magnuson, M. Burke, and X. G. Lei*, Cornell University, Ithaca, NY

Effect of supplementing milk during first 4 days postweaning on growth performance, energy digestibility, gut morphology, and severity of diarrhea for nursery pigs in a commercial farm.
J. Guo*, J. Wang1, J. M. Purvis2, and S. W. Kim1, North Carolina State University, Raleigh, N. G. Purvis Farm Inc., Robbins

Effects of dietary lysophospholipid complex on apparent ileal digestibility and growth performance in nursery pigs.
L. Zheng*, A. C. Weaver, and S. W. Kim*, Cornell University, Ithaca, NY

Effects of dietary supplementation of phytobiotics on intestinal health and growth performance of nursery pigs.
I. Park*, J. K. Lee, J. Wang, and S. W. Kim, North Carolina State University, Raleigh

Physiology, Endocrinology and Extension Symposium: Enhancing Adoption of Reproductive Management Tools for Beef and Dairy Producers
Chair: G. Cliff Lamb, University of Florida, North Florida Research and Education Center

History of the development of the Beef Reproduction Task Force (BRTF) and impacts of the BRTF on beef cattle reproductive management.
S. Johnson1, R. F. Cooke2, G. R. Dahlke1, R. N. Funston1, J. B. Hall3, D. J. Kesler4, G. C. Lamb5, J. Lauderdale6, D. J. Patterson7, G. A. Perry8, D. R. Strohbehn9, and A. L. Van Eenennaam10, 1Kansas State University, Colby, 2Oregon State University-EOARC Burns, 3Iowa State University, Ames, 4University of Nebraska, North Platte, 5University of Idaho Nancy M. Cummings Research, Extension Education Center, Carmen, 6University of Illinois at Urbana-Champaign, 7University of Florida, North Florida Research and Education Center, Marianna, 8Lauderdale Enterprises, Inc., Augusta, MI, 9University of Missouri, Columbia, 10Department of Animal Science, South Dakota State University, Brookings, 11University of California-Davis

History of the development of the Dairy Cattle Reproduction Council (DCRC) and impacts of the DCRC on dairy cattle reproductive management.
M. C. Lucy*, University of Missouri, Columbia

Physiological and management advances enhancing adoption of applied reproductive management procedures in beef cattle.
D. J. Patterson1, R. F. Cooke2, G. R. Dahlke1, R. N. Funston1, J. B. Hall3, G. C. Lamb5, J. Lauderdale6, G. A. Perry8, and A. L. Van Eenennaam10, 1University of Missouri, Columbia, 2Oregon State University-EOARC Burns, 3Iowa State University, Ames, 4University of Nebraska, North Platte, 5Department of Animal & Veterinary Sciences, University of Idaho, Moscow 6University of Florida, North Florida Research and Education Center, Marianna, 7Lauderdale Enterprises, Inc., Augusta, MI, 8Department of Animal Science, South Dakota State University, Brookings, 9University of California-Davis

Physiological and management advances enhancing adoption of applied reproductive management procedures in dairy cattle.
J. S. Stevenson* and L. G. D. Mendonça, Kansas State University, Manhattan

Impacts of temperament on reproductive performance of Bos indicus and B. taurus beef females.
R. F. Cooke*, Oregon State University-EOARC Burns

Estrus: Association with productive parameters and implications to fertility.
R. L. A. Cerri*, B. F. Silper1, T. A. Burnett1, A. M. L. Madureira2, J. L. M. Vasconcelos2, and L. Polsky1, 1Applied Animal Biology, Faculty of Land and Food Systems, University of British Columbia, Vancouver, BC, Canada, 2Sao Paulo State University, Botucatu, Brazil
Production, Management and the Environment Symposium: Impacts of Livestock Production on Environmental Reactive Nitrogen

Chair: April B. Leytem, USDA-ARS

9:30 AM - 12:00 PM
151 E/F

9:30 AM 1287 The world’s nitrogen cycle and human impacts.
J. Ham*, Colorado State University, Fort Collins

10:00 AM 1288 Reactive N emissions from beef cattle feedlots.

10:20 AM 1289 Reactive nitrogen losses from dairy production systems.
A. B. Leytem1 and C. A. Roze2, 1USDA-ARS, Kimberly, ID, 2USDA-ARS Pasture Systems and Watershed Management Research Unit, University Park, PA

10:40 AM 1290 Reactive N emissions from crops and pastures.
C. Wagner-Riddle* and K. Congreves, University of Guelph, ON, Canada

11:00 AM 1291 Measurement and mitigation of reactive nitrogen species from swine and poultry production facilities.
W. Powers* and M. Capelari, Michigan State University, East Lansing

11:20 AM 1292 Modeling atmospheric reactive nitrogen.
J. O. Bash1, K. Foley1, J. T. Walker1, M. W. Shepard2, K. E. Cady-Pereira2, S. Napelenok1, D. K. Henze2, and E. J. Cooter1, 1US EPA, Research Triangle, NC, 2Environmental Canada, Toronto, ON, Canada, 3Atmospheric and environmental Research Inc., Lexington, MA, 4University of Colorado, Boulder

Toxic Plants Symposium

Chair: T. Zane Davis, USDA-ARS

Sponsor: USDA-ARS

9:30 AM - 12:30 PM
150 E/F

9:30 AM 1766 Is there a difference between exposures to one or two plant toxins?
K. D. Welch*, USDA-ARS, Poisonous Plant Research Laboratory, Logan, UT

9:55 AM 1767 Resistance to toxic plants: The right animal at the right time in the right pasture.
B. T. Green1, K. D. Welch1, J. W. Keele2, T. G. McDanel2, and J. A. Pfister3, 1USDA-ARS, Poisonous Plant Research Laboratory, Logan, UT, 2USDA-ARS, US Meat Animal Research Center, Clay Center, NE,

10:20 AM 1768 Using divergent selection and genomics to uncover genetic variation underlying larkspur tolerance and susceptibility in cattle.

10:45 AM Break

11:10 AM 1769 The relationship between swainsonine-containing plants and endophytic fungi.
D. Cook6, D. R. Gardner, and J. A. Pfister, USDA-ARS Poisonous Plant Research Laboratory, Logan, UT

11:35 AM 1770 Alleviation and mitigation of fescue toxicosis.
G. E. Aiken*, USDA-ARS Forage-Animal Production Research Unit, Lexington, KY

12:00 PM 1771 Effects of high selenium forages on reproduction in sheep.
Z. Davis*, USDA-ARS, Logan, UT
Animal Health: Immunology and Gut Health

Chairs: Michael A. Ballou, Texas Tech University; Nicole C. Burdick Sanchez, USDA-ARS, Livestock Issues Research Unit

2:00 PM - 5:00 PM
155 D

2:00 PM 172 Porcine intestinal explants as ex vivo/in vitro model to study gastrointestinal disease.
N. Reisinger*, P. Fuhrmann, C. Emsenhuber, B. Grenier, E. Mayer, and G. Schatzmayr, BIOMIN Research Center, Tulln, Austria

D. B. Jensen* and A. R. Kristensen, University of Copenhagen, Department of Large Animal Sciences, Frederiksberg, Denmark

2:30 PM 174 Heat stress increases gut permeability in pigs – application of a non-invasive assay.
N. Reisinger*, S. Schaumberger*, I. Dohnal*, B. Doupovec*, E. Mayer*, and G. Schatzmayr*, BIOMIN Research Center, Tulln, Austria, BIOMIN Holding GmbH, Getzersdorf, Austria

2:45 PM 175 The effect of various parameters measured at farrowing on subsequent pig performance.

3:00 PM 176 Environmental persistence of porcine epidemic diarrhea virus, porcine delta corona virus, and transmissible gastroenteritis in feed ingredients.

3:15 PM 177 Bovine macrophage phenotype influences inflammatory response to lipopolysaccharide.
W. Raphael* and G. A. Contreras, Michigan State University, East Lansing

3:30 PM 178 High immune response technology for use in commercial swine herds: A broad based approach to disease resistance.
J. D. Schmied*, S. L. Cartwright*, F. Rupa*, and B. Mallard*, University of Guelph, ON, Canada, Department of Animal Biosciences, Centre for Genetic Improvement of Livestock, University of Guelph, ON, Canada

3:45 PM 179 Immunomodulatory activities of polyphenol extract from Cowpea (Vigna unguiculata) on bovine polymorphonuclear neutrophils.
S. Adjei-Fremah*, L. E. Jackai, K. Schimmel, and M. Worku, North Carolina Agricultural and Technical State University, Greensboro

4:00 PM 180 Prevalence of digital dermatitis in Canadian Holsteins classified as high, average or low antibody and cell-mediated immune responders.
S. L. Cartwright*, F. Malchiodi, K. A. Thompson-Crisp, F. Miglior*, and B. Mallard*, University of Guelph, ON, Canada, Centre of Genetic Improvement of Livestock University of Guelph, ON, Canada, Trouw Nutrition AgResearch, Guelph, ON, Canada, Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada

4:15 PM 181 MiRNASeq of neutrophils during the transition period in cows with divergent metabolic phenotypes.
**Beef Species Symposium: Improving Welfare of Beef Cattle**

Chair: Judson T. Vasconcelos, Merck & Co

Sponsor: Novus

2:00 PM - 5:00 PM

</table>
3:30 PM  Break

3:45 PM  385  Use of a threshold animal model to estimate calving ease and stillbirth (Co)variance components for US Holsteins.  
J. B. Cole1, D. J. Niall1, and S. Tsuruta1, 1Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD,  
2University of Georgia, Athens

4:00 PM  386  Genetic parameters for production traits and heifer pregnancy in Red Angus cattle.  
R. J. Boldt1, S. E. Speidel1, M. G. Thomas1, L. Keenan2, and R. M. Enns3, 1Department of Animal Sciences, Colorado State University, Fort Collins, 2Red Angus Association of America, Denton, TX

4:15 PM  387  Daily rumination time in Italian Holstein cows: Heritability and correlation with milk production.  
R. Moretti1, R. Bozzi1, C. Maltecca2, F. Tiezzi2, S. Chessa2, D. Bar3, and S. Biffani4, 1University of Florence, Italy,  
2North Carolina State University, Raleigh, 3Institute of Agricultural Biology & Biotechnology - CNR, Lodi, Italy, 4SCR Europe, Gariga di Podenzano, Italy

4:30 PM  388  Relationship between linear type and fertility traits in Nguni cows.  
T. J. Zindove1, K. A. Nephawe2, S. P. Ndou4, and M. Chimonyo1, 1University of KwaZulu-Natal, Pietermaritzburg, South Africa, 2University of the Witwatersrand, Johannesburg, South Africa, 3University of Manitoba, Winnipeg, MB, Canada

4:45 PM  389  Estimation of genetic parameters for birth to weaning traits in meat goats.  
K. M. Andries1, F. Bebe, A. McKay, A. Bodrick, and A. Hartell, Kentucky State University, Frankfort

Development of a Hazard Analysis for Animal Food Performed for Compliance with the Federal Food Safety Modernization Act (AFIA/IFEEDE)

Chair: R. S. Sellers, American Feed Industry Association
Sponsor: AFIA
2:00 PM - 5:00 PM  
Grand Ballroom B/D

2:00 PM  Introductory Remarks

2:20 PM Requirements of the Hazard Analysis Section of the Animal Food Rules.  
D. Edwards, Center for Veterinary Medicine, US Food and Drug Administration

2:50 PM  Review process and categories of hazards for animal food.  
J. Evanson, Center for Animal Health and Food Safety, University of Minnesota

3:30 PM  Findings of the review process.  
T. Goldsmith, Center for Animal Health and Food Safety, University of Minnesota

4:10 PM  Animal food hazards report and proposed use.  
J. Evanson, T. Goldsmith, Center for Animal Health and Food Safety, University of Minnesota

4:40 PM  Risks involved with raw milk consumption.  
Alvaro D. Garcia1 Dairy and Food Science Department, South Dakota State University, Brookings, SD.

5:10 PM  Discussion

EAAP Symposium:
Genomic Selection is Transforming Cattle Breeding

Chair: Ignacy Misztal, University of Georgia
Sponsor: EAAP
2:00 PM - 5:00 PM  
Grand Ballroom J

2:00 PM  407  ASAS-EAAP Speaker: Genomic selection for methane emission.  
Y. de Haas1, J. E. Pryce2, E. Wall3, S. McParland4, C. I. V. Marzanilla Pech1, G. Difford5, and J. Lassen6, 1Animal Breeding and Genomics Centre, Wageningen UR Livestock Research, Netherlands, 2Agribio, Department of Economic Development, Jobs, Transport and Resources and La Trobe University, Melbourne, Australia, 3SRUC, Edinburgh, United Kingdom, 4Teagasc, Moorepark, Fermoy, Co. Cork, Ireland, 5Center of Quantitative Genetics and Genomics, Department of Molecular Biology and Genetics, Aarhus University, Foulum, Denmark

2:45 PM  408  ASAS-EAAP Speaker: How is genomics changing cattle breeding?.  
D. Boichard1, V. Ducrocq1, P. Croiseau1, and S. Fritz2, 1GABI, INRA, AgroParistech, Universite Paris Saclay, Jouy-en-Josas, France, 2Allice, Paris, France
3:30 PM 409 ASAS-EAAP Speaker: Genomic prediction using imputed sequence data in dairy and dual purpose breeds.
M. Erbe1,2, M. Frischknecht3,4, H. Pausch5, R. Emmerling6, T. H. Metwissener7, B. Gredler1, B. Bapst8, I. Consortium9, K. U. Götz1, and H. Simianer2, 1Bavarian State Research Centre for Agriculture, Institute for Animal Breeding, Grub, Germany, 2Georg-August-University, Department of Animal Sciences, Animal Breeding and Genetics Group, Göttingen, Germany, 3Qualitas AG, Zug, Switzerland, 4Bern University of Applied Sciences, School of Agricultural, Forest and Food Sciences HAF, Zollikofen, Switzerland, 5Technische Universität München, Chair of Animal Breeding, Freising, Germany, 6Norwegian University of Life Sciences, Department of Animal and Aquacultural Sciences, As, Norway, 7Interbull Centre, Uppsala, Sweden

4:15 PM 410 ASAS-EAAP Speaker: Multi-breed genomic evaluations for 1 million beef cattle in Ireland.
A. Cromie1, R. Evans2, F. Kearney2, D. Berry3, M. C. McClure1, and J. McCarthy4, 1Irish Cattle Breeding Federation, Bandon, Ireland, 2Irish Cattle Breeding Federation, Bandon, Co. Cork, Ireland, 3Teagasc, Moorepark Research Centre, Fermoy, Cork, Ireland, 4Irish Cattle Breeding Federation, Cork, Ireland

Extension Education
Chair: Joseph Dalton, University of Idaho
2:00 PM - 4:00 PM
155 C

2:00 PM 579 WS Survey of serum trace mineral concentrations in weaned Montana ram lambs.
C. M. Page1, M. Van Emon1, S. Spear1, T. W. Murphy2, J. G. P. Bowman1, and W. C. Stewart1, 1Montana State University, Bozeman, 2University of Wisconsin-Madison

2:15 PM 580 Breakfast on the Farm event is an effective learning activity and improves consumer perceptions of dairy production.
J. M. Smith1 and T. A. Ferris2, 1University of Vermont, Burlington, VT, 2Michigan State University, East Lansing

2:30 PM 581 Breakfast on the Farm, an educational farm tour, improves consumer trust in animal care, food safety and modern conventional dairy production.

2:45 PM 582 Creation, delivery, and assessment of the livestock education and certification for agricultural law enforcement extension program.
C. Wickens1, M. J. Hersom2, R. G. Easterly III3, E. Jennings1, B. Myers1, J. Shaffit1, B. Stice1, and J. Weir1, 1University of Florida, Gainesville, 2Department of Animal Sciences, University of Florida, Gainesville

3:00 PM 583 Benchmark demographics of the Mississippi feeder calf board sale program.
E. A. Caldwell1, B. B. Karisch1, J. M. Riley2, and J. A. Parish1, 1Mississippi State University, Mississippi State, 2Oklahoma State University, Stillwater, 3Mississippi State University, Prairie

3:15 PM 584 The show-me-select replacement heifer program: Adding value to beef herds in Missouri.
J. W. C. Locke1, J. M. Thomas, B. E. Bishop, J. M. Abel, S. E. Poock, D. S. Brown, J. E. Decker, and D. J. Patterson, University of Missouri, Columbia

3:30 PM 585 Perceived mastitis costs and milk quality management practices among Southeastern United States dairy producers.
D. T. Nolan1, C. Blakely1, P. D. Krawczel2, C. S. Petersson-Wolfe3, G. M. Pighetti2, A. Stone1, S. Ward4, and J. M. Bewley1, 1University of Kentucky, Lexington, 2University of Tennessee, Knoxville, 3Virginia Polytechnic Institute and State University, Blacksburg, 4Mississippi State University, Mississippi State
Growth and Development Symposium:
New -OMICS Technologies to Understanding the Biological Processes
and Network Pathways Associated with Cattle Growth and Health

Chair: Gary J. Hausman, University of Georgia; Angela Canovas, University of Guelph
Sponsor: EAAP
2:00 PM - 5:00 PM
150 G

2:00 PM  Introductory Remarks
2:15 PM  783  Objective-oriented genomic relationship matrices.
A. Reverter*, CSIRO Agriculture, Brisbane, Australia
2:55 PM  784  Multi-omics data resources and use in genetic improvement of cattle growth and health.
M. G. Thomas*, S. J. Coleman, S. E. Speidel, and R. M. Enns, Department of Animal Sciences, Colorado State University, Fort Collins

3:35 PM  The new bovine reference assembly and its value for genomic research.
J. F. Medrano, University of California-Davis

4:15 PM  Metagenomics and transcriptomics associated with adiposity and feed efficiency in beef cattle.
L. Guan, University of Alberta, Canada

Horse Species Symposium:
Nutrition and Immunology

Chair: Fernanda Camaro, University of Kentucky
2:00 PM - 4:30 PM
155 A

2:00 PM  815  Nutritional immunology for the geriatric horse.
A. A. Adams*, The Gluck Equine Research Center, University of Kentucky, Lexington
2:30 PM  816  Nutrition and immunity: General principles.
K. C. Klasing*, University of California-Davis
3:00 PM  817  Optimizing nutrition to improve immune function in horses.
L. K. Warren*, University of Florida, Gainesville
3:30 PM  818  Effect of selenium and vitamin E supplementation on blood glutathione peroxidase activity and selenium in
moderately exercised horses.
E. Velázquez Cantón*, A. H. Ramírez Pérez, L. A. Zarco Quintero, R. Rosiles Martínez, and J. C. Ángeles Hernández,
FMVZ-UNAM, Mexico
3:45 PM  819  Age-related changes in select fecal bacteria in foals.
M. B. Pyles*, A. L. Fowler*, V. Bill, B. E. Harlow*1,2, A. Crum*, S. H. Hayes*, M. D. Flythe*1,2, and L. M. Lawrence*1,
1University of Kentucky, Lexington, 2USDA-ARS, Forage-Animal Production Research Unit, Lexington, KY
4:00 PM  820  Changes in equine hindgut fermentation and carbohydrate digestion in response to varying sources of nitrogen.
M. O. Lass*, J. S. Drouillard, J. M. Koubka, C. I. Vahl, Y. Wei, and T. L. Douthit, Kansas State University, Manhattan
4:15 PM  821  Effects of meal size and frequency on the equine cecal microbiota.
E. B. Venable*, S. S. Bland*, H. Holscher*, T. W. Liu*, and K. S. Swanson*, 1Southern Illinois University, Carbondale,
2University of Illinois at Urbana-Champaign
Livestock Water Symposium
Chair: John J. Wagner, Colorado State University
2:00 PM - 5:00 PM
Grand Ballroom H

2:00 PM  
Understanding blue and green water for feed production in animal agriculture.  
J. G. Warren*, Oklahoma State University, Stillwater

2:45 PM  
Mineral balances including TMR, drinking water and assay minerals in the milk.  
A. R. Castillo*, UC Cooperative Extension, Merced, CA

3:15 PM  
Break

3:30 PM  
Water: The frequently neglected nutrient in growing and finishing diets.  
J. J. Wagner* and T. E. Engle, Colorado State University, Fort Collins

4:00 PM  
Simultaneous monitoring of water consumption in eight double pens as a tool for improving welfare and predicting diseases and unwanted behavioral changes in finisher pigs.  
K. N. Dominiak1, L. J. Pedersen1, and A. R. Kristensen1, 1University of Copenhagen, Department of Large Animal Sciences, Frederiksberg, Denmark, 2Aarhus University, Department of Animal Science Behavior and Stress Biology, Denmark

4:15 PM  
Growth and health performance of dairy calves drinking reverse osmosis water compared to municipal water.  
N. D. Senevirathne*, J. L. Anderson, and M. Rovai, Dairy Science Department, South Dakota State University, Brookings

4:30 PM  
Effect of protein supplementation on low-quality forage utilization and nitrogen balance by lambs drinking saline water.  
J. I. Arroquy1, A. Lopez2, and A. Juarez Sequeira3, 1INTA - CONICET - UNSE, Santiago del Estero, Argentina, 2INTA EEA Santiago del Estero, Santiago del Estero, Argentina, 3CONICET-F AyA UNSE, Santiago del Estero, Argentina

Meat Science and Muscle Biology Symposium:  
Science of Red Meat Consumption  
Chair: Luigi Faucitano, Laval University  
2:00 PM - 5:00 PM  
155 B

2:00 PM  
Welcoming Remarks

2:05 PM  
Beef’s role in a healthy diet.  
J. N. Martin*, D. R. Woerner, R. Delmore, K. E. Belk, and J. D. Tatum, Colorado State University, Fort Collins

2:45 PM  
How certain can we be about the association of meat consumption and cancer?  
D. M. Klurfeld*, USDA-ARS, Beltsville, MD

3:25 PM  
The role of red and processed meat in colorectal cancer development: A perspective.  
S. De Smet*, Ghent University, Melle, Belgium

4:05 PM  
Is there a role for meat in a plant-based diet?  
M. A. Binnie*, Canadian Pork Council, London, ON, Canada

4:45 PM  
Panel Discussion
Nonruminant Nutrition: Feed Ingredients and Digestibility

Chair: Miguel Cervantes, University of Baja California

Sponsor: H. J. Baker

2:00 PM - 5:00 PM

Grand Ballroom F

2:00 PM 969 Effects of high protein canola meal on digestibility of phosphorus and growth performance of weanling pigs.
Y. She1, H. H. Salgado2, D. Li3, and H. H. Stein3, 1University of Illinois at Urbana-Champaign, 2Laval University, Quebec City, QC, Canada, 3CAU, Beijing, China

2:15 PM 970 Effect of heat stress on the apparent and standardized ileal digestibilities of amino acids in growing pigs.
A. Morales1, M. Perez1, P. Castro1, N. O. Ibarra1, E. Avelar1, L. H. Baumgard1, and M. Cervantes1, 1ICA - Universidad Autonoma de Baja California, Mexicali, Mexico, 2Iowa State University, Ames

2:30 PM 971 Effect of methionine sources and graded levels of sulfur amino acids on the growth performance of post-weaning piglets.
F. Molist1, P. Buttin1, M. Bouwhuis1, and P. J. van der Aar1, 1Schoorist Feed Research, Lelystad, Netherlands, 2Novus International, Brussels, Belgium

2:45 PM 972 Digestible calcium requirement for 100 to 130 kg pigs.
L. A. Merriman1, C. L. Walk2, C. M. Parsons1, and H. H. Stein1, 1University of Illinois at Urbana-Champaign, 2AB Vista, Marlborough, United Kingdom

3:00 PM 973 Effects of inclusion of canola meal in weanling pig diets containing different concentrations of energy.
T. F. Pedersen1, Y. Liu2, and H. H. Stein2, 1Aarhus University, Denmark, 2University of California-Davis, 3University of Illinois at Urbana-Champaign

3:15 PM 974 Effect of increasing concentrations of digestible calcium and digestible phosphorus on apparent total tract digestibility of calcium and phosphorus by pigs.
J. C. González-Vega1, C. L. Walk2, M. R. Murphy1, and H. H. Stein1, 1University of Illinois at Urbana-Champaign, 2AB Vista, Marlborough, United Kingdom

3:30 PM Break

3:45 PM 975 Trans-generational effect of feeding genetically modified mCry1Ac corn to laying hens and offspring on offspring growth and health.
L. Chen1, R. Zhong, L. Zhang, L. Guo, and H. Zhang, Institute of Animal Sciences, Chinese Academy of Agricultural Sciences, Beijing, China

4:00 PM 976 Effects of methionine or arginine supplementation and environmental temperature on performance, carcass traits and meat quality of finishing pigs.
J. K. Htoo1, C. A. Garbossa2, H. Silveira2, L. G. Amaral2, N. A. Barbosa1, and V. S. Cantarella1, 1Evonik Nutrition & Care GmbH, Hanau-Wolfgang, Germany, 2Federal University of Lavras, Brazil, 3Evonik Industries do Brazil, São Paulo, Brazil

4:15 PM 977 A protective effect of IGF-activated plasma protein (CTCgrow) on lipopolysaccharide-induced intestinal dystrophy in rats.
M. Kwak1, J. Kim1, J. M. Lee2, S. W. Jung2, and K. Y. Whang1, 1Korea University, Seoul, The Republic of Korea, 2CTC BIO, Seoul, The Republic of Korea

4:30 PM 978 Effects of α-Galactosidase supplementation on the energy value of soybean meal and growth performance of weanling pigs.
C. D. Espinosa1, University of the Philippines Los Baños, Laguna, Philippines; University of Illinois at Urbana-Champaign

4:45 PM 979 Use of crystalline amino acids in meal feeding does not affect nitrogen retention in growing pigs compared to protein-bound amino acids.
S. A. Lee1 and B. G. Kim, Konkuk University, Seoul, The Republic of Korea
Physiology and Endocrinology: Nutrition, Reproduction and Metabolism in Dairy Cattle
Chair: Ronaldo L.A. Cerri, University of British Columbia
2:00 PM - 4:30 PM
151 G

2:00 PM 1100 Body condition score affects milk yield and energy balance of dairy cows after a short or no dry period. A. van Knegsel* and B. Kemp, Adaptation Physiology Group, Wageningen University, Netherlands

2:15 PM 1101 The effect of stocking rate and cow breed on resumption of cyclicity, blood indicators of energy status, uterine health and reproductive parameters in pasture-based dairy systems. S. Leane1,2, P. Lonergan3, J. Kenneally1, and S. Butler1, Animal & Grassland Research and Innovation Centre, Teagasc Moorepark, Fermoy, Co. Cork, Ireland, 2School of Agriculture and Food Science, University College Dublin, Ireland

2:30 PM 1102 Implications of acute or chronic pasture restriction on indicators of metabolic status in grass-based dairy cows. F. Curran1,2, E. Kennedy1, E. Lewis1, P. Lonergan3, and S. Butler1, Animal & Grassland Research and Innovation Centre, Teagasc Moorepark, Fermoy, Co. Cork, Ireland, 3School of Agriculture and Food Science, University College Dublin, Ireland

2:45 PM 1103 The effects of ketosis, feed restriction, and an endotoxin challenge on circulating serotonin (5-HT) in lactating dairy cows. E. A. Horst1, S. K. Kvidera1, M. Abuajamieh1, E. J. Mayorga1, M. A. Al-Qaisi1, H. B. Green2, K. M. Schoenberg2, W. E. Trout1, and L. H. Baumgard1, 1Iowa State University, Ames, 2Elanco Animal Health, Indianapolis, IN, 3Elanco Animal Health, Greenfield, IN

3:00 PM 1104 Transcriptome analysis reveals fundamental differences between liver of neonatal calves and transition dairy cows. F. Batistel*, M. Vailati Riboni, A. Agrawal, and J. J. Loor, University of Illinois at Urbana-Champaign

3:15 PM 1105 ADSA-EAAP Speaker Exchange Presentation: Effect of rumen content exchange on gene expression in rumen epithelium of lactating cows. J. Vilkki1, D. Fischer1, I. Tapio1, S. Alvenjärv1, and K. J. Shingfield2, 1Natural Resources Institute Finland, Jokioinen, 2Aberystwyth University, United Kingdom

3:45 PM 1106 Identification of effects of different forage source on metabolism and function of liver from dairy cows using systematic approaches. H. Z. Sun1,2, H. Y. Liu1, D. M. Wang1, L. L. Guan2, and J. X. Liu1, 1Institute of Dairy Science, Zhejiang University, Hangzhou, China, 2Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada

4:00 PM 1107 Early postpartum administration of sodium salicylate to multiparous dairy cattle is associated with alterations in feeding behavior up to 120 days in milk. A. J. Carpenter*, C. M. Ylioja, and B. J. Bradford, Kansas State University, Manhattan

4:15 PM 1108 Proteomic analysis reveals increased abundance of inflammation-related proteins in adipose tissues from postpartum dairy cows treated with sodium salicylate. M. Zachut1, S. R. Montgomery2, Y. Levin1, L. Mamedova1, and B. J. Bradford3, 1Institute of Animal Science, Volcani Center, Bet Dagan, Israel, 2Kansas State University, Manhattan, 3The Nancy and Stephen Grand Israel National Center for Personalized Medicine, Weizmann Institute of Science, Rehovot, Israel
Production, Management and the Environment: Reproduction
Chair: Felipe Cardoso, University of Illinois
2:00 PM - 5:00 PM
151 E/F

2:00 PM 1253 Evaluation of different synchronization and early pregnancy diagnosis methods in postpartum Holstein cows.
A. H. Shahzad1, A. Sattar2, I. Ahmad1, A. Y. Qamar2, and N. Ahmad3, 1University of Veterinary and Animal Sciences, Lahore, Pakistan, 2Department of Theriogenology, University of Veterinary and Animal Sciences, Lahore, Pakistan, 3Department of Veterinary and Animal Sciences, Lahore, Pakistan

2:15 PM 1254 WS Effects of octacosanol on non-seasonal spermatogenesis in ovine.
J. W. Dickison*, Angelo State University, San Angelo, TX

2:30 PM 1255 WS Winter grazing or confinement feeding heifer development strategies differ in energetics as measured by 24 hour heart rate and activity.
M. K. Petersen1, J. M. Muscha2, and A. J. Roberts1, 1USDA-ARS Fort Keogh Livestock and Range Research Laboratory, Miles City, MT, 2Fort Keogh Livestock & Range Research Laboratory, Miles City, MT

2:45 PM 1256 WS Effects of dietary phytoestrogens on testicular growth and semen quality characteristics in developing Angus bulls.
S. C. Yurrita*, Angelo State University, San Angelo, TX

3:00 PM 1257 Reproductive performance of lactating dairy cows managed for first service with the Double-Ovsynch or Presynch-Ovsynch protocol and different duration of the voluntary waiting period.
M. L. Stangaferro*, R. Wijma, M. Masello, and J. O. Giordano, Department of Animal Science, Cornell University, Ithaca, NY

3:15 PM 1258 Estrus detection intensity and accuracy, and optimal timing of insemination with automated activity monitors for dairy cows.
C. S. Leroy1, J. S. Walton1, and S. J. LeBlanc2, 1University of Guelph, ON, Canada, 2Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada

3:30 PM Break

3:45 PM 1259 Beta-hydroxybutyrate concentration influences conception date in young beef cows in Tennessee.
J. D. Hobbs1, E. R. Cope1, S. R. Edwards1, Z. D. McFarlane1, and J. T. Mulliniks2, 1University of Tennessee, Knoxville, 2University of Tennessee, Knoxville

4:00 PM 1260 Heifer development using stockpiled, dormant native forages delays gain without altering reproductive performance.
Z. D. McFarlane3, J. D. Hobbs1, E. R. Cope1, R. L. Nave2, and J. T. Mulliniks2, 1University of Tennessee, Knoxville, 2University of Tennessee, Crossville

4:15 PM 1261 Effect of pre- and postnatal trace mineral (TM) source on Angus and Brangus heifer growth and body composition.
D. M. Price1, M. M. O’Neil3, W. B. Watson III3, R. West2, D. O. Rae2, D. M. Irsik2, M. J. Hersom1, and J. V. Yelich1, 1Department of Animal Sciences, University of Florida, Gainesville, 2College of Veterinary Medicine, University of Florida, Gainesville

4:30 PM 1262 Effect of pre- and postnatal trace mineral (TM) source on Angus and Brangus heifer growth and reproductive performance.
D. M. Price1, M. M. O’Neil3, W. B. Watson III3, R. West2, D. O. Rae2, D. M. Irsik2, M. J. Hersom1, and J. V. Yelich1, 1Department of Animal Sciences, University of Florida, Gainesville, 2College of Veterinary Medicine, University of Florida, Gainesville

4:45 PM 1263 Impacts of zinc, manganese, and copper source on mature bull trace mineral status and spermatozoa characteristics.
A. L. Zeceski1, M. Van Emmon2, R. C. Waterman1, B. Eik1, J. S. Held2, and T. W. Geary1, 1USDA-ARS Fort Keogh LARRL, Miles City, MT, 2Montana State University, Bozeman, 3Micronutrients, Indianapolis, IN
Ruminant Nutrition:
Forages and Crop Residues

Chair: Ken P. Coffey, University of Arkansas
2:00 PM - 5:00 PM

2:00 PM 1415 Evaluation of five cool season grasses and alfalfa-grass mixtures.
J. Paulson1, D. Holen2, D. Nicolai3, and B. J. Heins4, 1University of Minnesota Extension, Rochester, 2University of Minnesota, Morris, 3University of Minnesota, Farmington, 4University of Minnesota West Central Research and Outreach Center, Morris

2:15 PM 1416 A novel BM3 corn silage hybrid with floury kernel genetics improves lactational performance and feed efficiency in Holstein cows.
E. M. Remick1, S. M. Fredin1, K. W. Cotanch1, H. M. Dann1, C. S. Ballard1, J. P. Brouillette2, and R. J. Grant1, 1William H. Miner Agricultural Research Institute, Chazy, NY, 2Dow AgroSciences, Mycogen Seeds, Indianapolis, IN

2:30 PM 1417 Alternative forage crops modify the composition and content of bovine milk fatty acids.
L. M. Cersosimo1, R. Tacoma1, S. Greenwood1, K. Juntwait2, A. F. Brito2, and J. Kraft2, 1University of Vermont, Burlington, 2University of New Hampshire, Durham

2:45 PM 1418 Effects of post-ethanol extraction sorghum silage as an alternative forage in growing and finishing diets on steer performance, carcass characteristic and nutrient digestibility.
C. P. Blank1, D. D. Loy2, and S. L. Hansen1, 1Iowa State University, Ames, 2Department of Animal Science, Iowa State University, Ames

3:00 PM 1419 Effect of lactic acid bacterial inoculants on the fermentation parameters and aerobic stability of sorghum-sudangrass silage.
X. Li1,2, Y. Zhu1, D. Vyas1, and A. T. Adesogan1, UF/IFAS, Gainesville, FL, 2Institute of Grassland Science, China Agricultural University, Beijing

3:15 PM 1420 Effects of feeding triticale and oat silages on feed intake, milk production and composition, and enteric methane production in lactating dairy cows.
M. T. Harper1, J. Oh, F. Giallongo, G. Roth, and A. N. Hristov, The Pennsylvania State University, University Park

3:30 PM 1421 Effects of feeding sorghum and oat silages on feed intake, milk production and composition, and enteric methane production in lactating dairy cows.
M. T. Harper1, J. Oh, F. Giallongo, J. C. Lopes, G. Roth, and A. N. Hristov, The Pennsylvania State University, University Park

3:45 PM 1422 Effect of harvest method on digestibility of corn residue.
T. M. King1, M. L. Jolly-Breithaupt, J. L. Gramkow, J. C. MacDonald, and T. J. Klopfenstein, University of Nebraska-Lincoln

4:00 PM 1423 Supplementing corn on alfalfa pasture to alter growth performance, carcass, and quality traits.
C. Gresel1, C. Campbell1, L. Duizer1, B. W. McBride2, I. B. Mandell1, and C. Lafreniere1, 1University of Guelph, ON, Canada, 2Department of Animal Biosciences, University of Guelph, ON, Canada, 3Universite du Quebec en Abitibi-Temiscamingue, Rouyn-Noranda, QC, Canada

4:15 PM 1424 Effect of harvest method and ammoniation on apparent digestibility and intake of baled corn residue in lambs.
A. C. Conway1, T. M. King, M. L. Jolly-Breithaupt, J. C. MacDonald, T. J. Klopfenstein, and M. E. Drewnoski, University of Nebraska-Lincoln

4:30 PM 1425 Effects of growing system and silage type on feedlot growth performance, carcass characteristics, and nutrient digestibility of beef steers.
P. R. B. Campanili1, J. O. Sarturi1, S. J. Trojan1, M. A. Ballou1, B. J. M. Lemos2, L. A. Ovinge1, and J. B. G. Mayorquin1, 1Texas Tech University, Lubbock, 2Universidade Federal de Goiás, Goiânia, Brazil, 3University of Florida, North Florida Research and Education Center, Marianna

4:45 PM 1426 Effects of feeding green chopped winter forages on digestibility, ruminal fermentation and blood parameters in beef steers.
Ruminant Nutrition: Ruminal Fermentation

Chair: Jenny S. Jennings, Texas A & M AgriLife Research and Extension Center
2:00 PM - 5:00 PM

2:00 PM 1605 Rumen fluid metabolomics analysis associated with feed efficiency on crossbred steers.
V. M. Artegoitia1, A. P. Foote2, R. M. Lewis1, and H. C. Freedly1, 1University of Nebraska-Lincoln, 2USDA-ARS, US Meat Animal Research Center, Clay Center, NE.

2:15 PM 1606 Enrichment of cattle rumen with bison rumen contents improves N digestion.
G. O. Ribeiro Jr1, D. B. Oss2, Z. He2, V. Bremer1, R. J. Forster1, W. Yang1, K. A. Beauchemin1, and T. A. McAllister1, 1Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 2Departamento de Zootecnia, Universidade Federal de Viçosa, Viçosa, Brazil, 3Elanco Animal Health, Greenfield, IN

2:30 PM 1607 Effect of nitrate, monensin and the combination of additives on rumen fermentation using a semi-continuous culture system.
M. Capelari1, K. A. Johnson2, B. Latack1, J. Roth1, and W. Powers1, 1Michigan State University, East Lansing, 2Washington State University, Pullman

2:45 PM 1608 Metagenomic census of predominant ureC genes of ureolytic bacteria in the rumen of dairy cows.
D. Jin1,2,3, S. Zhao1,2, N. Zheng1,2,3, D. Bu1, Y. Beckers4, and J. Wang1,2,3, 1Ministry of Agriculture-Milk Risk Assessment Laboratory, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 2Ministry of Agriculture-Milk and Dairy Product Inspection Center, Beijing, China, 3Gembloux Agro-Bio Tech, University of Liège, Gembloux, Belgium, 4State Key Laboratory of Animal Nutrition, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 5Ministry of Agriculture - Laboratory of Quality & Safety Risk Assessment for Dairy Products, Beijing, China, 6Ministry of Agriculture Laboratory of Quality & Safety Risk Assessment for Dairy Products, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China

3:00 PM 1609 Rumen bacterial communities continue to shift five weeks after switching diets from conserved forage to pasture.
M. L. Bainbridge1, L. K. Saldinger, J. W. Barlow, J. P. Alvez, J. Roman, and J. Kraft, University of Vermont, Burlington

3:15 PM 1610 Metabolome and microbiome associations after a grain and sugar challenge.
H. M. Goldere1, S. Denman1, C. McSweeneye2, and I. J. Leane2, 1Scibus, Camden, Australia, 2University of Sydney, Camden, Australia

3:30 PM 1611 Ruminal dosing with Megasphaera elsdenii and strain persistence are associated with milk fat depression in Holstein cows.
F. Cacite1 and P. J. Weimer2, 1Federal University of Mato Grosso, Cuiabá, Brazil, 2USDA-ARS, Madison, WI

3:45 PM 1612 Potential for live yeast culture to enhance nitrate mitigation of methanogenesis in Jersey dairy cattle.
R. A. Meller1, J. M. Ashworth1, A. M. Gehman1, and J. L. Firkins1, 1The Ohio State University, Columbus, 2Alltech, Inc., Nicholasville, KY

4:00 PM 1613 Inhibition of methanogenesis by nitrate, with or without defaunation, in continuous culture.
B. A. Wenner1, B. K. Wagner, Z. Yu, N. St. Pierre, and J. L. Firkins, The Ohio State University, Columbus

4:15 PM 1614 Does weaning age affect the development of ruminal and fecal microbiomes in dairy calves?
S. J. Meale1, S. Li2, P. Agevedo3, H. Derakhshan4, J. C. Plaizier1, M. Steele2, and E. Khajipour4, 1UMR Herbivores, INRA, Vetagro Sup, Saint-Genas-Champanelle, France, 2Department of Animal Science, University of Manitoba, Winnipeg, MB, Canada, 3UMR Herbivores, INRA, Vetagro Sup, Saint-Genas-Champanelle, France, 4UMR Herbivores, INRA, Vetagro Sup, Saint-Genas-Champanelle, France

4:30 PM 1615 Analysis methods differ in recovery of microbial glycogen.
M. B. Hall1, U. S. Dairy Forage Research Center, USDA-ARS, Madison, WI

4:45 PM 1616 Utilization of lactose by mixed ruminal microbes is affected by nitrogen type and level, and differs from utilization of glucose.
M. B. Hall1, U. S. Dairy Forage Research Center, USDA-ARS, Madison, WI
Small Ruminant II
Chair: Maristela Rovai, South Dakota State University

2:00 PM - 4:15 PM
150 E/F

2:00 PM
Introductory Remarks

2:05 PM 1718
In vitro efficacy of three novel compounds on development and survival of gastrointestinal nematode larvae in feces of sheep.
J. E. Miller1, V. Kelly2, and J. M. Burke3, 1Louisiana State University, Baton Rouge, 2Louisiana State University School of Veterinary Medicine, Baton Rouge, 3USDA-ARS, Booneville, AR

2:20 PM 1719
Recovery of fibroblast cells up to 65 days of postmortem storage of sheep ear skin at 4°C.
M. Singh* and X. Ma, Fort Valley State University, Fort Valley, GA

2:35 PM 1720
Morphometric measurements and body weight affected by breed, age and sex in Sindh goat breeds population of Pakistan.
M. Moaeen-ud-Din1, G. Bilal1, J. M. Reecy2, M. S. Khan3, and S. Razzaq1, 1PMAS-Arid Agriculture University, Rawalpindi, Pakistan, 2Iowa State University, Ames 3University of Agriculture, Faisalabad, Pakistan

2:50 PM 1721
Effects of supplementing olive pomace as a feed additive on weight gain in Capris aegagrus hircus.
P. Uzzo*, M. M. Beverly, S. F. Kelley, M. J. Anderson, J. L. Leatherwood, K. J. Stuats, and S. Nair, Sam Houston State University, Huntsville, TX

3:05 PM 1722
Genetic and non-genetic effects on performance traits in a US population of dairy sheep.
T. W. Murphy*1, M. Baldin2, Y. M. Berger3, R. L. Burgett4, P. W. Holman5, and D. L. Thomas6, 1University of Wisconsin-Madison, 2The Pennsylvania State University, Department of Animal Science, University Park, 3University of Wisconsin-Madison, Spooner Agricultural Research Station, 4National Sheep Improvement Program, Ames, IA

3:20 PM 1723
Effects of high concentrations of crude glycerin on feed intake and ruminal parameters of sheep.
E. H. C. B. van Cleef1,2, M. T. C. Almeida1,2, E. S. Castro Filho1, I. Monsignati1, H. L. Perez1,2, and J. M. B. Ezequiel1, 1São Paulo State University, Jaboticabal, Brazil, 2FAPESP, São Paulo, Brazil

3:35 PM 1724
Serum anti-mullerian hormone as an indicator of fertility in Katahdin ewes.
M. Acharya1, J. M. Burke2, E. Smyth2, L. Ngere3,4, and R. W. Rorie1, 1Department of Animal Science, Division of Agriculture, University of Arkansas, Fayetteville, 2USDA-ARS, Booneville, AR, 3Oak Ridge Institute for Science and Education, Oak Ridge, TN

3:50 PM 1725
Fatty acid composition of different fat depots from hair and wool x hair crossbred lambs supplemented with highly digestible fiber containing agro-byproducts on pasture.
C. Tripp1, J. H. Lee1, S. Wildeus2, A. Discua1, and D. Kafle1, 1Fort Valley State University, GA, 2Virginia State University, Petersburg
POSTER PRESENTATIONS

Sponsor: Innovad

Poster Session V

7:15 AM - 8:15 AM
Exhibit Hall A/B

Comparative Gut Physiology

438 1
β-hydroxybutyrate and glucose concentrations in the blood of dairy calves.
F. X. Suarez-Mena*, W. Hu, T. S. Dennis, T. M. Hill, J. D. Quigley and R. L. Schlotterbeck, Proviimi, Brookville, OH

439 2
Comparison of intestinal goblet cell staining methods in turkey poults.
S. O. Osho*, T. Wang, N. L. Horn and O. Adeola, Department of Animal Sciences, Purdue University, West Lafayette, IN

440 3
The development of a cecum-cannulated gnotobiotic piglet model to study the human gut microbiota.

Physiology and Endocrinology: Environment, Metabolism, and Physiology

1039 4
Influence of sampling location and pregnancy on composition of the microbiome associated with the reproductive tract of the ewe.
K. E. Smith*, A. L. Garza, C. Robinson, R. L. Ashley and S. L. Ivey, New Mexico State University, Las Cruces

1040 5
Use of doppler ultrasound and infrared thermography to evaluate scrotal insulation in Brahford bulls.

1041 6
Diurnal vaginal temperature cycles of senepol and crossbred beef heifers with different hair coat types and colors under tropical conditions.
H. L. Sánchez-Rodríguez*, Z. Contreras-Correa, K. Domenech-Pérez, G. Rivera-Collazo, A. Casas-Guérnica and G. Muñiz-Colón, 1University of Puerto Rico, Mayagüez Campus, Mayagüez, Puerto Rico, 2University of Nebraska-Lincoln

1042 7
Associations between the environmental conditions and vaginal temperature in wild type and slick-haired Puerto Rican Holstein cows.
H. L. Sánchez-Rodríguez*, Z. Contreras-Correa, M. Pagán-Morales, J. Curbelo-Rodríguez, A. Mesonero-Morales, C. Cabrera-Cabrera and G. Muñiz-Colón, 1University of Puerto Rico, Mayagüez Campus, Mayagüez, Puerto Rico, 2Department of Animal Science, University of Puerto Rico, Mayagüez Campus, Mayagüez, Puerto Rico, 3Universidad ISA, Santiago, Dominican Republic

1043 8
Impact of heat stress and metabolic endotoxemia on porcine ovarian function.

1044 9
Heat stress induces distinct lipidomic profile in differentiating porcine adipocytes.
H. Qu1 and K. M. Ajouwon2, 1Purdue University, West Lafayette, IN, 2Department of Animal Sciences, Purdue University, West Lafayette, IN

1045 10
Impact of temperature fluctuations in cooled-fresh semen on fertility of lactating dairy cows.
A. H. Souza*, H. J. Bessoff and E. Danzeisen, 1Ceva Animal Health, Libourne, France, 2Dairy Management Solutions, Tulare, CA, 3Global AG Alliance, Tulare, CA

1046 11
Effects of a 48h feed withdrawal on intraperitoneal core body temperature in growing pigs.
J. S. Johnson*, N. M. Chape1 and C. J. Byrd2, 1USDA-ARS Livestock Behavior Research Unit, West Lafayette, IN, 2Purdue University, West Lafayette, IN

1047 12
The effect of exercise on heat tolerance and first lactation in pregnant Holstein heifers.
J. Johnson*, P. L. Steichen and T. G. Rozell, Kansas State University, Manhattan
Effect of exercise on ovarian function in cycling gilts.
A. M. Mesa1, A. M. Adkin1, A. L. Dias2, D. Y. Kim3, P. J. Hansen4 and C. J. Mortensen5, 1Department of Animal Sciences, University of Florida, Gainesville, 2University of Alberta, Edmonton, AB, Canada, 3Gachon University, Gyeonggi-do, The Republic of Korea

The effect of exogenous glucose infusion on early embryonic development in lactating dairy cows.
S. Leane1,2, M. M. Herlihy3, N. Forde3, M. C. Lucy4, P. Loneragan4 and S. Butler5, 1Animal & Grassland Research and Innovation Centre, Teagasc Moorepark, Fermoy, Co. Cork, Ireland, 2School of Agriculture and Food Science, University College Dublin, Ireland, 3University of Leeds, United Kingdom, 4University of Missouri, Columbia

Influence of cattle temperament on blood serum fatty acid content.
T. Gardner1, J. F. Legako1, N. C. Burdick Sanchez1,2, P. R. Broadway3, J. A. Carroll2 and R. C. Vann3, 1Utah State University, Logan, 2Livestock Issues Research Unit, USDA-ARS, Lubbock, TX, 3MAFES-Brown Loam, Mississippi State University, Raymond

Effects of intramammary LPS infusions on inflammation and reproductive parameters of dairy cows.
M. P. T. Coleson1, E. J. Northrop2, J. J. J. Rich2, G. A. Perry2, C. G. Hart2, K. J. McCarty1 and C. O. Lemley1, 1Mississippi State University, Mississippi State, 2Department of Animal Science, South Dakota State University, Brookings

Relationships of calf vigor at birth with calf size and circulating metabolites in fall-born beef calves.
J. M. Larson1, B. L. Vander Ley2 and A. M. Meyer1, 1Division of Animal Sciences, University of Missouri, Columbia, 2Department of Veterinary Medicine and Surgery, University of Missouri, Columbia

Nonruminant Nutrition: Feed Ingredients

Growth performance and toxic response of broilers fed diets containing unfermented or fermented cottonseed meal.
J. L. Xiong1, L. Y. Wu1, H. L. Zhou2, Z. J. Wang3, F. T. Meng4 and L. H. Miao1, 1Hubei Key Laboratory of Animal Nutrition and Feed Science, Wahan Polytechnic University, Wahan, China, 2Xiangyang Engineering Research Center of Animal Medicine, Xiangyang Vocational and Technical College, Xiangyang, China

Protein value of eight triticale genotypes for pigs based on standardized ileal amino acid digestibility.
E. J. P. Strang1, M. Eklund1, P. Rosenfelder1, J. K. Hoo2 and R. Mosenthin3, 1University of Hohenheim, Institute of Animal Science, Stuttgart, Germany, 2Evonik Nutrition & Care GmbH, Hanau-Wolfgang, Germany

Effect of metabolizable energy and sulfur amino acid levels on productive performance and economic return of laying hens.
C. Gallardo1 and E. Salvador2, 1University of São Paulo, Pirassununga, Brazil, 2National University of San Luis Gonzaga, Ica, Peru

Intestinal microbiota, microbial metabolites and carcass traits are changed in a pig model fed a high-fat/low-fiber or a low-fat/high-fiber diet.
S. N. Heinritz4, E. Weiss4, M. Eklund4, T. Aumiller5, S. Messner5, C. M. E. Heyer4, S. Bischoff and R. Mosenthin1, 1University of Hohenheim, Institute of Animal Science, Stuttgart, Germany, 2University of Hohenheim, Department of Nutritional Medicine, Stuttgart, Germany

Use of zinc oxide nanoparticles as growth promoter for weanling pigs.
N. C. Milani*, N. Y. Ikedo, M. Shardelowa and V. S. Miyada, Universidade de São Paulo, Piracicaba, Brazil

Effect of dietary flaxseed oil on growth performance, nutrient digestibility, blood profiles, and meat quality in pigs.
P. Y. Zhao*, T. S. Li, S. Shanmugam, S. Kathannan, R. X. Lan and I. H. Kim, Department of Animal Resource & Science, Dankook University, Cheonan, South Korea

The effect of three levels of unmilled rice on growth performance and digestive tract development in broilers and ducks.
C. P. Villemarette*, E. Lyons, B. Chang, E. Ferguson and F. M. LeMieux, McNeese State University, Lake Charles, LA
Influence of zinc-methionine complex supplementation on reproductive performance and immunity of gestating-lactating sows under hot weather condition.

J. M. Romo, J. A. Romo, R. Barajas*, H. R. Güémez, J. Enriquez and G. Silva, FMVZ-Universidad Autónoma de Sinaloa, Culiacán, Mexico

Japanese quail (Coturnix japonica) responses to low protein diets supplemented with crystalline lysine, methionine, and threonine.

C. R. Herrera Cortés1, H. Bernal Barragán*, F. Sánchez Dávila*, J. E. Hernández Quiroz*, M. A. Montemayor Abundiz* and M. Cervantes Ramírez, 1Universidad Autónoma de Nuevo León, San Nicolás de los Garza, Mexico, 2ICA - Universidad Autónoma de Baja California, Mexicali, Mexico

Bioavailability of D-methionine relative to L-methionine for nursery pigs using slope-ratio assay.

C. Kong1, J. Y. Ahn and B. G. Kim, Konkuk University, Seoul, The Republic of Korea

Energy value of bakery meal and peanut flour meal for broiler chickens determined using the regression method.

F. Zhang1 and O. Adeola2, 1Purdue University, West Lafayette, IN, 2Department of Animal Sciences, Purdue University, West Lafayette, IN

Kinetics of lipid peroxidation in fats and oils as affected by lipid source, heating temperature, and length of heating.

S. C. Lindblom1, G. C. Shurson2, J. Moser1 and B. J. Kerr4, 1Iowa State University, Ames, 2Department of Animal Science, University of Minnesota, St. Paul, 3USDA-ARS, Peoria, IL, 4USDA - ARS, Ames, IA

Bioavailability of D-methionine from unlabeled L-methionine in nursery pigs using the dual isotope method.

Energy value of bakery meal and peanut flour meal for broiler chickens determined using the regression method.

F. Zhang1 and O. Adeola2, 1Purdue University, West Lafayette, IN, 2Department of Animal Sciences, Purdue University, West Lafayette, IN

Effects of feeding dried cabbage leaf residues on broiler performance, ileal digestibility and total tract nutrient digestibility.

A. Mustafa, V. Higginson and B. Baurhoo, McGill University, Saint-Anne De Bellevue, QC, Canada

Effect of type of fibrous sources in the phosphorus-free diet on the basal endogenous loss of phosphorus in growing pigs.

A. R. Son1 and B. G. Kim2, 1Konkuk University, Seoul, South Korea, 2Konkuk University, Seoul, The Republic of Korea

Effects of feeding dried broccoli floret residues on performance, ileal and total tract digestibility, and selected microbial population in broiler chickens.

A. Mustafa, B. Baurhoo and V. Higginson, McGill University, Saint-Anne De Bellevue, QC, Canada

Effect of different levels of zinc and calcium on growth performance in weanling pigs.

L. Blavi*, D. Solá-Oriol, S. M. Martín-Orue and J. F. Pérez, Animal Nutrition and Welfare Service, Department of Animal and Food Sciences, Universitat Autonoma de Barcelona, Bellaterra, Spain

Evaluation of cold pressed soybean meal and pea protein as alternative amino acid sources in swine diets.

J. Koepke*, South Dakota State University, Brookings

The effects of feeding low trypsin inhibitor soybean meal to broilers on growth performance.

G. Hosotani*, B. Freitas, M. S. Kerley and M. C. Shannon, Division of Animal Sciences, University of Missouri, Columbia

Nutritive value of cold-pressed camelina cake with or without supplementation of multi-carbohydrase in pig diets.

T. A. Woyengo1, R. Patterson2 and C. L. Levesque1, 1South Dakota State University, Brookings, 2Canadian Biosystems, Calgary, AB, Canada

Optimization of alkali hydrolysis conditions to increase antioxidant availability in corn distillers grain.

A. Daramola* and B. Min, University of Maryland Eastern Shore, Princess Anne

Animal Health: Dairy Calves

Effects of climatic conditions before and after birth on growth rate of Holstein calves in a hot environment.

E. L. Lopez-Rodríguez1, A. Martínez2 and M. Mellado2, 1Universidad Autonoma Agraria Antonio Narro, Torreon, Mexico, 2Universidad Autonoma Agraria Antonio Narro, Saltillo, Mexico, 3Autonomous Agrarian University Antonio Narro, Saltillo, Coahuila, Mexico

The hidden cost of a hidden disease: Growth performance of calves as affected by bovine respiratory disease diagnosed using ultrasonography.

C. Tejero1 and A. Bach2, 1Rancho Las Nieves, Mallen, Spain, 2ICREA, Barcelona, Spain, 3IRTA, Caldes de Montbui, Spain

Serum and colostrum antibody titers in Holstein cows, and the relationship between these titers and serum antibody titers in their calves.

D. J. McLean1, J. D. Chapman1, A. Woolams2, D. J. Harley1 and L. O. Ely4, 1Phibro Animal Health Corp., Quincy, IL, 2Mississippi State University, Starkville, 3University of Georgia, Athens
Evaluating pre-weaned calf housing and its impact on calf respiratory parameters on New York dairy farms.
K. M. Morrill*, Cornell University, Ithaca, NY

Differential primary and secondary immune responses in calves fed heat-treated or unheated colostrum.
S. L. Gelsinger* and A. J. Heinrichs, The Pennsylvania State University, University Park

The effect of novel antiseptic compounds on umbilical cord healing and infection rates in the first week of life in dairy calves.
A. L. Robinson*, L. L. Timms, K. J. Stalder and H. D. Tyler, Iowa State University, Ames

Effects of Omigen-AF and Provia 6086 on growth, leukocyte, and hematological variables of pre-weaned and immediately post-weaned Holstein calves.

**Ruminant Nutrition: Protein, Amino Acids and Nitrogen I**

Effects of different protein level and corn processing method on nitrogen metabolism in dairy cows and environmental pollution.
G. R. Ghorbani*, H. Rafiee and M. Alikhani, Isfahan University of Technology, Isfahan, Iran

Relative availability for lactating dairy cattle of methionine from two sources of ruminally protected methionine.
1Department of Animal Sciences and Industry, Kansas State University, Manhattan, 2USDA-ARS, U.S. Dairy Forage Research Center, Madison, WI, 3Novus International, Inc., St. Charles, MO, 4Kansas State University, Manhattan

Effects of rumen undegradable protein supplementation and ambient temperature on growth performance and blood metabolites in Korean cattle steers.
H. J. Kang*, M. Y. Piao, H. J. Kim and M. Baik, Department of Agricultural Biotechnology, College of Agriculture and Life Sciences, Seoul National University, Seoul, The Republic of Korea

Guanidinoacetic acid as a precursor for creatine in steers.
1Department of Animal Sciences and Industry, Kansas State University, Manhattan, 2Department of Clinical Sciences, Kansas State University, Manhattan, 3Department of Diagnostic Medicine/Pathobiology, Kansas State University, Manhattan

Total amino acid content variation for commercial TMR and relationship to crude protein.
J. P. Goeser*1,2, D. Sawyer* and G. A. Broderick*, 1University of Wisconsin-Madison, 2Rock River Laboratory, Inc, Watertown, WI, 3Broderick Nutrition & Research, LLC, Madison, WI

Impact of a rumen protected methionine prototype on dairy cow performance, milk composition, and milk casein.
A. M. Barnard*, B. A. Barton*, C. A. Zimmerman*, R. S. Ordway* and T. F. Gressley*, 1University of Delaware, Newark, 2Balchem Corporation, New Hampton, NY

Effects of feeding canola meal or wheat dried distillers grains with solubles alone or in combination as the major protein sources on ruminal function and production in dairy cows.
S. Abeysekara*1 and T. Mutsvangwa*2. 1Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada, 2University of Saskatchewan, Saskatoon, SK, Canada

Relative bioavailability of L-carnitine delivered by ruminal or abomasal infusion or by encapsulation in dairy cattle.
K. E. Olagaray*1, J. E. Shaffer1, C. K. Armendariz*, A. Bellamine*, S. Jacobs*, E. C. Titgemeyer* and B. J. Bradford*, 1Kansas State University, Manhattan, 2Department of Animal Sciences and Industry, Kansas State University, Manhattan, 3Lonza, Inc., Allendale, NJ

Comparison of three levels of a rumen-protected methionine product on performance of lactating dairy cows.
A. M. Barnard*, B. A. Barton*, C. A. Zimmerman*, R. S. Ordway* and T. F. Gressley*, 1University of Delaware, Newark, 2Balchem Corporation, New Hampton, NY

Evaluation of Brassica carinata meal as a protein supplement for growing beef heifers.
Effects of replacing soybean meal with canola meal or treated canola meal on nitrogen metabolism and total tract digestibility in lactating dairy cows.
E. Marostegan de Paula1, M. A. Camargo Danes2, N. E. Lobos3, G. I. Zanton4, G. A. Broderick5 and A. Faciola1,
1University of Nevada, Reno, 2Federal University of Lavras, Brazil, 3Kemin Industries, Des Moines, IA, 4USDA-ARS, U.S. Dairy Forage Research Center, Madison, WI, 5Broderick Nutrition & Research, LLC, Madison, WI

Impact of different diet CP levels and RDP:RUP ratios on midlactation dairy cow performance: Dry matter intake, digestibility and nitrogen balance.
C. R. Guimarães1, S. G. Coelho2, A. M. Pedroso3, F. S. Machado4, M. M. Campos4, R. A. Azevedo5, L. C. Rezende5, T. R. Tomich5 and L. G. R. Pereira5, 1Cargill Amidos, Uberlandia, Brazil, 2UFMG, Belo Horizonte, Brazil, 3Cargill Premix & Nutrition, Campinas, Brazil, 4EMBRAPA, Juiz de Fora, Brazil

Evaluation of protein supplementation in low to medium quality forage diets on intake and ruminal fermentation in steers.

The effect of increasing concentrations of different methionine forms and 2-hydroxy-4-(methylthio) butanoic acid on hepatic oxidative status and genes controlling methionine metabolism and transmethylation flux.
Q. Zhang1, D. N. Lucchini2 and H. M. White1, 1University of Wisconsin-Madison, 2Adisseo S.A.S., Alpharetta, GA

Heat stress alters glucose homeostasis, hepatic heat shock proteins and the immune system in lactating dairy cows.
S. Quan1,2, D. Bu1,3,4, Y. Zhang2, J. Guo1, S. Gao1 and L. H. Baumgard5, 1State Key Laboratory of Animal Nutrition, Institute of Animal Sciences, Chinese Academy of Agricultural Sciences, Beijing, China, 2The Animal Physiology and Biochemistry Laboratory of the Ministry of Agriculture in Nanjing Agriculture University, Nanjing, China, 3Hunan Co-Innovation Center of Animal Production Safety, CAPCIS, Changsha, China, 4CAAS-ICRAF Joint Laboratory of Agroforestry and Sustainable Animal Husbandry, World Agroforestry Centre, East and Central Asia, Beijing, China, 5Iowa State University, Ames

Ruminant Nutrition: Growth, Young Stock and Calves II

Effects of different forage combination on growth performance, ruminal fermentation, and digestibility of weaned calves.
Y. Zou1, X. Zou, Z. J. Cao, Y. Wang and S. L. Li, State Key Laboratory of Animal Nutrition, Beijing Engineering Technology Research Center of Raw Milk Quality and Safety Control, College of Animal Science and Technology, China Agricultural University, Beijing, China

Use of the Brix refractometer to evaluate milk replacer solutions for calves.
H. K. Floren1, W. M. Sischo1, C. Crudo1 and D. A. Moore2, 1Washington State University, Pullman, 2Department of Veterinary Clinical Sciences, Washington State University, Pullman

Effect of corn wet distillers grains inclusion in growing diets on backgrounded cattle performance.
M. Arcieri1, P. Davies2, D. Méndez2, J. Elizalde3 and I. Ceconi2, 1Universidad Nacional de Córdoba, Córdoba, Argentina, 2Instituto Nacional de Tecnología Agropecuaria, General Villegas, Argentina, 3Private consultant, Rosario, Argentina

Effects of *Saccharomyces cerevisiae* fermentation products on intestinal villi integrity in neonatal calves naturally infected with *Cryptosporidium* spp..
S. Vázquez Flores1, M. de Jesús Guerrero Carrillo2, M. F. Scott3, J. Hamann4, S. Barrera Almanza1, C. Guizar Bravo1, A. Patricia Baños Quintana1 and P. Jazmin Aranda Vargas2, 1ESIABA-Tecnológico de Monterrey-Campus Querétaro, Querétaro, Mexico, 2Facultad de Ciencias Naturales, Universidad Autónoma de Querétaro, Querétaro, Mexico, 3Diamond V, Cedar Rapids, IA

Evaluation of Brix refractometer to assess IgG concentration of first and second colostrum from Jersey cows.
D. Rolle, S. Rodríguez, A. Valldecabres and N. Silva-del-Rio*, Veterinary Medicine Teaching and Research Center, University of California-Davis, Tulare

Effects of lactose inclusion in calf starters on starter intake, growth performance and digestive organ development.
K. Inouchi1, A. Saegusa1, Y. Inabu1, T. Sugino1 and M. Oba4, 1ZEN-RAKU-REN, Nishi-shirakawa, Japan, 2ZEN-RAKU-REN, Fukushima, Japan, 3Hiroshima University, Higashi-hiroshima, Japan, 4University of Alberta, Edmonton, AB, Canada

Bioavailability of different sources of zinc using stable isotope s in male Holstein calves.

A novel method for collecting gas produced from the in vitro ANKOM gas production system.
P. S. Alvarez Hess\textsuperscript{1}, P. Giraldo\textsuperscript{2}, R. O. Williams\textsuperscript{2}, P. J. Moate\textsuperscript{2}, K. A. Beauchemin\textsuperscript{1} and R. J. Eckard\textsuperscript{1,2}, \textsuperscript{1}The University of Melbourne, Faculty of Veterinary and Agricultural Sciences, Melbourne, Australia, \textsuperscript{2}The Department of Economic Development, Jobs, Transport and Resources Ellinbank Research Centre, Ellinbank, Australia, \textsuperscript{3}Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada
Effect of baling or grazing of corn residue on the subsequent crop yields.
K. M. Ulmer, J. L. Cox, M. K. Rakkar, R. G. Bondurant, M. E. Drewnoski, J. C. MacDonald, H. Blanco-Canqui and R. J. Rasby, University of Nebraska-Lincoln, Department of Agronomy and Horticulture, University of Nebraska-Lincoln

Intake, milk production, and methane emission of dairy cows fed diets that differ in ruminal in vitro NDF digestibility.

Life cycle energy and greenhouse gas comparison of co-located organic and conventional dairy systems.
B. J. Heins, M. Reese, J. Tallaksen and E. Buchanan, University of Minnesota West Central Research and Outreach Center, Morris

Effects of canola meal and soybean meal as protein sources on methane and ammonia emissions of high producing dairy cows.

L. Fadul-Pacheco, D. Pellerin, P. Y. Chouinard, M. A. Wattiaux, Département des Sciences Animales, Université Laval, Québec, QC, Canada, University of Wisconsin-Madison

Including corn in crop rotations is profitable for dairy farms and does not result in greater greenhouse gas emissions at the whole-farm level.
V. Ouellet, D. Pellerin, M. Chantigny and E. Charbonneau, Département des Sciences Animales, Université Laval, Québec City, QC, Canada, Soils and Crops Research and Development Centre, Agriculture and Agri-Food Canada, Québec, QC, Canada

Effect of forage source of dairy cow diets on methane emission from enteric fermentation and manure storage.
F. Hassanat and C. Benchaa, Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada

Ruminant Nutrition: Greenhouse Gas Emissions

Enteric methane emissions from dairy cows fed corn silage based-diet supplemented with increasing amounts of linseed oil.
C. Benchaa, F. Hassanat, D. Warner and H. Petit, Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada

Essential oils from three tropical Citrus species can reduce in vitro enteric methane production.

Effect of different forages and concentrate levels on energy conversion, and enteric methane production of Holstein × Gyr heifers.
F. A. S. Silva, S. C. Valadares Filho, E. Detmann, L. F. Costa e Silva, L. A. Godoi, B. C. Silva, J. M. V. Pereira, A. C. B. Menezes, P. Pucetti and P. P. Rotta, Universidade Federal de Viçosa, Viçosa, Brazil, Universidade Federal de Viçosa, Department of Animal Science, Viçosa, Minas Gerais, Brazil, Universidade Federal de Viçosa, Viçosa, Minas Gerais, Brazil, Colorado State University, Fort Collins

Ruminant Nutrition: Intake and Feed Efficiency

Endocannabinoids concentrations in plasma associated with feed efficiency and carcass composition on crossbred steers.

The phenotypic relationship between residual feed intake and ultrasound carcass traits in Santa Gertrudis steers.
C. R. Branton, Stephen F. Austin State University, Nacogdoches, TX

Using indigestible rare earth markers and internal markers to predict DMI and residual feed intake.
K. A. Weld and L. E. Armentano, University of Wisconsin-Madison
Short term intake technique to predict dry matter intake and digestibility in forages.
F. M. Ingentron, B. C. Lentz, N. P. Stritzler, C. N. Rabotnikof, M. Menghini and H. M. Arelovich,
Fac. Agronomia, Universidad Nacional de La Pampa, Santa Rosa, Argentina; CONICET, Santa Rosa, Argentina; CIC,
Bahia Blanca, Argentina; Dto. Agronomia, Universidad Nacional del Sur, Bahia Blanca, Argentina; CERZOS, Bahia
Blanca, Argentina

Effects of a blend of essential oils on milk yield and feed efficiency of lactating cows.
I. Guasch, G. Elcoso, B. Zweifel and A. Bach, Blanca, Lleida, Spain; Agolin, Bière, Switzerland; ICREA,
Barcelona, Spain; IRITA, Caldes de Montbui, Spain

Repeatability of feed efficiency in beef cattle offered grass silage and zero-grazed grass.
S. Coyle, C. Fitzsimons, D. A. Kenny, A. K. Kelly and M. McGee, Teagasc Grange, Dunsany Co. Meath, Ireland,
University College Dublin, Ireland

Repeatability of feed efficiency in steers offered a high concentrate diet.
S. Coyle, C. Fitzsimons, D. A. Kenny, A. K. Kelly and M. McGee, University College Dublin, Ireland; Teagasc
Grange, Dunsany Co. Meath, Ireland

NADH dehydrogenase (ubiquinone) Fe-S protein-1 (NDUFS1), a core subunit of mitochondrial complex I, is not
differentially expressed in peripheral blood mononuclear cells of beef steers with divergent residual feed intakes.
Johnson, Washington State University, Pullman; Iowa State University, Ames; University of Missouri, Columbia;
Division of Animal Sciences, University of Missouri, Columbia

Dry matter intake prediction of heifers under tropical conditions.
M. I. Marcondes and A. L. Silva, Departamento de Zootecnia, Universidade Federal de Viçosa, Viçosa, Brazil,
Universidade Federal de Viçosa, Viçosa, Brazil

Repeatability of feed efficiency in steers offered a high concentrate diet.
S. Coyle, C. Fitzsimons, D. A. Kenny, A. K. Kelly and M. McGee, University College Dublin, Ireland; Teagasc
Grange, Dunsany Co. Meath, Ireland

NADH dehydrogenase (ubiquinone) Fe-S protein-1 (NDUFS1), a core subunit of mitochondrial complex I, is not
differentially expressed in peripheral blood mononuclear cells of beef steers with divergent residual feed intakes.
Johnson, Washington State University, Pullman; Iowa State University, Ames; University of Missouri, Columbia;
Division of Animal Sciences, University of Missouri, Columbia

Dry matter intake prediction of heifers under tropical conditions.
M. I. Marcondes and A. L. Silva, Departamento de Zootecnia, Universidade Federal de Viçosa, Viçosa, Brazil,
Universidade Federal de Viçosa, Viçosa, Brazil

Nonruminant Nutrition: Feed Additives I

Effect of supplemental citrulline on thermal and production parameters during heat stress in growing pigs.
Baumgard, Iowa State University, Ames; Virginia Polytechnic Institute and State University, Blacksburg

Effect of microencapsulated blends of organic acids on growth performance, nutrient digestibility, and fecal
microflora in pigs.
P. Y. Zhao, F. Peñagaricano, J. K. Drackley and J. E. P. Santos, University of Florida, Gainesville; University of
Illinois at Urbana-Champaign

Effect of multispecies probiotic supplementation source on growth performance and meat quality traits in
growing-finishing pigs.
University, Cheonan, South Korea

Effect of dietary red ginseng on growth performance, nutrient digestibility, blood profile, meat quality, and
carcass grade in growing-finishing pigs.
H. N. Tran, Y. H. Kim, J. W. Park, S. Mohana Devi and I. H. Kim, Department of Animal Resource & Science, Dankook
University, Cheonan, South Korea

Effect of protected organic acid blend with medium chain fatty acid on growth performance, nutrient
digestibility, blood profiles, meat quality, fecal micro flora and fecal gas emission in finishing pigs.
D. H. Nguyen, T. S. Li, S. D. Upadhyaya, H. N. Tran and I. H. Kim, Department of Animal Resource & Science, Dankook
University, Cheonan, South Korea

Effect of dietary melamine concentrations on performance and tissue melamine residue in male broiler chickens.
J. H. Kim and D. Y. Kil, Chung-Ang university, Anseong-si, The Republic of Korea
Effect of dietary melamine concentrations on performance and tissue melamine residue in female broiler chickens.

A plant extract with manganese, Vali MP, decreased adipogenesis in 3T3-L1 pre-adipocytes by modulating adipogenic gene expression and cellular energy level.
S. W. Choi*, J. Kim, S. W. Jung and K. Y. Whang, Korea University, Seoul, The Republic of Korea, CTC BIO, Seoul, The Republic of Korea

Effects of dietary lysophospholipids (LipidolTM) on intestinal morphology and gene expression of inflammatory cytokines in weaned rats.

Effect of protected sodium butyrate and nutrient concentration on early phase of broilers.
M. Puyalto, C. Sol, J. J. Mallo and M. J. Villamide, NOREL S.A., Madrid, Spain, Departamento de Produccion Agraria, Universidad Politecnica de Madrid, Madrid, Spain

Use of aromatics plants in the diet on performance of broilers in Colombia.
L. Bernal*, La Salle University, Bogotá, Colombia

Dietary antioxidants, chromium and betaine supplementation can improve lactation performance of sows during summer.
J. J. Cottrell, F. Liu, D. J. Henman, K. O’Halloran and F. R. Dunsha*, Faculty of Veterinary and Agricultural Sciences, The University of Melbourne, Parkville, Australia, Rivalea Australia Pty Ltd, Corowa, Australia

Effects of dietary melamine on growth performance, organ weight, and blood melamine concentrations in pigs.
K. R. Park and B. G. Kim, Konkuk University, Seoul, The Republic of Korea

Dietary antioxidants, chromium and betaine supplementation can improve lactation performance of sows during summer.
J. J. Cottrell, F. Liu, D. J. Henman, K. O’Halloran and F. R. Dunsha*, Faculty of Veterinary and Agricultural Sciences, The University of Melbourne, Parkville, Australia, Rivalea Australia Pty Ltd, Corowa, Australia

Feed additives reduced diarrhea occurrence in a medication-free postweaning pig diet.
Z. Yang*, X. Wang, F. Chi and S. Ching, College of Animal Science, Shandong Agricultural University, Tai-an, China, Amlan International, Chicago, IL

Optimization of B vitamins for improving the quality of fermented feed with response surface methodology.
Z. Yang* and X. M. Wang, College of Animal science, Shandong Agricultural University, Tai-an, Shandong, Tai-an, China

Ruminant Nutrition: Vitamins

Pantothenic acid does not affect the concentration of biotin in plasma of Holstein bull calves.
G. Ferreira*, C. L. Teets, A. N. Bladen and A. Geiger, Virginia Polytechnic Institute and State University, Blacksburg

Short-term feeding of a tocopherol mix (α-, β-, γ-, and δ) alters the daily pattern of tocopherol isoforms present in milk and blood in lactating dairy cows.
Y. Qu*, T. H. Elsasser, J. R. Newbold, E. E. Connor, M. Garcia, C. M. Scholte and K. M. Moyes, Department of Animal and Avian Sciences, University of Maryland, College Park, USDA-ARS, Animal Biosciences and Biotechnology Laboratory, Beltsville, MD, Cargill Innovation Center, Veldriel, Netherlands, USDA-ARS, Animal Genomics and Improvement Laboratory, Beltsville, MD

Effect of rumen protected vitamin B complex on metabolic parameters, milk production and d 15 conceptus and endometrium outcomes.
M. Kaur*, J. Hartling, T. A. Burnett, L. Polsky, R. L. A. Cerri and H. Leclerc, Applied Animal Biology, Faculty of Land and Food Systems, University of British Columbia, Vancouver, BC, Canada, Jefo Nutrition, St. Hyacinthe, QC, Canada

Teaching/Undergraduate and Graduate Education II

Application of a survey instrument for assessing student demographics and interests in an animal and dairy sciences career planning course.
M. C. Nicodemus*, Mississippi State University, Mississippi State

Evaluation of learning outcomes in a dairy science section of a science, technology, engineering, and math retention program.
K. A. Dolecheck* and J. M. Bewley, University of Kentucky, Lexington
### Poster Session VII

1:00 PM - 2:00 PM  
Exhibit Hall A/B

**Horse Species: Nutrition**

806 1 Feeding a small amount of hay prior to concentrate neutralizes the effects of high starch diets on inflammation in horses.  
J. K. Suagee-Bedore1, K. Wimbush1, D. R. Linden1 and R. K. Splan2, 1The Ohio State University, Wooster, 2Virginia Polytechnic Institute and State University, Middleburg

807 2 Feeding DigestaWell Buffer to horses neutralizes the effects of high starch diets on blood pH and inflammation.  
J. K. Suagee-Bedore1, A. L. Wagner2 and I. D. Girard3, 1The Ohio State University, Wooster, 2Probiotech International Inc., St-Hyacinthe, QC, Canada

808 3 Efficacy of a brewer’s yeast supplement with or without fat added to an energy restricted diet for performance horses.  
L. B. Hodge1, A. Boyer2 and B. J. Rude1, 1Mississippi State University, Mississippi State, 2FL Emmert, Cincinnati, OH

809 4 Modeling ammonia emission rate from horses fed different concentrations of dietary crude protein.  
J. Weir4, H. Lf5, L. K. Warren4, E. Macon6 and C. Wickens7, 1University of Florida, Gainesville, 2University of Delaware, Newark, 3Middle Tennessee State University, Murfreesboro

810 5 Dietary supplementation of DigestaWell NRG to unconditioned Warmblood mares may reduce lactate rise following exercise.  
A. L. Wagner1, R. K. Splan2, J. K. Suagee-Bedore3 and I. D. Girard1, 1Probiotech International Inc., St-Hyacinthe, QC, Canada, 2Virginia Polytechnic Institute and State University, Middleburg, 3The Ohio State University, Wooster

811 6 Maturity of bermudagrass hay affects digestibility by horses.  
T. L. Hansen1, E. C. Lee1, O. K. Zugay1 and L. K. Warren1, University of Florida, Gainesville

812 7 Investigation of equine hindgut microbiota development in young horses.  
B. St-Pierre1, M. E. Graf1, B. M. Schlaikjer1 and R. C. Bott1, South Dakota State University, Brookings

813 8 Evaluation of chromic oxide and titanium dioxide as external markers for estimating digestibility in horses.  
A. Fowler1, B. M. Pyles1, B. Harlow2, S. H. Hayes1, A. Crum1 and L. M. Lawrence1, 1University of Kentucky, Lexington, 2USDA-ARS Forage Animal Production Research Unit, Lexington, KY

814 9 Effect of starch source in pelleted concentrates on fecal bacterial communities in thoroughbred mares.  
M. B. Pyles1, A. L. Fowler1, V. Bill1, B. E. Harlow2, A. Crum1, S. H. Hayes1, M. D. Flythe1 and L. M. Lawrence1, 1University of Kentucky, Lexington, 2USDA-ARS, Forage-Animal Production Research Unit, Lexington, KY

**Horse Species: Management**

796 10 Stress responses in horses tied with overchecks.  
K. Bennett-Wimbush1, J. K. Suagee-Bedore1 and M. Amstutz1, The Ohio State University, Wooster

797 11 Effect of pre-race behavior on performance in racing quarter horses.  
C. E. Ferguson1, McNeese State University, Lake Charles, LA

798 12 Evaluating the effectiveness of varying doses of supplemental tryptophan as a calmative in horses.  
B. Davis1, T. Grandin1, T. E. Engle2 and J. Ransom3, 1Colorado State University, Fort Collins, 2National Park Service, Sedro-Woolley, WA

799 13 Effects of barefoot trimming and shoeing on the lower forelimb: Hoof morphology.  
D. K. Proskes1, J. L. Leatherwood1, M. J. Anderson1, K. J. Stuts1, C. J. Hammer2 and J. Coverdale3, 1Sam Houston State University, Huntsville, TX, 2North Dakota State University, Fargo, 3Texas A&M University, College Station

800 14 Effects of barefoot trimming and shoeing on the lower forelimb: Joint inflammation.  
D. K. Proskes1, J. L. Leatherwood1, K. J. Stuts1, M. J. Anderson1, C. J. Hammer2 and J. Coverdale3, 1Sam Houston State University, Huntsville, TX, 2North Dakota State University, Fargo, 3Texas A&M University, College Station

801 15 Characterizing the physiological response of a novel vaccine in mature horses.  
J. L. Leatherwood1, D. L. Parker1, M. J. Anderson1, K. J. Stuts1, M. M. Beverly and S. F. Kelley1, Sam Houston State University, Huntsville, TX
Application of either a single or multiple doses of an intravaginal GnRH agonist to induce ovulation in mares.
C. D. Sinclair1, S. K. Webe2, T. L. Douthit1, D. M. Grieber1 and J. M. Kouba1, 1Kansas State University, Manhattan, 2JBS United, Inc., Sheridan, IN

Incidence of exercise induced pulmonary hemorrhage in race horses in Puerto Rico.
V. Morales1, S. Glass1, J. De Ange1, B. Vallejo2 and A. A. Rodriguez1, 1University of Puerto Rico, Mayaguez, PR, 2Equus PR, Caguas, PR

Application of gait analysis to determine if the Galiceno horse breed is a gaited horse breed.
M. C. Nicodemus1 and J. Beranger1, 1Mississippi State University, Mississippi State, 2The Livestock Conservancy, Pittsboro, NC

Effect of body condition score on fatty acid composition of equine subcutaneous adipose tissue.

Physiology and Endocrinology:
Ruminant Nutrition, Metabolism and Reproduction

Plasma concentrations of glucagon-like peptide 1 and 2 in calves fed calf starters containing lactose.
Y. Inabu1, A. Saegusa2, K. Inouchi2, M. Oba3 and T. Sugino4, 1Hiroshima University, Higashi-hiroshima, Japan, 2ZEN-RAKU-REN, Nishi-shirakawa, Japan, 3Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada

Metabolic profile and inflammatory response in calves with different intake of immunoglobulins.
S. Dander, F. Piccoli-Cappelli, A. Bignami, A. Minuti and E. Trevisi1, Università Cattolica del Sacro Cuore, Piacenza, Italy

Effect of the timing of addition of trans-10, cis-12 conjugated linoleic acid and L-carnitine during culture on development and cryotolerance of bovine embryos produced in-vitro.
A. M. Zolini1, P. J. Hansen1, C. A. Torres2 and J. Block1,3, 1Department of Animal Sciences, University of Florida, Gainesville, 2Universidade Federal de Vicoso, Vicoso, Brazil, 3OvaTech LLC, Gainesville, FL

An insufficient supply of glucose substrates causes reduced lactose synthesis in lactating dairy cows fed cereal straws instead of alfalfa hay.
B. Wang1, F. Zhao1,2, B. X. Zhang1 and J. X. Liu1, 1Institute of Dairy Science, Zhejiang University, Hangzhou, China, 2University of Vermont, Burlington

Expression of genes involved in the initial steps of steroidogenesis in adipose tissue depots of dairy cows during the dry period and early lactation.
A. Alizadeh1,2,3, H. Sadri1, J. Rehage4, S. Dänicke1 and H. Sauerwein1, 1Institute of Animal Science, Physiology and Hygiene Unit, University of Bonn, Germany, 2Department of Animal Science, Saveh Branch, Islamic Azad University, Saveh, Islamic Republic of Iran, 3Department of Embryology, Reproductive Biomedicine Research Center, Royan Institute for Reproductive Biomedicine, ACECR, Tehran, Islamic Republic of Iran, 4University for Veterinary Medicine, Foundation, Hannover, Germany, 5Institute of Animal Nutrition, Friedrich-Loeffler-Institute (FLI), Braunschweig, Germany

Effects of a dietary supplementation of rumen-protected B vitamins on reproduction of dairy cows by measuring nutrigenomic parameters.
F. Richard1, D. R. Khan1, C. L. Girard2, H. Leclerc2 and E. Evans3, 1Universite Laval, Quebec, QC, Canada, 2Agriculture & Agri-Food Canada, Sherbrooke, QC, Canada, 3Jefo Nutrition, St. Hyacinthe, QC, Canada, 4Technical Advisory Services, Bowmanville, ON, Canada

Impact of dietary protein levels during late pregnancy on the number of binuclear cells in sheep.
H. H. Mansour1, A. Reyaz1, S. T. Dorsam1, L. A. Lekatz1 and K. A. Vonnahme1, 1North Dakota State University, Fargo, 2Illinois State University, Normal

Effect of serum concentration of beta-carotene at AI on productive and reproductive parameters in lactating Holstein cows.
A. M. L. Madureira1, T. Guzella Guida1, R. L. A. Cerri2 and J. L. M. Vasconcelos1, 1Sao Paulo State University, Botucatu, Brazil, 2Applied Animal Biology, Faculty of Land and Food Systems, University of British Columbia, Vancouver, BC, Canada

Propionic acid decreased hepatic acetyl CoA content compared with glycerol within the timeframe of meals when infused abomasally.
L. B. Gualdron-Duarte1 and M. S. Allen, Michigan State University, East Lansing
Feed restriction-induced negative energy balance alters the fatty acid profiles of adipose tissue and milk fat of dairy cows.

Body condition score and body condition score change: Associations with fertility phenotypes in lactating dairy cows.
M. M. Herlihy1, E. Rojas1, J. Kenneally1, P. Lonergan1 and S. Butler1, 1Animal & Grassland Research and Innovation Centre, Teagasc Moorepark, Fermoy, Co. Cork, Ireland, 2School of Agriculture and Food Science, University College Dublin, Ireland

Effects of Omnigen-AF supplementation on body temperature, milk production, and somatic cell count in lactating dairy cows.
T. Leiva1, R. F. Cooke1, A. P. Brandao2, R. L. A. Cerri1, R. O. Rodrigues1 and J. L. M. Vasconcelos1, 1UNESP - FMVZ, Botucatu, Brazil, 2Oregon State University - EOARC Burns, 3Applied Animal Biology, Faculty of Land and Food Systems, University of British Columbia, Vancouver, BC, Canada, 4Sao Paulo State University, Botucatu, Brazil

The effects of stage of gestation and maternal nutrient status on binucleate cell numbers in the beef cow.
A. M. Peterson1, A. Reyaz1, S. T. Dorsam1, L. E. Camacho2, K. C. Swanson1, A. Grazul-Bilska1 and K. A. Vonnahme1, 1North Dakota State University, Fargo, 2University of Arizona, Tucson

Effects of post-AI supplementation with Ca salts of soybean oil on ovarian and pregnancy development in Bos indicus beef cows.

Assessment of tubal patency by hysterosalpingo-contrast sonography in cow.
K. Itoh1, N. Endo1, S. I. Kataoka2 and T. Tanaka*1, 1Tokyo University of Agriculture and Technology, Fuchu, Tokyo, Japan, 2Tokyo Metropolitan Agriculture and Forestry Research Center, Ome, Tokyo, Japan

Assessment of tubal patency by hysterosalpingo-contrast sonography in cow.
K. Itoh1, N. Endo1, S. I. Kataoka2 and T. Tanaka*1, 1Tokyo University of Agriculture and Technology, Fuchu, Tokyo, Japan, 2Tokyo Metropolitan Agriculture and Forestry Research Center, Ome, Tokyo, Japan

Retained placenta and subclinical endometritis: Prevalence and relation with reproductive performance in crossbred dairy cows.
R. R. Buso, C. C. Campos, T. R. Santos, J. P. E. Saat and R. M. Santos*, FAMEV-UFU, Uberlândia, Brazil

Association of rumination time and health status with milk production in early lactation dairy cows.
V. H. Asselstine1, E. I. Kaufman1, S. J. LeBlanc2, B. W. McBride1, T. F. Duffield1 and T. J. DeVries1, 1Department of Animal Biosciences, University of Guelph, ON, Canada, 2Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada

Association of cow-level factors with the risk of poor hygiene.
I. Robles1, D. F. Kelton1, H. Barkema1, G. P. Keefe1, J. P. Roy1, M. A. von Keyserlingk1 and T. J. DeVries1, 1Department of Animal Biosciences, University of Guelph, ON, Canada, 2Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada, 3University of Calgary, AL, Canada, 4Atlantic Veterinary College, University of Prince Edward Island, Charlottetown, PE, Canada, 5Faculté de Médecine Vétérinaire, University of Montreal, St. Hyacinthe, QC, Canada, 6Animal Welfare Program - University of British Columbia, Vancouver, BC, Canada

Genomic markers associated with hyperketonemia in Jersey cows.
R. S. Pralle1, H. A. Adams2, T. L. Chandler2 and H. M. White1, 1Department of Dairy Science University of Wisconsin-Madison, 2CRI International Center for Biotechnology, Mount Horeb, WI

Meta-analysis of factors influencing new intramammary infection rate in experimental challenge teat dip efficacy trials.
B. D. Enger1, R. R. White1, S. C. Nickerson1 and L. K. Fox1, 1Virginia Polytechnic Institute and State University, Blacksburg, 2University of Georgia, Athens, 3Washington State University, Pullman

The effects of short-term feeding of tocopherol mix (α-, β-, γ-, and δ) on blood neutrophil function and immunometabolic-related gene expression in lactating dairy cows.
Y. Qu1, T. H. Elsasser2, M. Garcia1, C. M. Scholte1, E. E. Connor1, J. R. Newbold1 and K. M. Moyes1, 1Department of Animal and Avian Sciences, University of Maryland, College Park, 2USDA-ARS, Animal Biosciences and Biotechnology Laboratory, Beltsville, MD, 3USDA-ARS, Animal Genomics and Improvement Laboratory, Beltsville, MD, 4Cargill Innovation Center, Velddriel, Netherlands
Predicting hyperketonemia prevalence in Jersey herds from milk composition and cow test-day information using multiple linear regression.
T. L. Chandler1, N. Zhang2, M. R. Skiba1, S. G. Moore1, M. O. Caldeira1, S. E. Poock1, G. R. Oetzel4, C. W. Wolfe5, R. H. Fourdraine6 and H. M. White1, 1Department of Dairy Science University of Wisconsin-Madison, 2Feed Research Institute Chinese Academy of Agricultural Sciences, Beijing, China, 1University of Missouri, Columbia, 4Department of Medical Sciences, School of Veterinary Medicine, University of Wisconsin-Madison, 1American Jersey Cattle Association, Reynoldsburg, OH, 5CRI International Center for Biotechnology, Mount Horeb, WI

Liver transcriptome modifications by nutrient restriction in early lactation Holstein cows challenged with intramammary lipopolysaccharide.
K. Pawlowski1, C. Leroux1, Y. Faulconnier1, C. Boby2, A. de la Foye2, D. Durand2 and J. A. A. Pires3,1, 1UMR1213 Herbivores, INRA, VetAgroSup, Saint-Genes-Champanelle, France, 2PFEM, INRA, Saint-Genes-Champanelle, France

Growth and transcriptional profile analysis following oral probiotic supplementation in dairy cows.
M. Worku1, S. Adeji-Fremah, K. Ekwemalor, E. Asiamah and H. Ismail, North Carolina Agricultural and Technical State University, Greensboro

Mammary gland transcriptome and proteome modifications by nutrient restriction in early lactation Holstein cows challenged with intramammary lipopolysaccharide.
K. Pawlowski1, C. Chambon2, C. Boby3, A. de la Foye2, Y. Faulconnier1, J. A. A. Pires3,1 and C. Leroux1, 1UMR1213 Herbivores, INRA, VetAgroSup, Saint-Genes-Champanelle, France, 2PFEM, INRA, Saint-Genes-Champanelle, France

Methionine supplementation modulates the inflammatory response of dairy cow blood neutrophils in response to lipopolysaccharide.
M. Vailati Riboni1, B. Qadir2 and J. J. Loor1, 1University of Illinois at Urbana-Champaign, 2Veterinary Division, Sulaymaniyah Veterinary Department, Ministry of Agriculture and Water Resource, Kurdistan Region Government, Sulaymaniyah, Iraq

Feasibility and safety of nitric oxide releasing solution as a treatment for bovine mastitis.
G. Regev-Shoshani, J. Martins*, J. Leemhuis, N. Dinn and C. Miller, University of British Columbia, Vancouver, BC, Canada

Methionine coupled with choline supplementation alters inflammation and oxidative stress gene network expression of dairy cow blood neutrophils.
M. Vailati Riboni1, A. Bellingeri2, I. Khan3 and J. J. Loor1, 1University of Illinois at Urbana-Champaign, 2Università Cattolica del Sacro Cuore, Piacenza, Italy, 3University of Agriculture, Peshawar, Pakistan

Impact of a BRDC vaccine with a MLV or KV IBR component on the innate inflammatory profile of nulliparous heifers.
C. L. Widener*, D. J. Hurley, W. M. Graves, A. H. Nelson, D. A. L. Lourenco and J. F. Bohlen, University of Georgia, Athens

Association between bovine milk infrared temperature and bacteriological results from CHROMagar Mastitis Plates and PathoProof Mastitis Complete-16 Kit.
M. G. Marrero-Pérez1, J. Curbelo-Rodríguez, G. Ortiz-Colón, H. L. Sánchez-Rodríguez and Y. R. Vélez-Robles, University of Puerto Rico, Mayagüez Campus, Mayagüez, Puerto Rico

The endometrial microbiome in transition cows fed an energy-restricted diet.
G. Esposito1,2, J. J. Lim1, T. Tasaara1, P. C. Irons1,2, E. C. Webb1,2 and A. Chapwanya2, 1Department of Production Animal Studies, Faculty of Veterinary Sciences, University of Pretoria, South Africa, 2University of Pretoria, Onderstepoort, South Africa

Beef Species I

Relationship between forage quality parameters and mineral intake in grazing beef cattle.
J. D. Rivera1, M. L. Gipson and R. G. Gipson, Mississippi State University South Branch Experiment Station, Poplarville

Feeding antibodies against interleukin-10 improved gain efficiency in beef steers.
M. R. Schaefer1, M. E. Cook and D. M. Schaefer, University of Wisconsin-Madison

Animal and digestibility marker variation influence predictions of dry matter intake and dry matter digestibility.
K. A. Weld2, J. R. R. Dorea1, F. A. P. Santos2 and D. E. Oliveira1, 1University of Wisconsin-Madison, 2University of São Paulo, Piracicaba, Brazil, 3Santa Catarina State University, Lages, SC, Brazil
230 54 Using hair cortisol concentrations to assess the adrenocortical stress response in beef cattle administered corticotrophin-release hormone.
K. M. Schubach*1, R. F. Cooke2, A. P. Brandao1,2, K. Lippolis3, M. T. Hinchliff4, D. W. Bohnert5 and R. L. A. Cerri6,
1Oregon State University - EOARC Burn, 2UNESP - FMVZ, Botucatu, Brazil, 3Applied Animal Biology, Faculty of Land and Food Systems, University of British Columbia, Vancouver, BC, Canada

231 55 Effects of static or oscillating dietary crude protein levels on fermentation dynamics of beef cattle diets using a dual-flow continuous culture system.
P. Amaral1,2, L. Mariz1,2, P. Del Bianco Benedetti1,2, L. Galoro da Silva1, E. Marostegan de Paula1, H. Monteiro1,3, T. Shenkoru1, S. A. Santos1, S. Poulson1 and A. Faciola1, 1University of Nevada, Reno, 2Texas A&M University, College Station, 3Sao Paulo State University, Botucatu, Brazil, 4Federal University of Minas Gerais, Belo Horizonte, Brazil

232 56 Reproductive development of rotationally grazed beef heifers when supplemented chelated trace minerals.

233 57 Comparison of treatment protocols for bovine respiratory disease in high-risk, newly received beef calves.
J. J. Ball*1, E. B. Kegley1, J. A. Hornsby1, J. L. Reynolds1, J. Sarchet2 and J. G. Powell3, 1Department of Animal Science, Division of Agriculture, University of Arkansas, Fayetteville, 2Zoetis, Kalamazoo, MI

234 58 Glycerin as an alternative energy source for ruminants: In vitro fermentation, total gas and methane production.
P. Del Bianco Benedetti1,2, T. Shenkoru2, M. Fonseca3, R. Bittner2, K. Murphy2, D. Ivey2, B. Ribas2,4, E. Marostegan de Paula2, L. Galoro da Silva2, H. Monteiro2,3, I. Nicolis2, L. Mariz2,3, H. Costa2, P. Amaral2,3, I. Marcondes1 and A. Faciola1, 1Federal University of Vicosa, Brazil, 2University of Nevada, Reno, 3Texas A&M University, College Station, 4Sao Paulo State University, Botucatu, Brazil, 5Maringa State University, Maringa, Brazil, 6Federal University of Minas Gerais, Belo Horizonte, Brazil

235 59 The effects of supplementing ruminal bypass unsaturated fatty acids during late gestation on cow and calf serum fatty acids in beef cows.
R. E. Ricks, E. K. Cook, S. K. Duckett and N. M. Long*, Clemson University, SC

236 60 The effects of supplementing ruminal bypass unsaturated fatty acids during late gestation on transfer of passive immunity and growth in calves.
R. E. Ricks, E. K. Cook, L. K. Lewis and N. M. Long*, Clemson University, SC

237 61 Effect of OmniGen-AF dietary supplementation on ultrasound parameters in purebred Angus steers fed a finishing diet.
S. A. Armstrong1,2, D. J. McLean1, G. Bobe1, M. Bionaz2 and T. J. Wistuba1, 1Phibro Animal Health Corporation, Quincy, IL, 2Department of Animal and Rangeland Sciences, Oregon State University, Corvallis

238 62 Total gastrointestinal tract digestibility of dry matter, neutral detergent fiber and starch of Nellore and ½ Angus x Nellore cattle adapted either for 9 or 14 days to high-concentrate diets.
W. I. Silva Filho1, D. H. M. Watanabe2, A. L. Rigueiro1, M. C. Pereira2, G. P. Bertoldi1, A. C. J. Pinto1, A. A. Santos1, M. M. Squizatti1, L. A. Tomaz1, O. A. Souza1 and D. D. Millen1, 1Sao Paulo State University (UNESP), Dracena, Brazil, 2São Paulo State University (UNESP), Botucatu, Brazil

239 63 Effect of OmniGen-AF supplementation on the metabolic profile of growing beef cattle.
T. H. Schell1,2, S. A. Armstrong1,2, J. A. Bronson1, M. C. Lewis1, A. P. Snider1,2, D. J. McLean1 and G. Bobe1, 1Department of Animal and Rangeland Sciences, Oregon State University, Corvallis, 2Phibro Animal Health Corporation, Quincy, IL

240 64 Dietary melatonin and growth responses in feedlot heifers.
M. R. Schaefer* and D. M. Schaefer, University of Wisconsin-Madison

241 65 Dietary melatonin and growth responses in implanted feedlot steers.
M. R. Schaefer* and D. M. Schaefer, University of Wisconsin-Madison

242 66 Use of the residual retained energy as a measure of efficiency in growing Nellore cattle bulls.
A. M. Castilhos1, A. M. Jorge1, C. L. Francisco1, M. E. Z. Mercadante1, S. F. M. Bonilha1, C. M. Pariz2, D. C. M. Silva1 and R. H. Branco1, 1Universidade Estadual Paulista - FMVZ, Botucatu, Brazil, 2Centro APTA Bovinos de Corte, Instituto de Zootecnia, Seriãocinho, Brazil

871 67 Comparative effect of two commercial preparations of bovine somatotropin on milk yield and overall performance in Chilean dairy cows.
M. A. Barrios1, P. Melendez2, and M. Duchens3, 1University of Chile, Santiago, 2University of Missouri, Columbia

68 Measuring the prevalence and impact of subclinical ketosis on lactation performance in U.S. dairy herds
Heather A. Adams1, Gary R. Oetzel2, Tawni L. Chandler1, Heather M. White1 and Robert H. Fourdraine4, 1CRI International Center for Biotechnology, Mount Hope, WI, 2University of Wisconsin-Madison, 3Department of Dairy Science University of Wisconsin-Madison
Poster Session VIII

5:00 PM - 6:00 PM

Exhibit Hall A/B

**Meat Science and Muscle Biology**

890 1 Sensory properties of meat of Nellore cattle fed different levels of lipid-based diets.

T. N. P. Valente¹, E. S. Lima², J. P. G. Morais¹, R. O. Roça¹ and D. P. B. Costa³, ¹IFGOFIANO, POSSE, Brazil, ²Environmental Health, FMU, São Paulo, Brazil, ³Agricultural Sciences Center, Federal University of Sao Carlos, Araras, Brazil, ⁴São Paulo State University (FCA/UNESP), Botucatu, Brazil, ⁵IFMT, Cuiabá, Brazil

891 2 Genome-wide efficient mixed-model study for meat quality in Nellore cattle.

C. E. Bass¹, P. C. Tizioto², P. S. N. Oliveira², M. A. Mudada³, A. S. M. Cesar¹, R. V. Ventura¹, J. Afonso¹, A. O. D. Lima¹, L. L. Cunho¹, R. R. Tullio² and L. C. A. Regitano³, ¹Federal University of Sao Carlos, Sao Carlos, Brazil, ²Embrapa Pecuária Sudeste, São Paulo, Brazil, ³Animal Biotechnology Laboratory - ESALQ, University of São Paulo, Piracicaba, Brazil, ⁴Beef Improvement Opportunities, Guelph, ON, Canada

892 3 Comparison of carcass and sensory traits and contents of fatty acids and volatile compounds in *Longissimus dorsi* of three cattle breeds.

893 4 Label-Free MS⁸ proteomic analysis of the bovine skeletal muscle: New approach for meat tenderness evaluation.

M. D. Poleti¹, R. C. Simas¹, A. S. M. Cesar¹, S. C. S. Andrade¹, G. H. F. Souza¹, L. C. Cameron¹, L. C. A. Regitano⁸ and L. L. Coutinho¹, ¹Animal Biotechnology Laboratory - ESALQ, University of São Paulo, Piracicaba, Brazil, ²Thomson Mass Spectrometry Laboratory - , Campinas, Brazil, ³Genetics and Evolutionary Biology Department – IB, University of São Paulo, São Paulo, Brazil, ⁴Waters Corporation, Sao Paulo, Brazil, ⁵Laboratory of Protein Biochemistry - Federal University of State of Rio de Janeiro, Brazil, ⁶Embrapa Southeast Livestock, Sao Carlos, Brazil

894 5 Carcass grading effects on the fatty acid and amino acid composition of pork loin from Duroc pigs.

J. Álvarez-Rodriguez¹, R. Ros-Freixedes¹, S. Gol¹, E. Henríquez-Rodriguez¹, R. N. Pena¹, L. Bosch², J. Estany³, F. Vilatorio³ and M. Tor¹, ¹University of Lleida, Agrotenio Center, Spain, ²Universitat de Girona, Spain, ³University of Lleida, Spain

895 6 The *Longissimus thoracis* muscle proteome in Alentejana bulls as affected by growth pattern.

A. M. Almeida¹, P. Nanni³, A. M. Ferreira¹, C. Fortes³, J. Grossmann³, R. J. Bessa¹ and P. Costa¹, ¹Instituto de Biologia Experimental e Tecnologica, Oeiras, Portugal, ²Ross University School of Veterinary Medicine, Bassetterre, Saint Kitts and Nevis, ³Functional Genomics Center Zurich (FGCZ) - University of Zurich, Zurich, Switzerland, ⁴CIISA, FMV-Ulisboa, Lisboa, Portugal

896 7 Ferulic acid in diets of heifers and its effect on the oxidative stability of meat stored in refrigeration.

897 8 Label-free quantification of myosin isoforms in porcine skeletal muscles.

J. Y. Jeong¹, H. S. Yang², J. K. Seo³, H. W. Yum⁴ and G. D. Kim⁵, ¹Institute of Agriculture & Life Science, Gyeongsang National University, Jinju, The Republic of Korea, ²Division of Applied Life Science (BK21 plus), Gyeongsang National University, Jinju, The Republic of Korea, ³Department of Animal Sciences, University of Illinois at Urbana-Champaign

898 9 Identification of novel genes and mechanisms involved in bovine myogenic differentiation.

H. Jiang¹, R. Settlage², X. Leng¹ and Y. Hou¹, ¹Department of Animal and Poultry Sciences, Virginia Polytechnic Institute and State University, Blacksburg, ²Biocomplexity Institute, Virginia Polytechnic Institute and State University, Blacksburg

899 10 Omega-3 and omega-7 oil supplementation on tissue fatty acid accumulation.

S. K. Duckett¹, I. F. Furusho-Garcia, M. F. Miller Jr., B. M. Koch and G. Volpi Lagreca, Clemson University, SC

900 11 Supplementation of glycerol or fructose via drinking water of pasture-fed lambs.

G. Volpi Lagreca, I. F. Furusho-Garcia, B. M. Koch, M. F. Miller Jr. and S. K. Duckett¹, Clemson University, SC

901 12 Comparison of meat quality and fatty acid composition of grain-fed calves to grass-fed steers, as an alternative beef production system in Chilean Patagonia.

F. Sales¹, R. Morales², R. Lira¹, L. Bravo³ and Q. Sciaccia⁶, ¹Instituto de Investigaciones Agropecuarias, Punta Arenas, Chile, ²Instituto de Investigaciones Agropecuarias, Osorno, Chile, ³Universidad del País Vasco, Bizkaia, Spain, ⁴Leibniz Institute, Dummerstorf, Germany
Influence of tannins extract supplementation on lipid oxidation of beef kept in refrigerated storage.  
B. O. Lopez1, R. Barajas1, M. A. Mariezcurrena2, M. D. Mariezcurrena3 and Y. Libien4, 1FMVZ-Universidad Autonoma de Sinaloa, Culiacan, Mexico, 2FMVZ-Universidad Autonoma del Estado de Mexico, Toluca, Mexico, 3FM-Universidad Autónoma de Estado de México, Toluca, Mexico

Differentially expressed genes in genetically divergent Nellore steers for calcium content in the Longissimus dorsi muscle.  
J. Afonso1, P. C. Tizioto2, P. S. N. Oliveira1, W. J. S. Diniz3, A. O. D. Lima4, M. M. D. Souza5, M. I. P. Rocha6, J. V. D. Silva7, C. E. Buss1, C. F. Gromboni8, G. B. Mourão9, A. R. Nogueira10, L. L. Coutinho11 and L. C. A. Regitano12, 1Federal University of Sao Carlos, Brazil, 2Embrapa Southeast Livestock, Sao Carlos, Brazil, 3Federal Institute of Education, Bahia Science and Technology, Valenca, Brazil, 4University of Sao Paulo, Piracicaba, Brazil, 5Animal Biotechnology Laboratory - ESALQ, University of Sao Paulo, Piracicaba, Brazil

Fatty acid profile and gene expression of lipogenic transcription factors in the muscle of Nellore bulls fed processed soybean.  
C. V. Oliveira1, M. M. Ladeira1, O. R. Machado Neto2, D. R. Casagrande1, L. Ruiz3, J. R. R. Carvalho4, J. P. Schoonmaker5 and A. C. Rodrigues6, 1Universidade Federal de Lavras, Brazil, 2Universidade Estadual Paulista, Botucatu, Brazil, 3Purdue University, West Lafayette, IN

Heat shock protein expression differs in 14 day aged Longissimus lumborum in agreement with Warner-Bratzler Shear Force values.  

Development of a web-based calendar tool for scheduling beef cow management activities.  
D. Poddaturi1, S. Johnson2, G. R. Dahlke1, D. A. Blasi3 and G. Hanzlicek4, 1Iowa State University, Ames, 2Kansas State University, Colby, 3Department of Animal Science & Industry, Manhattan, KS, 4Kansas State Veterinary Diagnostic Laboratory, Manhattan

Comparing The Pennsylvania State and NRC 2001 heifer ration programs.  
L. K. Mitchell* and A. J. Heinrichs, The Pennsylvania State University, University Park

Motivations of calf care workers for sick calf identification and treatment decisions.  
C. Crudo1, D. A. Moore2, J. A. Afema3 and W. M. Sischo1, 1Washington State University, Pullman, 2Department of Veterinary Clinical Sciences, Washington State University, Pullman

Developing a feed allocation model to maximize income over feed cost considering farmer risk preferences.  
D. Liang5, T. F. Rutherford, B. L. Jones, R. D. Shaver and V. Cabrera, University of Wisconsin-Madison

A qualitative assessment of perception and communication barriers that interfere with the transfer of knowledge to dairy farmers.  
M. E. Woolpert1,2, C. E. Morse1 and D. M. Barbano3, 1University of Vermont, Burlington, 2William H. Miner Agricultural Research Institute, Chazy, NY, 3Cornell University, Department of Food Science, Northeast Dairy Foods Research Center, Ithaca, NY

Characterization of the fatty acid composition of retail bovine milk and vegetable milk in Chile.  
E. Vargas-Bello-Pérez*, P. Toro-Majica, D. Enriquez-Hidalgo and M. A. Fellenberg, Pontificia Universidad Católica de Chile, Santiago, Chile

Effect of milk protein intake and casein: Whey ratio in breakfast meals on postprandial glucose, satiety ratings and subsequent meal intake.  
B. Kung1, S. Paré1, A. J. Tucker1, G. H. Anderson2, A. J. Wright1 and H. D. Geff1, 1University of Guelph, ON, Canada, 2University of Toronto, ON, Canada

Influence of sodium reduction on the rheological characteristics of cottage cheese cream dressing.  
H. L. Damiano*, University of Idaho, Moscow

A rapid and non-destructive fluorescence-based analyzer for monitoring the changes in deproteinized whey powder during storage.  
K. Sajith Babu* and J. K. Amamcharla, Food Science Institute, Animal Sciences and Industry, Kansas State University, Manhattan

Extension Education

Dairy Foods Division: Dairy Chemistry I
Evaluation of mineral compositions in commercial Mongolian dried yogurts (Aaruul) marketed at retail stores in Mongolia.
Y. W. Park¹, B. I. Davis¹, J. H. Ko², K. P. Bastola¹, A. Siddique¹ and J. O. Jones¹, ¹Fort Valley State University, GA, ²Mongolia Huree University of ICT, Ulaanbaatar, Mongolia

Potential protective effect of camel milk and yogurt with chromium on alloxan-induced hyperglycemia in rats.
M. M. Motawee* and A. M. Badawi, National Organization for Drug Control and Research, Giza-, Egypt

Characteristics, composition and sensory properties of butter from cows on pasture versus indoor feeding systems.
T. F. O’Callaghan¹, ², H. Faulkner³, S. McAulliffe³, M. G. O’Sullivan¹, D. Hennessy³, P. Dillon³, K. N. Kilkenny¹, C. Stanton¹ and R. P. Ross¹, ¹University College Cork, Ireland, ²Teagasc Food Research Centre, Cork, Ireland, ³Teagasc Animal & Grassland Research and Innovation Centre, Cork, Ireland

Identification of protein fractions in ripened American style natural cheese manufactured utilizing recombinant bovine and camel chymosin by capillary electrophoresis.
A. C. Biswas* and L. Metzger, South Dakota State University, Brookings

Effect of gamma radiation on physicochemical properties, protein-protein interaction, and microstructure of whey proteins.
M. Guo¹, ², X. Wang¹, F. Lee¹, J. Liu¹ and D. Zhang¹, ¹College of Food Science and Engineering, Jilin University, Changchun, China, ²University of Vermont, Burlington, ³Northeast Agriculture University, Harbin, China, ⁴Agriculture Academy of China, Beijing, China

Effects of sodium polyphosphate on distribution of particle size of polymerized whey protein.
M. Guo¹, ², D. Liu¹ and C. Wang¹, ¹College of Food Science and Engineering, Jilin University, Changchun, China, ²University of Vermont, Burlington

Effects of ultrasound treatment on physicochemical properties of whey protein soluble aggregates.
X. Shen¹, T. Fang¹, T. Zhang¹ and M. Guo¹, ², ¹Department of Food Science, College of Food Science and Engineering, Jilin University, Changchun, China, ²Department of Nutrition and Food Science, College of Agriculture and Life Science, University of Vermont, Burlington

Crystallization of calcium phosphate in stabilized-paste white mold cheese rinds.
G. F. Tansman¹, P. S. Kindstedt¹ and J. M. Hughes², ¹Department of Nutrition and Food Sciences, University of Vermont, Burlington, ²Department of Geology, University of Vermont, Burlington

Effect of buffalo αs1-casein polymorphism on the semi-hard Monterey Jack-type cheese quality.
L. Li¹, Q. Zeng¹, D. Ren¹, L. Huang¹ and Y. Tang¹, ¹Buffalo Research Institute, Chinese Academy of Agricultural Science, Nanning, China, ²Institute of Dairy Science, College of Animal Sciences, Zhejiang University, Hangzhou, China

Membrane fractionation of delactosed permeate to enhance salty taste.
L. D. Alexander¹, M. A. Stout², M. Drake², S. L. Beckman¹ and L. Metzger¹, ¹Midwest Dairy Foods Research Center, South Dakota State University, Brookings, ²North Carolina State University, Raleigh, ³South Dakota State University, Brookings

Characterization of Queso Fresco made with Na/K salt blends and stored for 12 weeks.
D. L. Van Hekken¹, M. H. Tunick¹, J. A. Renye and P. M. Tomasula, USDA-ARS, ERRC, Dairy & Functional Foods Research Unit, Wyndmoor, PA

Effect of micro-encapsulated iron salts on Cheddar cheese divalent cation balance and composition.
A. Arce¹ and Z. Ustunol, Michigan State University, East Lansing

Chemical characteristics and enhanced hepatoprotective activities of Maillard-reaction products derived from milk protein-sugar system.

Production, Management and Environment: Stress

Use of evaporative cooling systems and their effects on core body temperature and lying times in lactating dairy cattle.
J. R. Johnson¹, L. G. D. Mendonça¹, J. P. Harner¹ and M. J. Brouk¹, ¹Department of Animal Sciences and Industry, Kansas State University, Manhattan, ²Kansas State University, Manhattan, ³Department of Biological and Agricultural Engineering, Kansas State University, Manhattan

Relationship between blood parameters, physiological changes and behavior pattern in Korean native steers under cold stress.
Effects of exit-lane water drenching using showers on lactating dairy cow vaginal temperature.

The effects of zinc amino acid complex on biomarkers of gut integrity and metabolism in heat-stressed steers.
M. Abuajamieh1, S. K. Kvidera1, E. A. Horst1, E. J. Mayorga1, J. T. Seibert1, J. S. Johnson1, J. W. Ross1, M. A. Al-Qais1, P. J. Gorden1, J. DeFrain1, R. P. Rhodes1 and L. H. Baumgard1, 1Iowa State University, Ames, 2Veterinary Diagnostic and Production Animal Medicine, Iowa State University, Ames, 3Zinpro Corporation, Eden Prairie, MN, 4Virginia Polytechnic Institute and State University, Blacksburg

Effect of OmniGen-AF supplementation to heat stressed cows during late gestation on blood parameters and immune cells of their calves.
A. L. Skibiel*, J. L. Powell1, T. F. Fabris1, Y. M. Torres1, F. N. Corra1, J. D. Chapman2, D. J. McLean2, D. Kirk2, G. E. Dahl1 and J. Laporta1, 1Department of Animal Sciences, University of Florida, Gainesville, 2Phibro Animal Health Corporation, Quincy, IL

Effects of cooling and dietary zinc source on the inflammatory responses to an intra-mammary lipopolysaccharide challenge in lactating Holstein cows during summer.
A. P. A. Monteiro*, X. Weng1, J. Guo1, J. K. Bernard1, J. DeFrain2 and S. Tao1, 1University of Georgia, Tifton, 2Zinpro Corporation, Eden Prairie, MN

Survey of facility design and heat abatement strategies in progressive Central California dairies.
A. H. Souza*, E. O. S. Batista2, B. Gonzales3 and F. Doricci4, 1Ceva Animal Health, Libourne, France, 2University of Sao Paulo, Pirassununga, Brazil, 3Large Animal Veterinary Practitioner, Campestre Dairy, Sao Pedro, Brazil, 4University of Sao Paulo, Sao Paulo, Brazil

**Ruminant Nutrition: Protein, Amino Acids and Nitrogen II**

The effect of heat stress and jugular infusions of methionine, lysine and branched-chain amino acids in lactating dairy cattle.
K. Kassube*, J. Kaufman, K. G. Pohler and A. G. Rius, The University of Tennessee, Knoxville

Effect of experimental design on production responses in high-producing dairy cows fed two levels of metabolizable protein.
G. I. Zanton*, USDA-ARS, U.S. Dairy Forage Research Center, Madison, WI

Meta-analysis of post-ruminal microbial nitrogen flows in dairy cattle.
Y. Roman-Garcia1,2, R. R. White1, and J. L. Firkins1, 1Department of Animal Sciences, The Ohio State University, Columbus, 2Virginia Polytechnic Institute and State University, Blacksburg

Prediction of crude protein and neutral detergent fiber content in Pennisetum clandestinum by near-infrared spectroscopy.
A. Rivera1, Universidad Nacional de Colombia, Medellin, Colombia

Impact of metabolizable protein source on pancreatic enzyme activity in finishing cattle fed dry-rolled corn-based diets.
E. J. Blom1, D. W. Brake1, M. R. Fiene1, J. A. Walker1, F. E. Keomaniyong2 and K. C. Swanson2, 1South Dakota State University, Brookings, 2North Dakota State University, Fargo

Comparative effects of multiple sources of rumen-protected methionine on milk production and serum amino acid levels in mid-lactation dairy cows.
Y. Zang1, S. Saed Samii*1, J. L. Tager1, J. W. McFadden1 and K. M. Krause1, 1West Virginia University, Morgantown, WV, 2MarSyt, Elizabethtown, PA

Milk protein synthesis gene expression and mTOR phosphorylation in response to the “ideal” profile of Lys, Met, Thr, Phe, His, Val, Ile, and Leu in bovine mammary cells.
X. Dong1,2, Z. Zhou1, Z. Wang2, B. Saremi1 and J. J. Loor1, 1University of Illinois at Urbana-Champaign, 2Sichuan Agricultural University, Ya’an, IL, 3Evonik Industries AG, Hanau, Germany

Nitrogen excretion of lactating dairy cows fed alfalfa hay- or birdsfoot trefoil hay-based high-forage diet.
M. Ghetlich Khan1, S. Y. Yang1, J. S. Eun1 and J. W. MacAdam1, 1Department of Animal, Dairy, and Veterinary Sciences, Utah State University, Logan, 2Department of Plants, Soils, and Climate, Utah State University, Logan

Determination of relative methionine bioavailability in lactating cows fed Smartamine M, Mepron, and AminoShure M using the plasma free AA dose-response method.
N. L. Whitehouse1,2, C. G. Schwab3, S. M. Fredin1 and A. F. Brito1, 1University of New Hampshire, Durham, 2Schwab Consulting, LLC, Boscobel, WI, 3Adisso, Inc., Alpharetta, GA
Impact of three rumen protected lysine prototypes on dairy cow performance, milk composition, and milk casein.
A. M. Barnard\textsuperscript{1}, B. A. Barton\textsuperscript{1}, C. A. Zimmerman\textsuperscript{2}, R. S. Ordway\textsuperscript{3} and T. F. Gressley\textsuperscript{1}, \textsuperscript{1}University of Delaware, Newark, \textsuperscript{2}Balchem Corporation, New Hampton, NY

Effects of soybean meal, Fermenten, or expeller soybean meal on milk performance and intake in lactating dairy cattle.
S. W. Fessenden\textsuperscript{1}, D. A. Ross\textsuperscript{1}, E. Block\textsuperscript{2} and M. E. Van Amberg\textsuperscript{1}, \textsuperscript{1}Cornell University, Ithaca, NY, \textsuperscript{2}Church and Dwight Animal Nutrition, Ewing, NJ

Effect of ruminal bypass lysine on amino acid status, performance and carcass characteristics of steers fed corn product based diets.
N. A. Lancaster\textsuperscript{1}, J. A. Tekippe\textsuperscript{2}, M. C. Claey\textsuperscript{1} and J. P. Schoonmaker\textsuperscript{1}, \textsuperscript{1}Purdue University, West Lafayette, IN, \textsuperscript{2}Ajinomoto Heartland LLC, Chicago, IL

Determining ruminal lysine degradability of a bypass soybean meal product and an encapsulated lysine source.
J. M. Prestegaard\textsuperscript{4}, A. L. Kenny\textsuperscript{1}, M. M. Masiero\textsuperscript{2} and M. S. Kerley\textsuperscript{1}, \textsuperscript{1}University of Missouri, Columbia, \textsuperscript{2}Division of Animal Sciences, University of Missouri, Columbia

Effects of rumen-protected lysine and methionine on milk yield and milk composition in lactating Holstein cows fed two different levels of crude protein.
A. Ostrensky\textsuperscript{1}, G. Negro\textsuperscript{2}, A. M. D. Santos\textsuperscript{1}, A. Anater\textsuperscript{1}, D. R. Ribeiro\textsuperscript{1}, L. F. Greco\textsuperscript{1}, M. N. Pereira\textsuperscript{1} and R. D. Almeida\textsuperscript{1,2}, \textsuperscript{1}Pontificia Universidade Católica do Paraná, Curitiba, Brazil, \textsuperscript{2}Universidade Federal do Paraná, Curitiba, Brazil

Immunometabolic gene expression in blood neutrophils (PMN) in Holstein dairy cows supplemented with rumen-protected methionine or rumen-protected choline during the peripartal period.
P. Montagner\textsuperscript{1}, Z. Zhou\textsuperscript{1}, D. N. Luchini\textsuperscript{2}, J. J. Loor\textsuperscript{1} and M. Nunes Corrêa\textsuperscript{1}, \textsuperscript{1}University of Illinois at Urbana-Champaign, \textsuperscript{2}Adisseo S.A.S., Alpharetta, GA

Estimation of microbial protein and blood urea of confined bulls fed with diets containing virginiamycin and monensin sodium.
F. R. Camilo\textsuperscript{1}, A. M. Mobiglia\textsuperscript{1}, J. J. D. R. Fernandes\textsuperscript{1}, V. R. M. Couto\textsuperscript{1}, F. D. D. Resende\textsuperscript{1}, G. R. Siqueira\textsuperscript{1} and R. K. Grizotto\textsuperscript{1}, \textsuperscript{1}CAPES Foundation, Brazil, \textsuperscript{2}Federal University of Pelotas, Pelotas, Brazil

Data acquisition settings of the Ankom RF system and inocula donors affect \textit{in vitro} gas production.
D. R. Mertens\textsuperscript{1}, N. Schlau\textsuperscript{2} and D. M. Taysom\textsuperscript{2}, \textsuperscript{1}Mertens Innovation & Research LLC, Belleville, WI, \textsuperscript{2}Dairyland Laboratories, Inc., Arcadia, WI

Effect of duration of \textit{in vitro} incubation on disappearance of NDF and starch from chopped corn plants versus their resulting corn silages.
L. Nuzback\textsuperscript{1}, B. Mahanna\textsuperscript{1}, R. A. Zimm\textsuperscript{1}, S. Dennis\textsuperscript{1} and F. Owens\textsuperscript{1}, \textsuperscript{1}DuPont Pioneer, Johnston, IA, \textsuperscript{2}University of California-Davis, El Centro

Ruminant Nutrition: Ruminal Fermentation II

Effects of inoculum source and ammoniation on \textit{in vitro} gas production kinetics of barley straw.
L. Xu\textsuperscript{1,2}, Z. X. He\textsuperscript{1}, P. X. Jiao\textsuperscript{1,3}, G. O. Ribeiro Jr\textsuperscript{1}, V. Bremer\textsuperscript{4}, K. A. Beauchemin\textsuperscript{1} and W. Z. Yang\textsuperscript{1,4}, \textsuperscript{1}Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, \textsuperscript{2}Light Industry Vocational Technical College, Baotou, China, \textsuperscript{3}Northwest Agriculture and Forestry University, Yangling, China, \textsuperscript{4}Elanco Animal Health, Greenfield, IN

Feeding ground flaxseed to lactating dairy cows decreases the ruminal proportion of Archaea, but does not change the major species of cellulolytic bacteria.
A. B. D. Pereira\textsuperscript{1}, A. F. Brito\textsuperscript{1}, T. L. Resende\textsuperscript{2}, D. H. Woitschach\textsuperscript{1}, R. B. Reis\textsuperscript{2} and K. J. Soder\textsuperscript{1}, \textsuperscript{1}University of New Hampshire, Durham, \textsuperscript{2}Universidade Federal de Minas Gerais, Belo Horizonte, Brazil

Data acquisition settings of the Ankom RF system and inocula donors affect \textit{in vitro} gas production.
D. R. Mertens\textsuperscript{1}, N. Schlau\textsuperscript{2} and D. M. Taysom\textsuperscript{2}, \textsuperscript{1}Mertens Innovation & Research LLC, Belleville, WI, \textsuperscript{2}Dairyland Laboratories, Inc., Arcadia, WI

Rumen protozoal communities are dynamic after a dietary switch from conserved forage to pasture.
M. L. Bainbridge\textsuperscript{1}, L. K. Saldinger, J. W. Barlow, J. P. Alvez, J. Roman and J. Kraft, University of Vermont, Burlington

Effects of \textit{Enterococcus faecalis} SROD5 supplementation on microbial communities and quantities of \textit{in vitro} rumen fermentation.
L. L. Mamuad, S. S. Lee\textsuperscript{1}, A. A. Biswas and C. D. Jeong, Sunchon National University, Suncheon, The Republic of Korea
INTRODUCING

SAFE\textsc{GAIN™}

ENCAPSULAIDS™ FOR BEEF CATTLE

LYSINE FORMULA

STOCKER CATTLE just became more profitable, thanks to new SafeGain™ Lysine Formula from H.J. Baker. SafeGain's patented rumen protected Encapsulaids allow more lysine to be absorbed into the bloodstream. By balancing amino acids, SafeGain delivers consistent, healthy growth for just pennies a day. Plus, whether you prefer a TMR or pasture for your operation, SafeGain is proven effective. To learn more, call your H.J. Baker representative or visit hjbaker.com.

1. UP TO 184% RETURN ON INVESTMENT
2. INCREASES AVERAGE DAILY GAINS
3. IMPROVES FEED TO GAIN CONVERSION
4. REDUCES DRY MATTER INTAKE
### SYMPOSIA AND ORAL SESSIONS

#### Animal Health: Dairy Udder Health

**Chairs:** Jamie P. Jarrett, Phibro Animal Health Corporation; Thomas R. Overton, Cornell University  
**Sponsor:** H. J. Baker  
**Time:** 10:30 AM - 12:30 PM  
**Location:** 155 D

| 10:35 AM | 152 The effect of dry period length and antibiotic treatment at drying off on somatic cell counts across the dry period.  
*R. J. Vanhoeij*, A. van Kriegers, B. Kemp*, and T. J. G. M. Lam*, Wageningen University, Netherlands, Adaptation Physiology Group, Wageningen University, Netherlands, Animal Health Service, Deventer, Netherlands, University of Utrecht - Department of Farm Animal Health, Utrecht, Netherlands |
| 10:50 AM | 153 Enhancement of the dry-off process by intramammary infusion of metalloproteinase 9 nanoparticles.  
*S. Parés*, O. Cano-Garrido, E. Garcia-Fruíos, F. Fàbregas, A. Bach*, N. Ferrer-Miralles, M. Teré, A. Villaverde, and A. Arís*, Department of Ruminant Production, IRTA, Caldes de Montbui, Spain, Departament de Genetica i de Microbiologia, UAB, Cerdanyola del Valles, Spain, IRTA, Caldes de Montbui, Spain, CRE, Barcelona, Spain |
| 11:05 AM | 154 Effects of inhibiting prolactin production with cabergoline on the physiology of the cow-dry period.  
*S. Parés*, A. Arís*, M. Teré, F. Fàbregas, E. Garcia-Fruíos, J. Ruberte*, V. Nacher*, A. De-Prado*, and A. Bach*, Department of Ruminant Production, IRTA, Caldes de Montbui, Spain, IRTA, Caldes de Montbui, Spain, CBATEG Universitat Autònoma de Barcelona, Bellaterra, Spain, Ceva Santé Animale, Libourne, France, CRE, Barcelona, Spain |
| 11:20 AM | 155 The treatment of only environmental Streptocooci clinical mastitis cases reduced antibiotic use, days out of the tank, recurrence of clinical mastitis and a tendency to reduce culling.  
*A. Lago*, C. Tovar, J. Zaragoza, D. Luiz, and D. Pearce, DairyExperts Inc., Tulare, CA |
| 11:35 AM | 156 Effect of the selective treatment of gram-positive clinical mastitis cases versus blanket therapy.  
*A. Lago*, D. Luiz, D. Pearce, C. Tovar, and J. Zaragoza, DairyExperts Inc., Tulare, CA |
| 11:50 AM | 157 Comparison of PCR and culture methods for detecting mastitis causing mycoplasma in bulk tank milk from commercial dairy herds.  
*A. M. Britten*, E. D. Tretter*, and M. Gurajala, Udder Health Systems, Inc., Meridian, ID |
| 12:05 PM | 158 Effects of antibiotic dry cow therapy and internal teat sealant (Teatseal) on milk somatic cell counts, clinical, and subclinical mastitis in early lactation.  
*H. M. Golder*, A. Hodge, and I. J. Lean*, Scibos, Camden, Australia, Zoetis Australia Research and Manufacturing Pty. Ltd., Parkville, Australia |

#### ASAS Graduate Student Symposium

**Chair:** Kyle J. McLean, North Dakota State University  
**Sponsor:** ASAS  
**Time:** 10:30 AM - 12:30 PM  
**Location:** 254 B

</tbody>
</table>
10:45 AM  353  Genetic evaluation for heat tolerance in growing Angus cattle.
H. L. Bradford*, B. D. Fragomeni, D. Lourenco, and I. Misztal, University of Georgia, Athens

11:00 AM  354  Angus cattle at high elevation: Comparison of models to estimate breeding values of yearling pulmonary arterial pressure.
X. Zeng1, T. N. Holt1, S. E. Speidel1, R. M. Enns1, and M. G. Thomas1, 1Department of Animal Sciences, Colorado State University, Fort Collins, 2College of Veterinary Medicine and Biomedical Sciences, Colorado State University, Fort Collins

11:15 AM  355  The effect of heterosis on pulmonary arterial pressure on beef cattle.
M. M. Culbertson1, M. G. Thomas1, L. L. Leachman2, R. M. Enns1, and S. E. Speidel1, 1Department of Animal Sciences, Colorado State University, Fort Collins, 2Leachman Cattle of Colorado, Fort Collins

11:30 AM  356  Genetic and phenotypic analysis of Israeli Holstein milk, fat and protein production as determined by the Afilab real-time milk analyzer.
J. I. Weller1 and E. Ezra2, 1ARO, The Volcani Center, Bet Dagan, Israel, 2Israel Cattle Breeders Association, Caesarea, Israel

11:45 AM  357  ADSA-EAAP Speaker Exchange Presentation: Genetic analysis of multivariate indices of detailed fatty acid profile determined by gas chromatography in bovine milk.
N. P. P. Macciotta1, M. Mele2, A. Cecchinato3, G. Conte4, S. Schiavon5, and G. Bittante6, 1Dipartimento di Agraria, University of Sassari, Italy, 2University of Pisa, Italy, 3University of Padova, Legnaro PD, Italy, 4Department of Agriculture, Food and Environment, University of Pisa, Italy, 5Department of Agronomy, Food, Natural resources, Animals and Environment, University of Padova, Italy

12:15 PM  358  Effectiveness of genomic prediction of boar taint components in Pietrain sired breeding populations.
C. Große-Brinkhaus1, E. Heuß1, J. Trautmann2, D. Mörlein3, K. Schellander1, C. Looft1, J. Dodenhoff1, K. U. Götz4, and E. Tholen1, 1Institute of Animal Science, University of Bonn, Germany, 2Department of Animal Science, University of Göttingen, Germany, 3isi GmbH & Co. KG, Rosdorf, Germany, 4Bavarian State Research Centre for Agriculture, Institute of Animal Breeding, Poing, Germany

12:30 PM  359  Understanding the genetic architecture of Hays Converter Cattle.
M. K. Abo-Ismail12, R. Khorsheid1, E. C. Akanno1, J. Crowley1, J. Basarab1, C. Li9, P. Stothard1, and G. Plastow1, 1Livestock Genetics, Department of Agriculture, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Animal and Poultry Production, Damanhour University, Egypt, 3Canadian Beef Breeds Council, Calgary, AB, Canada, 4AgResearch Limited, Mosgiel, New Zealand, 5Centre for Genetic Improvement of Livestock, University of Guelph, ON, Canada, 6University of Queensland, Centre for Animal Science, QAAFI, St. Lucia, Australia, 7Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada, 8Lacombe Research Centre, Alberta Agriculture and Forestry, Lacombe, AB, Canada, 9Lacombe Research and Development Centre, Agriculture and Ag-Food Canada, Edmonton, AB, Canada

Companion Animal: Nutrition and Biology
Chair: Brittany M. Vester Boler, Nestle Purina
10:30 AM - 11:45 AM  150 E/F

10:30 AM  425  Canine hemangiosarcoma expresses luteinizing hormone (LH) receptors.
K. Zwida* and M. A. Kutzler, Oregon State University, Corvallis

10:45 AM  426  Rabbit maternal pheromone delivered in ointment decreases heart rate in domestic dogs during a simulated thunderstorm.
G. M. Pirner* and J. J. McGlone, Texas Tech University, Lubbock

11:00 AM  427  Evaluation of nutrient digestibility and fecal scores in domestic dogs (Canis lupis familiaris) fed raw meat diets varying in protein source.
C. A. Iennarella*, C. J. Iske, and C. L. Morris, Iowa State University, Ames

11:15 AM  428  Miscanthus grass utilization as a dietary fiber source for dogs.
R. Antunes Donadelli*, C. G. Aldrich, and I. C. Alvarenga, Kansas State University, Manhattan

11:30 AM  429  The effect of milled sorghum fractions on diet utilization by dogs.
I. C. Alvarenga*, C. G. Aldrich, and R. A. Donadelli, Kansas State University, Manhattan
### Dairy Foods Division Symposium:
**Advances in Sustainability within the Dairy Processing Industry**

**Chairs:** Lisbeth Goddik, Oregon State University; Ying Wang, Innovation Center for US Dairy

</table>
**Growth and Development**

**Chair: Jay Daniel, Berry College**

10:30 AM - 12:30 PM

150 G

10:30 AM  778  A new view on the growth of pigs in relation to frequent body weight monitoring.
A. H. Stygar*, K. A. Dolecheck, and A. R. Kristensen, University of Copenhagen, Department of Large Animal Sciences, Frederiksberg, Denmark.

10:45 AM  779  Effect of prior fiber consumption on diet-induced obesity susceptibility and metabolic health indicators in Ossabaw pigs.
V. V. Almeida and K. M. Ajuwon, Purdue University, West Lafayette, IN.

11:00 AM  780  Body composition at first heat of gilts exposed to three different feeding regimens.
S. Van Vliet, T. S. Bruun, J. Hales, C. F. Hansen, and P. K. Theil, Aarhus University, Denmark.

11:15 AM  781  Pre-weaning diet and exogenous estrogen alter mammary epithelial cell proliferation and progesterone and estrogen receptor expression.
A. J. Geiger, R. M. Akers, and C. L. M. Parsons, Virginia Polytechnic Institute and State University, Blacksburg.

11:30 AM  782  In vivo knockdown of FGFR2 and MET mRNAs in trophectoderm of ovine conceptuses retards their development via abrogation of MAPK and MTOR pathways.
X. Wang, K. A. Dunlap, M. C. Satterfield, G. Wu, and F. W. Bazer, Texas A&M University, College Station.

**Milk Protein and Enzymes**

**Chair: Rafel Jimenez-Flores, California Polytechnic State University**

10:30 AM - 12:30 PM

Grand Ballroom B/D

10:30 AM  910  Intrinsic and extrinsic factors affecting milk yield and composition of Camel milk in Northern Eritrea.
Y. N. Berhane, Uludag University, Bursa, Turkey.

10:45 AM  911  Effect of lactoferrin hydrolysates on cytokine expression in Raw264.7 cells.
Y. W. Park, J. Y. Son, G. Renchinkhand, S. H. Pak, and M. S. Nam, Fort Valley State University, GA.

11:00 AM  912  Three new bovine αs-CN phosphorylation isoforms reveal different phosphorylation pathways.

11:15 AM  913  Hardening and microstructure of high protein nutrition bars made using whey protein isolate or milk protein concentrate.
S. K. Hassan and D. J. McMahon, College of Education, Al-Qadisiya University, Al-Qadisiya - Diwaniya, Iraq.

11:30 AM  914  Effect of casein non-phosphopeptides on the development of rat muscle analyzed using computed tomography (CT) scanning technology.

11:45 AM  915  Physico-chemical properties and antioxidant efficacy of whey protein isolate and casein hydrolyzate stabilized nano-vesicular vehicle systems containing curcumin.
Z. Z. Haque and S. Mukherjee, Food Science, Nutrition and Health Promotion, Mississippi State.
Physiology and Endocrinology: Nutrition, Reproduction and Metabolism
Chair: Lance H. Baumgard, Iowa State University
10:30 AM - 12:30 PM
151 G

10:30 AM 1092 **WS** Mycobacterium avium subspecies paratuberculosis serum lipid profile analysis through Fourier transform ion cyclotron resonance mass spectrometry.
A. L. Salazar1, J. M. Jarvis1, N. M. Sudasinghe1, S. Kumar1, M. Song1, J. Stabel2, T. Thacker2, S. L. Ivey1, and T. Schaub1, 1New Mexico State University, Las Cruces, 2USDA-ARS, Ames, IA

10:45 AM 1093 **WS** Insulin-associated and insulin-independent impacts of β adrenergic agonists and pro-inflammatory cytokines on glucose metabolism in primary rat soleus muscle.
C. N. Cadaret*, K. A. Beede, H. E. Riley, and D. T. Yates, University of Nebraska-Lincoln

11:00 AM 1094 **WS** Relationship between current temperament measures and physiological responses to handling of feedlot cattle.
A. F. Williams1*, J. A. Boles1, M. R. Herrygers1, J. G. Berardinelli1, M. C. Meyers2, and J. M. Thomson1, 1Montana State University, Bozeman, 2Idaho State University, Pocatello

11:15 AM 1095 Cardiovascular performance of modern swine does not comply with allometric scaling laws.
G. van Essen*, University Medical Center Rotterdam, Netherlands

11:30 AM 1096 DL-methionine increases glutathione concentration and alleviates inflammatory responses in primary bovine hepatocytes.
Q. Zhang1, D. N. Luchini2, and H. M. White1, 1University of Wisconsin-Madison, 2Adisseo S.A.S., Alpharetta, GA

11:45 AM 1097 Elevated hepatic lipid peroxidation and oxidative stress in underperforming pigs.
T. G. Ramsay*, M. J. Stoll, L. A. Blomberg, and T. J. Caperna, USDA-ARS, BARC, Beltsville, MD

12:00 PM 1098 Yeast supplementation altered the metabolic response to a combined viral-bacterial challenge in feedlot heifers.
A. B. Word1*, P. R. Broadway2, N. C. Burdick Sanchez3, K. P. Sharon4, S. L. Roberts5, J. T. Richeson6, P. J. Defoor7, M. D. Cravey8, J. R. Corley9, A. B. Prata2, P. L. J. Monteiro Jr1, M. C. C. Mattos1, F. C. Mattos1, G. B. Mourao2, and F. A. P. Santos3, 1University of São Paulo - ESALQ/USP, Piracicaba, Brazil, 2ESALQ/USP, Piracicaba, Brazil, 3CEVA Animal Health, Paulínea, Brazil, 4Ourofino Animal Health, Cravinhos, Brazil, 5Department of Animal Science, University of São Paulo/ESALQ, Piracicaba, Brazil, 6Phileo Lesaffre Animal Care, Milwaukee, WI, 7Phileo Lesaffre Animal Care, Cedar Rapids, IA

12:15 PM 1099 In vivo production, quality and pregnancy of bovine embryos from cows with high or low intake of dry matter or energy.
R. Sartori1*, R. S. Surjus2, A. B. Prata2, P. L. J. Monteiro Jr1, M. C. C. Mattos3, F. C. Mattos4, G. B. Mourao5, and F. A. P. Santos6, 1University of São Paulo - ESALQ/USP, Piracicaba, Brazil, 2ESALQ/USP, Piracicaba, Brazil, 3CEVA Animal Health, Paulínea, Brazil, 4Ourofino Animal Health, Cravinhos, Brazil, 5Department of Animal Science, University of São Paulo/ESALQ, Piracicaba, Brazil, 6University of São Paulo, Piracicaba, Brazil

Ruminant Nutrition: Lactation Performance
Chair: Fernando Bargo, FAUBA
10:30 AM - 12:30 PM
155 F

10:30 AM 1500 Effects of arginine infusion through jugular vein on the milk performance and casein synthesis in mid-lactation cows.
M. Z. Wang*, Yangzhou University, Yangzhou, China

10:45 AM 1501 Diet starch content and fermentability affects feed intake and milk yield of cows in the postpartum period.
R. I. Albornoz*, Michigan State University, East Lansing

11:00 AM 1502 Effects of feeding a histidine-deficient diet on lactational performance of dairy cows.
F. Giallongo1*, M. Harper1, J. Oh1, C. Pars6, I. Shinzato1, and A. N. Hristov1, 1The Pennsylvania State University, University Park, 2Evonik Nutrition & Care GmbH, Hanau, Germany, 3Ajinomoto Co., Inc., Tokyo, Japan
K. M. Hultquist1, K. W. Cotanch1, C. S. Ballard1, H. A. Tucker1, R. J. Grant1, R. Suzuki2, and H. M. Dann1, 1William H. Miner Agricultural Research Institute, Chazy, NY, 2ZEN-NOH National Federation of Agricultural Cooperative Associations, Tokyo, Japan

11:30 AM 1504  Meta-analysis to predict amino acids limiting dairy cattle performance.
I. J. Lean1, M. B. De Ondarza2, C. J. Sniffen3, and K. E. Griswold4, 1Scibus, Camden, Australia, 2Paradox Nutrition, West Chazy, NY, 3Fencrest, LLC, Holderness, NH, 4Kemin Industries, Inc., Des Moines, IA

11:45 AM 1505  Influence of essential amino acid balancing post-partum on lactation performance by dairy cows through a meta-analysis.
L. F. Ferraretto1, C. S. Ballard1, C. J. Sniffen2, and I. Shinzato3, 1William H. Miner Agricultural Research Institute, Chazy, NY, 2Fencrest, LLC, Holderness, NH, 3Ajinomoto Heartland Inc., Chicago, IL

12:00 PM 1506  Canola meal in dairy cow diets during early lactation increases production compared to soybean meal.
S. A. E. Moore1 and K. F. Kalscheur2, 1University of Wisconsin-Madison, 2USDA-ARS, US Dairy Forage Research Center, Madison, WI

Ruminant Nutrition: Minerals
Chair: Matt J. Hersom, University of Florida
10:30 AM - 12:30 PM
155 E

10:30 AM 1531  A meta-analysis to estimate the net macromineral (Ca, P, Mg, Na, and K) requirements for maintenance in beef cattle.
L. F. Costa e Silva1, S. C. Valadarees Filho2, P. P. Rotta1, M. I. Marcondes4, D. Zanetti1, F. A. S. Silva1, and M. V. C. Pacheco3, 1Universidade Federal de Vicosa, Vicosa, Minas Gerais, Brazil, 2Universidade Federal de Vicosa, Vicosa, Minas Gerais, Brazil, 3Universidade Federal de Vicosa, Vicosa, Minas Gerais, Brazil, 4Departamento de Zootecnia, Universidade Federal de Viçosa, Viçosa, Brazil

10:45 AM 1532  Effect of micronutrient source on mineral status and performance of steers fed low or high sulfur diets.
S. J. Hartman*, O. N. Genther-Schroeder, and S. L. Hansen, Iowa State University, Ames

11:00 AM 1533  Effect of anionic salts on rumen fermentation in a continuous culture system.
A. L. Kenny1, J. L. Purdom1, M. M. Masiero1, J. P. Jarrett2, T. J. Wistuba2, and M. S. Kerley1, 1University of Missouri, Columbia, 2Phibro Animal Health Corporation, Quincy, IL

11:15 AM 1534  Effects of prepartum dietary cation anion difference and source of vitamin D on dairy cows: Vitamin D, mineral and bone metabolism.
R. M. Rodney1, N. Martinez2, E. Block3, L. L. Hernandez3, C. D. Nelson4, P. Celi5, J. E. P. Santos5, and I. J. Lean1, 1University of Sydney, Camden, Australia, 2Scibus, Camden, Australia, 3Department of Animal Sciences, University of Florida, Gainesville, 4Church and Dwight Animal Nutrition, Ewing, NJ, 5Department of Dairy Science, University of Wisconsin-Madison, 6University of Florida, Gainesville, 7Faculty of Veterinary and Agricultural Sciences, The University of Melbourne, Parkville, Australia

11:30 AM 1535  The net macromineral (Ca, P, Mg, Na, and K) requirements for growth in beef cattle estimated by meta-analysis.
P. P. Rotta1, S. C. Valadarees Filho2, L. F. Costa e Silva2, M. I. Marcondes2, A. C. B. Menezes2, M. V. C. Pacheco1, T. E. Engle6, and B. C. Silva1, 1Universidade Federal de Vicosa, Vicosa, Minas Gerais, Brazil, 2Universidade Federal de Vicosa, Vicosa, Minas Gerais, Brazil, 3Universidade Federal de Vicosa, Vicosa, Minas Gerais, Brazil, 4Departamento de Animal Science, Universidade Federal de Viçosa, Vicosa, Brazil, 5Universidade Federal de Vicosa, Vicosa, Brazil, 6Colorado State University, Fort Collins
**Ruminant Nutrition: Western Section**

**Chair:** Terry E. Engle, Colorado State University  
**Sponsor:** Western Section ASAS  
**10:30 AM - 12:30 PM**  
**155 C**

**10:30 AM** 1664 **WS**  
Effect of crude protein supplementation on performance of cow-calf pairs and replacement heifers grazing late growing season forage.  
L. Canterbury*, P. Ebert, D. G. Lust, and E. A. Bailey, Department of Agricultural Sciences, West Texas A&M University, Canyon

**10:45 AM** 1665 **WS**  
Effect of corn-based supplementation on gas emissions, performance, and energetic losses of steers grazing wheat pasture.  
P. Ebert¹, E. A. Bailey¹, A. L. Shreck², N. A. Cole², and J. S. Jennings¹, ¹Department of Agricultural Sciences, West Texas A&M University, Canyon, ²USDA-ARS Conservation and Production Research Laboratory, Bushland, TX, ³Texas A & M AgriLife Research and Extension Center, Amarillo

**11:00 AM** 1666 **WS**  
Effects of rumen protected arginine supplementation to cows during early or late gestation on progeny glucose tolerance.  
L. R. Owensby¹, C. B. Gardner¹, R. C. Dunlap¹, C. A. Loest¹, S. L. Ivey¹, S. H. Cox², A. F. Summers¹, and E. J. Scholljegerdes¹, ¹New Mexico State University, Las Cruces, ²Corona Range and Livestock Research Center, Corona, NM, ³Animal and Range Science Department, New Mexico State University, Las Cruces

**11:15 AM** 1667 **WS**  
Effects of administering Ralgro to Holstein calves during the hutch period on growth performance.  
K. L. McCarthy¹, E. J. Scholljegerdes¹, J. A. Gould¹, and W. T. Nichols¹, ¹New Mexico State University, Las Cruces, ²Reynolds Creek Calf Ranch, Melba, ID, ³Merck Animal Health, DeSoto, KS

**11:30 AM** 1668 **WS**  
Effects of protein concentration and degradability on performance and carcass characteristics of finishing heifers receiving 0 or 400 mg ractopamine hydrochloride.  
K. L. Samuelson¹, M. Hubbert², E. R. Oosthuysen¹, Z. Bester¹, and C. A. Loest¹, ¹New Mexico State University, Las Cruces, ²Clayton Livestock Research Center, New Mexico State University, Clayton

**11:45 AM** 1669 **WS**  
Evaluation of *Eragrostis tef* (Zucc.) as a forage option for grazing beef cattle in the Southern High Plains.  
D. Sugg, Texas Tech University, Lubbock; Angelo State University, San Angelo, TX

**12:00 PM** 1670 **WS**  
Salivary cortisol concentrations affect rumen microbial fermentation and nutrient digestibility in vitro.  
K. L. Samuelson¹, A. L. Salazar¹, L. L. Rath¹, J. B. Alford¹, E. R. Oosthuysen¹, S. L. Ivey¹, D. M. Hallford¹, and C. A. Loest¹, ¹New Mexico State University, Las Cruces, ²Animal and Range Science Department, New Mexico State University, Las Cruces

**12:15 PM** 1671 **WS**  
Shifting the paradigm of liver abscess dogma in USA feedlots.  
Z. Bester¹, M. Hubbert², R. E. Carey³, K. L. Samuelson¹, and C. A. Loest¹, ¹New Mexico State University, Las Cruces, ²Clayton Livestock Research Center, New Mexico State University, Clayton

**Swine Species**

**Chair:** Samer W. El-Kadi, Virginia Polytechnic Institute and State University  
**10:30 AM - 12:30 PM**  
**Grand Ballroom F**

**10:30 AM** 1730 **WS**  
Probiotic treatment using *Bacillus subtilis* PB6 improves the growth performance, intestinal morphology, enzyme activities and barrier function in low birth weight piglets.  
L. Hu, L. Che*, X. Peng, Q. Xu, Z. Fang, S. Xu, Y. Lin, and D. Wu, Institute of Animal Nutrition, Sichuan Agricultural University, Chengdu, China

**10:45 AM** 1731 **WS**  
Dietary nucleotides supplementation improves the intestinal development and immune function of low birth weight piglets.  
L. Hu, L. Che*, X. Peng, Q. Xu, Z. Fang, S. Xu, Y. Lin, and D. Wu, Institute of Animal Nutrition, Sichuan Agricultural University, Chengdu, China
11:00 AM  1732  Effect of supplemented mineral phosphorus and fermentable substrates on gut microbiota composition and metabolites, phytate hydrolysis, and health status of growing pigs.

11:15 AM  1733  Sexual development and boar taint in male pigs selected for divergent residual feed intake.
A. Prunier*1, S. Parois1, N. Le Floc'h1, and H. Gilberri1, 1PEGASE, Agrocampus Ouest, INRA, Saint-Gilles, France, 2GenPhysyse, Université de Toulouse, INRA, INPT, INPT-ENV, F-31326 Castanet-Tolosan, France

Q. Xu, L. Che*, C. Wu, X. Peng, C. Yan, L. Hu, L. Qin, R. Wang, Y. Lin, Z. Fang, and D. Wu, Institute of Animal Nutrition, Sichuan Agricultural University, Chengdu, China

11:45 AM  1735  Assessment of the age of lesions on the pig carcass at the abattoir through spectrophotometric color assessment and gene expression analysis.
M. Vitali1, S. Conte2, M. Lessard3, G. Martelli4, F. Guay, and L. Faucciatano5, 1University of Bologna, Bologna, Italy, 2Agriculture and Agri-Food Canada, Lennoxville, QC, Canada, 3Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada, 4Université Laval, Quebec City, QC, Canada, 5Agriculture and Agri-Food Canada, Sherbrooke, QC, Canada

12:00 PM  1736  Blood plasma replacement by hydrolyzed yeast in weaned piglets diets.
J. A. Rivera1, L. F. Araújo2, R. L. D. C. Barbalho1, M. A. Bonato1, L. A. Vitaglione4, G. D. Santos1, and M. L. Cuadros5, 1Faculdade de Medicina Veterinária e Zootecnia – VNP/FMVZ/USP, Pirassununga, Brazil, 2University of Sao Paulo, Pirassununga, Brazil, 3ICC Brazil, Sao Paulo, Brazil, 4Universidade de Sao Paulo, Pirassununga, Brazil, 5Veterinary Medical, Universidad Peruana Cayetano Heredia, Lima, Peru

12:15 PM  1737  Effects of dietary energy on muscle growth of low birth weight neonatal pigs.
Y. Chen*, S. R. McCauley, K. R. Oliver, R. P. Rhoads, and S. W. El-Kadi, Virginia Polytechnic Institute and State University, Blacksburg

Animal Behavior and Well-Being
Chair: Elsa Vasseur, McGill University
2:00 PM - 5:00 PM
150 B/C

2:00 PM  61  Utility of an online learning module for teaching disbudding in dairy calves, including cornual nerve block application.
C. B. Winder*, S. J. LeBlanc1, D. B. Haley2, K. D. Lissimore1, M. A. Godkin1, and T. F. Duffield1, 1University of Guelph, ON, Canada, 2Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada, 3Ontario Ministry of Agriculture, Food and Rural Affairs, Guelph, ON, Canada

2:15 PM  62  Grazing behavior and production characteristics among cows differing in residual feed intake while grazing late season Idaho rangeland.
J. E. Sprinkle1, 2, J. B. Taylor1, P. E. Clark1, M. C. Roberts-Lew1, and J. B. Hall1, 1University of Idaho Nancy M. Cummings Research, Extension Education Center, Carmen, ID, 2Department of Animal & Veterinary Sciences, University of Idaho, Moscow, USDA-ARS, US Sheep Experiment Station, Dubois, ID, 4USDA-ARS, Northwest Watershed Management Research Unit, Boise, ID

2:30 PM  63  Variability in feeding behavior between individual dairy cows fed under different levels of competition.
R. E. Crossley*, A. Harlander, and T. J. DeVries, Department of Animal Biosciences, University of Guelph, ON, Canada

2:45 PM  64  Identification of lameness using lying time, rumination time, neck activity, reticulorumen temperature, and milk yield.
B. A. Wadsworth*, A. Stone, J. D. Clark, and J. M. Bewley, University of Kentucky, Lexington

3:00 PM  65  Management and dimensions of footbaths on California dairies.
M. Pineda* and N. Silva-del-Rio, Veterinary Medicine and Research Center, University of California, Tulare, CA

3:15 PM  66  History of management procedures and hierarchy in dairy cows.
A. Butterworth* and L. van Dijk1, 1University of Bristol, United Kingdom, 2HAS Institute, Amsterdam, Amsterdam, Netherlands
3:30 PM  Break

3:45 PM  67  Behavioral analysis and performance response of feedlot steers on concrete slats versus rubber slats.
D. Wagner*, Colorado State University, Fort Collins

4:00 PM  68  Effect of corral modification for humane livestock handling on cattle behavior and cortisol release.
M. L. P. Lima1, J. A. Negrao2, C. C. P. Pac1,4, and T. Grandin1, Instituto de Zootecnia, Seriâoço, Brazil, 1Faculdade de Zootecnia e Engenharia de Alimentos, FZEA, USP, Pirassununga, Brazil, 1Universidade de Sao Paulo, Faculdade de Medicina de Ribeirao Preto - Departamento de Genetica (USP/FMRP), Ribeirao Preto-SP, Brazil, 1SAA/AFTA/Instituto de Zootecnia-Centro de Bovinos de Corte, Seriâoço-SP, Brazil, 1Colorado State University, Fort Collins

4:15 PM  69  A preliminary examination of swine caretakers’ perspectives for euthanasia technology and training.
M. McGee1, R. L. Parsons1, A. M. O’Connor1, A. K. Johnson2, R. Anthony1, A. Ramirez1, and S. T. Millman1,2,1Department of Veterinary Diagnostic & Production Animal Medicine, Iowa State University, Ames, 2Iowa State University, Ames, 1Department of Philosophy, University of Alaska Anchorage, Anchorage, 2Department of Biomedical Sciences, Iowa State University, Ames

4:30 PM  70  Slow doesn’t win the race: Reduced energy diets did not improve sow articular cartilage.
N. M. Chapel1, R. L. Dennis2, J. N. Marchant-Forde3, B. T. Richert4, and D. C. Lay Jr., Purdue University, West Lafayette, IN, 2University of Maryland, College Park, 3USDA-ARS Livestock Behavior Research Unit, West Lafayette, IN

Animal Health:
Dairy Calves and General Health

Chair: Charles C. Elrod, Natural Biologics, Inc.
Sponsor: H. J. Baker

2:00 PM - 5:00 PM
155 D

2:00 PM  Introductory Remarks

2:05 PM  110  Health status of dairy feeder calves arriving to a veal facility.
D. L. Renaud*, T. F. Duffield, D. F. Kelton, S. J. LeBlanc, and D. B. Haley, Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada

2:20 PM  111  Acute immunological responses to a combined viral-bacterial respiratory disease challenge in feedlot heifers supplemented with yeast.
A. B. Word1, P. R. Broadway2, N. C. Burdick Sanchez3, Y. L. Liang1, K. P. Sharon1, S. L. Roberts4, J. T. Richeson2, P. J. Defoor5, M. D. Cravey2, J. R. Corley1, M. A. Ballou1, and J. A. Carroll1, 1Texas Tech University, Lubbock, 2USDA-ARS, Livestock Issues Research Unit, Lubbock, TX, 3Texas Tech University, Department of Animal and Food Sciences, Lubbock, 4Department of Agricultural Sciences, West Texas A&M University, Canyon, 5Cactus Feeders, Canyon, TX, 6Phileo Lesaffre Animal Care, Milwaukee, WI, 7Phileo Lesaffre Animal Care, Cedar Rapids, IA

2:35 PM  112  Safmannan and ActiSaf supplementation in milk replacer modulates health and performance in high-risk, pre-weaned Holstein calves.
T. L. Harris1, Y. Liang1, R. E. Hudson1, K. P. Sharon1, J. A. Carroll2, and M. A. Ballou1, 1Texas Tech University, Lubbock, 2USDA-ARS, Livestock Issues Research Unit, Lubbock, TX

2:50 PM  113  Evaluation of horn bud wound healing following cautery disbudding of pre-weaned dairy calves treated with aluminum-based aerosol bandage.
K. L. Huebner*, A. K. Kunkel, C. M. McConnel, R. J. Callan, R. P. Dinsmore, and L. S. Caixeta, Colorado State University, Fort Collins

3:05 PM  Break

3:15 PM  114  Automated milking systems: Using productivity and behavioral data to detect illness in dairy cows.
M. T. King1,2, E. A. Pajaro3, S. J. LeBlanc1, and T. J. DeVries1, 1Department of Animal Biosciences, University of Guelph, ON, Canada, 2University of Calgary, Calgary, AB, Canada, 3Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada

3:30 PM  115  Occurrence of mycotoxins in the 2015 US corn crop.
P. N. Gott*, B. G. Miller, R. Beltran, and G. R. Marugesan, Biomin America Inc., San Antonio, TX
3:45 PM 116 Associations of hygiene and lying behavior with the risk of elevated somatic cell count and lameness. I. Robles, D. F. Kelton, H. Barkema, G. P. Keefe, J. P. Roy, M. A. von Keyserlingk, and T. J. DeVries. 1Department of Animal Biosciences, University of Guelph, ON, Canada, 2Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada, 3University of Calgary, Calgary, AL, Canada, 4Atlantic Veterinary College, University of Prince Edward Island, Charlottetown, PE, Canada, 5Faculté de médecine vétérinaire, University of Montreal, St. Hyacinthe, QC, Canada, 6Animal Welfare Program - University of British Columbia, Vancouver, BC, Canada.

4:00 PM 117 Using milk fat-to-protein ratio to evaluate dairy cows energy balance status. T. Schcolnik, Afimilk, Afikim, Israel.

4:30 PM 119 Risk factors for subclinical ketosis in grazing dairy herds in Brazil. R. R. Daros, M. J. Hötzel, S. J. LeBlanc, J. A. Bran, A. J. Thompson, and M. A. von Keyserlingk. 1Animal Welfare Program - University of British Columbia, Vancouver, BC, Canada, 2Universidade Federal de Santa Catarina, Florianopolis, Brazil, 3Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada.

4:45 PM 120 Mortality risk factors for calves entering a multi-location white veal farm in Ontario. C. B. Winder, D. F. Kelton, and T. F. Duffield. 1University of Guelph, ON, Canada, 2Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada.

Breeding and Genetics Symposium:
Resilience of Livestock to Changing Environments

Chair: John B. Cole, Animal Genomics and Improvement Laboratory, USDA-ARS

Sponsor: Neogen

2:00 PM - 5:00 PM
Grand Ballroom I

2:00 PM 401 Production, biological, and genetic responses to heat stress in ruminants and pigs. L. H. Baumgard, J. T. Seibert, S. K. Kvidera, A. F. Keating, J. W. Ross, and R. P. Rhoads. 1Iowa State University, Ames, 2Virginia Polytechnic Institute and State University, Blacksburg.

3:00 PM 403 Climate change and selective breeding in aquaculture. P. Sae-Lim, Nofima, Ås, Norway.

4:00 PM 405 Genetic solutions to infertility caused by heat stress. P. J. Hansen, S. Dikmen, J. B. Cole, M. S. Ortega, and G. E. Dahl. 1Department of Animal Sciences, University of Florida, Gainesville, 2Uludag University, Faculty of Veterinary Medicine, Department of Animal Science, Bursa, Turkey, 3Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD.

4:30 PM 406 Resilience and lessons from studies in genetics of heat stress. I. Misztal, University of Georgia, Athens.
Companion Animal Symposium: 
Fundamentals of Protein Nutrition

Chair: Greg Aldrich, Kansas State University
Sponsor: George Fahey Appreciation Club
2:00 PM - 5:00 PM
150 E/F

2:00 PM  Introductory Remarks
2:10 PM 434  Global protein supply: Present and future considerations and availability.
D. L. Schaefer*, Cargill, Wichita, KS
2:40 PM 435  Alternative protein supplies for petfood.
G. Bosch*, Wageningen University, Netherlands
3:10 PM  Break
3:25 PM 436  Amino acid requirements and protein digestibility and assessment in dogs with considerations for cats.
A. K. Shoveller*, University of Guelph, ON, Canada
3:55 PM 437  Idiosyncrasies of amino acid metabolism in dogs and cats.
D. L. Harmon*, University of Kentucky, Lexington
4:25 PM  Panel Discussion

CSAS Symposium:
Reducing the Use of Antibiotics in Livestock Production

Chairs: Filippo Miglior, Centre for Genetic Improvement of Livestock, University of Guelph; Eveline M Ibeagha-Awemu, Agriculture and Agri-Food Canada, Dairy and Swine Research and Development Centre
Sponsor: CSAS
2:00 PM - 5:00 PM
155 A

2:00 PM 492  Alternatives to antibiotics in swine and poultry.
D. Schokker1,2 and M. A. Smits1,3, 1Wageningen UR Livestock Research, Netherlands, 2Animal Breeding and Genomics Centre, Wageningen, Netherlands, 3Wageningen UR, Central Veterinary Institute, Lelystad, Netherlands
2:30 PM 493  Management of dairy cows to improve resistance to infectious diseases.
P. Lacasse1, N. Vanacker2, S. Lancôt3, and S. Ollier2, 1Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada, 2Sherbrooke R&D Centre, Sherbrooke, QC, Canada, 3Université de Sherbrooke, Sherbrooke, QC, Canada
3:00 PM 494  Selection for disease resistance in swine.
G. Plastow1, Livestock Gentec, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada
3:30 PM 495  Genomic approaches to characterizing and reducing antimicrobial resistance in beef cattle production systems.
M. A. Javed, C. Klina, A. A. Cameron, T. W. Alexander, R. Zaheer, K. Munns, and T. A. McAllister*, Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada
4:00 PM 496  Nurturing healthy gut microbiome: Route to increased disease resistance in ruminants.
L. L. Guan* and N. Malmuthuge, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada
4:30 PM 497  Pre- and probiotics for increased disease resistance in the nonruminant animal.
C. M. Nyachoti*, University of Manitoba, Winnipeg, MB, Canada
Dairy Foods Division:
Advances in Dairy Microbiology
Chair: Milena Corredig, University of Guelph
2:00 PM - 5:00 PM
151 B/C

2:00 PM 498 Investigating the antimicrobial activity of pasteurized and raw camel milk against foodborne pathogens: *Listeria monocytogenes* and *E. coli* O157:H7
M. Ayyash*, UAE University, Al-Ain, United Arab Emirates

2:15 PM 499 Application of fluorescent probes to determine localized salt concentrations within cheese matrices and their influence on metabolic activity of entrapped bacterial cells.
C. D. Hickey¹, V. Fallico¹, Z. Burdikova¹, M. G. Wilkinson², and J. J. Sheehan*¹, ¹Teagasc Food Research Centre Moorepark, CO Cork, Ireland, ²University of Limerick, Ireland

2:30 PM 500 Inducing HT-29 colon cells apoptosis by the extracellular polymeric substances isolate from L.casei strains.
W. Di², L. Zhang, and X. Han, Harbin Institute of Technology, Harbin, China

2:45 PM 501 Comparative genomics of *Lactobacillus brevis* uncovers its common capability for efficiently synthesizing neuroactive γ-aminobutyric acid.
Q. Wu¹, H. M. Tun², Y. S. Law¹, E. Khafipour², and N. P. Shah¹, ¹School of Biological Sciences, The University of Hong Kong, Pokfulam, ²Department of Animal Science, University of Manitoba, Winnipeg, MB, Canada

3:00 PM 502 Effect of incubation temperature on yield and molar mass of EPS during fermentation of milk by *Streptococcus thermophilus* DGCC 7785 and the impact on the rheological properties of acid milk gels.
S. N. Khanal¹ and J. A. Lucey², ¹University of Wisconsin-Madison, ²Wisconsin Center for Dairy Research, Madison, WI

S. Kim*, Korea University, Seoul, The Republic of Korea

3:30 PM 504 An ancient, species-specific tagatose-6-phosphate pathway in *Lactobacillus casei* group for galactose reduction in cultured dairy foods.
N. P. Shah* and Q. Wu, School of Biological Sciences, The University of Hong Kong, Pokfulam

Extension Education Symposium:
Growing Extension’s Impacts with Changing Budgets and Personnel
Chair: Julie A. Walker, South Dakota State University
2:00 PM - 4:30 PM
155 C

2:00 PM 591 Work-life balance for extension professionals: Maybe it should be redefined as ‘work-life effectiveness’.
G. P. Lardy*, North Dakota State University, Fargo

2:30 PM 592 Enhancing your Extension program through a strong research program, and vice versa.
W. Powers*, Michigan State University, East Lansing

3:00 PM 593 Culturing and leveraging allied industry support for academic programs.
M. W. Overton*, Elanco Animal Health, Greenfield, IN

3:30 PM 594 Developing regional and multi-state extension collaborations.
A. J. Young*, Utah State University, Logan

4:00 PM 595 Extension faculty navigating the tenure and promotion process.
N. E. Cockett*, Utah State University, Logan
Meat Science and Muscle Biology
Chair: Jerrad F. Legako, Utah State University
2:00 PM - 5:00 PM
155 F

2:00 PM 878
Chemical composition and expression of genes involved in lipid metabolism in the muscle of Nellore and Angus young bulls fed whole shelled corn diet.
M. M. Ladeira1, P. D. Teixeira1, M. P. Gionbelli1, M. L. Chizzotti2, J. R. R. Carvalho1, D. M. Oliveira1, and T. C. Coelho1, 1Universidade Federal de Lavras, Brazil, 2Universidade Federal de Viçosa, Brazil

2:15 PM 879
Effects of arachidonic acid and prostaglandins on proliferation, differentiation, and fusion of bovine myoblasts.
X. Leng* and H. Jiang, Department of Animal and Poultry Sciences, Virginia Polytechnic Institute and State University, Blacksburg

2:30 PM 880
Influence of zinc amino acid complex and ractopamine hydrochloride supplementation on the sarcoplasmic protein profile of finishing steers.
O. N. Genther-Schroeder1, E. Huff-Lonergan1, M. E. Branine2, and S. L. Hansen1, 1Iowa State University, Ames, 2Zinpro Corporation, Eden Prairie, MN

2:45 PM 881
Survey of attitudes for millennials who do not consume lamb.
K. R. Wall* and C. R. Kerth2, 1Texas A&M University, College Station, 2Texas A&M University Animal Science Department, College Station

3:00 PM 882
Survey of attitudes for millennial lamb consumers.
K. R. Wall* and C. R. Kerth2, 1Texas A&M University, College Station, 2Texas A&M University Animal Science Department, College Station

3:15 PM 883
A histologic and ultrastructural study of wooden breast disease in modern broiler chickens.
M. P. Babak, E. M. Brannick, C. J. Schmidt, and B. Abasht*, Department of Animal and Food Sciences, University of Delaware, Newark

3:30 PM 884
High-energy forage and feedlot finishing impact on beef consumer acceptability and sensory characteristics in the upper Midwest.
R. M. Martin1, J. E. Rowntree1, J. P. Schweilhofer2, J. B. Harte1, and A. M. Merwin1, 1Michigan State University, East Lansing, 2Michigan State University Extension, Bad Axe

3:45 PM 885
Effect of growth-promoting technologies on the proteome of bovine Longissimus lumborum.
C. A. Hayes1,2, W. L. Keller1, J. K. Grubbs3, S. M. Lonergan4, S. M. Ebarb4, K. J. Phelps4, J. S. Drouillard4, J. M. Gonzalez4, and K. R. Maddock-Carlin1, 1North Dakota State University, Fargo, 2Purina Animal Nutrition LLC, Gray Summit, MO, 3Iowa State University, Ames, 4Kansas State University, Manhattan

4:00 PM 886
Effects of post-weaning exposure to a high-concentrate diet vs. pasture on live performance, carcass characteristics, and meat quality of early harvested steers.
B. M. Koch1, L. E. Bowen1, J. T. Milopoulos2, G. Volpi Lagreca2, and S. K. Duckett1, 1Clemson University, SC, 2INTA, Anguil, Argentina

4:15 PM 887
Effects of post-weaning exposure to a high-concentrate diet vs. pasture on carcass ultrasound, plasma insulin and glucose, and gene expression of lipogenic enzymes of early harvested steers.
B. M. Koch1, L. E. Bowen, N. M. Long, and S. K. Duckett, Clemson University, SC

4:30 PM 888
Effects of dietary coated cysteamine hydrochloride on meat quality in finishing pigs.
H. Liu1, M. Bai2, K. Xu1, B. Zou1, R. Yu1, Q. Xi1, and Y. Yin1, 1Institute of Subtropical Agriculture, Chinese Academy of Sciences, Changsha, China, 2College of Animal Science, South China Agricultural University, Guangzhou, China, 1King Techina Group, Hangzhou, China

4:45 PM 889
Meat quality of lambs fed diets containing different levels of residual frying oil.
M. Capelari1, E. L. T. Peixoto2, E. S. Moura2, E. L. A. Ribeiro1, and I. Y. Mizubuti2, 1Michigan State University, East Lansing, 2Universidade Federal do Sul e Sudeste do Pará, Maraba, Brazil, 3Universidade Estadual de Londrina, Londrina, Brazil
MILK Symposium:  
Marketing Milk for Entrepreneurial and Big Business Value  
Chair: Lisbeth Goddik, Oregon State University  
Sponsor: ADSA Foundation  
2:00 PM - 5:30 PM  
Grand Ballroom B/D

2:00 PM 916  
Get in the driver’s seat: Marketing milk and dairy products to today’s and tomorrow’s consumers.  
D. M. Berry*, Dairy & Food Communications Inc., Chicago, IL

2:45 PM 917  
Practices and programs to ensure the safety of artisan cheese.  
D. J. D’Amico*, University of Connecticut, Storrs

3:30 PM 918  
Camel milk from commodity to added value product. The science behind the development of the camel dairy industry.  
P. Nagy*, Emirates Industries for Camel Milk and Products, Dubai, United Arab Emirates

4:15 PM 919  
Terroir: Science based or marketing gimmick.  
L. Goddik*, Oregon State University, Corvallis

5:00 PM  
Reception

Nonruminant Nutrition: General  
Chair: Z. J. Rambo, Zinpro Corporation  
Sponsor: JBS United, DuPont  
2:00 PM - 3:30 PM  
Grand Ballroom F

2:00 PM 980  
Withdrawn.

2:15 PM 981  
Effect of increasing Buttiauxella phytase dose to 2,000 FTU/kg on phytate degradation and ileal AA digestibility in weaned pigs.  
Y. Dersjant-Li1 and G. Dusel*2, 1Danisco Animal Nutrition, DuPont Industrial Biosciences, Marlborough, United Kingdom, 2University of Applied Sciences Bingen, FB1- Life Sciences, Bingen am Rhein, Germany

2:30 PM 982  
Influence of dietary crude protein and phosphorus levels on the utilization of crude protein and phosphorus in growing pigs.  
P. Xue1 and O. Adeola2, 1Purdue University, West Lafayette, IN, 2Department of Animal Sciences, Purdue University, West Lafayette, IN

2:45 PM 983  
Effects of Dakota gold and high fat commodity DDGS in a complete diet on pellet quality.  
A. D. Yoder*, Kansas State University, Manhattan

3:00 PM 984  
Oregano essential oil supplementation in gestation and lactation shortened birthing interval in primparous and multiparous sows.  
M. Renken, R. C. Thaler, and C. L. Levesque*, South Dakota State University, Brookings

3:15 PM 985  
Effects of casein on digestibility of amino acids in distillers dried grains with solubles fed to pigs.  
C. S. Park2, C. Fang1, D. Ragland2, and O. Adeola1, 1Department of Animal Sciences, Purdue University, West Lafayette, IN, 2Department of Veterinary Clinical Sciences, Purdue University, West Lafayette, IN
**Physiology and Endocrinology: Reproduction and Estrous Cycle Control**

Chair: Vitor R. G. Mercadante, Virginia Polytechnic Institute and State University

2:00 PM - 5:00 PM

151 G

### 2:00 PM

#### 1109 WS

**Effect of delayed insemination of non-estrous beef heifers following a 7-d-CO-Synch plus controlled internal drug release (CIDR) insert timed artificial insemination protocol.**

D. C. Shaw*, K. E. Fike, and D. M. Grieger, Kansas State University, Manhattan

### 2:15 PM

#### 1110

**GnRH increased pregnancy risk in suckled beef cows that did not display estrus when subjected to a split-time artificial insemination program.**

### 2:30 PM

#### 1111

**Comparison of long- versus short-term CIDR-based protocols to synchronize estrus prior to fixed-time AI in primiparous two-year-old beef cows.**

J. M. Abel*, B. E. Bishop, J. M. Thomas, M. R. Ellersieck, S. E. Poock, M. F. Smith, and D. J. Patterson, University of Missouri, Columbia

### 2:45 PM

#### 1112

**Comparing split-time AI pregnancy rates among non-estrous heifers based on administration of GnRH at AI.**

B. E. Bishop*, J. M. Thomas, J. M. Abel, M. F. Smith, M. R. Ellersieck, S. E. Poock, and D. J. Patterson, University of Missouri, Columbia

### 3:00 PM

#### 1113

**Comparing fixed-time artificial insemination to split-time artificial insemination with delayed administration of GnRH in postpartum beef cows.**

B. E. Bishop*, J. M. Abel, J. M. Thomas, M. F. Smith, S. E. Poock, M. R. Ellersieck, and D. J. Patterson, University of Missouri, Columbia

### 3:15 PM

#### 1114

**Split-time artificial insemination following synchronization of estrus with the 14-d CIDR-PG protocol in primiparous two-year-old beef cows.**

J. M. Abel*, B. E. Bishop, J. M. Thomas, M. R. Ellersieck, S. E. Poock, M. F. Smith, and D. J. Patterson, University of Missouri, Columbia

### 3:30 PM

**Break**

### 3:45 PM

#### 1115

**The 9-d CIDR-PG protocol: Incorporation of prostaglandin pretreatment into a long-term, CIDR-based estrus synchronization protocol improves timed AI pregnancy rates in postpartum suckled beef cows.**

J. M. Thomas*, B. E. Bishop, J. M. Abel, J. W. Locke, S. E. Poock, M. F. Smith, and D. J. Patterson, University of Missouri, Columbia

### 4:00 PM

#### 1116

**Requirement of GnRH administration at the onset of the 5 day CO-Synch + CIDR protocol in suckled beef cows.**

T. M. Grussing*, M. L. Day, B. J. Funnell, B. R. Harstine, E. J. Northrop, G. A. Perry, J. J. J. Rich, D. W. Shike, K. R. Stewart, and P. J. Gunn, Department of Animal Science, Iowa State University, Ames, Department of Animal Science, University of Wyoming, Laramie, Department of Veterinary and Clinical Sciences, Purdue University, West Lafayette, IN, The Ohio State University, Columbus, Department of Animal Science, South Dakota State University, Brookings, University of Illinois at Urbana-Champaign, Purdue University, West Lafayette, IN

### 4:15 PM

#### 1117

**Comparison of follicular dynamics and subsequent progesterone profiles in Brahman cows with either two or three ovarian follicular waves.**

R. A. d’Orey Branco, D. A. Neuenendorff, A. W. Lewis, R. C. Vann, T. H. Welsh, Jr., and R. D. Randle, Texas A&M AgriLife Research, Overton, Department of Animal Science, Texas A&M University, College Station, Texas A&M AgriLife Research, Texas A&M University System, Overton, MAFES - Brown Loam Experiment Station, Mississippi State University, Raymond, Texas A&M AgriLife Research and Department of Animal Science, College Station

### 4:30 PM

#### 1118

**Effect of a progesterone-based estrous synchronization program for timed AI (TAI) on reproductive performance in a seasonal pasture-based dairy production system.**

F. Randi, J. M. Sanchez, M. M. Herthly, D. A. Kenny, A. Valenza, S. Butler, and P. Lonergan, School of Agriculture and Food Science, University College Dublin, Ireland, Teagasc Grange, Meath, Ireland, Animal & Grassland Research and Innovation Centre, Teagasc Moorepark, Fermoy, Co. Cork, Ireland, Teagasc Grange, Dunsany Co. Meath, Ireland, Ceva Animal Health, Libourne, France
Production, Management and the Environment: Health and Welfare

Chair: Don Ely, University of Kentucky

2:00 PM - 5:00 PM

151 E/F

2:00 PM 1227 Factors associated with average daily gain in dairy heifer calves on US dairy operations.
C. B. Shivley1,2, N. J. Urie1,2, and J. E. Lombard3, 1Colorado State University, Fort Collins, 2USDA:APHIS:VS:Center for Epidemiology and Animal Health, National Animal Health Monitoring System, Fort Collins, CO

2:15 PM 1228 Factors associated with morbidity in dairy heifer calves on US dairy operations.

2:30 PM 1229 Factors associated with Cryptosporidium and Giardia infection in preweaned dairy heifer calves.
N. Urie1,2, C. B. Shivley1,2, and J. E. Lombard, 1Colorado State University, Fort Collins, 2USDA:APHIS:VS:Center for Epidemiology and Animal Health, National Animal Health Monitoring System, Fort Collins, CO

2:45 PM 1230 Factors associated with colostrum quality and passive transfer status of dairy heifer calves on US dairy operations.
J. E. Lombard1, C. B. Shivley1,2, and N. Urie1,2, 1USDA:APHIS:VS:Center for Epidemiology and Animal Health, National Animal Health Monitoring System, Fort Collins, CO, 2Colorado State University, Fort Collins

3:00 PM 1231 Risk factors for calf mortality on farms using automated feeders in the Midwest USA.
M. Jorgensen and M. I. Endres, University of Minnesota, St. Paul

3:15 PM 1232 Impact of milk-feeding programs on fecal bacteria population and antimicrobial resistance genes in Escherichia coli isolated from feces in preweaned calves.
G. Maynou1, L. Migura-Garcia2, J. Sabirats2, H. Chester-Jones1, D. Ziegler1, A. Bach1, and M. Terré1, 1IRTA, Caldes de Montbui, Spain, 2CRESA, Cerdanyola del Vallès, Spain, 3ICRA, Girona, Spain, 4University of Minnesota Southern Research and Outreach Center, Waseca, 5ICREA, Barcelona, Spain

3:30 PM 1233 A survey of management practices and producers’ perceptions regarding manual and automated milk feeding systems for dairy calves.
C. Medrano-Galarza1,2, J. Rushen1, A. M. de Passillé2, A. Jones-Bitton1, T. J. DeVries3,4, S. J. LeBlanc5, and D. B. Haley1, 1Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada, 2Campbell Centre for the Study of Animal Welfare, University of Guelph, ON, Canada, 3Faculty of Land & Food Systems, University of British Columbia, Agassiz, BC, Canada, 4Department of Animal Biosciences, University of Guelph, ON, Canada, 5University of Guelph, ON, Canada

3:45 PM 1234 Investigating the within-herd prevalence and risk factors of hyperketonemia of dairy cattle in Ontario as diagnosed by the test-day concentration of milk ß-hydroxybutyrate.
E. H. Tatone1, T. F. Duffield1, S. J. LeBlanc1, T. J. DeVries2, and J. L. Gordon1, 1Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada, 2Department of Animal Biosciences, University of Guelph, ON, Canada

4:00 PM 1235 Relationships between early life milk replacer and starter intake and first lactation performance of Holstein dairy cows.
H. Chester-Jones1, B. J. Heins2, D. Ziegler1, D. Schimek3, S. E. Schuling1, B. Ziegler1, M. R. De Ondarza4, C. J. Sniffen5, and N. Broadwater6, 1University of Minnesota Southern Research and Outreach Center, Waseca, 2University of Minnesota West Central Research and Outreach Center, Morris, 3Hubbard Feeds Inc., Mankato, MN, 4Paradox Nutrition, West Chazy, NY, 5Fencrest, LLC, Holderness, NH, 6University of Minnesota Extension, Rochester

4:15 PM 1236 Feeding management strategies on large and smaller freestall dairy herds in Minnesota.
L. Klocek1 and M. I. Endres, University of Minnesota, St. Paul

4:30 PM 1237 Evaluation of the CowVac for controlling flies on Minnesota organic dairy farms.
M. A. Kienitz1 and B. J. Heins2, 1University of Minnesota, Lakeville, 2University of Minnesota West Central Research and Outreach Center, Morris
Ruminant Nutrition: Intake, Digestibility and Efficiency  
Chair: Kristen Johnson, Washington State University  
2:00 PM - 5:00 PM  
155 E

2:00 PM 1488  
Toxicity of antibiotics on rumen protozoan Entodinium caudatum and its associated microbes.  
T. Park*, The Ohio State University, Columbus

2:15 PM 1489  
Effect of diets containing different levels of crude glycerol on nutrient intake in lambs.  

2:30 PM 1490  
Effects of corn particle size and ratio NDF:starch on in-vitro NDF degradability.  
S. Malan and E. Raffrenato*, Department of Animal Sciences, Stellenbosch University, Stellenbosch, South Africa

2:45 PM 1491  
Associations between RFI, and metabolite profiles and feeding behavior traits in feedlot cattle.  
M. D. Miller, G. E. Carstens, J. M. Thomson, J. G. Berardinelli, M. R. Herrygers, J. White, L. O. Tedeschi, and P. K. Riggs, Department of Animal Sciences, Texas A&M University, College Station, Montana State University, Bozeman

3:00 PM 1492  
Effects of acidity and silage type on lysine retention among two lipid-coated ruminally protected lysine products.  
J. N. Reiners* and D. W. Brake, South Dakota State University, Brookings

3:15 PM 1493  
Relationship of days in milk to nutrient digestibility in lactating multiparous cows.  
A. M. Barnard, H. Jensen, and T. F. Gressley, University of Delaware, Newark, 2BioZyme, Wathena, KS

3:30 PM 1494  
Effects of animal and diet characteristics on digestibilities of dry matter, fiber and starch in lactating cows.  
R. A. De Souza, R. J. Tempelman, M. S. Allen, J. K. Bernard, B. Weiss, and M. J. VandeHaar, Michigan State University, East Lansing, University of Georgia, Tifton, The Ohio State University, Wooster

3:45 PM 1495  
Effects of silage type and inclusion level on ruminal characteristics and feeding behavior of feedlot steers.  
P. R. B. Campanili, J. O. Sarturi, S. J. Trojan, M. A. Ballou, L. A. Pellarin, J. D. Sugg, L. A. Ovinge, A. Alrumaih, and A. A. Hoffman, Texas Tech University, Lubbock, Angelo State University, San Angelo, TX

4:00 PM 1496  
Identification of biological pathways involved in residual feed intake in Hereford cattle through Gene Set Enrichment Analysis.  
J. L. Mutch, M. Neupane, C. M. Seabury, H. L. Neibergs, P. C. Tizioto, D. J. Garrick, M. S. Kerley, D. W. Shike, J. E. Beever, J. F. Taylor, U. S. Feed Efficiency Consortium, and K. A. Johnson, Department of Animal Sciences, Washington State University, Pullman, College of Veterinary Medicine, Texas A&M University, College Station, University of Missouri, Columbia, Department of Animal Science, Iowa State University, Ames, University of Illinois at Urbana-Champaign

4:15 PM 1497  
Updating equations to estimate dry matter intake of Nellore and beef crossbred cattle.  
L. F. Costa e Silva, S. C. Valadares Filho, P. P. Rotta, J. A. G. Azevedo, F. F. Silva, A. C. B. Menezes, and B. C. Silva, *Universidade Federal de Viçosa, Viçosa, Brazil, 1Universidade Federal de Viçosa, Viçosa, Brazil, Department of Animal Science, Viçosa, Minas Gerais, Brazil, 1Universidade Federal de Viçosa, Viçosa, Minas Gerais, Brazil, 1Universidade Estadual de Santa Cruz, Ilheus, Bahia, Brazil

4:30 PM 1498  
Rumen bacterial species associate with residual feed intake in beef cattle.  
A. A. Elolimy, M. Abdelmegeid, J. C. McCann, and J. J. Loo, University of Illinois at Urbana-Champaign, 2Kafrelsheikh University, Egypt

4:45 PM 1499  
The association between body condition score, residual feed intake, and hyperketonemia.  
**POSTER PRESENTATIONS**

*Sponsor: Chr. Hansen*

**Poster Session IX**

7:15 AM - 8:15 AM  
Exhibit Hall A/B

### Swine Species

1738 1

**Prediction of the concentration of androstenone in backfat from boar carcasses using indicators of sexual development.**

A. Prunier¹, S. Parois¹, A. Faouën¹ and C. Larzul², ¹PEGASE, Agrocampus Ouest, INRA, Saint-Gilles, France, ²Gen Physe, Université de Toulouse, INRA, INPT, INPT-ENV, Castanet-Tolosan, France

1739 2

**Effects of dietary ramie (Bochmeria nivea) powder at different levels on carcass traits, muscle fiber characteristics and muscular free amino acid profile of Chinese indigenous finishing pigs.**

Y. Tang¹, Institute of Subtropical Agriculture, Chinese Academy of Sciences, Changsha, China

1740 3

**Effects of different sources and routes of administration of copper and vitamins A and D on gut volatile fatty acids and gene expression involved in regulation of innate and acquired immunity in piglets.**

L. Lo Verso¹, J. J. Matte¹, G. Talbot¹, J. Lapointe¹, N. Bissonnette¹, F. Guay¹, N. Gagnon¹, B. Ouattara¹ and M. Lessard⁶, ¹Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada, ²Universite Laval, Quebec City, QC, Canada

1741 4

**Comparison of transport characteristics of ferrous sulfate and iron glycine gelate across IPEC-J2 cell monolayers.**

S. Fang¹, College of Animal Science, Zhejiang University, Hangzhou, China

1742 5

**Studying of population structure of European wild boar (sus scrofa) and its subspecies, inhabiting Russia.**

A. A. Traspov¹, O. V. Kostyunina¹, I. A. Domsky², A. V. Ekonomov², A. A. Sermyagin³ and N. A. Zinovieva¹, ¹L. K. Ernst Institute of Animal Husbandry, Moscow, Russian Federation, ²Institute of Hunting and Fur-farming named after professor B. M. Zhitkov, Kirov, Russian Federation

1743 6

**Supplementation with a blend of capsicum and artificial sweetener improves performance of growing and finishing pigs.**

C. Ionescu¹, C. Soulet, C. Bruneau and E. H. Wall, Pancosma, Geneva, Switzerland

1744 7

**Effects of different sources and routes of administration of copper and vitamins A and D on piglets gut microbiota.**

G. Talbot¹, M. Lessard¹, E. Yergeau², N. Gagnon¹, L. Lo Verso¹, J. Lapointe¹, N. Bissonnette¹, D. Bueno Dalto¹, B. Ouattara¹, F. Guay¹ and J. J. Matte¹, ¹Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada, ²Universite du Quebec, Centre INRS-Institute Armand-Prappier, Laval, QC, Canada, ³Universite Laval, Quebec City, QC, Canada

1745 8

**Diurnal heat stress reduces nursery-grower pig performance and intestinal integrity.**

N. K. Gabler¹, G. R. Murugesan¹, S. Schaumberger¹, U. Hofstetter¹ and G. Schatzmayer¹, ¹Department of Animal Science, Iowa State University, Ames, ²Biomin America Inc., San Antonio, TX, ³Biomin Holding GmbH, Getzersdorf, Austria, ⁴Biomin Research Center, Tulln, Austria

1746 9

**Effect of diet composition on piglet growth and digestibility responses to a high dietary canola content.**

G. A. Mejicanos¹, University of Manitoba, Winnipeg, MB, Canada

### Breeding and Genetics: Molecular Genetics

338 10

**Comparison of transcriptome profiles in longissimus dorsi muscle between bulls and steers of Korean cattle.**

M. Baik, S. J. Park and N. Sang Weon, Department of Agricultural Biotechnology, College of Agriculture and Life Sciences, Seoul National University, Seoul, The Republic of Korea

339 11

**Gene network regulated by microRNAs suggests modulation of fat deposition in cattle.**

G. B. Oliveira¹, A. S. M. Cesar¹, A. M. Felicio¹, M. D. Poleti¹, L. C. A. Regitano¹ and L. L. Coutinho¹, ¹Animal Biotechnology Laboratory - ESALQ, University of Sào Paulo, Piracicaba, Brazil, ⁴Embrapa Southeast Livestock, São Carlos, Brazil
miRNAs related to fatty acids composition in Nelore cattle.
P. S. N. Oliveira*1, A. S. M. Cesar2, G. B. Oliveira2, P. C. Tizioto1, M. D. Poleti1, W. J. S. Diniz1, A. O. D. Lima1, J. M. Reecy4, L. L. Coutinho2 and L. C. A. Regitano1, 1Embrapa Southeast Livestock, Sao Carlos, Brazil, 2Animal Biotechnology Laboratory - ESALQ, University of São Paulo, Piracicaba, Brazil, 3Federal University of Sao Carlos - UFSCar, Sao Carlos, Brazil, 4Iowa State University, Ames, 5Embrapa Southeast Livestock, Sao Carlos, Brazil

Expression levels of the bovine SCD gene are significantly associated with fatty acid composition of cattle.

Profiling microRNA expression in Longissimus dorsi muscle of F2 pigs from the Michigan State University Duroc x Pietrain Resource Population.
K. R. Perry*1, J. W. Keel1,2, D. Velez-Irizarry1, S. A. Funkhouser3, N. E. Raney1, R. O. Bates1 and C. W. Ernst1, 1Department of Animal Science, Michigan State University, East Lansing, 2Department of Fisheries and Wildlife, Michigan State University, East Lansing, 3Genetics Program, Michigan State University, East Lansing

Scan for allele frequency differences from pooled samples in lines of pigs selected for components of litter size.

Construction and functional analysis of expression vector and miRNA interference vectors of Gsdma of Tibetan sheep.
C. Li1, L. Ren1, Y. Wang1, J. Zhong2, L. Huang1, Y. Lin1, X. Zi1 and Y. Zheng1, 1Southwest University for Nationalities, Chengdu, China, 2Auburn University, AL

Genetic characteristics of semi-domesticated reindeer populations from different regions of Russia based on SNP analysis.
V. R. Khazinova1, A. V. Dotsev1, I. M. Okhlopkov2, K. A. Layshev2, V. I. Fedorov4, L. D. Shim1, G. Bremer1, K. Winners1, H. Reyer1 and N. A. Zinovieva1, 1LK Ernst Institute of Animal Husbandry, Moscow, Russian Federation, 2Science Institute of Biological Problems Cryolithozone, Yakutsk, Russian Federation, 3North-West Center of Interdisciplinary Research of Food Maintenance Problems, Federal Agency of Scientific Institutions, St. Petersburg, Russian Federation, 4Federal Government Budget Scientific Institutions Yakut Scientific Research Institute of the Agriculture Federal Agency Scientific Institutions, Yakutsk, Russian Federation, 5Tuva State University, Tyva Republic, Russian Federation, 6Institute of Animal Breeding and Genetics, VMU, Vienna, Austria, 7Genome Biology, Leibniz Institute for Farm Animal Biology (FBN), Dummerstorf, Germany

Candidate gene and markers for equine metabolic syndrome.
S. Lewis*, H. Holl, M. T. Long, M. Mallicote and S. Brooks, University of Florida, Gainesville

The polymorphisms of Toll-like receptor 4 gene influences milk production traits in Chinese Holstein cows.

A polymorphism within the PAPPA2 gene is associated with postpartum fertility traits in Holstein dairy cattle located in southern Sonora Mexico.
P. Luna-Nevarez1, J. C. Leyva-Corona1, M. A. Sanchez-Castro1, R. Zamorano-Algandar1, J. F. Medrano2, G. Rincon1, R. M. Enns2, S. E. Speidel1 and M. G. Thomas4, 1Instituto Tecnologico de Sonora, Ciudad Obregon Sonora, Mexico, 2University of California-Davis, 3Zoetis Inc., Kalamazoo, MI, 4Department of Animal Sciences, Colorado State University, Fort Collins

Using LD structure of several populations to optimize an SNP panel for conservation and selection.
C. Díaz1, L. Varona1, M. J. Carabaño1, E. Nicolazzi1, M. Bichard1, J. Baro1, A. Molina1, J. Piedraftia2, A. Rossoni1, H. Schwarzenbacher1, F. Seyfried10, T. R. Solberg11, D. Vicario12, J. Altarriba12 and K. J. Abraham13, 1INIA, Madrid, Spain, 2Universidad de Zaragoza, Spain, 3Fondazione Parco Tecnologico Padano, Lodi, Italy, 4English Guernsey Cattle Society, Launceston, United Kingdom, 5Universidad de Valladolid, Palencia, Spain, 6Universidad de Córdoba, Córdoba, Spain, 7Universitat Autònoma de Barcelona, Bellaterra (Barcelona), Spain, 8ANARB, Italian Brown Cattle Breeders’ Association, Bussolelnoo (VR), Italy, 9ZuchtData EDV-Dienstleistungen GmbH, Vienna, Austria, 10Qualitas AG, Zug, Switzerland, 11Geno Breeding and A.I. Association, Hamar, Norway, 12National Simmental Cattle Breeders Association, ANAPRI, Udine, Italy, 13Estacio –Uniseb, Ribeirão Preto, Brazil

Meiotic recombination differences in ruminant livestock species.
K. M. Davenport1 and B. M. Murdoch, University of Idaho, Moscow
**Dairy Foods Division: Dairy Microbiology**

542 24 Inactivation of Listeria innocua on cheddar cheese by supercritical fluid CO2.
S. Padilla Antunez1 and R. Jimenez-Flores2, 1California Polytechnic State University, San Luis Obispo, 2Dairy Products Technology Center, California Polytechnic State University, San Luis Obispo

543 25 Evaluation of the effect of cavitation on biofilm forming ability of sporeformers.
T. Almalki2 and S. Anand1, 1Midwest Dairy Foods Research Center, Dairy Science Department, South Dakota State University, Brookings, 2South Dakota State University, Brookings

544 26 The effect of Lactobacillus brevis and fibrolytic enzymes on fermentation of switchgrass silages.
L. Jingjing1, State Key Laboratory of Animal Nutrition, Engineering Technology Research Center of Raw Milk Quality and Safety Control, College of Animal Science and Technology, China Agricultural University, Beijing, China

545 27 Influence of flax seed on the bile tolerances of Lactobacillus acidophilus, Lactobacillus bulgaricus and Streptococcus thermophilus.
M. Theegala1, R. Chiguila Arevalo1, V. Viana1, D. Olson2 and K. J. Aryana2, 1Louisiana State University, Baton Rouge, 2Louisiana State University Agricultural Center, Baton Rouge

546 28 Characterization of Lactobacillus wasatchensis from aged cheeses showing late-gas defects.
C. J. Oberg1, M. D. Culumber1, T. Allen2, T. S. Oberg1, B. Villalba1 and D. J. McMahon3, 1Department of Microbiology, Weber State University, Ogden, UT, 2Utah State University, Logan, 3Department of Nutrition, Dietetics, and Food Sciences, Western Dairy Center, Utah State University, Logan

547 29 Determination of antagonism between NSLAB strains and Lactobacillus wasatchensis WDC04 using the agar-flip method.
C. J. Oberg1, M. Walker2, M. D. Culumber1 and D. J. McMahon1, 1Department of Microbiology, Weber State University, Ogden, UT, 2Weber State University, Ogden, UT, 3Western Dairy Center, Utah State University, Logan

548 30 Determination of treatments to reduce late gassy defect in cheese due to Lactobacillus wasatchensis WDC04 contamination.
C. J. Oberg1, J. Bowen2, M. D. Culumber1 and D. J. McMahon1, 1Department of Microbiology, Weber State University, Ogden, UT, 2Weber State University, Ogden, UT, 3Western Dairy Center, Utah State University, Logan

549 31 Regional milk sourcing impact on non-starter lactic acid bacteria (NSLAB) in raw milk and Cheddar cheese during aging.
L. Goddik1, C. Baird and J. Waite-Cusic, Oregon State University, Corvallis

550 32 Effect of rate of cooling and ripening temperatures on non-starter lactic acid bacteria in cheese.
D. I. Khan1 and S. Anand, Midwest Dairy Foods Research Center, South Dakota State University, Brookings

551 33 Efficient removal of spores from skim milk using microfiltration: Spore size and surface property considerations.
E. R. Griepe1, Y. Cheng and C. I. Moraru, Cornell University, Ithaca, NY

552 34 Evaluation of microbial enzymes for degradation of exopolymeric substances (EPS) within biofilm matrices for more effective cleaning.
N. Garcia-Fernandez1,2, A. Hassan1 and S. Anand2, 1Dairy Science Department, South Dakota State University, Brookings, 2Midwest Dairy Foods Research Center, Brookings, SD, 3Daisy Brand, Garland, TX, 4South Dakota State University, Brookings

553 35 Comparison of biofilm formation on stainless steel and modified surface milk plate heat exchangers.
S. Jindal1, S. Anand1, J. K. Amamcharla2 and L. Metzger1, 1South Dakota State University, Brookings, 2Food Science Institute, Animal Sciences and Industry, Kansas State University, Manhattan

554 36 Improved functionality of fermented milk is mediated by the symbiotic interaction between Cudrania tricuspidata leaf extract and Lactobacillus gasseri strains.

555 37 Influence of proteolytic Bacillus spp. on sour cream characteristics.
D. Mehta1, L. Metzger1, A. Hassan2 and B. Nelson2, 1South Dakota State University, Brookings, 2Daisy Brand, Garland, TX

556 38 Heat tolerance of Leuconostoc mesenteroides as influenced by prior subjection to mild heat.
I. Osorio1 and K. J. Aryana, Louisiana State University Agricultural Center, Baton Rouge

557 39 Lactobacillus plantarum ameliorates inflammation in LPS-induced RAW264.7 cells and DSS-induced colitis animal model.
S. H. Choi1, S. H. Lee1, H. J. Lee2 and G. B. Kim3, 1Department of Animal Science and Technology, Chung-Ang University, Anseong, The Republic of Korea, 2Department of Food Science and Technology, Chung-Ang University, Anseong, The Republic of Korea
In silico identification of natural product inhibitors of Brucella abortus threonyl-tRNA synthetase.
M. Li1,2, N. Zheng1,2, F. Wen1, Y. Zhang1,2, S. Li1,2, S. Zhao1 and J. Wang1,2, 1Ministry of Agriculture Laboratory of Quality & Safety Risk Assessment for Dairy Products, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 2Ministry of Agriculture - Milk and Dairy Product Inspection Center, Beijing, China, 3State Key Laboratory of Animal Nutrition, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China

Evaluation of immune function markers in OmniGen-AF supplemented steers.
S. A. Armstrong1,2, D. J. McLean1, T. H. Schell1, G. Babe1 and M. Bionaz1, 1Department of Animal and Rangeland Sciences, Oregon State University, Corvallis, 2Phibro Animal Health Corporation, Quincy, IL

Influence of dietary supplementation with a Saccharomyces cerevisiae fermentation product prototype on the pathophysiological response to a combined intranasal bovine herpesvirus-1 and intratracheal Mannheimia haemolytica challenge in Holstein steers.
K. P. Sharon1, Y. Liang1, R. E. Hudson1, I. Yoon1, M. F. Scott1, N. C. Bardick Sanchez1, P. R. Broadway1, J. A. Carroll1 and M. A. Ballou1, Texas Tech University, Lubbock, 2Diamond V, Cedar Rapids, IA, 3USDA-ARS, Livestock Issues Research Unit, Lubbock, TX

Dose response effect of Saccharomyces cerevisiae fermentation product prototype on leukocyte functionality and ex vivo cytokine production during a dexamethasone challenge in Holstein steers calves.
K. P. Sharon1, Y. Liang1, R. E. Hudson1, I. Yoon1, M. F. Scott1, N. C. Bardick Sanchez1, P. R. Broadway1, J. A. Carroll1 and M. A. Ballou1, Texas Tech University, Lubbock, 2Diamond V, Cedar Rapids, IA, 3USDA-ARS, Livestock Issues Research Unit, Lubbock, TX

Effect of total replacement of trace minerals with Bioplex proteinated minerals on the health and performance of light weight, high risk feedlot cattle.
V. B. Holder1, J. S. Jennings2 and T. L. Covey3, 1Alltech Inc, Nicholasville, KY, 2Texas A&M AgriLife Research and Extension Center, Amarillo, 3OT Feedyard and Research Center, Hereford, TX

The effect of frequency of supplementing rumen protected unsaturated fatty acids on blood serum fatty acid profiles in beef heifers and lactating cows.
E. K. Cook1, M. E. Garcia-Ascolani2, R. E. Ricks1, S. K. Duckett1, N. DiLorenzo2, G. C. Lamb2 and N. M. Long1, 1Clemson University, SC, 2University of Florida, North Florida Research and Education Center, Marianna

Economic viability of supplementation during the rainy season for growing water buffaloes.
D. C. M. Silva1, F. M. Silva, C. L. Francisco, A. M. Castilhos, P. R. L. Meirelles and A. M. Jorge, Universidade Estadual Paulista - FMVZ, Botucatu, Brazil

Subclinical ketosis prevalence in Nellore beef cows during the breeding season in Brazil did not affect pregnancy rate.
R. C. de Souza1, R. C. Souza1, A. C. B. P. Tavares1, G. C. V. de Oliveira1, L. A. M. de Souza1, C. A. G. Pellegrino2, M. I. V. Melo1, J. P. Lustosa1 and A. B. D. Pereira1, Pontificia Universidade Catolica de Minas Gerais, Belo Horizonte, Brazil, 2Faculdade Alis de Bom Despacho, Bom Despacho, Brazil, 3University of New Hampshire, Durham

Effects of breeding system of origin (natural service or artificial insemination) on pregnancy rates, distribution of calving, and calf weaning weights of commercial beef cow herds in North Dakota.
M. R. Crosswhite1, D. N. Black2, S. R. Underdahl1, T. L. Neville2 and C. R. Dahlen2, 1North Dakota State University, Fargo, 2Department of Animal Sciences, North Dakota State University, Fargo

Resynchronization for sequential timed artificial insemination.
K. E. Zechiel1, K. G. Pohler1, S. A. Lockwood2, M. Backas1 and J. D. Rhinehart1, 1University of Tennessee, Knoxville, 2Department of Animal Science, University of Tennessee, Knoxville, 3University of Tennessee, Spring Hill

Impact of diet on the behavior of limit-fed beef cows in drylots.
C. L. Daigle1, J. R. Baber1, J. E. Sawyer2 and T. A. Wickersham1, 1Texas A&M University, College Station, 2Department of Animal Science, Texas A&M University, College Station

Newborn beef calves benefit from supplementation of vitamins D and E.
C. D. Nelson1, M. Poindexter2, J. L. Powell1, J. V. Yelich2, S. L. Bird1 and R. L. Stuart4, 1University of Florida, Gainesville, 2Department of Animal Sciences, University of Florida, Gainesville, 3University of Minnesota, Grand Rapids, 4Stuart Products Inc, Bedford, TX
Functional SNP in a polygenic disease induced by high-altitude in fattening Angus steers using systems biology approach.
A. Cánovas*, R. Cockrum, S. Riddle, J. M. Neary, T. N. Holé, J. F. Medrano, R. M. Enns, S. E. Speidel, K. Cummack, K. R. Stemmark and M. G. Thomas, University of Guelph, Ontario, ON, Canada, Virginia Polytechnic Institute and State University, Blackbush, University of Colorado, Denver, Colorado State University, Fort Collins, College of Veterinary Medicine and Biomedical Sciences, Colorado State University, Fort Collins, University of California-Davis, Department of Animal Sciences, Colorado State University, Fort Collins, University of Denver, CO

Factors affecting timing and intensity of calving season of beef cow-calf producers in the Midwest.
C. E. Andresen*, P. J. Guinn and L. L. Schulz, Department of Animal Science, Iowa State University, Ames, Department of Economics, Iowa State University, Ames

Effects of feeding NaturSafe on performance, carcass characteristics, and liver abscesses in finishing beef heifers at a commercial feedlot.

Inclusion of exogenous enzymes in creep feeding rations for nursing beef calves.
J. M. Lourenço*, B. T. Campbell, N. DiLorenzo and R. L. Stewart, Jr., Department of Animal and Dairy Science, University of Georgia, Athens, DSM Nutritional Products, LLC., Parsippany, NJ, University of Florida, North Florida Research and Education Center, Marianna

Body Temperature And Seminal Characteristics In Double And Normally Muscled Senepol Bulls In The Tropics.

Effects of Summer and Winter Feeding of Endophyte Infected Tall Fescue Seeds on Average Daily Gain and Activity of Hepatic Cytochrome P450 1A, 2C, 3A, Aldo-Keto Reductase 1C, and Uridine 5'-Diphospho-Glucuronosyltransferase in Beef Steers.
B. J. McClenton*, C. Waldrip, C. G. Hart, A. Theradiyil Sukumaran, C. O. Lemley, J. R. Blanton and T. T. N. Dinh, Mississippi State University, Mississippi State, Mississippi State University Department of Animal and Dairy Sciences, Mississippi State

Relationships of neonatal beef calf birth weight and body size measures.
A. M. Meyer*, S. M. Bolen and J. M. Larson, Division of Animal Sciences, University of Missouri, Columbia

Ruminant Nutrition: Minerals I

The effect of decreasing dietary cation anion difference in the prepartum diet on urine mineral excretion and blood energy metabolite concentrations in multiparous Holstein cows.

Influence of molybdenum concentration, pH, and transit time on the in vitro bioaccessibility of sulfur.
J. Hawley* and E. B. Kegley, Department of Animal Science, Division of Agriculture, University of Arkansas, Fayetteville

Bovine hair mineral concentrations as potential indicators of mineral status.
J. Hawley* and E. B. Kegley, Department of Animal Science, Division of Agriculture, University of Arkansas, Fayetteville

Effects of diets containing either traditional anionic salts or a commercial anionic supplement on feed intake and energy balance of pre-partum dairy cows.
F. S. Strydom*, J. N. Nothnagel and J. P. Swiegers, Nova Feeds, Malmesbury, South Africa, Ruminant Nutrition Consultancy, Bethlehem, South Africa

The effect of decreasing dietary cation anion difference in the prepartum diet on plasma haptoglobin concentrations and incidence of cytological endometritis in multiparous Holstein cows.

Effect of level of dietary cation-anion difference (DCAD) and duration of prepartum feeding on calcium and measures of acid-base status in transition cows.
Effects of concentrate type and chromium propionate supplementation on insulin resistance parameters, milk production, and reproductive outcomes in lactating dairy cows consuming excessive energy.
T. Leiva1, R. F. Cooke2, A. P. Brandao2 and J. L. M. Vasconcelos3,1UNESP - FMVZ, Botucatu, Brazil, 2Oregon State University - EOARC Burns, 3Sao Paulo State University, Botucatu, Brazil

Regulatory effect of dietary intake of chromium propionate on function of monocyte-derived macrophages from Holstein cows in mid-lactation.
M. Garcia1, Y. Qi2, C. M. Scholte2, D. O’Connor3, P. W. Rounds1 and K. M. Moyes3,1Kansas State University, Manhattan, 2Department of Animal and Avian Sciences, University of Maryland, College Park, 3Kemin Industries, Inc., Des Moines, IA

**Poster Session X**

**Animal Behavior and Well-Being**

**8:15 AM - 9:15 AM**

**Exhibit Hall A/B**

**1 WS**
Use of a human tri-axial pedometer for measurement of sheep activity.
K. A. Perz1, J. G. Berardinelli, R. A. Shevitski II, J. White and J. M. Thomson, Montana State University, Bozeman

**2**
Cooling cows with soakers: Spray duration affects heat loss in dairy cattle.
G. Tresoldi1, K. E. Schütz2 and C. B. Tucker1,1University of California-Davis, 2AgResearch, Hamilton, New Zealand

**3**
Association between rumination behavior, milk yield and milk composition in dairy cows kept on commercial farms.
T. Miedema and T. J. DeVries*, Department of Animal Biosciences, University of Guelph, ON, Canada

**4**
Lameness, productivity and cow behavior in dairy herds with automated milking systems.
M. T. King1, E. A. Pajor1, S. J. LeBlanc1 and T. J. DeVries1,1Department of Animal Biosciences, University of Guelph, ON, Canada, 2University of Calgary, AB, Canada, 3Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada

**5**
Assessment of biomarkers of pain and daily activity patterns in lactating dairy cows diagnosed with clinical metritis.
A. A. Barragan1, S. Bas1,1 J. M. Piñeiro1, G. M. Schuenemann1, P. Rajala-Schultz2 and D. Sanders2,1Department of Veterinary Preventive Medicine, The Ohio State University, Columbus, 2Vaca Resources, Urbana, OH

**6**
Effect of social feeding environment on the feeding behavior of dairy cows and their willingness to consume a novel feed.
G. Mainardes and T. J. DeVries*, Department of Animal Biosciences, University of Guelph, ON, Canada

**7**
Effects of acute and chronic heat stress on feed sorting behavior of lactating dairy cows.
A. Dayton1, A. P. A. Monteiro2, X. Weng2, S. Tao2 and E. K. Miller-Cushon1,1University of Florida, Gainesville, 2University of Georgia, Tifton, 3Department of Animal Sciences, University of Florida, Gainesville

**8**
In-utero exposure to heat stress during late gestation has prolonged negative effects on activity patterns of dairy calves.
E. K. Miller-Cushon1, K. C. Horvath, G. E. Dahl and J. Laporta, Department of Animal Sciences, University of Florida, Gainesville

**9**
Factors associated with the occurrence of stillborn calves.
M. I. Chavez1, M. A. Mella2, E. Carrillo2 and J. E. Garcia2, Universidad Autonoma Agraria Antonio Narro, Torreon, Mexico, 1Universidad Autonoma Agraria Antonio Narro, Saltillo, Mexico, 3Instituto Tecnologico de Torreon, Torreon, Mexico

**10**
T. H. Friend and L. Y. Carrillo, Texas A&M University, College Station, 3NASA Johnson Space Center, Houston, TX

**11**
Sprinkler system in a holding pen: Behavioral responses of dairy cows during the subsequent grazing.
S. V. Matarazzo1, D. S. Mello1, L. M. de Toledo2, I. Arcaro Júnior3 and S. A. D. A. Fernandes3,1State University of Santa Cruz, Ilhéus, Brazil, 2Animal Science Institute, Nova Odessa, SP, Brazil, 3University of Southwest of Bahia, Itapetinga, BA, Brazil

**12**
Evaluation of alternative flooring surfaces for dairy goats.
M. A. Sutherland, G. L. Lowe, C. M. Ross, D. Rapp and G. A. Zobel, AgResearch Ltd, Hamilton, New Zealand
Risk factors associated with lameness severity in feedlot cattle.
S. Marti1,2, E. D. Janzen1, K. Orsel1, M. J. Jelinski1, L. C. Dorin1, E. Pajor1, J. K. Shearer4, S. T. Millman1, J. F. Coetzee1, D. U. Thomson1 and K. S. Schwartzkopf-Genswein2, 1University of Calgary, AB, Canada, 2Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 3Veterinary Agri-Health Services, Airdrie, AB, Canada, 4Iowa State University, Ames, 5Department of Veterinary Diagnostic & Production Animal Medicine, Iowa State University, Ames, 6Pharmacology Analytical Support Team, Iowa State University College of Veterinary Medicine, Ames, 7Department of Diagnostic Medicine/Pathobiology, Kansas State University, Manhattan

Assessment of acute pain during and after knife and band castration following a single dose of Meloxicam in 1 week old beef calves.
D. M. Melendez1,2, S. Marti1,2, E. D. Janzen1, D. Maya1, D. R. Soares1,2, E. A. Pajor1 and K. S. Schwartzkopf-Genswein2, 1University of Calgary, AB, Canada, 2Agriculture and Agri-Food Canada, Lethbridge, AB, Canada

Effect of castration method and analgesia on inflammation and behavior in feedlot cattle.
S. L. Roberts1, H. D. Hughes2, J. G. Powell2 and J. T. Richeson3, 1Department of Agricultural Sciences, West Texas A&M University, Canyon, 2Department of Animal Science, Division of Agriculture, University of Arkansas, Fayetteville

A systematic review-meta-analysis of castration and welfare indicators in beef cattle.
M. E. A. Canozzi1, A. Mederos2, D. Zago3, G. R. Pereira1 and J. O. Barcellos4, 1NESPRO/UFRGS - Federal University of Rio Grande do Sul, Porto Alegre, Brazil, 2National Research Institute for Agriculture, Tacuarembo, Uruguay

Blocking the steer’s view of people during restraint in a squeeze chute results in calmer behavior.
M. L. P. Lima1, R. Woiwode2, C. C. P. Paz3,4 and T. Grandin2, 1Instituto de Zootecnia, Sertãozinho, Brazil, 2Colorado State University, Fort Collins, 3Universidade de Sao Paulo, Faculdade de Medicina de Ribeirao Preto - Departamento de Genetica (USP/FMRP), Ribeirao Preto-SP, Brazil, 4SAA/APTA/Instituto de Zootecnia-Centro de Bovinos de Corte, Sertaozinho-SP, Brazil

Effect of different hydraulic squeeze chute and cattle breed on behavior of steer during restraining in feedyard facilities.
M. L. P. Lima1, R. Woiwode2, C. C. P. Paz3,4 and T. Grandin2, 1Instituto de Zootecnia, Sertãozinho, Brazil, 2Colorado State University, Fort Collins, 3Universidade de Sao Paulo, Faculdade de Medicina de Ribeirao Preto - Departamento de Genetica (USP/FMRP), Ribeirao Preto-SP, Brazil, 4SAA/APTA/Instituto de Zootecnia-Centro de Bovinos de Corte, Sertaozinho-SP, Brazil

Movement and spatial proximity patterns of rangeland-raised Raramuri Criollo cow-calf pairs.
S. Nyamurekung’1, A. Cibils1, R. Estell2, A. Gonzalez2, O. Roacho-Estrada3 and F. A. Rodríguez-Almeida1, 1New Mexico State University, Las Cruces, 2Jornada Experimental Range, Las Cruces, 3Universidad Autonoma de Chihuahua, Mexico

Effects of predation on cortisol and progesterone levels in gestating ewes.
M. Ward1, A. F. Summers2, S. Roscano1, J. Beard1, S. A. Soto-Navarro1 and D. M. Hallford2, 1New Mexico State University, Las Cruces, 2Animal and Range Science Department, New Mexico State University, Las Cruces

Feeding and watering behavior of Nellore bulls fed with or without calcium, phosphorus and trace minerals supplemental sources.
D. Zanetti1,2, L. A. Godoi2, M. M. Estrada2, F. A. S. Silva2, L. F. Prados2, T. E. Engle3 and S. C. Valadares Filho4, 1Universidade Federal de Viçosa, Viçosa, Minas Gerais, Brazil, 2Universidade Federal de Viçosa, Viçosa, Brazil, 3Colorado State University, Fort Collins, 4Universidade Federal de Viçosa, Department of Animal Science, Viçosa, Minas Gerais, Brazil

Effects of ventilation and water misting on the physiological response of pigs kept in a stationary trailer before unloading.
T.L. Pereira1, S. Conte1, Devillers, N.2, R. Sommavilla2, R. Friendship1, F. Guay4, F.A. Dalla Costa1, E.A.L. Titto1 and L. Faucitano, L.2, 1Universidade de Sao Paulo, Pirassununga, SP, Brazil, 2Agriculture & Agri-Food Canada, Sherbrooke, QC, Canada, 3University of Guelph, Guelph, ON, Canada, 4University Laval, Quebec City, QC, Canada, 5Universidade Estadual Paulista, Jaboticabal, SP, Brazil

Increased intake of tannin-rich sainfoin (Onobrychis vicifolia) pellets by parasitized and non-parasitized sheep after a period of conditioning.
M. Costes-Thiré1, J. J. Villalba2, H. Hoste1 and C. Ginane4, 1INRA Clermont-Ferrand/Theix, St Genès-Champanelle, France, 2Utah State University, Logan, 3UMR 1225 INRA DGER, 23 Chemin des Capelles, Toulouse, France, 4Institut National de la Recherche Agronomique (INRA), St-Genès-Champanelle, France

Mitigation of variability in feeding patterns between competitively-fed dairy cows through increased feed delivery frequency.
R. E. Crossley1, A. Harlander and T. J. DeVries, Department of Animal Biosciences, University of Guelph, ON, Canada
Production, Management and the Environment: Health and Welfare

1208  25  Effects of pre- and postpartum supplementation of ruminally protected polyunsaturated fatty acids on reproductive performance of suckled beef cows.
P. L. P. Fontes1, N. Oosthuizen1, F. M. Ciriaico1, D. D. Henry1, M. E. Garcia-Ascolani1, V. R. G. Mercadante1, N. DiLorenzo2 and G. C. Lamb1, 1University of Florida, North Florida Research and Education Center, Marianna, 1Virginia Polytechnic Institute and State University, Blacksburg, 1University of Florida, Marianna

1209  26  The effect of straw bedding on dry matter intake and residual feed intake ranking in yearling bulls.
J. B. Hall1,2, M. C. Roberts Lew1, and W. K. Smith1, 1University of Idaho Nancy M. Cummings Research, Extension Education Center, Carmen, 2Department of Animal & Veterinary Sciences, University of Idaho, Moscow

1210  27  Management of dairy bull calves on U.S. dairy operations.
C. B. Shivley1,2, N. Urie1,2 and J. E. Lombard1, 1USDA:APHIS:VS:Center for Epidemiology and Animal Health, National Animal Health Monitoring System, Fort Collins, 2Colorado State University, Fort Collins

1211  28  Assessment of different bedding systems for lactating cows in freestall housing.
H. Su1, N. M. Esser2, W. K. Coblentz3, M. A. Borchardt4, W. Jokela4 and M. Akins1, 1University of Wisconsin-Madison, 2University of Wisconsin, Marshfield, 3US Dairy Forage Research Center, Marshfield, WI

1212  29  Management practices related to the welfare of dairy heifer calves on U.S. dairy operations.
C. B. Shivley1,2, N. Urie1,2 and J. E. Lombard1, 1USDA:APHIS:VS:Center for Epidemiology and Animal Health, National Animal Health Monitoring System, Fort Collins, 2Colorado State University, Fort Collins

1213  30  Performance and health of calves pre- and post-weaning when fed pasteurized whole milk and whole milk supplemented with differing milk replacer protein sources.
D. Ziegler1, H. Chester-Jones1, D. L. Cook2, J. L. Olson2 and S. M. McCusker2, 1University of Minnesota Southern Research and Outreach Center, Waseca, 2Milk Products, Chilton, WI

1214  31  Performance and health of calves pre- and post-weaning when fed milk replacers formulated with alternative protein sources.
H. Chester-Jones1, D. Ziegler1, R. Blome2 and D. Wood2, 1University of Minnesota Southern Research and Outreach Center, Waseca, 2Animix, Juneau, WI

1215  32  Performance and health of calves pre- and post-weaning when fed milk replacer supplemented with algae.
D. Schimek1, B. Ziegler1, D. Ziegler2 and H. Chester-Jones2, 1Hubbard Feeds Inc., Mankato, MN, 2University of Minnesota Southern Research and Outreach Center, Waseca

1216  33  Evaluation of the efficacy of a copper sodium hypochlorite footbath and a 5% copper sulfate footbath on the control of digital dermatitis lesions.
B. A. Wadsworth*, J. D. Clark and J. M. Bewley, University of Kentucky, Lexington

1217  34  Comparison of DX613 copper sulfate acidifier to a 5% copper sulfate footbath for prevention of digital dermatitis lesions in dairy cattle.
H. B. Reichenbach*, B. A. Wadsworth, J. D. Clark and J. M. Bewley, University of Kentucky, Lexington

1218  35  Northeast dairy herd characteristics: Transition cow management strategies, performance, culling, and health.

1219  36  Facilities, management, and animal factors associated with heifer culls in New York State dairy farms.
B. D. Scott* and J. O. Giordano, Department of Animal Science, Cornell University, Ithaca, NY

1220  37  Facilities, management, and animal factors associated with primiparous cows postpartum herd exit risk in New York state dairy farms.
B. D. Scott* and J. O. Giordano, Department of Animal Science, Cornell University, Ithaca, NY

1221  38  Facilities, management, and animal factors associated with calf losses in New York state dairy farms.
B. D. Scott* and J. O. Giordano, Department of Animal Science, Cornell University, Ithaca, NY

1222  39  Seasonal effects on milk yield and somatic cell score in organic dairy farms from the Northeast United States.
J. G. B. Galvão Jr1, A. F. Brito2, A. H. N. Rangel3 and J. B. A. Silva4, 1Federal Institute of Science, Education and Technology of Rio Grande do Norte, Ipanguaçu, Brazil, 2University of New Hampshire, Durham, 3Federal University of Rio Grande do Norte, Natal, Brazil, 4Universidade Federal do Semi-árido, Mossoro, Brazil

1223  40  Argentina Veterinarian preferences to devise a mastitis control plan: A conjoint analysis approach.
C. Vissio1,2, M. Richarder1,2, C. Bonetto1, P. Turilli1, and A. Larriestra1, 1Facultad de Agronomia y Veterinaria, UNRC, Rio Cuarto, Argentina, 2CONICET, Rio Cuarto, Argentina, 3IAP Ciencias Basicas y Aplicadas, UNVM, Villa Maria, Argentina
A model to estimate losses due to bovine mastitis for Argentinian dairy herds.  
M. Richardet$^{1,2}$, H. Solari$^{3,4}$, C. Vissio$^{1,2}$, J. Bartolome$^{4}$, G. Bo$^{6}$, P. Turiello$^{2}$, C. Bogni$^{1}$ and A. Larriestra$^{2}$, $^{1}$CONICET, Rio Cuarto, Argentina, $^{2}$Facultad de Agronomía y Veterinaria, UNRC, Rio Cuarto, Argentina, $^{3}$CONICET, Buenos Aires, Argentina, $^{4}$Facultad de Ciencias Exactas, Físicas y Naturales, UBA, Buenos Aires, Argentina, $^{5}$Facultad de Ciencias Veterinarias, UNLPam, General Pico, Argentina, $^{6}$IAP Ciencias Basicas y Aplicadas, UNVM, Villa Maria, Argentina, $^{7}$Facultad de Ciencias Exactas, Físico-Químicas y Naturales, UNRC, Rio Cuarto, Argentina

Effects of oral calcium formate supplementation in peripartum dairy cows.  
E. W. Carneiro$^{1}$, E. E. Ichikawa$^{2}$, D. M. V. F. Carneiro$^{3}$ and R. D. Almeida$^{1}$, $^{1}$Universidade Federal do Paraná, Curitiba, Brazil, $^{2}$Bayer HealthCare, São Paulo, Brazil, $^{3}$Instituto Federal Catarinense, Araquari, Brazil

Effect of prenatal and lactating cow trace mineral source on Angus and Brangus calf acute phase protein response to a weaning stressor.  
D. M. Price$^{1}$, K. G. Arriola$^{2}$, K. K. Arellano$^{3}$, M. M. O’Neil$^{1}$, W. B. Watson III$^{1}$, D. M. Irsik$^{3}$, D. O. Rae$^{1}$, M. J. Hersom$^{1}$ and J. V. Yelich$^{1}$, $^{1}$Department of Animal Sciences, University of Florida, Gainesville, $^{2}$Department of Animal Sciences, UF/IFAS, Gainesville, FL, $^{3}$College of Veterinary Medicine, University of Florida, Gainesville

Animal Health: Monogastric

Short chain nitrocompounds treatment of poultry excreta: In vitro survivability of Salmonella, E. coli and nitrogen metabolism.  
C. Arzola-Alvarez$^{1}$, J. Corrales$^{1}$, O. Ruiz-Barrera$^{1}$, R. C. Anderson$^{2}$, M. E. Hume$^{2}$, Y. Castillo-Castillo$^{1}$, A. Corral-Luna$^{1}$, J. L. Guevara-Valdezes$^{1}$, J. Salinas$^{1}$ and C. Rodriguez-Muela$^{1}$, $^{1}$Universidad Autonoma de Chihuahua, Mexico, $^{2}$USDA/ARS, College Station, TX, $^{3}$Universidad Autonoma de Ciudad Juarez, Cdad. Juarez, Chihuahua, Mexico, $^{4}$Universidad Autonoma de Tamaulipas, Reynosa, Tamaulipas, Mexico

Effect of protected sodium butyrate on Salmonella spp. excretion in a pig fattening unit.  
M. Puyalto$^{1}$, C. Sol$^{1}$, J. J. Mallo$^{1}$, S. Andrés-Barranco$^{2}$, A. Casanova-Higes$^{2}$ and R. C. Mainar-Jaime$^{3}$, $^{1}$NOREL S.A., Madrid, Spain, $^{2}$Unidad de Produccion y Sanidad Animal, Centro de Investigacion y Tecnologia Agroalimentaria de Aragon, Universidad de Zaragoza-CITA, Zaragoza, Spain, $^{3}$Departamento de Patología Animal. Facultad de Veterinaria, Instituto Agroalimentario de Aragón, Universidad de Zaragoza - CITA, Zaragoza, Spain

Study of genetic basis of immune response in gilts vaccinated with a modified live PRRS virus in a swine farm from southern Sonora Mexico.  
P. Luna-Nevarez$^{1}$, M. Pavlovich-Sotomayor$^{1}$, R. I. Luna-Ramirez$^{1}$, C. M. Aguilar-Trejo$^{1}$, G. Luna-Nevarez$^{1}$, X. Zeng$^{2}$, S. E. Speidel$^{2}$, R. M. Enns$^{2}$ and M. G. Thomas$^{2}$, $^{1}$Instituto Tecnologico de Sonora, Ciudad Obregon Sonora, Mexico, $^{2}$Department of Animal Sciences, Colorado State University, Fort Collins

Ruminant Nutrition: Minerals II

Influence of supplementary zinc and chromium-amino acid complexes on growth performance and carcass characteristics of finishing cattle fed zilpaterol hydrochloride.  
R. Barajas$^{1}$, M. E. Branie$^{2}$, C. K. Larson$^{2}$ and B. J. Cervantes$^{1}$, $^{1}$FMVZ-Universidad Autónoma de Sinaloa, Culiacan, Mexico, $^{2}$Zinpro Corporation, Eden Prairie, MN, $^{3}$Ganadera los Migueles, S.A. de C.V., Culiacán, México

Effect of peripartum source of dietary calcium and magnesium, and postpartum level of magnesium, on dry matter intake, performance and plasma minerals in multiparous Holstein cows.  
B. M. Leno$^{1}$, S. E. Williams$^{1}$, C. M. Ryan$^{1}$, D. Briggs$^{2}$, M. Crombie$^{3}$ and T. R. Overton$^{1}$, $^{1}$Cornell University, Department of Animal Science, Ithaca, NY, $^{2}$Papillon Agricultural Company, Inc., Easton, MD, $^{3}$MIN-AD, Inc., Winnemucca, NV

Effects of mineral supplementation on pre- and postpartum primiparous beef heifer performance and progeny preweaning performance.  
J. Hawley$^{1}$, E. B. Kegley and J. G. Powell, Department of Animal Science, University of Arkansas Division of Agriculture, Fayetteville

Effects of mineral supplementation on pre- and postpartum primiparous beef heifer mineral status and progeny preweaning mineral status.  
J. Hawley$^{1}$, E. B. Kegley and J. G. Powell, Department of Animal Science, University of Arkansas Division of Agriculture, Fayetteville

Relative bioavailability of selenium sources for beef cattle.  
M. A. Zanetti$^{1}$, J. S. Silva$^{2}$, J. C. D. C. Balieiro$^{1}$ and J. A. Cunha$^{2}$, $^{1}$University of São Paulo- USP/FZEA, Pirassununga, Brazil, $^{2}$FZEA-USP, Pirassununga, Brazil
Hydroxy trace mineral supplementation lowers proportion of low-quality embryos in postpartum dairy cows.
A. H. Souza1, C. D. Narciso1, G. E. Higginbotham2, E. Martinez2, R. Ruggeri2 and E. O. S. Batista4, 1Ceva Animal Health, Libourne, France, 2Sequoia Veterinary Services Inc., Tulare, CA, 3Micronutrients, Indianapolis, IN, 4University of Sao Paulo, Pirassununga, Brazil

Effects of zinc amino acid complex on mammary epithelium and dairy food chemistry.
J. E. Shaffer1,2, K. Pandalaneni1, L. Mamedova1, J. DeFrain2, J. K. Amamcharla1 and B. J. Bradford1, 1Kansas State University, Manhattan, 2Zinpro Corporation, Eden Prairie, MN

Effects of sulfur on the nutrition value of DDGS for beef cattle.
L. He1,2, China Agricultural University, Beijing, China

Effects of sulfur on the in vitro fermentation profile of DDGS.
L. He1,2, China Agricultural University, Beijing, China

Ruminant Nutrition: Forages and Feeds II

Evaluation of use of heat-stable α-amylase for neutral detergent fiber contents by using cellulose standard in filter bags made from different textiles add starch in samples.
T. N. P. Valente1, E. Detmann1 and C. Batista Sampaio2, 1IFGoiano, POSSE, Brazil, 2Universidade Federal de Viçosa, Viçosa, Minas Gerais, Brazil, 3Universidade Federal de Viçosa, Department of Animal Science, Viçosa, Minas Gerais, Brazil

Production response of lactating cows to diets based on corn or forage sorghum silage harvested on two dates and supplemented with soybean meal or mechanically pressed cottonseed meal.
J. K. Bernard1, S. Tao and T. Smith, University of Georgia, Tifton

Commercial ground corn surface area is better related to rumen disappearance than geometric mean particle size.
J. P. Goeser1,2, B. Beck1, T. Koehler1, D. Tanata1, E. Reid1, M. Kirch1 and R. D. Shaver1, 1University of Wisconsin-Madison, 2Rock River Laboratory, Inc, Watertown, WI, 3Witmers Feed and Grain, Cottage Grove, WI, 4Landmark Cooperative, Cottage Grove, WI, 5Medford Cooperative, Medford, WI, 6Cooperative Feed Dealers, Conklin, NY, 7Masters Choice, Anna, IL

Effect of steam flake and ground corn with different particle size on dairy cow performance with high concentrate diet.
G. R. Ghorbani1, F. Ahmadi and M. Haidary, Isfahan University of Technology, Isfahan, Islamic Republic of Iran

Effect of diastatic power and processing index on the feed value of barley grain for finishing feedlot cattle.
G. O. Ribeiro Jr1,2, M. L. Swift3 and T. A. McAllister1, 1Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 2Hi-Pro Feeds, Okotoks, AB, Canada, 3DuPont Pioneer, Johnston, IA

Heating of ensiled high moisture corn and aerobic loss of volatile organic compounds are delayed by inoculation with Lactobacillus buchneri.
S. Qi1, W. Rutherford, B. Smiley, B. Harman and F. Owens1, DuPont Pioneer, Johnston, IA

Liver gluconeogenesis in young bulls fed different levels of crude glycerin.
M. M. Ladeira1, J. R. R. Carvalho2, P. D. Teixeira3, J. C. O. Dias2, T. R. Gionbelli1, A. C. Rodrigues1 and D. M. Oliveira1, 1Universidade Federal de Lavras, Brazil, 2IFNMG, Salinas, Brazil, 3Univesidade Estadual do Mato Grosso do Sul, Aquidauana, Brazil

Starch digestibility by lactating cows fed flint or dent corn silage stored two or six months prior to feeding.
A. Laflotte1, L. Aubry2, B. Mahanna1 and F. Owens1, 1U. Lorraine, Nancy, France, 2DuPont Pioneer, Aussonne, France, 3DuPont Pioneer, Johnston, IA

Ruminal in situ degradability and in vitro organic matter digestibility of peanut hulls under different incubation times with calcium oxide.
F. M. Ciricco1,2, D. D. Henry1, R. Beierbach1, T. M. Schulmeister1, M. Ruiz-Moreno1, M. E. Garcia-Ascolani1, N. Oosthuizen1, P. L. P. Fontes1, G. C. Lamb1 and N. DiLorenzo1, 1University of Florida, North Florida Research and Education Center, Marianna, FL, 2Instituto Nacional de Tecnologia Agropecuaria (INTA), EEA Anguil, Anguil, Argentina

A comparison of Lacto-Whey to soybean meal in continuous cultures fed corn- or wheat-based diets.
J. L. Firkins1, B. K. Wagner1, J. E. Plank1, B. A. Wenner2 and G. Poppy2, 1The Ohio State University, Columbus, 2Fermented Nutrition Corporation, St, Luxembourg, WI

Glucose precursor supplementation in Holstein and Jersey cows as a preventative treatment for ketosis in the transition period.
K. E. Mitchell1, University of California-Davis
Manipulation of lactating dairy cows diets using reduced-fat distillers grains, corn oil and calcium sulfate to reduce methane production measured by indirect calorimetry.
J. V. Judy1*, T. M. Brown-Brandl2, S. C. Fernando1 and P. J. Kononoff1, 1University of Nebraska-Lincoln, 2USDA-ARS, U.S. Meat Animal Research Center, Clay Center, NE

Effect of particle size of a mash concentrate on behavior, rumen fermentation, and macroscopic and microscopic lesions of the digestive tract in Holstein bulls fed a high-concentrate diet.
M. Devant1*, B. Quintana2, A. Sole2 and A. Bach3,2, 1IRTA - Department of Ruminant Production, Caldes De Montbui, Spain, 2IRTA, Caldes Montbui, Spain, 3ICREA, Barcelona, Spain

**Poster Session XI**
1:00 PM - 2:00 PM
Exhibit Hall A/B

**Dairy Foods Division: Dairy Chemistry II**

522 1  
Prediction of intact casein in cheese by using amaltheys: A front-face fluorescence analyzer.  
Z. Liu1*, K. Saijith Babu1, A. Coutouly2, F. Allouche2 and J. K. Amamcharla1, 1Food Science Institute, Animal Sciences and Industry, Kansas State University, Manhattan, 2Spectralys Innovation, Romainville, France

523 2  
Changes of the state of calcium and protein in low fat and full fat processed cheese during cheese making.  
N. Shirashoji1,2, H. Aoyagi1, T. Abe1 and M. Iked1, 1Food Research & Development Laboratory, Morinaga Milk Industry Co., Kanagawa, Japan, 2Life Sciences and Bioengineering, Graduate School of Life and Environmental Sciences, University of Tsukuba, Ibaraki, Japan

524 3  
Effect of selenium fortification on mozzarella cheese quality.  
K. L. Peng, J. X. Liu and D. X. Ren*, Institute of Dairy Science, College of Animal Science, Zhejiang University, Hangzhou, China

525 4  
Relationship between the yield of mozzarella cheese of buffalo’s milk, milk quality and the recovery of constituents in whey.  
D. C. Sales1, A. H. N. Rangel1, J. G. B. Galvão Júnior2, L. H. F. Borba1, A. R. Freitas1 and E. O. Moura1, 1Federal University of Rio Grande do Norte, Natal, Brazil, 2University of New Hampshire, Durham, 3Brazilian Agricultural Research Corporation (Embrapa), São Paulo, Brazil

526 5  
Transmission Electron Microscopy (TEM) identifies major microstructural changes in soft Feta cheese.  
A. H. Vollmer1*, D. J. McMahon1, J. C. Grande2 and N. N. Youssef1, 1Western Dairy Center, Utah State University, Logan, 2Analytical Sciences Laboratory, GE Global Research, Niskayuna, NY

527 6  
Performance shelf life extension of LMPS Mozzarella using high pressure treatment and low temperature storage.  
L. A. Jiménez-Maroto1*, S. Govindasamy-Lucey2, J. J. Jaegg2, M. E. Johnson2 and J. A. Lucey1,2, 1University of Wisconsin-Madison, 2Wisconsin Center for Dairy Research, Madison, WI

528 7  
Hydrolysis of phosphates with a different chain length in water, milk and calcium caseinate.  
W. H. Viotto1* and D. Maus, University of Campinas, Brazil

529 8  
Water mobility, texture and composition of “REQUEIJÃO CREMOSO” manufactured with polyphosphates of different chain lengths.  
W. H. Viotto1* and V. R. Dias, University of Campinas, Brazil

530 9  
Effect of carbon dioxide injection on protein interaction to reduce viscosity of high solids skim milk concentrates.  
H. Dahiya1*, L. Metzger1 and H. A. Pate2, 1South Dakota State University, Brookings, 2Land O’Lakes Inc., Arden Hills, MN

531 10  
Hauling and receiving practices at dairy processing facilities.  
E. Kuhn*, J. Waite-Cusic and L. Goddik, Oregon State University, Corvallis

532 11  
Comparing Fluorescent and Light-emitting Diode (LED) Retail Lighting Effects on Consumer Acceptability of Fluid Milk.  
S. Duncan*, H. Potts and K. N. Amin, Virginia Polytechnic Institute and State University, Blacksburg

533 12  
Effect of various storage conditions on the stability of Sulphonamides in raw milk.  
M. Chen1,2, F. Wen1,2, H. Wang1, N. Zheng1,2 and J. Q. Wang1,2, 1Ministry of Agriculture Laboratory of Quality & Safety Risk Assessment for Dairy Products, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 2State Key Laboratory of Animal Nutrition, Institute of Animal Sciences, Chinese Academy of Agricultural Sciences, Beijing, China, 3College of Animal Science and Technology, Yangzhou University, Yangzhou, China
Effect if pH on the hydrolysis of sodium polyphosphates in different dairy matrices.
W. H. Viotto* and A. P. Barth, University of Campinas, Brazil

NIR technology as a process analytical tool for cheese inspection.
W. H. Viotto*, D. F. Barbin and C. Karaziack, University of Campinas, Brazil

Extraction of phospholipids from procream using supercritical carbon dioxide and ethanol as a modifier.
B. Li*, Z. Linghu*, F. Hussain1, S. J. Smith2 and J. K. Amamcharla1, 1Food Science Institute, Animal Sciences and Industry, Kansas State University, Manhattan, 2Kansas State University, Manhattan

Evaluation of Sol-Gel non-stick surface modification in dairy thermal processing.
Z. Liu*, J. K. Amamcharla1 and L. Metzger2, 1Food Science Institute, Animal Sciences and Industry, Kansas State University, Manhattan, 2South Dakota State University, Brookings

Foaming and baking properties of MPC and egg white protein mixtures.
V. Hor* and B. Vardhanabhuti, University of Missouri, Columbia

The effect of emulsifying salts on the turbidity of a diluted milk system with varying pH and protein concentration.
M. Culler*, Y. Saricay and F. M. Harte, The Pennsylvania State University, University Park

Effect of high pressure jet processing on the rheological properties of ice cream mix.
M. Tran*, D. R. Roberts and F. M. Harte, The Pennsylvania State University, University Park

Fat reduction in ice cream and its effect on physical structure and consumer acceptability.

Oxygen barrier and light interference packaging properties for controlling light-induced oxidation in milk.
H. Potts*, S. Duncan, M. L. Johnson, S. F. O’Keefe, J. E. Marcy and K. Malikarjunan, Virginia Polytechnic Institute and State University, Blacksburg

**Physiology and Endocrinology: Estrus and Estrous Cycle Control**

Comparisons of two short duration estrous synchronization protocols on pregnancy rates to fixed-time AI.
J. B. Hall1 and M. C. Roberts-Lew2, 1Department of Animal & Veterinary Sciences, University of Idaho, Moscow, 2University of Idaho Nancy M. Cummings Research, Extension Education Center, Carmen

Effect of prostaglandin administration after ram exposure on ewe reproductive efficiency.
S. L. Rosasco*, J. K. Beard, M. C. Herrington, D. M. Halford and A. F. Summers, Animal and Range Science Department, New Mexico State University, Las Cruces

The association between Anti-Mullerian Hormone concentrations, antral follicle count and fertility measures in dairy cows.
M. Gobikrushanth1*, P. A. Dutra1, C. A. Felton1, A. Ruiz-Sanchez1, T. C. Bruinjé1, M. G. Colazo1, S. Butler1 and D. J. Ambrose1,2, 1Department of Agricultural Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Livestock Research Branch, Alberta Agriculture and Forestry, Edmonton, AB, Canada, 1Animal & Grassland Research and Innovation Centre, Teagasc Moorepark, Fermoy, Co. Cork, Ireland

Natural patterns of early postpartum luteal activity and their association with insemination outcomes in dairy cows.
T. C. Bruinjé1, M. Gobikrushanth1 and D. J. Ambrose1,2, 1Department of Agricultural Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Livestock Research Branch, Alberta Agriculture and Forestry, Edmonton, AB, Canada

Circulating LH concentrations after intravaginal instillation of GnRH in lactating dairy cows.
R. Wijma*, M. L. Stangaferro, M. A. Elmetwally, F. Amovilli and J. O. Giordano, Department of Animal Science, Cornell University, Ithaca, NY

Effect of dose and timing of prostaglandin F2α treatments during a Resynch protocol on luteal regression and fertility to timed artificial insemination in lactating Holstein cows.

Fertility of lactating Holstein cows after synchronization of ovulation and timed artificial insemination versus artificial insemination after detection of estrus at a similar DIM range.
V. G. Santos1, P. D. Carvalho1, C. Maia2, B. Carneiro2, A. Valenza3 and P. M. Fricke1, 1Department of Dairy Science, University of Wisconsin-Madison, 2Diesen Servicos Veterinarios Lda, Evora, Portugal, 3Ceva Animal Health, Libourne, France
Increasing estrus expression in lactating dairy cows.
J. A. Sauls*, B. E. Voelz, S. L. Hill and J. S. Stevenson, Kansas State University, Manhattan

The characterization of estradiol concentration prior to insemination and its effect on fertility in dairy cattle.
M. Gobikrsrathalt*, P. A. Dutra*, C. A. Felton, T. C. Brujin*, M. G. Colazo, S. Butler and D. J. Ambrose,1,2
1Department of Agricultural Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Livestock Research Branch, Alberta Agriculture and Forestry, Edmonton, AB, Canada, 1Animal & Grassland Research and Innovation Centre, Teagasc Moorepark, Fermoy, Co. Cork, Ireland

Resynchronization of ovulation strategies including or not including GnRH treatment before non-pregnancy diagnosis.
R. Wijma*, M. L. Stangaferro, M. Masello, G. E. Granados and J. O. Giordano, Department of Animal Science, Cornell University, Ithaca, NY

Fecal microbial shifts of the german Holstein dairy cows with left-sided displacement of the abomasum.

Genetic parameters and impact of post-partum diseases on lactation curves in dairy cattle.
H. Jeong*, D. Gonzalez-Pena, T. M. Goncalves, P. J. Pinedo, J. E. P. Santos, G. M. Schuenemann, G. J. M. Rosa, R. O. Gilber, R. C. Bicalho, R. Chebel, K. N. Galvão, C. M. Seabury, W. W. Thatcher and S. L. Rodriguez Zas, 1University of Illinois at Urbana-Champaign, 2Zoetis, Kalamazoo, MI, 3Colorado State University, Fort Collins, 4University of Florida, Gainesville, 5Department of Veterinary Preventive Medicine, The Ohio State University, Columbus, 6University of Wisconsin-Madison, Cornell University, Ithaca, NY, 7Department of Large Animal Clinical Sciences; University of Florida, Gainesville, 8Texas A&M University, College Station, 9Department of Animal Sciences, University of Florida, Gainesville

Genetic and environmental components of disease traits in dairy cattle.
T. M. Goncalves, D. Gonzalez-Pena, H. Jeong, P. J. Pinedo, J. E. P. Santos, G. M. Schuenemann, G. J. M. Rosa, R. O. Gilber, R. C. Bicalho, R. Chebel, K. N. Galvão, C. M. Seabury, W. W. Thatcher and S. L. Rodriguez Zas, 1University of Illinois at Urbana-Champaign, 2Zoetis, Kalamazoo, MI, 3Colorado State University, Fort Collins, 4University of Florida, Gainesville, 5Department of Veterinary Preventive Medicine, The Ohio State University, Columbus, 6University of Wisconsin-Madison, Cornell University, Ithaca, NY, 7Department of Large Animal Clinical Sciences; University of Florida, Gainesville, 8Texas A&M University, College Station, 9Department of Animal Sciences, University of Florida, Gainesville

Undernutrition alters metabolic responses to acute inflammation in early lactation cows.
J. A. A. Pires*, K. Pawlowski, J. Roueíc, C. Delavaud, G. Foucras, P. Rainard, P. Gennert and C. Leroux, 1UMR1213 Herbivores, INRA, VetAgroSup, Saint-Genes-Champanelle, France, 2UMR1225 IHAP, INRA, Toulouse, France, 3UMR1262 ISP, INRA, Nouzilly, France

Potential modulation of the toxic effects of Escherichia coli in bovine endometrium by lactic acid bacteria.
S. Genís*, A. Sánchez-Chardi, A. Bach and A. Arís, 1Department of Ruminant Production, IRITA, Caldes de Montbui, Spain, 2Servei de Microscopia, UAB, Cerdanyola del Valles, Spain, 3ICREA, Barcelona, Spain, 4IRTA, Caldes de Montbui, Spain

Meta-analysis of factors influencing new intramammary infection rate in natural exposure teat dip efficacy trials.
B. D. Enger*, R. R. White, S. C. Nickerson and L. K. Fox, 1Virginia Polytechnic Institute and State University, Blacksburg, 2University of Georgia, Athens, 3Washington State University, Pullman
Nonruminant Nutrition: Feed Additives II

1011  41  Changes in pH of digestive tract and cecal microflora composition in broilers fed with probiotic and prebiotic supplementation (SynerAll).
   A. Ipek* and A. Sozcu, Uludag University, Faculty of Agriculture, Department of Animal Science, Bursa, Turkey

1012  42  Effects of dietary inclusion of probiotic and prebiotic (SynerAll) on growth performance and serum biochemical parameters in broiler.
   A. Ipek*, A. Sozcu and V. Akay, Uludag University, Faculty of Agriculture, Department of Animal Science, Bursa, Turkey; 2Global Nutritech Biotechnology LLC, Richmond, VA

1013  43  Changes in pH of digestive tract and cecal microflora composition in broilers fed with probiotic and prebiotic supplementation, SynerAll.
   A. Ipek* and A. Sozcu, Uludag University, Faculty of Agriculture, Department of Animal Science, Bursa, Turkey

1014  44  Supplementation of chestnut tannins in artificially infected weaned piglets.
   G. Bee*, S. Thanner, G. Marion and A. Gutzwiller, Agroscope Institute for Livestock Sciences, Posieux, Switzerland

1015  45  Curcumin prevents hepatotoxic effects of Aflatoxin B1 associated with inhibition of cytochrome P450 isozymes genes in chick liver.
   L. Sun*, N. Zhang, M. Zhu, L. Zhao and D. Qi, College of Animal Science and Technology, Huazhong Agricultural University, Wuhan, China

1016  46  Effects of humic acids supplementation on pig growth performance, Nitrogen digestibility, odor and ammonia emission.
   C. H. Ponce*, C. Arteaga1 and A. Flores2, 1Escuela de Medicina Veterinaria, Colegio de Ciencias de la Salud, Universidad San Francisco de Quito USFQ, Quito, Ecuador; 2Departamento de Ciencias de la Vida y Agricultura, Universidad de las Fuerzas Armadas ESPE, Sangolqui, Ecuador

1017  47  A standardized blend of capsicum and turmeric oleoresins given during late gestation improves performance of sows vaccinated against E. coli.
   C. Ogue*, I. Riu*, C. Quintilla and S. Lopez, 1Pancosma, Geneva, Switzerland; 2Avena Nutrició, La Garriga, Spain; 3Copinsa, Altorrican, Spain; 4Pancosma SA, Le Grand Saconnex, Switzerland

1018  48  Evaluation of biodegraded and undegraded plantain peels as replacement to wheat offal in broiler production.
   F. A. Aderemi*, O. M. Alabi and A. Awe, 1Bowen University, Iwo, Nigeria

1019  49  Effect of lysophospholipids supplementation in different energy diets on growth performance, nutrient digestibility, milk composition, litter performance and fecal score in lactating sows.

1020  50  Effect of crystalline silicon dioxide in piglet feed on growth performance with different levels of growth promoters.
   Y. Martel-Kennes*, J. Lévesque and C. Decaux, 1Centre de Recherche en Sciences Animales de Deschambault, Deschambault, QC, Canada; 2Ceresco Nutrition, Saint-Urbain-Premier, QC, Canada

Ruminant Nutrition: Ruminal Fermentation III

1643  51  Effects of dietary neutral detergent fiber and starch ratio on rumen epithelial cell morphological structure and gene expression in dairy cows.
   L. Ma*, M. Zhao, X. Wu, L. Zhao and D. Bu1,2,3, 1State Key Laboratory of Animal Nutrition, Institute of Animal Sciences, Chinese Academy of Agricultural Sciences, Beijing, China; 2Kunming Institute of Botany, Chinese Academy of Sciences, Kunming, China; 3Hunan Co-Innovation Center of Animal Production Safety, CICAPS, Changsha, China; 4CAAS-ICRAF Joint Laboratory of Agroforestry and Sustainable Animal Husbandry, World Agroforestry Centre, East and Central Asia, Beijing, China

1644  52  Rumen disappearance of capsaicin and dihydrocapsaicin in lactating dairy cows.
   J. Oh*, D. M. Bravo, E. H. Wall and A. N. Hristov, 1The Pennsylvania State University, University Park, 2Pancosma, Geneva, Switzerland

1645  53  WS  Effects of capsaicin source on blood capsaicin, glucose and insulin concentrations, rumen fermentation and nitrogen balance of sheep.
   J. B. Aflopd, J. G. Castro1, E. R. Oosthuysen, S. L. Rosasco, R. D. Richins, E. J. Schollijgeredes, D. M. Hallford and C. A. Loest, 1New Mexico State University, Las Cruces, 2Animal and Range Science Department, New Mexico State University, Las Cruces

1646  54  Describing aNDFom in vitro digestion with a multi-compartment model and evaluation of predictions in the CNCP57.0 Model.
   A. M. Zontini* and M. E. Van Amburgh, Cornell University, Ithaca, NY
Mammalian hormones associated with stress impact microbial fermentation of rumen fluid in vitro.

RNA sequencing reveals differential expression of genes associated with an altered morphology of rumen papillae in lactating dairy cows fed diets with various forage sources.
B. Wang1, D. M. Wang1, M. Liu1, X. B. Wang1, L. L. Guan2 and J. X. Liu1, 1Institute of Dairy Science, Zhejiang University, Hangzhou, China, 2Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada

Effect of ruminal inoculum from bison or cattle on in vitro gas production, feed digestibility and responses to exogenous enzyme supplementation.
Z. X. He1, G. O. Ribeiro Jr1, V. Bremer1, K. A. Beauchemin1, T. A. McAllister1 and W. Z. Yang1, 1Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 2Key Laboratory for Agro-Ecological Processes in Subtropical Region, Hunan Research Center, The Chinese Academy of Sciences, Changsha, China, 3Elanco Animal Health, Greenfield, IN

Mammalian hormones associated with stress impact microbial fermentation of rumen fluid in vitro.

RNA sequencing reveals differential expression of genes associated with an altered morphology of rumen papillae in lactating dairy cows fed diets with various forage sources.
B. Wang1, D. M. Wang1, M. Liu1, X. B. Wang1, L. L. Guan2 and J. X. Liu1, 1Institute of Dairy Science, Zhejiang University, Hangzhou, China, 2Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada

Effect of ruminal inoculum from bison or cattle on in vitro gas production, feed digestibility and responses to exogenous enzyme supplementation.
Z. X. He1, G. O. Ribeiro Jr1, V. Bremer1, K. A. Beauchemin1, T. A. McAllister1 and W. Z. Yang1, 1Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 2Key Laboratory for Agro-Ecological Processes in Subtropical Region, Hunan Research Center, The Chinese Academy of Sciences, Changsha, China, 3Elanco Animal Health, Greenfield, IN

Ruminal fermentation from Nellore steers supplemented with additives in the rainy season.
E. E. Dalanttonia1, J. F. Lage2, E. San Vito1, P. D. S. Castagnino1, L. Maneck Delevatti1, R. A. Reis2 and T. T. Berchielli2, 1Universidade Estadual Paulista Júlio de Mesquita Filho - UNESP, Jaboticabal, Brazil, 2Trouw Nutrition BV, Leidschendam, The Netherlands

The micro gas test – a small scale in vitro system for high throughput analysis.
K. Elberg1, P. Steuer2, U. Habermann1, J. Lenz2, M. Nelles2 and K. H. Südekum3, 1Department of Waste Management and Material Flow, University of Rostock, Germany, 2Institute of Animal Science, University of Bonn, Germany

Rumen protozoal community structures are not altered in lactating dairy cows offered alternative forage crops during short-term grazing experiments.
L. M. Cersosimo1, R. Tacoma1, S. Greenwood1, K. Juntwait2, A. F. Brito2 and J. Kraft4, 1University of Vermont, Burlington, 2University of New Hampshire, Durham

Metabolomics analysis reveals effect of corn silage levels on ruminal metabolic profiles in Holstein heifers.
J. Zhang, H. Shi, Z. Cao, S. Li and Y. Wang1, 1State Key Laboratory of Animal Nutrition, Beijing Engineering Technology Research Center of Raw Milk Quality and Safety Control, College of Animal Science and Technology, China Agricultural University, Beijing, China

Response of rumen microbiota to diets containing different corn silage levels in Holstein heifers.
H. T. Shi, Z. J. Cao, S. K. Ji, H. T. Zhang, S. L. Li and Y. J. Wang1, 1State Key Laboratory of Animal Nutrition, Beijing Engineering Technology Research Center of Raw Milk Quality and Safety Control, College of Animal Science and Technology, China Agricultural University, Beijing, China

Effect of acetate addition and headspace gas composition on in vitro production of volatile fatty acids and gases.
L. M. Judd1 and R. A. Kohn, The University of Maryland, College Park

Predicting the time course of ruminal pH from continuous reticular pH measurements.
D. J. Seymour1, K. M. Wood2, J. P. Cant1 and G. B. Penner2, 1Department of Animal Biosciences, University of Guelph, ON, Canada, 2Department of Animal and Poultry Science, University of Saskatchewan, Saskatoon, SK, Canada, 3University of Saskatchewan, Saskatoon, SK, Canada

Effect of peNDF on milk production and composition in goats fed with NNFS replacing alfalfa hay.
D. D. Estevam1, I. C. Pereira1, A. L. Rigueiro2, F. T. Pereira2, C. L. Martins2, M. D. Arrigoni1 and D. D. Miller2, 1São Paulo State University, Botucatu, Brazil, 2São Paulo State University, Dracena, Brazil

Changes in milk production efficiency and ruminal bacterial community composition following near-total exchange of ruminal contents between high- and low-efficiency Holstein cows.
P. J. Weimer1, M. S. Cox2, T. Vieira de Paula1, M. Lin1 and G. Suer1, 1USDA-ARS, Madison, WI, 2University of Wisconsin-Madison, 1Federal University of Mato Grosso, Cuiabá, Brazil, 2Yangzhou University, Yangzhou, China

Synergism of cattle and bison inoculum on ruminal fermentation and bacterial communities in an artificial rumen (Rusitec) fed barley straw.
D. B. Ox1, G. O. Ribeiro Jr1, M. I. Marcondes1, W. Yang2, K. A. Beauchemin1, R. J. Forster1, V. Bremer2 and T. A. McAllister1, 1Departamento de Zootecnia, Universidade Federal de Viçosa, Brazil, 2Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 3Elanco Animal Health, Greenfield, IN

Effect of peNDF on milk production and composition in goats fed with NNFS replacing alfalfa hay.
D. D. Estevam1, I. C. Pereira1, A. L. Rigueiro2, F. T. Pereira2, C. L. Martins2, M. D. Arrigoni1 and D. D. Miller2, 1São Paulo State University, Botucatu, Brazil, 2São Paulo State University, Dracena, Brazil

Effects of conventional dietary adaptation over periods of 6, 9, 14 and 21 days on rumen morphometrics of Nellore cattle.
D. D. Estevam1, I. C. Pereira1, A. L. Rigueiro2, F. T. Pereira2, C. L. Martins2, M. D. Arrigoni1 and D. D. Miller2, 1São Paulo State University, Botucatu, Brazil, 2São Paulo State University, Dracena, Brazil
Poster Session XII
5:00 PM - 6:00 PM
Exhibit Hall A/B

Breeding and Genetics: Quantitative Traits

Genetic parameters and trends for length of productive life and lifetime production efficiency traits in Thai Landrace and Yorkshire sows.
U. Noppibool1, M. A. Elzo2, S. Koonawootrittriron3 and T. Suwanasopee, 1University of Florida, Gainesville, 2Kasetsart University, Bangkok, Thailand

Estimation of genetic parameters on carcass traits and body type measurements in Hanwoo.
Y. S. Choi1, S. W. Kim1, K. S. Kim1, D. J. Yu1, M. J. Ku1, G. H. Lee1, S. G. Park1 and J. W. Lee1, 1Livestock Research Institute, Jeollanamdo Agricultural Research & Extension Service, Jeollanamdo, The Republic of Korea

Residual feed intake (RFI) for genetic selection of Simmental and Simbrah cattle.
N. Manzanares-Miranda1, I. R. Kawas2, H. Villalon-Mendoza2 and G. Moreno-Degollado2, 1Universidad Autonoma de Nuevo Leon, Posgrado Conjunto de las Facultades de Agronomia y Medicina Veterinaria y Zootecnia, San Nicolas de los Garza, Mexico, 2Universidad Autonoma de Nuevo Leon, San Nicolas de los Garza, Mexico

Multivariate analysis of reproductive and productive traits in Sindhi breed females (Bos indicus).
R. R.C. Mello1, L. D. P. Sinedino2, S. L.G. Sousa1 and M. R.B. Mello1, 1Federal Rural University of Rio de Janeiro, Seropedica, Brazil, 2University of Florida, Gainesville

Repeatability of egg weight in Japanese quail.
O. T. Abanikannda, O. N. Ottun and A. O. Leigh, Lagos State University, Ojo-Lagos, Nigeria

Genetic parameters of cyclicity and other fertility indicators in dairy cattle.
D. Gonzalez-Pena1, H. Jeong2, P. J. Pinedo1, J. E. P. Santos1, G. M. Schuenemann1, G. J. M. Rosa1, R. O. Gilbert2, R. C. Bicalho2, R. Chebel1, K. N. Galvão2, C. M. Seabury2, W. W. Thatcher2 and S. L. Rodriguez Zas2, 1Zoetis, Kalamazoo, MI, 2University of Illinois at Urbana-Champaign, 3Colorado State University, Fort Collins, 4University of Florida, Gainesville, 5Department of Veterinary Preventive Medicine, The Ohio State University, Columbus, 6University of Wisconsin-Madison, 7Cornell University, Ithaca, NY, 8Department of Large Animal Clinical Sciences; University of Florida, Gainesville, 9Texas A&M University, College Station, 10Department of Animal Sciences, University of Florida, Gainesville

Genetic parameters of early lactation diseases in dairy cattle.
D. Gonzalez-Pena1, T. M. Goncalves2, P. J. Pinedo1, J. E. P. Santos1, G. M. Schuenemann1, G. J. M. Rosa1, R. O. Gilbert2, R. C. Bicalho2, R. Chebel1, K. N. Galvão2, C. M. Seabury2, W. W. Thatcher2 and S. L. Rodriguez Zas2, 1Zoetis, Kalamazoo, MI, 2University of Illinois at Urbana-Champaign, 3Colorado State University, Fort Collins, 4University of Florida, Gainesville, 5Department of Veterinary Preventive Medicine, The Ohio State University, Columbus, 6University of Wisconsin-Madison, 7Cornell University, Ithaca, NY, 8Department of Large Animal Clinical Sciences; University of Florida, Gainesville, 9Texas A&M University, College Station, 10Department of Animal Sciences, University of Florida, Gainesville

Genetic evaluation of mastitis, metritis, and ketosis in Holstein cattle using producer recorded data.
G. C. Márquez1, Y. Zare, K. L. Stephan and K. Olson, ABS Global, DeForest, WI

Genetic evaluation of dairy cow livability.
J. R. Wright and P. M. VanRaden, Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD

Genetic associations between milk production and growth traits in Guzerat breed.
M. P. M. Gama1, H. T. Ventura2, M. Alencar Pereira2, L. El Faro2 and C. C. P. Paz2, 1Departamento de Genetica, FMRP-USP, Ribeirao Preto, Brazil, 2Associação Brasileira de Criadores de Zebu, Uberaba, Brazil, 3SAA/APTA-Instituto de Zootecnia-Centro de Bovinos de Corte, Seriâncinho-SP, Brazil, 4Universidade de Sao Paulo, Faculdade de Medicina de Ribeirao Preto - Departamento de Genetica, Ribeirao Preto-SP, Brazil

Production, reproduction, and health of Holstein, Jersey, and crossbred cattle in a seasonal calving pasture-based dairy.
K. A. E. Mullen and S. P. Washburn, North Carolina State University, Raleigh

Between and within-lactation repeatabilities for hoof lesions in Canadian Holsteins.
F. Malchioldi1, A. M. Christen1, D. F. Kelton1, F. S. Schenkel1 and F. Miglior4, 1Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada, 2Valacta, Sainte-Anne-De-Bellevue, QC, Canada, 3Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada, 4Canadian Dairy Network, Guelph, ON, Canada
Sexed-semen usage for Holstein AI in the United States.
J. L. Hutchison* and D. M. Bickhart, Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD

Effect of semen type (cooled-fresh vs frozen-thawed) on fertility of lactating dairy cows.
A. H. Souza1, J. H. Besshof and E. Danzeisen1, 1Ceva Animal Health, Libourne, France, 2Dairy Management Solutions, Tulare, CA, 3Global AG Alliance, Tulare, CA

Subclinical ketosis in the oocyte donors of Holstein X Gir cows.
R. C. de Souza1, R. C. Souza1, B. C. M. V. Reginaldo1, G. C. M. V. da Silva1, C. A. G. Pellegrino2, M. I. V. Melo1, J. P. Lastosa1 and A. B. D. Pereira1, 1Pontifícia Universidade Católica de Minas Gerais, Bento, Brazil, 2Faculdade Alis de Bom Despacho, Brazil, 3University of New Hampshire, Durham

Clinical signs associated with bovine respiratory disease diagnosis and high heritability in beef and dairy cattle.
J. N. Kiser1, C. M. Seabury2, J. E. Womack2, R. Hagevoort3, T. W. Lehenbauer4, S. S. Aly5, A. L. Van Eenennaam6, T. Bovine Respiratory Disease Complex2 and H. L. Neibergs8, 1Department of Animal Science, Washington State University, Pullman, 2Texas A&M University, College Station, 3University of Missouri, Columbia, 4New Mexico State University, Dairy Extension, Clovis, 5University of California-Davis, 6VMTRC, University of California, Tulare, 7University of California-Davis, 8Department of Animal Sciences, Washington State University, Pullman

Estimating enteric methane and carbon dioxide emission from lactating dairy cows using GreenFeed system.
D. Hailemariam1, G. Manafiazar1, J. Basarab2, F. Miglior3, G. Plastow1 and Z. Wang1, 1Livestock Gentec, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Lacombe Research Centre, Alberta Agriculture and Forestry, Lacombe, AB, Canada, 3Canadian Dairy Network, Guelph, ON, Canada, 4Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada

Evaluation of factors affecting NaCl content the evolution in ewes milk and of its effect on technological properties.
J. Serdino, F. Correddu, M. G. Manca, A. Nudda, P. Urgeghe and N. P. P. Macciotta*, Dipartimento di Agraria, University of Sassari, Italy

A survey on breeding strategies and selection objectives for increased feed efficiency and decreased methane emission.
C. Richardson1, F. Malchiodi1, A. M. Wilson1, A. M. Butty3, C. Baes1, A. Cánovas1, M. P. Coffey2, E. E. Connor3, M. De Pauw4, B. Greddler4, E. Goddar6, G. Huitl7, V. R. Osborne7, J. E. Pryce8, M. Sargolzaei10, F. S. Schenkel11, E. Wall1, T. Wright12 and F. Miglior13, 1Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada, 2SRUC, Edinburgh, United Kingdom, 3USDA-ARS, Animal Genomics and Improvement Laboratory, Beltsville, MD, 4University of Alberta, Edmonton, AB, Canada, 5Qualitas AG, Zug, Switzerland, 6Department of Resource Economics and Environmental Sociology, University of Alberta, Edmonton, AB, Canada, 7Department of Food, Agricultural and Resource Economics, University of Guelph, ON, Canada, 8University of Guelph, ON, Canada, 9Department of Economic Development, Jobs, Transport and Resources, Bundoora, Australia, 10Semex Alliance, Guelph, ON, Canada, 11Livestock Gentec, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 12University of Guelph, OMAFRA, Guelph, ON, Canada, 13Canadian Dairy Network, Guelph, ON, Canada

Functional characterization of porcine SCD1 in stably transduced porcine SK6 cells.
J. Hwang*, N. Singh, C. Long and S. B. Smith, Texas A&M University, College Station

Gene expression profiling and fatty acid composition in muscle during growth of Yanbian Yellow Cattle.
X. Li1, C. Yan1, S. Choi2, J. Shin3 and S. B. Smith4, 1Yanbian University, Yanji, China, 2Chungbuk National University, Chungju, The Republic of Korea, 3Kongwon National University, Chuncheon, The Republic of Korea, 4Texas A&M University, College Station

α-chaconine induces myogenesis of bovine satellite cells isolated from semimembranosus and longissimus muscle tissue.

Vitamin C supplement increased intramuscular adipose tissues but not affect myogenic development of Hanwoo steers.

Chromium propionate supplementation alters feedlot performance and GLUT4 activity in feedlot steers.
J. O. Baggerman*, Z. K. F. Smith1, A. J. Thompson1, J. Kim1, P. W. Rounds2 and B. J. Johnson1, 1Texas Tech University, Lubbock, 2Kemin Industries, Inc., Des Moines, IA
Feeding 5% grass hay or wheat straw with high starch, textured diets to weaned dairy calves between 8 and 16 weeks of age.

F. X. Suarez-Mena*, T. S. Dennis, T. M. Hill, J. D. Quigley and R. L. Schlotterbeck, Provimi, Brookville, OH

Effects of a milk balancer protein supplement on growth and performance of dairy calves.

P. Turiello*, E. Martínez*, M. Auri, A. Bogni and O. Queiroz*, 1Facultad de Agronomía y Veterinaria, UNRC, Rio Cuarto, Argentina, 2Department Tecnico Bovinos, TEKNAL SA, Cordoba, Argentina

Effects of trans-10, cis-12 conjugated linoleic acid on gene expression and lipid content of adipocytes derived from lactating dairy cows.

Effects of maternal exercise on postnatal growth and carcass characteristics of swine.

B. L. Ferguson*, E. K. Harris, D. J. Newman, E. P. Berg and K. A. Vonnahme, North Dakota State University, Fargo

The effect of phase-feeding on feed cost, growth, and performance of calves fed milk replacer.

The effect of weaning over a 14-day vs 21-day period on the performance of calves fed milk replacer on a controlled ad libitum curve through an automatic feeder.

Effects of maternal dietary restriction during the second trimester on offspring growth and feedlot performance.

Neonate immunity, growth and puberty in dairy calves: Influence of dietary conjugated linoleic acid supplementation of the dam.

C. L. Cardoso*, D. Somwe and G. Esposito*, 1Department of Production Animal Studies, Faculty of Veterinary Science, University of Pretoria, Pretoria, South Africa, 2Department of Animal and Wildlife Science, Faculty of Natural and Agricultural Sciences, University of Pretoria, South Africa, 3Institute of Food, Nutrition and Well-being University of Pretoria, Pretoria, South Africa

Repeatability of residual feed intake and indices of body composition in growing Columbia ewes fed the same diet.

Food Safety

Monitoring of pesticide residues in animal feeds from republic of Korea.

Bacillus amyloliquefaciens from UHT Organic Milk Produces Biofilm and Demonstrates Virulence Potential.

J. L. McKillip*, A. Grutsch, E. R. Wagner and C. Klug, Ball State University, Muncie, IN

Occurrence of aflatoxin M1 in UHT, pasteurized and powdered milk marketed in Hubei province (central China).

J. L. Xiong*, H. L. Zhou*, L. Y. Wu* and F. T. Meng*, 1Hubei Key Laboratory of Animal Nutrition and Feed Science, Wuhan Polytechnic University, Wuhan, China, 2Xiyang Engineering Research Center of Animal Medicine, Xiayang Vocational and Technical College, Xiayang, China

An aptamer-based biosensor for detection of aflatoxin M1.

X. Guo*, F. Wen*, N. Zheng*, S. Li, M. L. Fauconnier and J. Wang*, 1Ministry of Agriculture - Milk and Dairy Product Inspection Center, Beijing, China, 2State Key Laboratory of Animal Nutrition, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 3Ministry of Agriculture - Laboratory of Quality & Safety Risk Assessment for Dairy Products, Beijing, China, 4Chimie Générante et Organique, Gembloux Agro-Bio Tech, Université de Liège, Gembloux, Belgium
600 38 Individual and combined cytotoxicity assessment of zearalenone and ochratoxin A /alpha-zearalenol by full factorial design. 
N. Zheng1,2,3, Y. Gao1,2,3, H. Wang1 and J. Wang1,2,3, 1Ministry of Agriculture - Laboratory of Quality & Safety Risk Assessment for Dairy Products, Beijing, China, 2State Key Laboratory of Animal Nutrition, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 3Ministry of Agriculture-Milk Risk Assessment Laboratory, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 3College of Animal Science and Technology, Gansu Agricultural University, Lanzhou, China

601 39 Distribution and genetic characterization of the top clinically-relevant Shiga toxin-producing Escherichia coli in feedlot cattle. 
J. Hallewell1, K. Stanford2, T. Reuter3, L. Chui1, R. Johnson1, T. A. McAllister1, E. Topp1 and T. W. Alexander1, 1Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 2Alberta Agriculture and Forestry, Lethbridge, AB, Canada, 3Provincial Laboratory for Public Health, Edmonton, AB, Canada, 4Public Health Agency of Canada, Ottawa, ON, Canada, 5Agriculture and Agri-Food Canada, London, ON, Canada

602 40 Isolation and characterization of listeriaphages for control of growth of Listeria monocytogenes in dairy foods. 
S. H. Lee1, H. S. Lee1, S. Heo1, C. R. Lee1,2 and G. B. Kim1, 1Department of Animal Science and Technology, Chung-Ang University, Ansegong, The Republic of Korea, 2Feed Industry Research Institute, Korea Feed Association, Seoul, The Republic of Korea

603 41 Effects of feeding NaturSafe on foodborne pathogens in finishing beef heifers. 
K. M. Feye1, K. L. Anderson1, M. F. Scott1,2, K. L. Dorton2, D. L. Henry2, C. R. Belknap2, B. E. Depeebusch1 and S. A. Carlson1, 1Department of Biomedical Sciences, Iowa State University, Ames, 2Diamond V, Cedar Rapids, IA, 3Innovative Livestock Services, Inc., Great Bend, KS

604 42 Moxidectin residues in tissues of lambs submitted to three programs of gastrointestinal endoparasite control. 
A. G. Monteiro1, C. H. E. C. Poli1,2, M. A. M. Fernandes1, F. G. Reyes-Reyes1, C. J. A. Silva1, M. D. Bianchi1, S. Gilaverie1 and M. T. Peres1, 1Universidade Federal do Parana, Curitiba, Brazil, 2Utah State University, Logan, Utah, USA, 3Universidade Estadual de Campinas, Brazil, 4Instituto Federal de SC, Camboriú, Brazil, 5Universidade Federal de Santa Catarina, Brazil

605 43 Shiga toxin-producing Escherichia coli on cattle hides and bacterial transfer from hides to carcasses in Midwestern commercial beef slaughter operations. 
A. McKiearnan1, N. Cernicchiaro and M. Sanderson, Kansas State University, Manhattan

706 44 Differences in HDPE milk packaging performance under LED and fluorescent retail storage. 
K. N. Amin1, M. L. Johnson, J. B. Phillips, S. Duncan, H. Potts, S. F. O’Keefe, J. E. Marcy, and K. Mallikarjunan, Virginia Polytechnic Institute and State University, Blacksburg

Ruminant Nutrition: Plant-Derived Feed Additives I

1553 45 Supplementation with a blend of capsules and artificial sweetener alters milk yield and nutrient partitioning in lactating dairy cows. 
E. H. Wall1 and D. M. Bravo, Pancosma, Geneva, Switzerland

1554 46 Supplementation with rumen-protected capsicum oleoresin increases milk production and component yield in lactating dairy cows. 
E. H. Wall1 and D. M. Bravo, Pancosma, Geneva, Switzerland

1555 47 WS Effects of increasing sugar beets on steer backgrounding performance. 
I. McGregor1, C. M. Page, W. C. Stewart and M. Van Emon, Montana State University, Bozeman

1556 48 Effects of red grape pomace to adapt beef cattle to finishing diets and spoilage mitigation strategies. 
L. A. Pellarin1, J. O. Sartori1, P. R. B. Campanili1, L. A. Ovinge1, B. C. Bernhard1, B. J. Johnson1, J. C. Brooks1 and E. W. Hellman1, 1Texas Tech University, Lubbock, 2Texas A&M AgriLife Extension and Texas Tech University, Lubbock

1557 49 Effects of thyme (Thymus vulgaris) essential oil on feed intake and feeding behavior of Nellore steers. 
L. C. Roma Junior1, E. S. Castro Filho1, J. M. Bertocco Ezequiel1, M. Almeida1 and E. H. C. B. Van Cleef1, 1Sao Paulo’s Agency for Agribusiness Technology, Ribeirao Preto, Brazil, 2Sao Paulo State University, Jaboticabal, SP, Brazil, 3Sao Paulo State University, Department of Animal Science, Jaboticabal, SP, Brazil

1558 50 Effects of functional oils or monensin on dry matter digestibility, milk yield and composition of Holstein cows. 
F. P. Remô1, E. F. Jesus1, T. A. Del Valle1, G. D. Calomeni1, T. H. Silva1, C. S. Takiya1, T. H. A. Vendramini1, P. G. D. Paiva1, G. G. Silva1, A. Saran Netto1 and J. Torrent1, 1School of Veterinary Medicine and Animal Science, University of São Paulo, Pirassununga, Brazil, 2School of Agricultural and Veterinary Sciences, University of São Paulo, Jaboticabal, Brazil, 3School of Animal Science and Food Engineering, University of São Paulo, Pirassununga, Brazil, 4Oligos Agroindustry, Cascavel, Brazil

1559 51 Effect of rumen-protected Capsicum oleoresin on immune responses in lactating dairy cows experimentally challenged with lipopolysaccharide. 
J. Oh1, M. Harper1, F. Giallongo1, E. H. Wall2, D. M. Bravo3 and A. N. Hristov1, 1The Pennsylvania State University, University Park, 2Pancosma, Geneva, Switzerland
Effects of cinnamaldehyde on performance of post-weaned Holstein dairy heifers.
C. E. Chapman1, D. Ziegler2, H. Chester-Jones3, J. A. Clapper1 and P. S. Erickson1, 1University of New Hampshire, Durham, 2University of Minnesota Southern Research and Outreach Center, Waseca, 3South Dakota State University, Brookings

Effects of essential oils and exogenous enzyme in feedlot finishing diets high in flint ground corn at different particle sizes during the adaptation period.
M. A. P. Meschiatti1, J. M. M. D. Moraes1, T. S. Acedo1, L. F. M. Tamassia2, C. S. Cortinhas2, V. N. D. Gouvea2, J. R. Dórea1 and F. A. P. Santos1, 1University of São Paulo, Sao Paulo, Brazil, 2DSM Nutritional Products SA, Sao Paulo, Brazil, 3University of Wisconsin, Madison, 4University of São Paulo, Piracicaba, Brazil

Effects of essential oils and exogenous enzymes on intake, digestibility and rumen fermentation in finishing Nellore cattle.
M. A. P. Meschiatti1, L. A. Pellarin1, C. D. A. Batalha2, T. S. Acedo3, L. F. M. Tamassia3, C. S. Cortinhas3, V. N. D. Gouvea4, F. A. P. Santos5 and J. R. Dórea6, 1University of São Paulo, Sao Paulo, Brazil, 2University of Wisconsin, Madison, 3DSM Nutritional Products SA, Sao Paulo, Brazil, 4University of Wisconsin, Madison, 5University of São Paulo, Piracicaba, Brazil

Effect of inclusion of Acacia mearnsii tannin extract on nitrogen and energy balance in growing beef cattle fed a low protein-corn silage diet.
S. Capa de Avila1, G. V. Kozloski2, K. R. McLeod3 and D. L. Harmon3, 1University of Kentucky, Lexington, 2University of São Paulo, Piracicaba, Brazil, 3Federal University of Santa Maria, Brazil

Ruminant Nutrition: Fats, Fatty Acids and Energy I

Hepatic oxidation is responsive to prepartum energy and peripartum rumen protected choline supplementation.
V. Caprarulo1,2, T. L. Chandler, M. G. Zenobi, H. Schutz, A. Barton, C. R. Staples and H. M. White, 1Department of Dairy Science University of Wisconsin-Madison, 2Department of Health, Animal Science and Food Safety, University of Milan, Milan, Italy, 3Department of Animal Sciences, University of Florida, Gainesville, Balchem Corporation, New Hampton, NY

Rumen-protected methyl donors during the transition period: Hepatic short-chain acyl CoA concentration in response to supplemental methionine or choline.
Z. Zhou1, C. L. Girard2, B. Ouattara2, M. Vallati Riboni1, D. N. Luchini1 and J. J. Loo1, 1University of Illinois at Urbana-Champaign, 2Agriculture & Agri-Food Canada, Sherbrooke, QC, Canada, 3Adisseo S.A.S., Alpharetta, GA

Development and validity of a lipid accessibility index that quantifies reaction exposure of internal fatty acids in animal feeds.
T. C. Jenkins1, K. Murphy2 and R. Ward2, 1Clemson University, SC, 2Virtus Nutrition, LLC, Corcoran, CA, 3Cumberland Valley Analytical Services Inc., Hagerstown, MD

Comparison of flax oil with varying lipid supplements in dairy ration: A meta-analysis.
M. Leduc1,2, M. P. Létourneau Montminy1, R. Gervais1 and P. Y. Chouinard1, 1Département des Sciences Animales, Université Laval, QC, Canada, 2INAF, Université Laval, Quebec, QC, Canada

Milk bioactive fatty acids decrease in cows grazing pearl millet versus a cool-season pasture.
M. L. Bainbridge1, E. Egolf, J. W. Barlow, J. P. Alvez, J. Roman and J. Kraft, University of Vermont, Burlington

Effect of early lactation feeding strategy on production, metabolic and endocrine responses of primiparous dairy cows.
M. Carriquiry1, M. Cariani2, A. Jasinsky2, M. L. Adrien3 and D. A. Mattiauda2, 1Facultad de Agronomía, Universidad de la Republica, Montevideo, Uruguay, 2Facultad de Agronomía, Universidad de la Republica, Paysandu, Uruguay, 3Facultad de Veterinaria, Universidad de la Republica, Paysandu, Uruguay

Ratios of milk fatty acids accurately estimates plasma non-esterified fatty acid concentrations as an indicator of animal energy balance.
J. R. R. Dórea1, E. A. French2 and L. E. Armentano2, 1University of Wisconsin-Madison, 2DeLaval USA, Madison, WI

Effect of linseed oil supplementation on milk fatty acid profile of dairy cows fed diets based on red clover silage or corn silage.
F. Hassanat1, R. Gervais2 and C. Benchaar1, 1Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada, 2Département des Sciences Animales, Université Laval, Québec, QC, Canada

Characterization of rumen bacterial and protozoal fatty acid compositions from lactating Jersey cows offered alternative forage crops.
L. M. Cersosimo1, R. Tacoma1, S. Greenwood1, K. Juntwait2, A. F. Brito1 and J. Kraft1, 1University of Vermont, Burlington, 2University of New Hampshire, Durham
Effect of frequency of supplementation with Megalac-R on non-esterified fatty acids and blood urea nitrogen concentration in lactating beef cows.
M. E. Garcia-Ascolani1, T. M. Schulmeister1, M. Ruiz-Moreno1, D. D. Henry1, F. M. Ciriaco1, P. L. P. Fontes1, G. C. Lamb1, N. M. Long2 and N. DiLorenzo1, 1University of Florida, North Florida Research and Education Center, Marianna, 2Clemson University, SC

Supplementation of palm oil to lactating dairy cows fed a high fat diet during summer.
R. P. Melo1, L. P. Castro1, F. F. Cardoso1, E. F. Barbosa1, L. Q. Melo1, R. B. Silva1-2, R. A. N. Pereira1-2 and M. N. Pereira1-2, 1Universidade Federal de Lavras, Brazil, 2Better Nature Research Center, Ijaci, Brazil

Effects of dietary fat source on performance of lactating dairy cows fed a pre-mixed concentrate.
C. M. Ylioja1, C. Schulte2, R. A. Stock2 and B. J. Bradford1, 1Kansas State University, Manhattan, 2Cargill Corn Milling, Blair, NE

Effects of feeding different forms of polyunsaturated fatty acids on performance, plasma metabolites and milk fatty acid composition of dairy cows.
L. D. P. Sinedino1, R. R. C. Mello1, C. Lopera1, A. Vieira Neto1, M. G. Zenobi1, E. Block1, C. L. Preseault1, A. L. Lock4, C. R. Staples1, W. W. Thatcher1 and J. E. P. Santos1, 1University of Florida, Gainesville, 2Federal Rural University of Rio de Janeiro, Seropedica, Brazil, 3Arm & Hammer Animal Nutrition, Princeton, NJ, 4Michigan State University, East Lansing
How many pounds of feed does a pig need to eat in order to gain 1 pound? Find out inside!
Life, made easier

It’s milk. It’s growth. It’s animals feeding the hands that feed them.
Jefo is a circle of life.

### SYMPOSIA AND ORAL SESSIONS

**Triennial Growth and Development Symposium: New Perspectives on Intramuscular Adipose Tissue**

Chair: Gary J. Hausman, University of Georgia; Angela Canovas, University of Guelph  
Sponsor: ASAS  
8:00 AM - 5:00 PM  
150 G

<table>
<thead>
<tr>
<th>Time</th>
<th>Session</th>
</tr>
</thead>
<tbody>
<tr>
<td>8:00 AM</td>
<td>Introductory Remarks</td>
</tr>
</tbody>
</table>
| 8:15 AM | 785 Muscle gene expression patterns associated with differential intramuscular fat in cattle and markers for skeletal muscle growth rate and major cell types.  
B. P. Dalrymple*, CSIRO Agriculture, Brisbane, Australia |
| 9:00 AM | 786 Factors influencing bovine intramuscular adipose tissue development and cellularity.  
E. Albrecht1, L. Schering1, Y. Liu1, K. Komolka1, C. Kühn2, K. Wimmers3, and S. Maak4, 1Muscle Biology and Growth, Leibniz Institute for Farm Animal Biology, Dummerstorf, Germany, 2Leibniz Institute for Farm Animal Biology, Dummerstorf, Germany, 3Genome Biology, Leibniz Institute for Farm Animal Biology, Dummerstorf, Germany |
| 9:45 AM | 787 Growth and growth rate influences bovine intramuscular adipose tissue gene expression in a differential manner.  
C. R. Krehbiel1, P. A. Lancaster2, G. W. Horn3, J. D. Starkey4, E. D. Sharman5, and S. L. Roberts6, 1Oklahoma State University, Stillwater, 2Missouri State University, Springfield, 3Oklahoma Agricultural Experiment Station, Stillwater, 4Starkey Consulting Services, Gainsville, GA, 5Johnson Research, LLC, Parma, ID, 6Department of Agricultural Sciences, West Texas A&M University, Canyon |
| 10:20 AM | Break                                                                   |
| 10:50 AM | 788 Molecular mechanisms of bovine intramuscular fat deposition.  
M. Baik*, H. J. Kang, S. J. Park, and M. Y. Piao, Department of Agricultural Biotechnology, College of Agriculture and Life Sciences, Seoul National University, Seoul, The Republic of Korea |
| 11:30 AM | 789 Dedifferentiated fat cells: Potential involvement in intramuscular adipogenesis.  
M. S. Duarte1, R. Bueno1, M. V. Dodson2, and G. J. Hausman3, 1University of Lleida - Agrotenio Center, Spain, 2Universidade Federal de Viçosa, Viçosa, Brazil, 3Washington State University, Pullman, 4University of Georgia, Athens |
| 12:00 PM | 790 Metabolic programming and intramuscular adipogenesis.  
T. Gotoh*, Kyushu University, Takeita-city, Japan |
| 12:30 PM | Break                                                                   |
| 1:30 PM  | 791 Genetics and breeding for intramuscular fat and oleic acid content in pigs.  
J. Estany1, R. Ros-Freixedes2, M. Tor2, and R. N. Pena1, 1University of Lleida - Agrotenio Center, Spain, 2Universitat de Lleida, Spain |
| 2:10 PM  | 792 The genetic landscape of intramuscular fat content and composition in pigs.  
M. Amills*, Center for Research in Agricultural Genomics, Bellaterra, Spain |
| 2:50 PM  | 793 Statistical models and tools for Integration of omics data to uncover the genetic control of pork quality and growth traits.  
J. P. Steibel1, D. Velez-Irizarry1, S. Casiro1, and C. W. Ernst2, 1Department of Animal Science, Michigan State University, East Lansing, 2Michigan State University, East Lansing |
| 3:30 PM  | 794 Marbling: Management of cattle to maximize the deposition of intramuscular adipose tissue.  
S. B. Smith* and B. J. Johnson2, 1Texas A&M University, College Station, 2Texas Tech University, Lubbock |
| 4:10 PM  | 795 Linking from the farm to the table.  
M. R. McMorris*, Beef Improvement Opportunities, Guelph, ON, Canada |
| 5:30 PM  | Discussion                                                               |
Functional Annotation of Animal Genomes (FAANG)
ASAS-iSAg Joint Symposium
Chair: Chris Tuggle, Iowa State University
Sponsor: Illumina
8:30 AM - 4:30 PM
Grand Ballroom A

8:30 AM  Welcoming Remarks
8:35 AM  Introductory Remarks
8:40 AM  Sponsor’s Remarks
Andre Eggen, Illumina
8:45 AM  411  Important lessons from complex genomes.
9:25 AM  Discussion
9:40 AM  412  Causal inference of molecular networks integrating multi-omics data.
F. Peñagaricano*, University of Florida, Gainesville
10:05 AM  Break
10:35 AM  413  Genotypes to phenotypes: Lessons from functional variation in the human genome and transcriptome.
B. E. Stranger*, Section of Genetic Medicine, Department of Medicine, Institute of Genomics and Systems Biology, Center for Data Intensive Sciences, University of Chicago, Chicago, IL
11:20 AM  Discussion
11:35 AM  414  Recurrent chimeric transcripts in human and mouse.
S. Djebali1,2,3, B. Rodríguez Martín1, E. Palumbo1,2, D. D. Pervouchine1,2, A. Breschi1,2, C. Davis4, A. Dobin4, G. Alonso5, A. Rastrojo5, B. Aguado5, T. R. Gingeras4, and R. Guigó2,3, 1GenPhySE, INRA, Castanet-Tolosan, France, 2Universitat Pompeu Fabra (UPF), Barcelona, Spain, 3Bioinformatics and Genomics Programme, Centre for Genomic Regulation (CRG), Barcelona, Spain, 4Cold Spring Harbor Laboratory, Functional Genomics, Cold Spring Harbor, NY, 5Centro de Biología Molecular Severo Ochoa (CSIC - UAM), Madrid, Spain
12:00 AM  Lunch and Poster Viewing
12:55 PM  415  Improving genomic selection across breeds and across generations with functional annotation.
B. Hayes1, A. J. Chamberlain2, H. Daetwyler3, C. J. Vander Jagt2, and M. E. Goddard4, 1Department of Economic Development, Melbourne, Australia, 2Dairy Futures Cooperative Research Centre, Bundoora, Australia, 3Department of Economic Development, Jobs, Transport and Resources, Bundoora, Australia, 4Department of Primary Industries, Melbourne, Australia
1:35 PM  Discussion
1:50 PM  416  Integrating dynamic -omics responses for universal personalized medicine.
G. I. Mias*, Michigan State University, East Lansing
2:30 PM  Discussion
2:45 PM  Break
3:15 PM  417  A review of sequencing and assembly methods that enhance computational use.
W. C. Warren*, McDonnell Genome Institute, Washington University School of Medicine, St Louis, MO
3:55 PM  Updates on ongoing FAANG activities
Companion Animal Symposium: Behavior and the Human-Animal Bond
Chair: Brittany M. Vester Boler, Nestle Purina
Sponsor: George Fahey Appreciation Club
9:30 AM - 12:30 PM
150 E/F

9:30 AM  Introductory Remarks

9:40 AM  430  Cognitive assessment protocols for use with companion animals.
B. Milgram*, CanCog Technologies, Toronto, ON, Canada

10:10 AM  431  Objective evaluation of affective states in dogs.
R. T. S. McGowan*, Nestle Purina Research, St. Louis, MO

10:40 AM  Break

C. C. Croney*, Purdue University, W. Lafayette, IN

11:25 AM  433  2015 Corbin Award Winner: Behavior and training of companion and zoo animals.
C. L. Morris*, Iowa State University, Ames

11:55 AM  Panel Discussion

Lactation Biology
Chair: Thomas B. McFadden, University of Missouri
9:30 AM - 12:30 PM
155 B

9:30 AM  859  Differences in body condition of gilts that are maintained from mating to the end of gestation affect their mammary development.
C. Farmer1, M. Comi2, M. Vignola3, P. Charague4, C. R. A. Duarte5, and M. F. Palin1, 1Agriculture and Agri-Food Canada, Sherbrooke R & D Centre, Sherbrooke, QC, Canada, 2Dipartimento VESP A, Università Studi Milano, Milano, Italy, 3Trouw Nutrition, St-Elzéar, QC, Canada, 4Hypor Inc, Regina, SK, Canada, 5Departamento de Zootecnia, Universidade Estadual de Maringá, Maringá, Brazil

9:45 AM  860  Stem cells and cell hierarchy in the bovine mammary gland.
I. Barash1 and G. Rauner1,2, 1Volcani Center, Bet-Dagan, Israel, 2Hebrew University of Jerusalem, Jerusalem, Israel

10:00 AM  861  Optimal combination of histidine, lysine, methionine and leucine affect β-casein synthesis via mTOR signaling pathway in bovine mammary epithelial cells.
H. Gao1,2,3,4, N. Zheng1,2,5, Y. Zhang1,2,6, S. Wang1,2,6, X. Q. Zhou1,2,6, and J. Wang2,3,4, 1Ministry of Agriculture-Milk Risk Assessment Laboratory, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 2State Key Laboratory of Animal Nutrition, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 3College of Animal Science and Technology, Gansu Agricultural University, Lanzhou, China, 4College of Animal Science and Technology, Gansu Agricultural University, Lanzhou, China

10:15 AM  862  The goat (Capra hircus) mammary gland secretory tissue proteome as influenced by weight loss: A study using label free proteomics.
A. M. Almeida1,2, L. E. Hernandez-Castellano1, A. M. Ferreira1, P. Nanni1, J. Grossmann1, A. Argüello1, J. Capote1, G. Cat1, J. D. Lippolis1, and N. Castro1, 1Ross University School of Veterinary Medicine, Basseterre, Saint Kitts and Nevis, 2Instituto de Biologia Experimental e Tecnologica, Oeiras, Portugal, 3Veterinary Physiology, Vetsuisse Faculty University of Bern, Bern, Switzerland, 4Functional Genomics Center Zurich (FGCZ) - University of Zurich, Zurich, Switzerland, 5Department of Animal Science, Universidad de Las Palmas de Gran Canaria, Arucas, 35413, Las Palmas, Spain, 6Canarian Agronomic Science Institute, La Laguna, Spain, 7USDA-ARS, National Animal Disease Center, Ames, IA, 8Dep. Animal Science, University of Las Palmas de Gran Canaria, Arucas, Spain
Pre-calving and early lactation factors that predict milk casein and fertility in the transition dairy cow.
R. M. Rodney1,2, J. K. Hall1, C. T. Westwood1, P. Celi1, and I. J. Lean1,2, 1Scibus, Camden, Australia, 2University of Sydney, Camden, Australia, 3Halltech Services, Orange, Australia, 4Kimihi Research Centre, PGG Wrightson Seeds Limited, Lincoln, Canterbury, New Zealand, 5Faculty of Veterinary and Agricultural Sciences, the University of Melbourne, Parkville, Australia

Increasing blood 5-hydroxy-L-tryptophan concentration for prevention of periparturient hypocalcemia in dairy cows.
L. E. Hernandez-Castellano1,2, S. R. Weaver2, L. L. Hernandez2, and R. M. Bruckmaier1, 1Veterinary Physiology, Vetsuisse Faculty University of Bern, Bern, Switzerland, 2Department of Dairy Science, University of Wisconsin-Madison

Beta-hydroxybutyrate infusion affects glucose metabolism before and after parturition in dairy cows.
M. Zarrin1,2, L. Grossen-Rösti1, R. M. Bruckmaier1, and J. J. Gross1, 1Veterinary Physiology, Vetsuisse Faculty University of Bern, Bern, Switzerland, 2Department of Animal Science, Yasouj University, Yasouj, Iran

Impact of increasing dietary crude protein content on urinary nitrogen excretion and milk nitrogen secretion of lactating sows.
T. F. Pedersen1,2, C. Y. Chang1, T. S. Bruun2, and P. K. Theil1, 1Aarhus University, Tjele, Denmark, 2SEGES Pig Research Centre, Copenhagen, Denmark

Intramammary prednisolone affects the permeability of the blood-milk barrier during LPS and LTA induced mastitis in dairy cows.
S. K. Wall, L. E. Hernandez-Castellano, R. M. Bruckmaier, and O. Wellnitz1, Veterinary Physiology, Vetsuisse Faculty University of Bern, Bern, Switzerland

Regulation of sterol regulatory element binding protein-1 in bovine mammary epithelial cells.
L. Chen1 and B. A. Corl, Virginia Polytechnic Institute and State University, Blacksburg

Efficacy of dual x-ray absorptiometry as a means to measure mammary gland development in dairy heifer calves.
A. J. Geiger1, C. L. M. Parsons, and R. M. Akers, Virginia Polytechnic Institute and State University, Blacksburg

Percentages of milk fat, lactose and protein are affected by diurnal variations in dairy goats.
F. Rosa1, J. S. Osorio1, J. Lohakare1, M. Moridi2, A. Ferrari3, E. Trevisi3, and M. Bionaz1, 1Department of Animal and Rangeland Sciences, Oregon State University, Corvallis, 2University of Guilan, Rasht, Islamic Republic of Iran, 3University Cattolica del Sacro Cuore, Piacenza, Italy

**Physiology and Endocrinology Symposium: Pre- and Post-natal Impacts on Offspring Performance**

Chair: Kimberly A. Vonannahme, North Dakota State University
Sponsor: Elanco Animal Health
9:30 AM - 5:00 PM
151 G

9:30 AM 1159
Consequences of early nutritional insults on fetal hepatic glucose metabolism and insulin action.
S. R. Wesolowski1, University of Colorado School of Medicine, Aurora

10:20 AM 1160
Alterations in uteroplacental hemodynamics during melatonin supplementation in sheep and cattle.
C. O. Lemley2,3 and K. A. Vonannahme1, 1Mississippi State University, Mississippi State, 2North Dakota State University, Fargo

10:50 AM 1161
Development of the fetus and fetal reproductive tract in gilts subjected to heat stress from week 4 to 8 of gestation.
C. J. Bernhard1, T. J. Safranski, M. C. Lucy, W. R. Lamberson, S. G. Moore, L. M. Mayo, and R. Molina-Coto, University of Missouri, Columbia

11:05 AM
Break
11:20 AM 1162 The effects of under- and over-feeding ewes during gestation on offspring growth and stem cell function.
K. E. Govoni*, S. A. Reed, M. L. Hoffman, S. M. Pillai, and S. A. Zinn, Department of Animal Science, University of Connecticut, Storrs

11:50 AM 1163 Postnatal reproductive development and the lactocrine hypothesis.
F. F. Bartol*i, C. A. Barnell, and A. F. George, iAuburn University, Auburn, AL, iRutgers University, New Brunswick, NJ

V. C. Kennedy*i, J. J. Gaspers*i, B. Mordhorst*i, G. L. Stokka*i, M. L. Bauer*i, K. C. Swanson*i, and K. A. Vonnahme*i, North Dakota State University, Fargo, Department of Animal Sciences, North Dakota State University, Fargo

12:55 PM 1165 The effects of nutritional restriction on endogenous retroviruses and placentation during the first 50 d of gestation in beef heifers.
K. J. McLean*i, M. S. Crouse*i, M. R. Crosswhite*i, N. Negrin Pereira*i, A. K. Ward*i, C. R. Dahlen*i, L. P. Reynolds*i, P. P. Borowicz*i, B. W. Neville*i, and J. S. Caton*i, Department of Animal Sciences, North Dakota State University, Fargo, North Dakota State University, Fargo, North Dakota State University, Streeter

1:10 PM Concluding Remarks

Production, Management and the Environment: Lactation and Growth

Chair: April B. Leytem, USDA-ARS
9:30 AM - 12:30 PM
151 E/F

9:30 AM 1242 Health treatment costs of pure Holsteins in 8 high-performance Minnesota dairies.
M. R. Donnelly*i, A. R. Hazel*i, B. J. Heins*i, and L. B. Hansen*i, University of Minnesota, St. Paul, University of Minnesota West Central Research and Outreach Center, Morris

B. J. Heins*i, H. Chester-Jones*i, D. Ziegler*i, M. B. De Ondarza*i, S. E. Schuling*i, B. Ziegler*i, D. Schimek*i, N. Broadwater*i, and C. J. Sniffen*i, University of Minnesota West Central Research and Outreach Center, Morris, University of Minnesota Southern Research and Outreach Center, Waseca, Paradox Nutrition, West Chazy, NY, Hubbard Feeds Inc., Mankato, MN, University of Minnesota Extension, Rochester, Fencrest, LLC, Holderness, NH

10:00 AM 1244 Relationships between birth season versus early life starter intake and growth and first lactation performance of Holstein dairy cows.
B. J. Heins*i, D. Ziegler*i, D. Schimek*i, S. E. Schuling*i, B. Ziegler*i, H. Chester-Jones*i, M. B. De Ondarza*i, C. J. Sniffen*i, and N. Broadwater*i, University of Minnesota West Central Research and Outreach Center, Morris, University of Minnesota Southern Research and Outreach Center, Waseca, Hubbard Feeds Inc., Mankato, MN, Paradox Nutrition, West Chazy, NY, Fencrest, LLC, Holderness, NH, University of Minnesota Extension, Rochester

10:15 AM 1245 ADSA-EAAP Ph.D. Student Travel Award Presentation: Comparing milk yield between cows with different dry period lengths over multiple lactations.
A. Kok*i, C. van Middelaar*i, A. van Knegsel*i, B. Engel*i, H. Hogeweij*i, B. Kemp*i, and I. de Boer*i, Animal Production Systems group, Wageningen University, Netherlands, Adaptation Physiology Group, Wageningen University, Netherlands, Biometr, Wageningen University, Netherlands, Animal Production Systems group, Wageningen University, Netherlands

10:45 AM 1246 Economic impact of introducing automatic milking system on Canadian dairy farms.
J. Ferland*i, E. Vasseur*i, M. Duplessis*i, E. A. Pajot*i, and D. Pellerin*i, Université Laval, Québec, QC, Canada, McGill University, Sainte-Anne-de-Bellevue, QC, Canada, Véla, Sainte-Anne-de-Bellevue, QC, Canada, University of Calgary, Calgary, AB, Canada

11:00 AM 1247 Potential economic returns associated with weekly body condition scoring.
C. M. Truman*i and J. M. Bewley, University of Kentucky, Lexington

11:15 AM 1248 The influence of genetic potential on lactation curve and survival response of commercial dairy cattle to early lactation non-steroidal antiinflammatory (NSAID) drug administration.
A. J. Carpenter*i, J. Ehrlich*i, L. G. D. Mendoça*i, M. J. Brouk*i, and B. J. Bradford*i, Kansas State University, Manhattan, DairySight LLC, Argyle, NY
Management practices and dietary physically effective fiber are related to bulk tank milk de novo fatty acid concentration on Holstein dairy farms.
M. E. Woolpert1,2, H. M. Dann1, W. K. Cotanch1, C. Melilli3, L. E. Chase3, R. J. Grant1, and D. M. Barbano1, 1William H. Miner Agricultural Research Institute, Chazy, NY, 2University of Vermont, Burlington, 3Cornell University, Ithaca, NY, 1Cornell University, Department of Food Science, Northeast Dairy Foods Research Center, Ithaca, NY

Estimating the benefit:cost ratio of monensin supplementation.
K. A. Dolecheck* and J. M. Bewley, University of Kentucky, Lexington

TMR versus grazing supplemented with TMR out or into the grazing plot: Productive response.
D. A. Mattiauda1, J. P. Marchelli2, and P. Chilibroste1, 1Facultad de Agronomía, Universidad de la Republica, Paysandu, Uruguay, 2Facultad de Agronomía, Universidad de la Republica, Montevideo, Uruguay

Shearing during milking increases milk yield in dairy ewes.
A. Elhadi1, G. Caja2, A. A. K. Salama1,3, X. Such1, and E. Albanell1, 1Universitat Autonoma de Barcelona, Bellaterra, Spain, 2Group of Ruminant Research (G2R), Universitat Autonoma de Barcelona, Bellaterra, Spain, 3Animal Production Research Institute, Giza, Egypt

Ruminant Nutrition: Calves
Chair: Jill L. Anderson, South Dakota State University
9:30 AM - 12:30 PM

Effect of lactose inclusion in calf starters on rumen fermentation of weaned calves.
A. Saegusa1, K. Inouchi2, M. Ueno1, Y. Inabu1, S. Koike1, T. Sugino1, and M. Oba1, 1ZEN-RAKU-REN, Fukushima, Japan, 2ZEN-RAKU-REN, Nishi-shirakawa, Japan, 1Hokkaido University, Sapporo, Japan, 4Hiroshima University, Higashi-hiroshima, Japan, 5Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada

Methionine:lysine ratio for crossbred suckling calves fed milk replacer and an amino acid complex.
J. C. Chagas1, M. A. Ferreira1, M. R. Entjes2, J. S. Machado1, L. F. Costa e Silva1, and M. I. Marcondes*3, 1Universidade Federal Rural de Pernambuco, Recife, Brazil, 2VHL University of Applied Sciences, Leeuwarden, Netherlands, 3EMBRAPA, Juiz de Fora, Brazil, 4Universidade Federal de Vicosa, Vicosa, Brazil, 5Departamento de Zootecnia, Universidade Federal de Vicosa, Vicosa, Brazil

Effects of organic or inorganic Co, Cu, Ma, and Zn supplementation to weaned calves during preconditioning on their productive and health responses.
K. Lippolis1, R. F. Cooke1, L. G. T. da Silva2, K. M. Schubachi1, A. P. Brandao1,2, R. Marques1, C. K. Larson1, T. DelCurto1, and D. W. Bohnert1, 1Oregon State University-EOARC Burns, 2UNESP - FMVZ, Botucatu, Brazil, 3Zinpro Corporation, Eden Prairie, MN, 4Oregon State University-EOARC Union

Dynamics of prepartum β-carotene supplementation among cow, colostrum, and calf.
C. M. Prom2, M. A. Engstrom2, and J. K. Drackley1, 1University of Illinois at Urbana-Champaign, 2DSM Nutritional Products, LLC, Parsippany, NJ

Effect of supplementing increasing levels of RUP on growing performance in calves fed a silage-based diet.
C. R. Oney1, R. G. Bondurant, F. H. Hilscher, A. K. Watson, G. E. Erickson, J. C. MacDonald, and T. J. Klopfenstein, University of Nebraska-Lincoln

Evaluation of stay strong for new born dairy calves.
K. Froehlich1, and D. P. Casper2, 1South Dakota State University, Brookings, 2Dairy Science Department, South Dakota State University, Brookings
Effects of supplementing pasteurized waste milk with vitamins A, D and E on fat-soluble vitamin status, growth, and health of calves.
L. Blakely*, M. Kweh1, M. Poindexter1, R. L. Stuart2, and C. D. Nelson1, 1Department of Animal Sciences, University of Florida, Gainesville, 2Stuart Products Inc, Bedford, TX, 3University of Florida, Gainesville

Effect of phytopgenic compounds fed to preweaned calves.
B. G. Miller*1 and C. Scheider2, 1Biomin USA, Warrenton, MO, 2Biomin Holding GmbH, Herzogenburg, Austria

Ruminant Nutrition: Feed Additives II

Chair: Maurice Eastridge, The Ohio State University
Sponsor: Ajinomoto
9:30 AM - 12:30 PM
155 D

Optimal blood sampling time points to determine bioavailability of rumen-protected Met products using the plasma free AA dose-response method.
N. L. Whitehouse1, D. L. Chirgwin1, C. G. Schwab1, D. N. Luchini1, and A. F. Brito1, 1University of New Hampshire, Durham, 2Schwab Consulting, LLC, Boscohle, WI, 3Adisseo S.A.S., Alpharetta, GA

Effects of prophylactic supplementation with oral calcium boluses on peripartum calcium, urine pH and health in a commercial Jersey herd supplemented with anionic salts.
A. Valdecabres*, D. Rolle, A. Belaid, S. Rodriguez, and N. Silva-del-Río, Veterinary Medicine Teaching and Research Center, University of California Davis, Tulare, CA

Effects of supplemental zinc sulfate concentrations on growth performance and carcass characteristics of feedlot heifers, and in vitro ruminal fermentative activity.
C. L. Van Bibber-Krueger*, C. I. Vahl, and J. S. Drouillard, Kansas State University, Manhattan

Evaluating the effects of an injectable trace mineral product on steers raised in a natural beef feedlot program.
E. K. Niedermayer*, O. N. Genther-Schroeder, and S. L. Hansen, Iowa State University, Ames

Interactive effects of supplemental Zn sulfate and ractopamine hydrochloride on growth performance, carcass traits, and plasma urea nitrogen in feedlot heifers.
C. L. Van Bibber-Krueger*, J. M. Gonzalez1, R. G. Amachawadi1, H. M. Scott1, and J. S. Drouillard1, 1Kansas State University, Manhattan, 2Texas A&M University, College Station

SafeGain (ruminally-protected lysine) for growing beef cattle.
V. De Aguiar Veloso*1, C. L. Van Bibber-Krueger1, K. Karges2, and J. S. Drouillard1, 1Kansas State University, Manhattan, 2H.J. Baker, Animal Health and Nutrition Division, Little Rock, AR

Break

Effects of rotating antibiotic and ionophore feed additives on enteric methane and rumen microbial populations of steers consuming a high forage diet.
W. L. Crossland1, L. O. Tedeschi1, T. R. Callaway2, M. D. Miller1, and W. B. Smith1, 1Texas A&M University, College Station, 2USDA-ARS, College Station, TX, 3Texas A&M AgriLife Research, Overton

Effects of supplementing lactating dairy cow ration with sodium sesquicarbonate on reticulorumen pH, rumination, and dry matter intake.
M. L. Jones*, J. D. Clark1, N. A. Michael1, and J. M. Bewley1, 1University of Kentucky, Lexington, 2Arm & Hammer Animal Nutrition, Princeton, NJ

Comparison of Titanium 5 PH-M versus Titanium 5 plus NUPLURA PH with the presence or absence of monensin on health and performance of newly received feedlot calves fed RAMP.
R. M. Jones1, C. J. Bitner1, F. H. Hilbers1, R. A. Stock1, and G. E. Erickson1, 1University of Nebraska-Lincoln, 2Cargill, Blair, NE

Effect of Bovamine on performance of lactating dairy cows.
C. Dickey*1 and M. Eastridge2, 1The Ohio State University, Columbus, 2The Ohio State University, Columbus

Effects of rumen-protected choline (RPC) supplementation to periparturient dairy cows did not depend upon prepartum energy intake.
M. G. Zenobi*1, R. Gardina1, A. L. G. Dias1, J. E. Zuniga1, R. Moreira1, B. A. Barton2, J. E. P. Santos2, and C. R. Staples1, 1Department of Animal Sciences, University of Florida, Gainesville, 2Balchem Corporation, New Hampton, NY, 3University of Florida, Gainesville
Ruminant Nutrition: Microbiology, Fermentation and Feeding
Chair: Antonio Faciola, University of Nevada
9:30 AM - 12:30 PM
155 E
Breeding and Genetics: Genomic Selection and GWAS

**313** 1 Identification of causative genomic region for carcass weights of cattle.

**314** 2 Introgression of the Belgian Blue Myostatin variant into Nellore cattle: Effects of double muscling on birth weight and calving ease.
G. Nogueira*, K. S. Paulussi, A. T. H. Utsunomiya, Y. T. Utsunomiya, A. Almeida, A. Tanuri, T. Santos and R. Alonso; 1 UNESP, Aracatuba-SP, Brazil, 2UNESP Univ Estadual Paulista, Jaboticabal, Brazil, 3Deoxi, Aracatuba-SP, Brazil, 4UFRRJ, Rio de Janeiro-RJ, Brazil

**315** 3 Genomic-polygenic and polygenic parameters and prediction trends for growth and reproduction traits in an Angus-Brahman multibreed population.
M. A. Elzo*, R. Mateescu, M. G. Thomas, D. D. Johnson, D. O. Rae, J. D. Wasdin, M. D. Driver and J. D. Driver; 1University of Florida, Gainesville, 2Department of Animal Sciences, Colorado State University, Fort Collins

**316** 4 Genome-enabled prediction of genetic values of growth traits using artificial neural networks.
S. O. Peters*, M. Sinecen, M. G. Thomas, I. G. Iimmunor and K. Kizilkaya; 1Department of Animal Science, Berry College, Mount Berry, GA, 2Adnan Menderes University, Aydin, Turkey, 3Department of Animal Sciences, Colorado State University, Fort Collins, 4Animal Genetics and Genomics Laboratory, Cornell University, Ithaca, NY

**317** 5 Molecular breeding values distribution in slick male and female senepol cattle differing In musculature.
C. L. Gonzalez-Berríos*, A. Rivera-Serrano, A. Casas-Guérnica, T. Sonstegard, M. Pagán-Morales; 1Department of Animal Science, University of Puerto Rico, Mayaguez, Puerto Rico, 2Recombinetics Inc., St Paul, MN

**318** 6 PRUNE2 gene has a potential effect on residual feed intake in Nelore cattle.
A. O. D. Lima*, P. S. N. Oliveira, P. C. Tizioto, A. L. Somavilla, W. J. S. Diniz, J. V. D. Silva, S. C. S. Andrade, C. Boschiero, A. S. M. Cesar, M. M. Souza, M. I. P. Rocha, J. Afonso, C. E. Bass, M. A. Madada, G. B. Mourao, L. L. Coutinho; 1Federal University of Sao Carlos, Sao Carlos, Brazil, 2Embrapa Southeast Livestock, Sao Carlos, Brazil, 3Universidade Estadual Paulista, Júlio de Mesquita Filho, Jaboticabal, Brazil, 4Animals and Evolutionary Biology Department – IB, University of São Paulo, São Paulo, Brazil, 5Department of Animal Science, University of São Paulo/ESALQ, Piracicaba, Brazil, 6Animal Biotechnology Laboratory - ESALQ, University of São Paulo, Piracicaba, Brazil, 7Embrapa Pecuária Sudeste, São Carlos, Brazil

**319** 7 A genome-wide association study for changes in dry matter intake due to temperature variation in an admixed beef cattle population.
R. Ghebrewold* and M. L. Spangler; 1University of Nebraska-Lincoln

**320** 8 An international effort to improve feed efficiency and reduce methane emissions in dairy cows through genomics.
A. M. Wilson*, A. M. Butty, C. Baes, A. Cánovas, M. P. Coffey, E. E. Connor, M. De Pauw, B. Gredler, E. Goddard, G. Haitu, V. R. Osborne, J. E. Pryce, M. Sargolzaei*, F. S. Schenkel, P. Stothard, E. Wall, Z. Wang, T. C. Wright and F. Miglior; 1Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada, 2SRUC, Edinburgh, United Kingdom, 3USDA-ARS, Animal Genomics and Improvement Laboratory, Beltsville, MD, 4University of Alberta, Edmonton, AB, Canada, 5Qualitas AG, Zug, Switzerland, 6Department of Food, Agriculture and Economic Resources, Government of Guelph, Canada, 7University of Guelph, ON, Canada, 8Department of Economic Development, Jobs, Transport and Resources, Bundooora, Australia, 9Semex Alliance, Guelph, ON, Canada, 10Livestock Genetec, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 11Ontario Ministry of Agriculture, Food and Rural Affairs, Guelph, ON, Canada, 12Canadian Dairy Network, Guelph, ON, Canada

**321** 9 Effect of diet energy level and genomic residual feed intake on dairy heifer performance.
K. Williams*, K. A. Weigel, W. K. Coblenz, N. M. Esser, H. Schlesser, P. Hoffman, H. Su and M. Akins; 1University of Wisconsin-Madison, 2Department of Dairy Science University of Wisconsin-Madison, 3US Dairy Forage Research Center, Marshfield, WI, 4University of Wisconsin, Marshfield, 5University of Wisconsin-Extension, Marathon County, Wausau, WI, 6Vita Plus Corporation, Madison, WI
Genomic prediction for feed efficiency traits based on 50K and imputed high density SNP genotypes in multiple breed populations of Canadian beef cattle.
C. Li1,2, L. Chen1, M. Vinsky2, J. Crowley1, S. P. Miller1,4, G. Plastow1, J. Basarab1 and P. Stothard1, 1Livestock Genomics, Department of Agricultural, Food and Nutritional Science, University of Alberta, Edmonton, AB, Canada, 2Lacombe Research and Development Centre, Agriculture and Agri-Food Canada, Lacombe, AB, Canada, 3Invermay Agricultural Centre, AgResearch Ltd., Mosgiel, New Zealand, 4Centre for the Genetic Improvement of Livestock, University of Guelph, ON, Canada, 5Lacombe Research Centre, Alberta Agriculture and Forestry, Lacombe, AB, Canada

Use of multivariate statistical analyses to preselect SNP markers for GWAS on residual feed intake in dairy cattle.
C. Dimaro1,1, E. Manca1, A. Rossoni2, E. Santus2, M. Cellesi3 and G. Gaspa3, 1Università di Sassari, Italy, 2ANARB, Italian Brown Cattle Breeders’ Association, Bussolello (VR), Italy, 3Dipartimento di Agraria, University of Sassari, Sassari, Italy

Breed base representation in dairy animals of five breeds.
H. D. Norman1, P. M. VanRaden2, J. H. Megonigal1, J. W. Dürr1 and T. A. Cooper2, 1Council on Dairy Cattle Breeding, Bowie, MD, 2Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD

Genome-wide association study and accuracy of genomic prediction for teat number in Duroc pigs using genotyping by sequencing.
C. Tan1,2, Y. Da2, Z. Wu1, D. Liu3, X. He1,2, N. Li1 and X. He1, 1State Key Laboratory for Agrobiotechnology, China Agricultural University, Beijing, China, 2Department of Animal Science, University of Minnesota, Saint Paul, 3College of Animal Science, South China Agricultural University, Guangzhou, China

Genome-wide association study for supernumerary teats in Swiss Brown Swiss Cattle reveals LGR5 as a major gene on chromosome 5.
A. M. Butty1,2, M. Frischknecht2,2, B. Gredler2, C. Baes3, S. Neuenschwander4, J. Moll2, A. Bieber2 and F. Seefried2, 1Centre for Genetic Improvement of Livestock, University of Guelph, ON, Canada, 2Qualitas AG, Zug, Switzerland, 3School of Agricultural, Forest and Food Sciences, Bern University of Applied Sciences, Zollikofen, Switzerland, 4Unit of Animal Genetics, Institute of Animal Sciences, Swiss Federal Institute of Technology, Zurich, Switzerland, 5Department of Animal Science, Research Institute of Organic Agriculture (FiBL), Frick, Switzerland

Genomic and polygenic evaluations for milk and fat yields in Holstein upgraded Thai dairy cattle.
D. Jattawa1, M. A. Elzo1, S. Koonawootrittriron1 and T. Siwanasoppe1, 1University of Florida, Gainesville, 2Kasetsart University, Bangkok, Thailand

Genome-wide association study for loci associated with digital dermatitis and pododermatitis circumscripta in Holstein cattle.
A. M. Oberbauer1, A. L. Danner1, J. M. Belanger1, T. R. Famula1 and J. M. Heguy2, 1Department of Animal Science, University of California-Davis, 2UCCE Stanislaus and San Joaquin Counties, Modesto, CA

Genome-wide association study for somatic cell score in Russian Holstein cattle population.
A. A. Sermyagin*, E. A. Gladyr* and N. A. Zinovieva, L.K.Ernst Institute of Animal Husbandry, Moscow, Russian Federation

Genome-wide association study of Milk Coagulation Properties in Dairy Sheep.
G. Gaspa1, J. Serdino1, M. G. Manca1, S. Sorbolini2, R. Negrini2, C. Dimaro1 and N. P. P. Macciotta1,1, 1Dipartimento di Agraria, University of Sassari, Italy, 2Associazione Italiana Allevatori, Roma, Italy, 3University of Sassari, Italy

Genetic markers identification and genotyping for resistance to internal parasites in sheep and goat infected with Haemonchus contortus.
Z. M. Estrada Reyes1, A. L. Goetsch2, T. A. Gipson2, Z. Wang3, M. Rolf4, T. Sahle1, R. Puchala2, S. Zeng3 and R. Mateescu1, 1University of Florida, Gainesville, 2American Institute for Goat Research, Langston University, Langston, OK, 3Langston University, Langston, OK, 4Oklahoma State University, Stillwater

Genomic analysis of lactation persistency in four breeds of dairy cattle.
J. B. Cole1, D. J. Null1 and K. L. Parker Gaddis1, 1Animal Genomics and Improvement Laboratory, USDA-ARS, Beltsville, MD, 2Department of Animal Sciences, University of Florida, Gainesville

Genome-wide association study for tick count and infection level of Babesia bovis traits in Angus cattle.
L. Cavani1, C. H. Santana1, R. Giglioti1, T. B. Bihassi1, M. C. D. S. Oliveira1, R. Carvalheiro1 and H. N. Oliveira1, 1State University of São Paulo, Faculty of Agriculture and Veterinary Sciences, Jaboticabal, Brazil, 2São Paulo State Foundation, São Paulo, Brazil, 3Embrapa Southeast Livestock, São Carlos, Brazil
Identification of loci associated with susceptibility to bovine paratuberculosis using imputed genotypes based on whole genome sequencing.
J. N. Kiser, J. L. Huff, S. N. White, J. F. Taylor and H. L. Neibergs, Department of Animal Science, Washington State University, Pullman, University of Missouri, Columbia, USDA-ARS, Animal Disease Research Unit, Pullman, WA

Joint SNP-haplotype analysis for genomic selection based on the invariance property of GBLUP and GREML to duplicate SNPs.
Y. Da, C. Tan and D. Parakapenka, Department of Animal Science, University of Minnesota, Saint Paul, Key Laboratory for Agrobiotechnology, China Agricultural University, Beijing, China

Practical approximation of accuracy in genomic breeding values for a large number of genotyped animals.

Animal Health: General Health

A new protocol for the isolation of key recombinant proteins in livestock production using lactic acid bacteria as a cell factory.
L. Gifre, O. Cano-Garrido, F. Fàbregas, J. Seras-Franzoso, R. Rocca, N. Ferrer-Miralles, A. Villaverde, A. Bach, A. Aris and E. Garcia-Fruitós, Department of Ruminant Production, IRTA, Caldes de Montbui, Spain, Departament de Genetica i de Microbiologia, UAB, Cerdanyola del Valles, Spain, CIBER de Bioingenieria, Biomateriales y Nanomedicina (CIBER-BBN), Cerdanyola del Valles, Spain, Insttitut de Biotecnologia i de Biomedicina, UAB, Cerdanyola del Valles, Spain, Cibbim-Nanomedicine, Hospital Vall d’Hebron, Institut de Recerca de la Vall d’Hebron (VHIR), Barcelona, Spain, ICREA, Barcelona, Spain

The negative effects of electromagnetic field exposure in male New Zealand White rabbits.
O. Yıldız-Gulay, M. S. Gulay, A. Balıç and A. A. A. Mehtem Akif Ersoy University, Burdur, Turkey, Sakarya Research Hospital, Sakarya, Turkey

Embracing innovation in the animal drug approval process.
D. M. Sholly and C. Taylor-Edwards, U.S. Food and Drug Administration/CVM, Rockville, MD

Regulation of animal drugs and foods in the 21st century: Enhancing communication among industry, academics, regulators, and the public.
C. Taylor-Edwards and D. M. Sholly, U.S. Food and Drug Administration/CVM, Rockville, MD

Exploring a new presentation form of recombinant proteins for animal production.
O. Cano-Garrido, S. Parés, A. Sánchez-Chardi, L. Gifre, N. Ferrer-Miralles, A. Natalello, R. Cubarsi, A. Bach, A. Villaverde, A. Aris and E. Garcia-Fruitós, Institut de Biotecnologia i de Biomedicina, UAB, Cerdanyola del Valles, Spain, Departament de Genetica i de Microbiologia, UAB, Cerdanyola del Valles, Spain, CIBER de Bioingenieria, Biomateriales y Nanomedicina (CIBER-BBN), Cerdanyola del Valles, Spain, Departament de Matemàtica Aplicada IV. Universitat Politècnica de Catalunya, Barcelona, Spain, ICREA, Barcelona, Spain, IRTA, Caldes de Montbui, Spain

Reduced severity of histological lesions in mink selected for tolerance to Aleutian mink disease virus infection- A field survey.
A. H. Farid and L. E. Ferns, Department of Animal Science, Dalhousie University Faculty of Agriculture, Truro, NS, Canada, Pathology Laboratory, Veterinary Services, Nova Scotia Department of Agriculture, Truro, NS, Canada

Type of blood tube affects haptoglobin concentration when analyzed with a colorimetric assay.
M. A. Campbell, J. W. Darrah and H. M. Dunn, William H. Miner Agricultural Research Institute, Chazy, NY, University of Vermont, Burlington

Health and production benefits of feeding cowpeas to goats.

Exposure of bovine blood to pathogen associated and non pathogen associated molecular patterns results in transcriptional activation.
K. Ekwemalor, S. Adjei-Fremah, E. Asiama, H. Ismail and M. Worku, North Carolina Agricultural and Technical State University, Greensboro

Prevalence of Brucella suis in hunting dogs in Hawai‘i.
B. S. McNeill, J. Odani, R. Jha and H. M. Zaleski, University of Hawaii at Manoa, Honolulu
Pulmonary arterial pressure in yearling Angus cattle managed at high altitude: Study of a non-synonymous SNP in the oxygen-dependent degradation domain of the endothelial PAS domain-containing protein 1 gene.

Wang², ¹College of Engineering, China Agricultural University, Beijing, China, ²Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, ⁶College of Animal Science and Technology, Northwest A&F University, Yangling, China
Effect of purple prairie clover (Dalea purpurea Vent.) and its condensed tannins on nutrient intake, digestibility and growth performance of lambs.
K. Peng*1,2, D. C. Shirley3, Z. Xu3, Q. Huang2,4, T. A. McAllister2, A. V. Chaves3, S. Acharya2, S. Wang1 and Y. Wang5,
1College of Engineering, China Agricultural University, Beijing, China, 2Lethbridge Research and Development Centre, Agriculture and Agri-Food Canada, Lethbridge, AB, Canada, 3The University of Sydney, Faculty of Veterinary Science, School of Life and Environmental Sciences, Sydney, Australia, 4College of Animal Science and Technology, Northwest A&F University, Yangling, China

Effect of dietary polyphenol, protected amino acid and crude protein levels on in vitro rumen fermentation and crude protein digestibility.
B. Choi1, J. Yang1, C. Ryu1, S. J. Shin1, Y. Kim1, J. Heo2, S. Cho1 and N. J. Choi1, 1Chonbuk National University, Jeonju-si, The Republic of Korea, 2Microbial Institute for Fermentation Industry, Sunchang-gun, The Republic of Korea, 3CALS Co., Ltd, Seongnam-si, The Republic of Korea

The effect of addition of mulberry leaves silage in the diet of beef cattle on their growth and slaughter performance.
H. Wu*, Q. Meng, L. Ren and Z. Zhou, China Agricultural University, Beijing, China

Supplementation of Korean honeysuckle (Lonicera vesicaria) extract in timothy hay on in vitro ruminal fermentation.
I. D. Lee1, S. K. Lee2, S. Y. Yang1, S. S. Lee1 and J. S. Eun1, 1Division of Applied Life Science, Gyeongsang National University, Jinju, The Republic of Korea, 2Institute of Agriculture and Life Science, Gyeongsang National University, Jinja, The Republic of Korea, 3Department of Animal, Dairy, and Veterinary Sciences, Utah State University, Logan

Effects of an extract of plant flavonoids from Citrus aurantium on performance, eating and animal behavior, ruminal health, and carcass yield in Holstein bulls fed high-concentrate diets.
M. Paniagua5, F. J. Crespo2, A. Bach3,4 and M. Devant*1, 1IRTA - Department of Ruminant Production, Caldes De Montbui, Spain, 2Interquim SA, Barcelona, Spain, 3ICREA, Barcelona, Spain, 4IRTA, Caldes de Montbui, Spain, 5Quimidroga, Barcelona, Spain

A blend of cinnamon aldehyde, eugenol and capsicum oleoresin improves milking performance in lactating dairy cows.
C. Oguey* and E. H. Wall, Pancosma, Geneva, Switzerland

Evaluation of a proprietary blend of essential oil and cobalt on a commercial dairy.
O. J. Kuester*, South Dakota State University, Brookings

Effects of feeding functional oils or monensin on feedlot performance and carcass traits of Nellore cattle.
A. C. Melo1,2, M. C. Pereira1, A. L. Rigueiro1, D. H. M. Watanabe1, M. M. Squizatti1, L. A. Tomaz1, J. S. Dellaquac, O. A. Souza1, P. F. Santi1, A. L. J. Lelis1, A. F. Toledo1 and D. D. Millen1, 1São Paulo State University, Dracena, Brazil, 2São Paulo State Foundation, São Paulo, Brazil, 3São Paulo State University, Botucatu, Brazil

Influence of tannins extract and monensin supplementation on performance of feedlot heifers in Argentina.
C. Cabral1, A. Lopez Du Silv12, J. J. Couderc3, D. Colombatto4 and R. Barajas5, 1Indiano, S.A., Buenos Aires, Argentina, 2Feedlot Don Corral de Corijonius S.A., Buenos Aires, Argentina, 3Novet S.A, Buenos Aires, Argentina, 4Universidad de Buenos Aires, Argentina, 5FMVZ-Universidad Autónoma de Sinaloa, Culiacan, Mexico

Ruminant Nutrition: Fats, Fatty Acids and Energy II

Milk production responses to palmitic acid supplementation when fed as fatty acids or triglycerides.
J. de Souza* and A. L. Lock, Michigan State University, East Lansing

Comparison of a palmitic acid-enriched triglyceride supplement and a calcium salts of palm fatty acids supplement on milk production responses of dairy cows.
J. de Souza* and A. L. Lock, Michigan State University, East Lansing

Changes in milk odd and branched-chain fatty acids during induction and recovery from biohydrogenation-induced milk fat depression.
E. Palmer1, M. Baldwin1, D. E. Rico2 and K. J. Harvatine1, 1The Pennsylvania State University, University Park, 2Université Laval, Québec, QC, Canada

Dynamics of enrichment of omega-3 fatty acids in plasma lipid fractions following a bolus dose in dairy cows.
N. L. Urrutia*1, M. Baldwin, J. Y. Ying2, S. R. McKinney and K. J. Harvatine, 1The Pennsylvania State University, University Park, 2The Pennsylvania State University, State College

Intravenous nicotinic acid suppresses adipose tissue lipolysis in Holstein dairy cows.
A. N. Davis*, J. L. Clegg and J. W. McFadden, West Virginia University, Morgantown, WV
Ruminal metabolism of fatty acids from fish oil or algae in steers fed a finishing diet.
A. Pesqueira*, University of Kentucky, Lexington

Increases in milk fat yield are maintained with prolonged palmitic acid supplementation in mid-lactation dairy cows.
A. T. Mathews1, J. E. Rico2, N. T. Sprenkle1, A. L. Lock2 and J. W. McFadden1, 1West Virginia University, Morgantown, WV, 2Michigan State University, East Lansing

Feedlot performance of Nellore bullocks fed with two different types of ruminally protected fat.
F. D. A. Nascimento1, N. C. D. Silva1, F. P. Monção1, R. D. L. Pacheco3, B. J. Johnson4, F. D. D. Resende1 and G. R. Siqueira1, 1UNESP - Univ Estadual Paulista, Jaboticabal, Brazil, 2Empresa Mato-grossense de Pesquisa, Assistência e Extensão Rural-EMPAER-MT, Campo Grande, Brazil, 3Texas Tech University, Lubbock, 4Agência Paulista de Tecnologia dos Agronegócios, Colina, Brazil

Studies on different energy density of close-up diets on energy metabolism and lactation performance in Montbeliarde-sired crossbred holstein cows.
S. Dong, Z. Cao, S. Li and Y. J. Wang*, State Key Laboratory of Animal Nutrition, Beijing Engineering Technology Research Center of Raw Milk Quality and Safety Control, College of Animal Science and Technology, China Agricultural University, Beijing, China

Prepartum body condition score and plane of nutrition affect the hepatic transcriptome during the transition period in grazing dairy cows.
M. Vailati Riboni1, S. Meier2, C. Burke2, J. K. Kay2, M. D. Mitchell3, C. G. Walker2, M. A. Crookenden4, A. Heiser4, S. L. Rodríguez Zas1, J. R. Roche2 and J. J. Loor1, 1University of Illinois at Urbana-Champaign, 2DairyNZ, Hamilton, New Zealand, 3University of Queensland, Australia, 4AgResearch, Palmerston North, New Zealand

**Poster Session XIV**

8:15 AM - 9:15 AM
Exhibit Hall A/B

### Companion Animal Biology

Ehrlichia canis in canines from Culiacan, Sinaloa, Mexico.

Effect of dietary composition over food preferences of dogs.
J. Figueroa, S. A. Guzmán-Pino, S. Morales and C. Muñoz, Universidad de Chile, Santiago, Chile

Hind limb kinematics of the Weimaraner at the trot.
L. Carlisle1, M. C. Nicodemus1 and K. Slater2, 1Mississippi State University, Mississippi State, 2Banfield Pet Hospital, Magnolia

The effect of source and drying process on amino acid composition and protein quality of dried poultry used in high quality pet diets and select human foods.
L. M. Molnar1, C. G. Aldrich1, S. Beyer1, C. K. Jones1 and R. L. Dake2, 1Kansas State University, Manhattan, 2American Dehydrated Foods, Springfield, MO

The amino acid composition and protein quality of various poultry and vegetable proteins commonly used in the production of dog and cat diets.
R. A. Donadelli1, C. G. Aldrich1, C. K. Jones1, R. S. Beyer1 and R. L. Dake2, 1Kansas State University, Manhattan, 2American Dehydrated Foods, Springfield, MO

The effect of Miscanthus grass as a fiber source in cat diets on nutrient utilization and stool consistency.
R. A. Donadelli1, C. G. Aldrich and I. C. Alvarenga, Kansas State University, Manhattan

The effect of feed form on diet digestibility and cecal fermentation in rabbits.
I. C. Alvarenga1, C. G. Aldrich1 and M. Kohles1, 1Kansas State University, Manhattan, 2Oxbow Animal Health, Murdock, NE
Lactation Biology

840 8 Duration of lactation in first-parity sows: Does it affect piglet growth in second parity?
C. Farmer*1, M. Amezcua2, R. M. Bruckmaier1, O. Wellnitz1 and R. Friendship1, 1Agriculture and Agri-Food Canada, Sherbrooke R & D Centre, Sherbrooke, QC, Canada, 2Department of Population Medicine, Ontario Veterinary College, University of Guelph, ON, Canada

841 9 Effects of glucose and amino acids on casein synthesis via JAK2/STAT5 signaling pathway in bovine mammary epithelial cells.
M. Zhang1,2,3, S. Zhao1,2,4, H. Gao1,2,4, C. Luo1,2,3, S. Wang1,2,3, N. Zheng1,2,3 and J. Wang1,2,3, 1Ministry of Agriculture-Milk Risk Assessment Laboratory, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 2State Key Laboratory of Animal Nutrition, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 3Ministry of Agriculture-Milk and Dairy Product Inspection Center, Beijing, China, 4College of Animal Science and Technology, Gansu Agricultural University, Lanzhou, China

842 10 Repeated mammary tissue collections during lactation have no impact on cow performance.
X. Weng1, A. P. A. Monteiro1, J. Guo1, B. M. S. Ahmed1, J. K. Bernard1, J. DeFrain1, G. E. Dahl1 and S. Tao1, 1University of Georgia, Tifton, 2University of Florida, Gainesville

843 11 Lack of glucose and amino acids suppresses protein synthesis of bovine mammary epithelial cells by activating AMPK and inhibiting mTORC1 signaling pathways.
S. Wang1,2,3, S. Zhao1,2,4, H. Gao1,2,4, M. Zhang1,2,3, N. Zheng1,2,3, Y. Zhang1,2,3, S. Yan4 and J. Wang1,2,3, 1Ministry of Agriculture-Milk Risk Assessment Laboratory, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 2State Key Laboratory of Animal Nutrition, Institute of Animal Science, Chinese Academy of Agricultural Sciences, Beijing, China, 3Ministry of Agriculture-Milk and Dairy Product Inspection Center, Beijing, China, 4College of Animal Science, Inner Mongolia Agricultural University, Hohhot, China

844 12 Genome wide association analysis and pathways enrichment for lactation persistency in Canadian Holstein cattle.
D. N. Do1,2, N. Bissonnette1, P. Lacasse1, M. Sargolzaei3,4, F. Miglior4,5, X. Zhao2 and E. M. Ibeagha-Awemu1, 1Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada, 2Department of Animal Science, McGill University, Montreal, QC, Canada, 3Semex Alliance, Guelph, ON, Canada, 4Centre for Genetic Improvement of Livestock, Department of Animal Biosciences, University of Guelph, ON, Canada, 5Canadian Dairy Network, Guelph, ON, Canada

845 13 Effect of 17β-estradiol on milk production, hormone secretion and mammary gland gene expression of dairy cows.
J. J. Tong1, I. M. Thompson2 and P. Lacasse2, 1Department of Clinical Veterinary Medicine, College of Veterinary Medicine, Northeast Agricultural University, Harbin, China, 2Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada

846 14 Estimation of quarter vs. composite colostrum composition via Brix refractometry, specific gravity, and visual color appearance in dairy cows.
J. J. Gross1, E. C. Kessler and R. M. Bruckmaier, Veterinary Physiology, Vetsuisse Faculty University of Bern, Switzerland

847 15 Effects of increasing residual milk on milk yield and composition.
L. L. Hernandez1, V. J. McKeon2, E. L. Endres2, A. de Bruijn2, A. Kleinhaus2 and D. J. Reinemann2, 1Department of Dairy Science, University of Wisconsin-Madison, 2University of Wisconsin-Madison

848 16 Nutrient composition of milk from great apes throughout lactation.
M. Garcia1, M. Power2 and K. M. Moyes1, 1Department of Animal and Avian Sciences, University of Maryland, College Park, 2Smithsonian Conservation Biology Institute, Washington DC, DC

849 17 Milk fat globules as a source of mammary microRNA.
D. Lago-Novais1,2, K. Pawlowski1, J. A. A. Pires1, L. Mobuchon1,2, S. Bes1, P. Martin2 and C. Leroux1, 1UMR1213 Herbivores, INRA, VetAgroSup, Saint-Genes-Champanelle, France, 2Universidade Federal da Bahia, CEP 40170-110 Salvador-BA, Brazil, 1UMR1313 GABI, INRA, AgroParisTech, Universite Paris-Saclay, Jouy-en-Josas, France
851 19 Intravenous infusion of 5 hydroxy-L-tryptophan, a serotonin precursor, to transition dairy cows pre-calving affects GH-IGF axis gene expression in the mammary gland and liver post-calving.
S. R. Weaver1, L. L. Hernandez2, S. Tao2 and J. Laporta1, 1Department of Dairy Science, University of Wisconsin-Madison, 2University of Georgia, Tifton 1Department of Animal Sciences, University of Florida, Gainesville

852 20 Effect of cortisol on mammary epithelial cell, Bax and Bel-2 gene expression at lactation peak of goats.
G. F. Bomfim1, State University, Julo de Mesquita Filho, Jaboticabal, Sao Paulo, Brazil

853 21 Interactions among serotonin and circadian systems in the mammary gland.
A. Suárez-Trujillo1, J. S. Crodrían1, A. M. Shaanay4, S. J. Mabijeesh1, K. Plaut3 and T. M. Casey5, 1Department of Animal Science, Universidad de las Palmas de Gran Canaria, Arucas, Las Palmas, Spain, 2Purdue University, West Lafayette, IN, 3University of Georgia, Tifton 4Department of Animal Sciences, University of Florida, Gainesville

854 22 Effects of stress on IGF-1 plasma concentrations, and on expression of GH and IGF-1 receptors in mammary glands.
G. F. Bomfim1, Faculty of Animal Science and Food Engineering, FZEA/USP, Pirassununga / Sao Paulo, Brazil

855 23 Extracellular matrix molecule decorin signaling pathway gene expression in two bovine mammary cell lines.
H. L. M. Tucker*, C. L. M. Parsons and K. M. Daniels, Virginia Polytechnic Institute and State University, Blacksburg

856 24 Associations between quarter-level inflammation status across the dry period and health outcomes in the subsequent lactation.
S. A. Metzger1, L. L. Hernandez and P. L. Ruegg, Department of Dairy Science, University of Wisconsin-Madison

Y. Chen1, K. C. Ramsey, C. Y. Tsai, M. A. McGuire and P. Rezamand, University of Idaho, Moscow

741 26 Effect of intramammary infusion of chitosan hydrogels on bovine mammary gland involution after drying-off.
S. Lanctot*, L. L. Hernandez1, P. Fustier2, A. Biciakowski2 and P. Lacasse3, 1Department of Animal Science, McGill University, Montreal, QC, Canada, 2Food Research and Development Centre, St-Hyacinthe, QC, Canada, 3Agriculture and Agri-Food Canada, Sherbrooke Research and Development Centre, Sherbrooke, QC, Canada

Production, Management and the Environment: Reproduction

1264 27 WS Effects of early or conventional weaning on beef cow and calf performance in pasture and drylot environments.
G. W. Preedy1, J. R. Jaeger2, J. W. Waggoner1 and K. C. Olson1, 1Kansas State University, Manhattan, 2Western Kansas Agricultural Research Center, Kansas State University, Hays, 3Western Kansas Agricultural Research Center, Kansas State University, Garden City

1265 28 Association between management practices and reproductive performance of lactating dairy cows.
G. M. Schuenemann1*, J. M. Piñeiro* and P. Turiello2, 1Department of Veterinary Preventive Medicine, The Ohio State University, Columbus, 2Facultad de Agronomía y Veterinaria, UNRC, Río Cuarto, Córdoba, Argentina

1266 29 Association between management practices and dairy herd performance.
P. Turiello*1, J. M. Piñeiro1 and G. M. Schuenemann1, 1Facultad de Agronomía y Veterinaria, UNRC, Río Cuarto, Córdoba, Argentina, 2Department of Veterinary Preventive Medicine, The Ohio State University, Columbus

1267 30 Impacts of early lactation hyperketonemia on reproduction and 305-d milk production.
D. E. Santschi*, R. Lacroix1, R. K. Moore1, F. Miglior1 and D. M. Lefebvre1, 1Valacta, Saint-Anne-de-Bellevue, QC, Canada, 2Canadian Dairy Network, Guelph, ON, Canada

1268 31 Reproductive performance and culling dynamics of lactating dairy cows with detected pregnancy loss.
R. Wijma*, M. L. Stangaferro and J. O. Giordano, Department of Animal Science, Cornell University, Ithaca, NY

1269 32 Profitability of dairy cows receiving first service timed artificial insemination after the Double-Ovsynch protocol with a voluntary waiting period of 60 or 88 days.

Ciencias Veterinarias, UABC, Mexicali, Baja California, Mexico, ⁴University of California-Davis, El Centro

Effect of pelleted feed products and bambermycins on performance when fed to cattle grazing corn residue.
C. A. Welchons¹, R. G. Bondurant², F. H. Hilscher³, J. C. MacDonald and G. E. Erickson, University of Nebraska-Lincoln

Mineral-glycinate supplementation improves the systemic immune response to lipopolysaccharide challenge in
lactating dairy cows.
E. H. Wall¹, K. Tran¹, C. Wallinger¹, J. S. Hogan² and W. P. Weiss², ¹Pancosma, Geneva, Switzerland, ²Department of
Animal Sciences, OARDC, The Ohio State University, Wooster
2017 ADSA® Annual Meeting
June 25–28 • Pittsburgh, Pennsylvania
http://adsa.org/2017

Integrating Dairy Science Globally
Attend the most comprehensive dairy science meeting in the world, including invited symposia and special pre- and postconference events, featuring:
Teagasc-Moorepark/University College Cork Cheese Symposium
Large Dairy Herd Management Symposium

Experience Pittsburgh:
#1 Food City in the United States, Zagat, 2015
Named a Best Place to Visit Worldwide by Travel + Leisure, 2016
Named a Top 10 Best All-American Vacation by The Travel Channel, 2014

Upcoming ADSA Discover Conferences™ on Food Animal Agriculture

DC31: Big Data Dairy Management
November 1–4, 2016
Hilton Chicago/Oak Brook Hills Resort and Conference Center

DC32: Replacement Dairy Heifers: Weaning to Lactation
May 30–June 1, 2017
Eaglewood Resort and Spa, Itasca, Illinois

It’s about what can be. Stronger, healthier, more productive animals. A more efficient, consistent and profitable operation. It starts with KemTRACE® Chromium. It’s essential and helps dairy cows optimize energy use and efficiency. It’s essential to them. Essential to you. Essential to what can be.

kemin.com/chromium

LIFE, LIBERTY AND THE PURSUIT OF BETTER LYSINE

THE PURSUIT OF BETTER BIOAVAILABILITY. IT’S THE AMERICAN WAY.

Going down in history isn’t easy. Improving the production of your dairy cattle, however, is a little more manageable. USA Lysine is a cost effective source of rumen escape and intestinally released lysine for use in dairy cattle. USA Lysine optimizes production and provides a positive return on investment. Turns out bioavailability really does matter. In fact, the results are monumental.
